Budget Message

BY

GOVERNOR EDMUND G. BROWN

To the Senate and Assembly of the Legislature of California:

I present to you a $2,885,523,247 Budget for the 1962-63 fiscal year.

It is the fourth consecutive soundly balanced budget transmitted to you by this Administration.

It is the third consecutive budget requiring no new taxes.

It recognizes in size and scope that this is the year when California takes its destined place as the first State in the Union, as the leader in population, in government, in education, and in dedication to the principles of equal opportunity.

It contemplates no major new expenditure programs.

It includes increases in existing programs only where they are required by growth and quality, the two traditional hallmarks of life and government in California.

It is once more based on an allocations system which guarantees that the State government will live within its resources without impairment of that level of services which has made California the most attractive State in the Union—to its citizens, to new population and to new industry and commerce.

It adheres to strict standards of austerity and economy.

Expenditure increases were limited to those areas in which direct services to people were involved. New administrative workload and overhead costs were pared from departmental budgets, even when formulas and ratios justified the requests involved. The only major exceptions were in our revenue collecting agencies where added staff costs demonstrably would produce even more added revenue.

I renew my annual invitation to the Legislature to produce even more economies to reduce this budget wherever possible without stunting the State's growth or reducing the quality of its essential services.

I also renew my pledge to economize in the administration of this budget.

I believe the record of the past three years reveals that both the invitation and the pledge are sincere.

As evidence, I offer the fact that this Administration has averaged $27 million a year for the last three years in savings from legislative appropriations. In the ten years prior to my election, two preceding administrations averaged $15 million and $14 million respectively.

This last year we have also held thousands of authorized positions vacant for long periods of time in order to achieve greater productivity and slow the expansion of the work force.

Together, in these three years, you and I have restored California's fiscal responsibility, returned its bonds to an envied status in the national financial market place and turned a $68 million deficit into a $20 million dollar surplus.

At the same time, we have kept faith with the future of this great State.

This budget is founded not alone on principles of economy, but on a deep conviction that we must meet both the needs of the present and the challenges of the future.

The major cost increases in this massive budget testify to our adherence to the principle of investment—investment in the education of our youth, investment in the development of water and the other great natural resources, and investment in people and programs designed to make California a better place to live and work.

Consider education, the area in which the largest growth is taking place and in which the most significant new investments are being made.

Local school districts will have 212,000 more students next year, bringing the total to 3,775,000 students in the elementary and secondary grades through junior college. The districts will receive $58 million more in operating and debt service costs. The total proposed expenditure is $863 million.

The rapidly expanding State College system will have 8,500 more students in 1962-63, bringing the total enrollment to 86,440. The Trustees, the sixteen present campuses and the two new ones will receive $19 million more in State funds for operation and construction purposes. The total proposed expenditure is $149 million.

The great University of California destined to double in size in this decade, will admit 5,128 more students in 1962-63, increasing total enrollment to 57,203. The proposed State supported budget for the University calls for an increase of $16 million. The total proposed State contribution is $197 million.

Next in importance among the few major increases are those resulting from 1961 legislation to improve health care for the aged and meet other deficiencies in the State's programs for the aged, the blind and the disabled. The forecast last year was for a $70 million increase in these items in 1962-63, the first full year of operation. The estimate now is for $54 million.

Another major cost factor is the first general pay increase for State employees in two years, a 5 per cent raise to be retroactive to January 1 of this year on the urgent recommendation of the State Personnel Board, the official fact-finding agency on proper State salary levels. That will cost $39.8 million in 1962-63.

State employees themselves have helped to finance this raise with increased productivity. Their efforts in work improvement plans and their money-saving suggestions submitted through the Merit Award System have also helped give impetus to the formulation of new standards of efficiency and economy in many departments.

If you examine the Budget in another way, a different kind of increase factor stands out. Of the entire budget, $1,514,200,000, or some 55%, is in local assistance, an increase of $145.6 million in school, welfare, health and flood control programs administered at the local level where the burden would otherwise fall on the property taxpayer.

California continues to have the largest local assistance program of any State.

Fortunately, this Budget was prepared at a time of growing prosperity in California and the Nation.

The revenue estimates on which it is predicated reflect the same steadfast confidence and faith in California's future that I expressed in less auspicious circumstances just one year ago.

Our determination then to press forward with anti-recession measures in partnership with the Federal government has been more than justified by events.

In almost every category of economic activity, California is at record highs and is continuing its steady upward climb.

Having doubled personal income in California in the last decade, we should see another increase of 8.6 per cent in 1962. The Nation's income will go up only 6.8 per cent.

The employment situation, already better, will continue to improve. As the State's population increases another 600,000, requiring 245,000 new jobs for proper support, we actually anticipate the creation of 288,000 new jobs. That would permit a welcome and substantial reduction in unemployment.

This splendid economic climate in California is not an accident. Government and industry and labor have worked hard to create and sustain it.

Recent comprehensive national surveys show that California is the leading choice of business executives for new and expanded plant capacity, not only because of our large and growing market, but because of the high level of publicly financed education here, a level essential to the advanced technology of most modern industry.

This is especially true of the Nation's burgeoning new business giant, the interrelated electronics and space exploration industries. It is in such areas that California's unique investment in higher education is paying dividends not only in culture and civilization, but in new levels of personal income and prosperity.

This Budget, just as the other budgets I have transmitted to you, has other contributions to make to a thriving economy.

There is an accelerated thrust in the California water program as it surges toward peak construction activity at Oroville and at the San Luis Reservoir, and the Nation's finest highway program is progressing ahead of schedule.

We are also continuing our assault on the ills of our society with some marked successes.

Despite our huge growth in population, a splendid treatment program has reduced the number of mentally ill in our State institutions to the lowest point in eight years.

The prisoner conservation camp program has a record number of adult and juvenile offenders doing useful and self-rehabilitating work in our forest and wilderness areas. Without their firefighting efforts in the last two years, untold thousands of acres more of California forests would have gone up in smoke.

The comprehensive narcotics program begun last year is still gathering momentum, but has already swept hundreds of addicts off the streets and out of the contagious centers of infection. This is a costly program, but one worth every dollar we have to pay to rid ourselves of this sordid traffic in human misery and degradation.

These, and other comparable expenditures, are largely in the pattern pioneered in previous years of this Administration.

In one area, however, I am supporting a drastic new approach to a task at which the State has long been laboring with only partial success.

I feel that our recreation programs have not kept pace with our needs.

Despite the greatest fiscal and planning effort of any Administration in the State's history, we still have not met the challenge fully. Lands which should be held for public use have slipped away into private hands because of inadequate funds for acquisition. The costs of other available and desirable lands is moving swiftly out of the range of the limited public purse, and within ten years will be completely beyond our resources.

Moreover, much property now held is not adequately developed to meet immediate public demand for recreational facilities.

Therefore, with this Budget, I plan to submit a $100 million bond issue proposal to finance an immediate five-year program of acquisition of land for beach, park and other recreational purposes.

At the same time, I am earmarking the General Fund money heretofore used for acquisition to accelerate the pace of our development program from $4 million to $6 million a year.

I will ask that the Legislature place the new recreation bond issue on the General Election ballot.

If it is approved, as I confidently expect, then I would ask that the Legislature work out, at the 1963 session, a method and program of acquisition which would take into account not only the needs of the State as a whole, but those of individual communities, counties and regions.

The 1962-63 budget contemplates other bond financing but with only one other basic variation from the traditional pattern of use of long-term capital outlay bonds in California. That one is of critical importance, however.

To the category of institutions for which proper expenditures from State construction bonds can be made legally, now including the University of California, the State College system, mental hospitals, prisons, government buildings and other purely State institutions, I propose we add the State's junior colleges.

Because the Master Plan for Higher Education adopted in 1960 calls upon the junior colleges to assume a major new role in meeting added statewide responsibilities in the field of higher education, a beginning capital outlay appropriation of $5 million was authorized by the Legislature last year.

It was agreed by all concerned, however, that no permanently satisfactory solution to the shared responsibility of the State and junior college districts was achieved at that time.

The Coordinating Council for Higher Education is now hard at work on this matter, and I am confident that the 1963 session of the Legislature, acting after it has had the benefit of the Council's study and advice, will be able to write adequate legislation covering the very complex problem of financing new junior college facilities cooperatively.

It will be important that there be funds available immediately to implement that decision next year, and I am therefore asking that the new State construction bond issue be so written as to permit the Legislature to use construction bond funds for junior college facilities.

As of the beginning of the new fiscal year, only $52 million of the State construction bonds authorized in 1958 will be available to meet the capital outlay needs of $141 million dollars projected in this Budget.

I therefore ask this session of the Legislature to place a new bond issue of $270 million dollars on the June primary ballot to meet the remaining needs for 1962-63 and the probable needs in 1963-64.

Building at the new campuses of the University of California and the State College system will be at its highest level for the next few years as the five-year building plan submitted with this Budget discloses. In addition, as indicated above, junior college assistance, perhaps as much as $20 million, may be required in the 1963-64 budget.

Thus, more than 80 per cent of the total $270 million bond issue will be devoted to meeting the drastic needs of our institutions of higher education as they absorb the first full impact of the postwar population boom.

The increased use of bonds in these two areas is more than offset by decreased use in two other areas.

The declining volume of new bond sales required to sustain the self-liquidating California Veterans' Farm and Home loan program will permit drastic reduction in the renewed bond authority sought and the amount to be offered.

Instead of the $400 million issue required two years ago, I am recommending that the new issue be limited to $250 million for the next two years without making any changes or restrictions in the loan program. Ample funds on hand will permit the issue to wait to go on the General Election ballot in November.

The bond program for assistance in local school construction has done its job well in reducing drastically the number of double sessions in the State. There is now for the first time in years no backlog of requests waiting on a priority basis.

The slackening of demand makes it possible for me to recommend that we reduce the two-year school construction bond issue from the $300 million level authorized two years ago to $200 million for the next two years.

I would further recommend that this issue be placed on the primary ballot in June with the $270 million State construction bond issue.

The net effect of these four proposals will be to reduce rather than to increase the number of general obligation bond sales in California during the next fiscal year while shifting the focus of long-term financing to the areas of greatest need.

California has already sold more than $500 million in bonds this year, and, because of steadily increasing confidence in California's fiscal soundness, it has sold them at the lowest rates of interest since the State surpluses of the post-war years disappeared in the prior Administration.

Yet, next year, we will be able to make a $50 million sale of water bonds if necessary and still hold the total to little more than $400 million.

To any among you with lingering doubts as to California's fiscal health, I would cite two remarkable facts.

California has the lowest net bond debt among nine comparable industrial states and ranks 37th in the Nation.

California ranks 27th among the states in tax rate per $100 of personal income.

In the last ten years, the tax rate per $100 of personal income in all states has gone up an average of 20% and in such industrial states as New York and Pennsylvania has gone up 36% and 50% respectively. California's rate is up just 5 per cent.

The fiscal moral is clear. Together you and I have kept economic faith with the people of California and with their future.

I submit this Budget to you with the utmost respect, and with confidence that your ultimate judgment will not stem from narrow partisanship, but will reflect your traditionally broad outlook on what is required to keep California in the position which she is just achieving, that of first among equals in this great union.

SUMMARY

In summary, this Budget totals $2,885,000,000, including $141,000,000 of bond financing of essential State building needs. It represents an increase of almost $199 million, or 6.7 per cent over current year requirements. Total revenues will reach $2,653,000,000, a corresponding increase of 8 per cent.

Of particular importance are the General Fund obligations of $1,917,000,000 contained in this total, up 10 per cent over current requirements. General Fund income for this budget is anticipated at $1,883,000,000, a comparable increase of 10 per cent over the present year.

The most comprehensive brief explanation of the revenue and expenditure programs contained in this budget document can be found on pages A-11 through A-38.

A summary of the condition of the General Fund is presented below.

GENERAL FUND CONDITION
(in Millions of Dollars)

	1960-61	*1961-62*	*1962-63*
Beginning Surplus and Reserves, July 1	$131.8	$58.3	$38.7
INCOME:			
Revenue and Transfers	1,613.0	1,723.9	1,882.7
EXPENDITURES:			
State Operations	547.3	623.8	687.4
Capital Outlay	117.8	36.4	16.1
Capital Outlay—Bonds	(12.6)	(110.6)	(141.1)
Local Assistance	1,018.9	1,083.3	1,213.1
Total Expenditures	$1,684.0	$1,743.5	$1,916.6
Committed Reserves	20.3	19.3	2.7*
Ending Surplus, June 30	38.0	19.4	2.1

* This amount has been reserved by the 1961 Legislature from County School Service Fund surpluses for future educational needs.

In conformity with Section 34, Article IV of the Constitution, I submit to you the Budget for the State of California for the fiscal year commencing July 1, 1962, and ending June 30, 1963.

Respectfully submitted,

Edmund G. Brown

Governor

February 5, 1962

Letter of Transmittal

HONORABLE EDMUND G. BROWN
Governor of California
State Capitol
Sacramento, California

DEAR GOVERNOR BROWN:

Transmitted herewith are the summary tables and detailed statements for the Budget of the State of California for the Fiscal Year, July 1, 1962, to June 30, 1963, prepared in conformity with your policies and instructions.

The revenue estimates presented in this budget are based upon a continuation of California's economic growth and further rapid recovery from the recession of late 1960 and early 1961. The amounts shown were determined in December, after a careful appraisal of trends, and after consultation with both government and private corporation economists in the State and Nation.

The expenditures proposed in this budget were again arrived at through the allocations system of budgeting adopted and used with substantial success in 1960. The co-operation of department heads was again outstanding, and other State employees deserve special commendation for their role in increasing productivity and thus partially financing a salary increase.

The staff of the Department of Finance is always available to furnish other information and otherwise assist in the budget consideration.

Respectfully yours,

Hale Champion
Director of Finance

February 5, 1962

GENERAL FUND ACCUMULATED SURPLUS, JUNE 30, 1962 RECONCILIATION OF THE CHANGES FROM THE PREVIOUS BUDGET ESTIMATES

GENERAL FUND ACCUMULATED SURPLUS, June 30, 1962, as estimated in the 1961-62 Budget		$467,975
Changes to budget expenditure programs:		
Legislative changes to budget		—2,813,062
Special appropriations enacted		—2,115,639
Beach and Park Fund abolished, transferred expenditures to the General Fund		—4,252,377
Prior year Capital Outlay items reappropriated for 1962-63		—1,128,108
Prior year item for hospital construction carried forward to 1962-63		—416,787
Flood control projects charged to prior year		+4,595,014
Reserve for 1961-62 salary increases added		—6,500,000
Changes to budget revenue estimates:		
Legislation transferring revenues between funds		+5,173,500
Legislation reducing budget estimates		—1,840,000
Revised estimate of revenues		+13,311,042
Changes to transfers between funds:		
Abolished funds transferred to the General Fund		+1,355,347
Legislative action on budget		—952,044
Revised estimate of transfer from the Beach and Park Fund		+7,097,604
Revised estimate of transfer from Fair and Exposition Fund		+288,714
Changes to surplus:		
Increase budget estimate of prior year surplus		+5,469,188
Adjustment for unreported accrued expenditures		—2,526,726
Revised Estimate of General Fund Surplus, June 30, 1962, as reported in the Summary of Financial Legislation, dated July 15, 1961		$15,213,641
Effect of revised estimates as presented in the 1962-63 budget:		
Revenues for 1961-62:		
Previous estimate	$1,697,362,875	
Revised estimate	1,698,825,594	+$1,462,719
Expenditures for 1961-62:

(1) Revenue and Taxation Code.
(2) This tax is levied at the rate of $1.24 per 31-gallon barrel.
(3) State Board of Equalization.
(4) Distilled spirits in excess of proof strength are taxed at double this rate.
(5) Minimum tax $100 per year, not applicable to banks.
(6) Franchise Tax Board.
(7) This tax is levied at the rate of 1.5 mills per cigarette.
(8) Business and Professions Code.
(9) Ocean marine insurance is taxed at the rate of 5 percent of underwriting profit attributable to California business. A special rate also applies to annuities.
(10) For return to cities and counties.
(11) For payment of administrative costs, highway bond interest and redemption and apportionment to counties, cities and school districts.
(12) For administrative expense and apportionment to State, counties and cities for highways, airport and small craft harbors.
(13) For administrative expenses and State highways.
(14) For support of State Department of Motor Vehicles, California Highway Patrol, county roads and State highways.
(15) Average property tax rate in the State during preceding year, which for 1961-62 was $6.54 per $100 of assessed valuation.

Revenue Estimates

State revenue receipts during the 1962-63 fiscal year are estimated to total $2,652,472,328, under the forecasts presented in this budget. This represents an increase of $208,749,214 over the revised estimate for the current period and is $314,272,353 more than was received in the 12 months which ended on June 30, 1961.

Both the forecast of receipts during the budget year and the revised estimate of current collections are predicated upon continued economic recovery and growth which will carry business activity to new records during the current calendar year. A summary of the economic factors underlying the revenue projections is given in the material which follows. Briefly, the salient features are gross national production of $560 billion in 1962 and aggregate personal income of $445 billion. For California the essential factors are personal income totalling $49.5 billion, an increase of 8.6 percent over last year, and corporate profits of $5 billion, compared with $4.5 billion in 1961.

Receipts for the State General Fund during the budget year are expected to reach $1,868,891,000,* an increase of $170,065,000 over the anticipated total in the current year and $271,004,000 more than was received in 1960-61. This revenue comes from general tax levies, interest on investments held for the General Fund and other miscellaneous sources. Virtually all will contribute to the anticipated increase, but most of the advance will come from the three major General Fund taxes—on retail sales, on personal income and on corporate profits. These account for 78.7 percent of General Fund collections in the current year, but because they are so immediately sensitive to changes in economic conditions, they contribute 86.4 percent of the anticipated increase next year.

Special fund income during 1962-63 is estimated at $783,581,000, or approximately $38,684,000 more than in the current year. Motor vehicle taxes account for the bulk of this money and for most of the increase. Motor vehicle owners and operators will pay a total of $686,600,000 in taxes and fees during the coming year, compared to $652,580,000 in the current fiscal period. The latter amounts include money earmarked for interest and redemption payments on highway bonds which are actually handled through the General Fund. Special fund receipts are earmarked for specific purposes. Highway user tax collections, for example, by constitutional provision must be spent for support of activities related to highways or motor vehicles, while fish and game license fees must be used for purposes related to the sports which give rise to this money.

A summary of principal revenue items for each of the three years covered by this budget is given in the accompanying table and in Schedule 2.

Table 2

COMPARATIVE REVENUES

(In millions)

Taxes, fees, etc.	*1960-61 Actual*	*1961-62 Estimated*	*1962-63 Estimated*
General Fund:			
Sales and use	$711.7	$751.5	$832.5
Personal income	269.1	298.1	330.7
Bank and corporation	272.7	287.3	320.3
Inheritance and gift	76.8	73.2	78.1
Insurance	66.7	69.8	75.8
Cigarette	66.0	66.3	71.8
Alcoholic beverages *	53.9	59.2	61.5
Horse racing †	16.6	17.6	18.7
Other sources	64.3	75.8	79.5
Totals, General Fund	$1.597.9	$1,698.8	$1,868.9
Special Funds:			
Motor vehicle			
Fuels	350.8	363.0	381.7
Registration, weight, etc.	137.2	140.4	146.9
License (in lieu tax) **	125.6	134.1	142.4
Transportation	12.5	13.5	14.5
Horse racing	20.6	21.5	22.4
Liquor license	10.1	10.4	10.6
Other sources	83.5	62.0	65.1
Totals, Special Funds	$740.3	$744.9	$783.6
Grand Totals, Revenue	$2,338.2	$2,443.7	$2,652.5

* Excluding special fund share of liquor license fees.

† Excluding special fund share of horse racing tax and transfers from the Fair and Exposition Fund to the General Fund in the amount of $12.0 million during 1960-61 and $13.7 million in 1961-62 and in 1962-63.

** Excludes General Fund share of vehicle license fee.

The close relationship between business activity and State revenue receipts has been demonstrated on many occasions in the past and is apparent again in the current economic recovery. The retail sales tax, which returned a total of $711,702,000 in the recession year of 1960-61, is expected to produce $751,500,000 in the present fiscal year and $832,500,000 in the period of relatively high prosperity foreseen for 1962-63. It must be emphasized, however, that realization of these totals depend heavily upon increased consumer spending, supported by a rise in construction activity and considerable improvement in business expenditures for machinery and equipment.

The personal income tax is expected to return $330,700,000 in the budget year, a gain of 10.9 percent over the current year total and nearly one-fourth above actual receipts from this source in 1960-61. Improvement in corporate profits is counted upon to carry the bank and corporation tax from $272,718,000 last year to $287,300,000 currently and to $320,350,000 in the budget period.

Two other important features of these estimates include the return to a normal flow of cigarette tax collections and the sale of surplus real property which had been planned earlier but was delayed by legal proceedings. A change in procedures which allowed limited use of credit in purchasing cigarette tax stamps beginning in July of last year relieved dealers of the necessity of paying this levy in advance and resulted in greater equity, but from the revenue viewpoint it had the effect of reducing cigarette tax receipts approximately $2,800,000 in the 1961-62 fiscal year. The delay in property sale involved approximately $2,700,000 of surplus acreage at Fairview State Hospital in Orange County.

---

* This and subsequent dollar amounts have been rounded. Percentage changes have been computed from unrounded figures.

A resurgence in the new car market is one of the developments anticipated during 1962. Sales during the closing months of last year provide a strong indication that this will be an excellent year nationwide and will set a new record for car sales in California. In addition to being an important source of sales tax revenue, new car sales will reinforce the upward trend in motor vehicle fuel tax receipts and other levies related to vehicle ownership and operation. Highway user taxes as a group—fuel taxes; registration, weight and other fees; and the motor vehicle transportation tax are expected to reach $543,100,000, compared with $516,880,000 in 1961-62. Another vehicle tax—the in lieu fee which is levied in place of local taxes on this type of property—will produce an estimated $143,500,000, or $7,800,000 more than during this year.

Revised Estimates

Because the forecaster's lot is sometimes not a happy one, it is a pleasure to report that for the second year in a row the revenue estimates appear to be highly accurate. It could be pointed out, however, that with aggregate state revenue exceeding $2.6 billion, a 1 percent margin of difference between the forecast and realization—phenomenal accuracy by most standards—amounts to more than $26,000,000. This is not an inconsequential sum by any means.

The original estimate of revenue for the 1960-61 fiscal year, prepared late in 1959, was $2.345 billion. A year later this was revised to $2.343 billion, the figure shown in the budget presented last year. Final tabulations for that year show a total of $2.338 billion. In other words, the original forecast was too high by $7 million (one-third of one percent) and the revised estimate was excessive by $5 million (one-fifth of one percent).

There were, of course, differences in the individual amounts, but even by funds the record was good from the viewpoint of relative accuracy.

	(In millions)		
	Original	*Revised*	*Actual*
General Fund	$1,617.1	$1,607.0	$1,597.9
Special funds	728.2	736.2	740.3
Totals	$2,345.4	$2,343.2	$2,338.2

Receipts during the current year are still partly estimated and are subject to change. However, the revised figures are very close to the original forecasts adjusted for legislation enacted during the 1961 Session. Against an adjusted estimate of $2.426 billion the revised figure shows an increase of $18.1 million, or seven-tenths of 1 percent. Approximately one-third of the margin between the original and revised amounts is traceable to interest received on investments, a type of revenue inherently difficult to foretell because it depends not only on income but upon outgo as well, and upon prevailing interest rates. The revised estimate of receipts for the General Fund is $17.9 million ahead of the original estimates, taking the fiscal year as a whole, while it appears that the total of special fund revenue will be about $0.2 million above the estimate prepared a year ago.

* Adjusted for the effect of legislation enacted subsequent to presentation of the 1961-62 Budget.

A comparison of the estimates is shown in the above table.

ECONOMIC CONDITIONS

The foregoing estimates of revenue are predicated upon a continued improvement in economic affairs of the nation which will carry business activity to new records in 1962. Gross national production of goods and services is estimated to reach $560 billion, an increase of $40 billion over the total for 1961. Aggregate personal income is projected at $445 billion, or 6.8 percent above last year.

California is expected to share fully in this economic growth, reaching new high levels of population, employment and income. With a strong westward tide of migration and with a record number of births, California will become the most populous state in the nation during 1962. Recent studies place the state's population at 17,655,000 on July 1, 1963, a growth of 622,000 or 3.7 percent over the total predicted for July 1, 1962. Employment in calendar year 1962 is expected to average 6,400,000, compared with 6,112,000 in 1961. This increase should not only absorb the normal addition to California's labor force, but also reduce unemployment.

Personal income of California residents during the current year is forecast at $49.5 billion—$3.9 billion over the level reached in 1961. Expansion in consumer credit and a reduction in the volume of additions to liquid assets will provide the basis for an increase in personal expenditures even more marked than the rise in income. For this reason taxable sales during the year have been estimated at $26.8 billion, an increase of 11.6 percent over the 1961 record.

Detailed components of gross national product, together with estimates of personal income, corporate profits and other major economic factors for the nation and for California, are summarized in the following table.

Table 4

ECONOMIC DATA

(Dollar amounts in billions)

National data:	*1960 Actual*	*1961 Prelim.*	*1962 Estimated*	*Percent Change 1961-62*

* Disposable income of California residents represents personal income less federal and state personal income taxes. Other personal tax and nontax payments have not been deducted.

** Spendable resources of California residents represents disposable income adjusted for estimated change in short-term consumer credit and estimated change in liquid asset holdings of individuals—e.g., money, bank accounts, savings bonds, etc. Amounts are estimated by the State Department of Finance for use in connection with the analysis and projection of sales tax revenue.

† Index for California as computed by the California Department of Industrial Relations, Division of Labor Statistics and Research.

SOURCE: National data for 1960 from reports of the Office of Business Economics, U.S. Department of Commerce; preliminary figures for 1961 based on Department of Commerce reports for the first three quarters with fourth quarter estimated by the State Department of Finance; estimates of national data for 1962 estimates of California's population, personal income, personal taxes, disposable income, etc., are based upon studies by the Financial and Population Research Section, Budget Division, State Department of Finance.

Gross National Product

One of the principal elements in the anticipated pattern of economic developments during the current year is the increase in governmental expenditures—Federal, state and local. Purchases of goods and services by the Federal government are expected to reach $64 billion, an increase of $7.4 billion over 1961. More than two-thirds of this rise will be attributable to the strengthening of national defense and the remainder chiefly to such non-defense activities as farm price supports, aeronautics and space exploration. In early months of the year increasing Federal expenditures will stimulate economic activity, but this effect will diminish as the Federal budget draws nearer to a balance between income and outgo.

Expenditures of state and local governments will continue the strong upward trend that has characterized the postwar period. From a total of $51.3 billion in 1961, purchases of goods and services by these agencies are estimated to rise to $55 billion in the current year, making the total expenditures of the government sector $119 billion, or 10.3 percent above 1961.

Public and private surveys agree on the upward trend of construction activity this year, though the amount of change over 1961 is subject to some debate. Continued improvement in residential building appears probable, but a housing boom is unlikely until later in the current decade. In view of the increase in vacancies during recent months, the improvement in construction of rental units is likely to be restrained and limited to specialized purposes, such as housing for older persons and urban redevelopment. On this basis, expenditures for private residential construction have been estimated to increase by $1.5 billion (7.1%) to reach a $22.7 billion total this year.

Somewhat the same considerations will govern nonresidential construction. The existence of ample capacity to meet immediate demand in most areas will curb the upswing in business investment during the months immediately ahead, though the longer term outlook is good. Because many kinds of building will continue to expand with population growth and higher living standards, further improvement is likely. Private nonresidential construction totalling $21.8 billion is anticipated for this year, an increase of $1.1 billion (5.3%) over the level indicated for 1961.

Expenditures for producers' equipment should be considerably better than last year. The normal business recovery pattern will be supplemented by continued improvement in equipment items, larger depreciation reserves and a desire by management to reinvest a substantial part of corporate profits in plant and equipment. In addition, the growing volume of trade necessitates expansion of inventories throughout the framework of business activity and this will further contribute to aggregate demand. In total, private investment in housing, plant and equipment, and inventories has been estimated at $78 billion, or $8.5 billion more than last year.

With the recovery movement following its normal pattern, the current year should bring a substantial increase in spending by individuals. New car sales show promise of reaching near record levels, after a disappointing year. Although the real test will come later, initial acceptance of new car models seems to foretell strength in this ingredient for 1962 prosperity. New car sales—coupled with the increase in demand for other consumer durables, for nondurables and services—should carry personal expenditures to a total of $361 billion, an increase of $21.7 billion (6.4%) over last year.

Net exports, smallest of the major components of national production, are expected to be less in 1962 than in 1961. Increased imports plus greater competition abroad are likely to reduce the favorable trade balance and continue this country's difficulties with regard to international payments.

Personal Income

As demand for goods and services increases, employment opportunities will be provided for a larger proportion of the Nation's labor force. The national economic pattern used in preparing these revenue estimates contemplates total civilian employment of more than 69 million and aggregate payrolls of $300.9 billion, including military. At this level, wage and salary income will be $21.1 billion (7.5%) above the comparable total of last year.

Allowing for improvement in business and professional incomes, larger dividend and interest receipts and increasing pensions, aggregate personal income in 1962 has been estimated at $445 billion, up $28.3 billion from the previous period. After payment of personal taxes, disposable income will be $388.3 billion, which will finance the personal consumption expenditure estimate of $361 billion and leave apparent savings of $27.3 billion—substantially the same savings rate as last year.

A continuation of recent price trends is expected, with consumer prices rising approximately 1.5 percent during the year. Wholesale quotations are likely to follow a similar pattern, though the relative change may be somewhat less, due to weakness in the price structure of certain raw materials.

Realization of these economic developments will depend to a great extent on four major conditions:

1. No active international military conflict involving the United States.
2. Continued strengthening of this Nation's military forces.
3. No inflationary price rise.
4. No extended labor-management disputes.

California Situation

Forces influencing the Nation's economy will also affect California, and in addition this State will continue to benefit from the stimulus of further substantial population growth. The advantages inherent in climate, skilled labor force and modern plant facilities are apparent in California's record of corporation growth, industrial employment and defense contract awards. Further indication of the dynamic western market is provided in the fact that California during 1960 accounted for 16.4 percent of all authorized new industrial, commercial and office construction in the entire United States and in the first nine months* of last year expanded this ratio to 19.7 percent—nearly one-fifth of all such construction in the Nation.

California's population continues to increase at increments of approximately 600,000 annually. Nearly six-tenths of the current growth arises from net migration, four-tenths from natural increase—the excess of births over deaths.

Population growth has been accompanied by far-reaching changes in the economic pattern of the State. As the accompanying table shows, there has been a shift toward manufacturing and service industries, including the services provided by governmental agencies. In this respect, the State has become more like the Nation as a whole and this process will continue, with a resulting growth in business investment and public expenditures for the facilities essential to the needs of a growing population and an industrial economy.

While gross receipts of California farm operators will be slightly higher this year, net income is likely to remain substantially unchanged. An increase can be expected in receipts from sales of livestock and livestock products. Most crops will be stable to slightly lower, supplemented in some instances by larger support payments from the Federal Government. However, production expenses are likely to be higher than in 1961, and this will make the difference between larger gross earnings and stable net profits.

Table 5

EMPLOYMENT PATTERNS IN CALIFORNIA

Industry Division	*Number Employed (000)* 1951	*Number Employed (000)* 1961	*Percent of Total Employment* 1951	*Percent of Total Employment* 1961	*Employed Per 1,000 Population* 1951	*Employed Per 1,000 Population* 1961

Services	685	1,050	15.1	17.2	61.7	63.8
Government	600	906	13.2	14.8	54.0	55.1
Totals	4,536	6,112	100.0	100.0	408.4	371.7

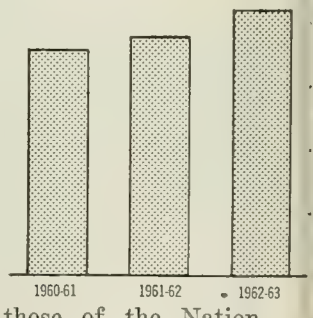
With aggregate personal income of $49.5 billion and the prospect of considerable expansion in consumer credit, retail sales should exceed any earlier year by a wide margin. Transactions subject to the State sales tax are estimated at $26.8 billion, compared with $24.0 billion last year. Principal components of these totals are given in the sales tax material below.

Corporate profits, which fluctuate less in California than in the Nation, should reflect both the cyclical recovery and the continued westward movement of business. Aggregate corporate earnings of $5.0 billion are forecast for 1962, compared with $4.5 billion from California operations last year and $4.2 billion in 1960.

GENERAL FUND REVENUE

More than two-thirds of the aggregate State revenue will accrue to the General Fund. This includes receipts from such general levies as those on sales of tangible personal property, personal income, corporate profits, and insurance premiums. For the most part, these taxes are geared directly to business conditions in the State and Nation. The aggregate volume of trade, personal income, corporate profits and other similar economic considerations determine the bases. Hence, the estimate of revenue from each source flows directly from the economic assumptions explained above. The influence of these economic factors upon the several taxes and the methods used in preparing the budget revenue estimates are outlined below.

Sales Tax—$832,500,000



The low point of the last recession occurred during the first quarter of 1961. Taxable sales for the quarter were 1.6 percent below the same period a year earlier. In the second quarter, sales picked up slightly but noticeably lagged income growth. In this respect, however, California developments were not unlike those of the Nation, giving rise to some apprehension regarding the vigor of the economic turnabout. July-September sales scored a four percent gain and further improvement in the fourth quarter made sales in this period the best on record.

---

* Latest available data.

Most of last year's weakness occurred in household appliances, furniture, expenditures for plant and equipment and automobiles—particularly the latter. New automobile registrations were off 13.5 percent in the first quarter compared to 1960, down 7.2 percent in the next three months and totalled 5 percent lower for the year. Household durables were down 9.5 percent in the first quarter, 3.6 percent in the second quarter and completed the year with a total 1.2 percent lower than 1960. Expenditures for plant and equipment declined seasonally in the second quarter and showed little vigor for the rest of the year.

Taxable sales for 1962 and 1963 are expected to show substantial improvement in line with the anticipated economic growth. Only taxable sales in the first quarter of 1963 and those of vendors reporting monthly during the second quarter will be reflected in the revenue for 1962-63. Hence, although this discussion shows projections for 1963, they will have only minor effect on the budget forecast.

As in former years, the estimates have been prepared by two methods. One is based upon detailed analyses of trends in per capita sales of more than 40 types of business: the other involves correlation analysis. Particular attention has been given to changes in unit volume during periods of expanding business activity and the foregoing assumptions regarding automobile sales, residential building, and the outlays by business for plant and equipment. Appropriate allowances were also made for the State's anticipated population increase, and a 1.5 percent rise in price levels.

Taxable sales by new motor vehicle dealers in 1962 are expected to reach $3.11 billion, 17.4 percent above the previous year, in contrast with the decline between 1960 and 1961. Sales for 1963, however, are expected to decline moderately, repeating the pattern of past years where high volume has been followed by contraction.

Taxable transactions by manufacturers and wholesalers should continue to improve. Sales for 1962 have been estimated at $5.19 billion, 10.6 percent above 1961, in contrast with the 2 percent gain recorded last year. Sales for 1963 are expected to show a further gain. These estimates, as well as those for nonresidential construction, allow for a continuing movement of industry to the Pacific Coast.

Sales of building materials and taxable transactions of contractors in 1962 have been projected at $2.86 billion, 7.1 percent above last year and slightly higher than the anticipated increase in new construction nationally. Next year has been increased 10 percent, anticipating another good year of industrial expansion and residential building.

The second estimate was prepared using the correlations developed between spendable income of California residents and taxable sales. Minor adjustments were made to reconcile the figures obtained from these two approaches. The adjusted estimates, with comparisons for the preceding year, are shown in Table 5.

Taxable transactions were allocated by quarters on the basis of seasonal patterns with appropriate allowances for changes in the dates of Easter and other factors affecting fiscal year collections. On the recommendation of Governor Brown, the Legislature exempted prescription drugs from the sales tax, effective on January 1, 1962, and adjustments were made for the effect of this legislation.

After audit adjustments, the sales tax is estimated to yield $751,500,000 for 1961-62 and $832,500,000 for 1962-63, contrasted with actual receipts of $711,702,000 for 1960-61.

Table 6

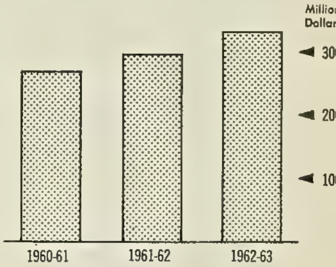
TAXABLE TRANSACTIONS IN CALIFORNIA

(In millions)

	1961	*1962*	*Percent change over 1961*	*1963*	*Percent change over 1962*
Consumer nondurables	$10,313	$11,100	7.6	$11,700	5.4
Consumer durables, excluding autos	1,904	2,160	13.4	2,275	5.3
Motor vehicle sales	3,388	3,945	16.4	3,850	—2.4
Motor vehicle supplies	1,043	1,095	5.0	1,150	5.0
Building materials	2,671	2,860	7.1	3,145	10.0
Producers' equipment and supplies	4,692	5,190	10.6	5,880	13.3
Unallocated	--	450	--	500	11.1
Totals	$24,011	$26,800	11.6	$28,500	6.3

Personal Income Tax—$330,700,000

Income tax collections are based primarily upon total personal income of Californians during the preceding year. As indicated in the foregoing analysis of the economic outlook, increases are expected in personal income for both the State and the Nation.



During 1960, California personal income aggregated $43,448,000,000, or 10.80 percent of the national total. Last year this rose to $45.6 billion—10.94 percent of the Nation, and in the current calendar year, California income is expected to amount to $49.5 billion, or 11.12 percent of the $445 billion estimated for the United States. Personal income of Californians during 1960, as reported by the United States Department of Commerce, and estimates for 1961 and 1962, as prepared by the State Department of Finance, are shown in the following table.

Table 7

CALIFORNIA PERSONAL INCOME

(In millions)

Source	*1960*	*1961*	*1962*
Wages and salaries	$29,314	$30,843	$33,730
Proprietors' income	5,214	5,359	5,765
Property income	5,847	5,982	6,475
Other income	4,199	4,606	4,865
Less: Social insurance contributions	1,125	1,190	1,335
Totals	$43,448	$45,600	$49,500

Wages and salaries, proprietors' income and property income (interest, dividends and rents) account for 90 percent of current self-assessed tax. The remainder is attributable to items not included in the personal income concept, such as capital gains, annuities and alimony payments.

Certain types of income tend to concentrate in different income brackets, and thus are subject to different tax rates. Therefore, the type of income, as well as the amount received, is important in preparing estimates of receipts from this tax. In general, wage and salary income tends to concentrate in the lower and middle brackets, and proprietors' and property income in the middle and the higher brackets. Analysis of the relationships of tax receipts to income sources over a period of years permits computation of correlation equations between the various income sources and the resulting tax payments. The following table compares the relative importance of the components of personal income and the tax attributable to these sources in 1960.

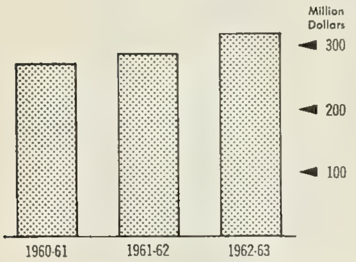
	Personal income (Percent)	*Tax assessments (Percent)*
Wages and salaries	67.5	57.1
Proprietors' income	12.0	17.5
Property income:	13.4	15.6
Dividends	3.3	9.6
Interest	6.6	3.5
Rents	3.5	2.5
Other income	7.1	2.4
Capital gains	–	7.4
Totals	100.0	100.0

That part of the tax which is not based on personal income as defined by the Department of Commerce must be estimated by other means. As more than half the capital gains is derived from stock sales, a relationship between the value of stock market activity and tax receipts from capital gains has been established. The estimate of the miscellaneous group—alimony, annuity income, etc.—is based upon past trends.

During the last session of the Legislature, the personal income tax law was brought into closer conformity with the Federal levy by allowing deductions for retirement credit, child care expenses and an interest equivalent of certain carrying charges and by liberalizing the allowance for medical expenditures. Because of these changes the revenue estimates for 1961-62 and 1962-63 were reduced by $2,100,000 and $2,650,000, respectively.

After adding collections under the audit program of the Franchise Tax Board and converting calendar year data to fiscal years, revenue from the California income tax during 1962-63 is expected to amount to $330,700,000, compared to $298,100,000 anticipated this year and actual receipts of $269,103,000 in 1960-61.

Bank and Corporation Tax—$320,350,000



Corporate profits during 1961 and 1962 will provide the basis of bank and corporation tax receipts during 1962 and 1963. The earnings estimate for 1961 was obtained from responses to a carefully selected sample of 600 corporations doing business in 61 different industry classifications in this State. According to the information received from this survey, corporate income attributable to California operations totaled $4.47 billion last year, 6.5 percent above the $4.20 billion earned during 1960. This contrasts with the 2 percent expansion indicated for the Nation as a whole. A summary of earnings by major industry in this State for 1960 and 1961 is shown in Table 7.

Nationally, 1962 corporate profits have been projected at $52 billion, 13 percent above last year. California earnings are expected to increase to $5.02 billion, paralleling the national improvement rate. Financial corporations in California are subject to a special tax rate; hence, the earnings of this group must be estimated separately. In this connection, it was assumed that the recently announced higher interest rate on savings accounts would be offset in part, by higher interest rates on bank loans, improved operating ratios and other adjustments.

Table 8

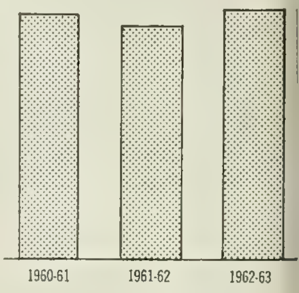
CORPORATE PROFITS BY MAJOR INDUSTRY, CALIFORNIA, 1960 AND 1961

(In thousands)

	1960	*1961*	*Percent change*
Agriculture	$42,000	$50,100	+19.3
Mining and oil production	208,630	204,500	—2.0
Construction	118,100	118,950	+0.7
Manufacturing	1,491,325	1,580,800	+6.0
Trade	592,806	590,600	—0.4
Services	210,143	223,900	+6.5
Financials subject to bank tax	512,181	590,000	+15.2
Real estate, insurance, etc.	302,147	351,500	+16.3
Public utilities	697,672	738,400	+5.8
Other	25,399	25,850	+1.8
Totals	$4,200,403	$4,474,600	+6.5

Including collections resulting from the audit program, revenue from the bank and corporation tax and the supplemental corporation income tax in the budget year is estimated to total $320,350,000, compared with $287,300,000 during 1961-62 and actual receipts of $272,718,000 in 1960-61.

Inheritance and Gift Taxes—$78,100,000

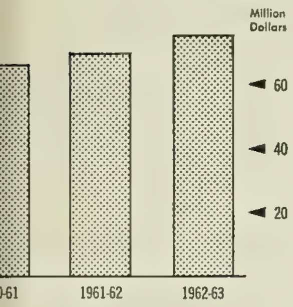


Inheritance and gift tax revenues depend primarily on the number and size of bequests and the relationship between the decedent or donor and the beneficiary. In general, the rates vary directly with the size of the inheritance or gift and with the remoteness of the relationship. Exemptions are scaled down as the relationship recedes.

The greater population and wealth in California has largely contributed to the growth in these revenues, but the increase since 1959 can be attributed in major part to the tax program which raised receipts approximately 30 percent. The inheritance tax estimate is based on past relationships between tax receipts and population and personal income, with adjustments for the 1959 tax changes. Revenue for 1962-63 is estimated at $73,500,000, compared with $69,000,000 in the current year. The 1960-61 receipts of $73,093,000 were unusually high due to the carryover of approximately $8,000,000 from 1959-60.

Gift tax receipts appear to be more closely related to personal income in California than to population, and the estimate is based on a projection relating the tax to personal income. The tax for 1962-63 is estimated at $4,600,000, against $4,250,000 currently and actual receipts of $3,710,000 in 1960-61. The current year and budget estimates include an allowance of $250,000 attributable to the concentrated effort by the State Controller to reduce the backlog of returns awaiting audit.

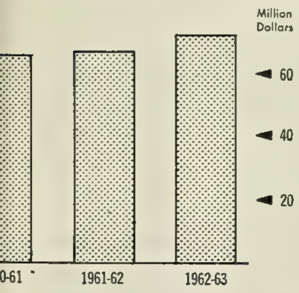
Insurance Tax—$75,800,000



The estimate of insurance gross premiums subject to State tax in 1961-62 was based upon information obtained from a sample of 74 major insurers in California handling approximately 60 percent of the total premiums. This sample, weighted for each line of insurance, indicated that last last year's taxable premiums totaled $3.31 billion, of which $3.20 billion is subject to the 2.35 percent general tax rate and $109 million to the special 1.95 percent rate on annuities. After adjustments to reflect other business done by title insurers and dividends paid or credited to policyholders, the 1961-62 tax has been estimated at $69,750,000. This includes $800,000 arising by reason of retaliatory rates on out-of-State insurers and a deduction of $4,250,000 for the provision allowing insurance companies to offset local property taxes paid on their principal office in California against the State tax.

The tax for the following year was estimated by relating life insurance, annuities, and disability insurance to population, motor vehicle insurance to registrations, and increasing other lines according to recent trends. This indicates a total of $3.6 billion in insurance premiums in California for the current calendar year, an increase of 8.7 percent from 1961 and 13.2 percent greater than in 1960. Adjustments for the principal office deduction, dividends to policyholders and other considerations yields an estimate of $75,800,000 for the budget year.

Cigarette Tax—$71,750,000

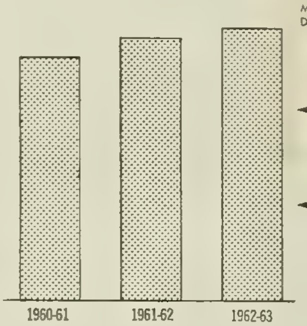


The cigarette tax is estimated in part through the use of a correlation involving cigarette consumption, income, population and the degree of urbanization and in part through an analysis of trends in California consumption since July 1, 1959, the date on which the tax went into effect.

Revenue in the current year will be reduced by approximately one-half month's receipts due to legislation allowing distributors to purchase tax stamps and meter impressions on credit. While not all dealers have taken advantage of this privilege, it is assumed that most will do so before the end of the current fiscal year. Because the change in procedure will affect only this year normal collections will be resumed in 1962-63.

Net revenue from the cigarette tax for the 1962-63 fiscal year is estimated at $71,750,000, compared with an estimated $66,300,000 in the current year and $66,024,000 in 1960-61.

Alcoholic Beverage—$57,325,000



The excise taxes on distilled spirits and beer and wine are expected to total $57,325,000 during the coming fiscal period. Of this total, $46,600,000, or 81 percent, is attributable to the $1.50 per gallon tax on distilled spirits; $9,840,000 to the 4 cent per gallon tax on beer and the remaining $885,000 to wine.

The estimate of these taxes is made on the basis of an analysis of per capita consumption trends related to income and population over the last decade. The table below gives estimated adult per capita consumption for the calendar years 1960 through 1963.

(In gallons)

	1960	*1961*	*1962*	*1963*
Distilled spirits	2.828	2.906	2.965	3.015
Beer	23.33	23.40	23.53	23.67
Sweet wine	1.75	1.80	1.78	1.74
Dry wine	1.57	1.66	1.72	1.78
Sparkling wine	.94	.98	1.04	1.15

The recent recession resulted in a smaller than normal growth in distilled spirits revenue, but with restoration of a high level of economic activity, sales are expected to increase. Rising populations will carry total consumption to 30,550,000 gallons this year and 32,100,000 gallons in 1963, compared with 29,050,000 gallons during calendar year 1961. These increases will raise distilled spirits revenue to $44,750,000 and $46,600,000 in 1961-62 and 1962-63, respectively, against actual receipts of $41,274,000 during 1960-61.

Following a year of decline, beer consumption began to pick up again last summer and further moderate increases have been assumed for 1962 and 1963. Taxable sales this year are estimated at 234 million gallons, up 7.4 million from 1961. After converting calendar data to fiscal years and applying the 4 cents per gallon tax rate, receipts from the excise tax on beer are expected to yield $9,509,000 during 1961-62 and $9,840,000 in 1962-63.

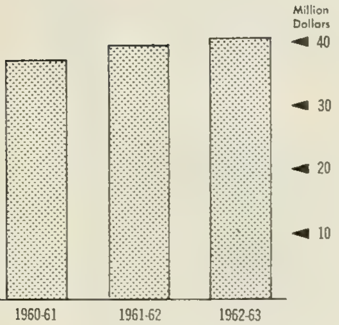
Consumption of sweet wine per adult is likely to drop slightly after a rise in 1961. However, population growth will cause a very slight increase in total consumption—18,300,000 gallons in 1962 and 18,500,000 in 1963. Per capita use of dry wine should continue the upward trend of the last few years, bringing total consumption to 17,700,000 gallons in 1962 and 18,900,000 gallons in 1963, as compared with with an estimated 16,586,000 gallons in 1961. Sparkling wine has shown rapid increases in the past few years. Total gallonage is expected to reach 1,070,000 in 1962 and 1,220,000 in 1963 compared with an estimated 984,000 in 1961. Application of the appropriate rates to the different types of wine, results in revenue estimates of $841,000 in the current year and $885,000 in the budget year.

The table below shows revenue from each source by fiscal years compared with the actual year for 1960-61.

	(In thousands)		
	1960-61 Actual	*1961-62 Estimated*	*1962-63 Estimated*
Distilled spirits	$41,274	$44,750	$46,600
Beer	9.704 *	9,509	9,840
Sweet wine		364	368
Dry wine		170	182
Sparkling wine		307	335
Totals	$50.978	$55.100	$57,325

* Cannot be separated due to audit and other adjustments.

Horse Racing—General Fund $18,700,000 Special Funds $22,380,000



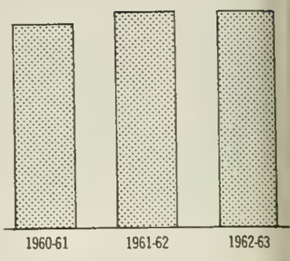
Horse racing license fees vary among the several tracks in proportion to the amount of wagering. The state fee progresses from 5 percent of the first $10 million in the parimutuel pool at any meet to 8 percent of amounts over $125 million. The volume of betting varies considerably among the different tracks, but in general it appears to fluctuate with personal income. For this reason, the estimate of horse racing revenue is based upon correlations between income and betting at each track over a period of years.

The rotation of the spring, early fall and late fall meets between the Bay Area tracks also affects the estimates of total wagering, and starting in 1961 four of the tracks conducting running races added an extra race each day with a consequent increase in total betting. Allowances were made for these factors in the projections.

The aggregate handle for all tracks for 1961-62 has been estimated at $516,475,000 and for 1962-63 at $539,500,000. These compare with the total of $496,150,000 wagered in 1960-61. The table below shows the amount of revenue from horse racing and the disposition of receipts between the various funds. Also shown are the actual and estimated transfers from the Fair and Exposition Fund to the General Fund. However, in this statement and in Schedule 2 revenues are shown as initially deposited: the transfers have been reflected on Schedules 1 and 4.

	(In thousands)		
	1960-61 Actual	*1961-62 Estimated*	*1962-63 Estimated*
Tax on parimutuel pools	$31.873	$33.356	$35,117
Breakage	5,165	5,340	5,655
Unclaimed wagering tickets	173	309	254
Licenses, fines, and penalties	49	50	54
Totals	$37,260	$39,055	$41,080
General Fund	16,626	17,600	18,700
Fair and Exposition Fund	19,884	20,705	21,630
Wildlife restoration fund	750	750	750
Transfers to the General Fund	*11,987*	*13,700*	*13,697*

Private Car Tax—$1,832,000



Under this levy, railroad cars owned by companies other than railroads are taxed by the State rather than by the various local governments. Assessed valuations are determined by the State Board of Equalization and the average statewide property tax rate during the preceding fiscal year is applied against the assessment roll.

Both the assessed value and the tax rate increased in the current fiscal year. As a result, there was a slight rise in the total tax assessment for 1961-62. Allowing for a moderate further increase in tax rates, receipts from this source during the budget year have been projected at $1,832,000, compared with $1,753,000 currently and $1,668,000 in 1960-61.

Other Taxes and Fees—$5,295,000

In addition to the specific taxes summarized above, shares of two other levies accrue to the State General Fund—liquor license fees in the estimated amount of $4,160,000 during the coming year and motor vehicle license fees of $1,135,000. Revenue arising from liquor licenses represents application fees, intercounty transfer fees, service charges by the Department of Alcoholic Beverage Control and ten percent of all other fees. Receipts from the motor vehicle license tax constitute amounts required to meet service charges on highway bonds. Revenue from each of these sources is discussed further below.

Non-tax Receipts—$76,539,000

A substantial volume of revenue accrues to the General Fund from sources other than tax levies. These include bonus payments and royalties on the production of oil and gas from State-owned lands, interest on investments and bank accounts, charges for treatment and services at State hospitals, if the patient has private means or is a responsibility of counties, a similar charge to counties for support of Youth Authority wards, and such other items as sale of property and penalty payments for traffic violations, which are earmarked for driver education in high schools.

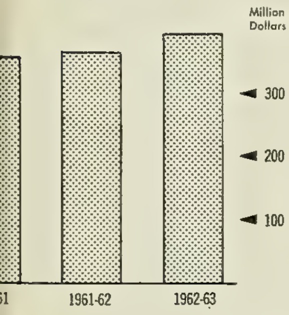
In sum, miscellaneous general receipts will amount to $76,539,000 in the budget year, an increase of $4,041,000 over the corresponding figure for the current period. Principal amounts comprising the total are shown in Schedule 2. It is of interest, however, that they fall into four categories: Pay patients and county board charges at hospitals and correctional schools—$20.3 million; interest income—$15.9 million; oil and gas royalties—$16.5 million; and all other, chiefly traffic penalties, sale of property and charges for certain services in connection with business incorporations and issuance of stock—$23.8 million. The increase over receipts in the 1961-62 fiscal year is due largely to proposed sale of surplus real property and to the adjustment in traffic penalties effected by legislation last year to provide more adequate support of the driver training program.

SPECIAL FUND REVENUE

Provisions of the State Constitution, codes and statutes restrict the use of certain revenue to specified purposes, and under California's financial procedure these receipts are separately accounted in various special funds. In general, they comprise three categories of income: (1) receipts from broad tax levies which are dedicated to specific functions; (2) charges for special services to specific groups; and (3) certain rentals, royalties and other receipts earmarked for particular purposes. Motor vehicle taxes and fees illustrate the first of these classes. License fees for the regulation of business and professions are typical of the second, while oil and gas royalty revenue dedicated in part to water resource development is an example of the third group. Interest earned by the investment of special fund money accrues to the fund for which the investments are held.

Motor vehicle taxes and fees account for 87 percent of all special fund revenue. Principal sources of this income are the levies upon motor vehicle fuel, registration and weight fees, transportation tax and the vehicle license fee which is levied in lieu of local taxes on this type of personal property. During the 1962-63 fiscal year $686,600,000 will be derived from motor vehicle taxes and approximately 40 percent of this revenue will be returned to local governments. Regulatory fees and charges for special services to industry, business and the professions constitute the second largest source of special fund revenue. Coupled with hunting and fishing licenses, receipts from these sources will amount to $46,002,000 in the coming fiscal year.

Motor Vehicle Fuel Taxes—$381,700,000



Among the more significant factors affecting consumption of motor vehicle fuel are number of vehicles in operation, number of miles driven per vehicle, and size of the vehicle. The increasing importance of compact cars, along with the rising penetration of compact trucks, has tended to depress fuel consumption per vehicle. However, the expected large sales of motor vehicles this year should significantly increase the number of vehicles on the highways, and the improvement in economic conditions should induce an increase in motor vehicle use for both business and pleasure.

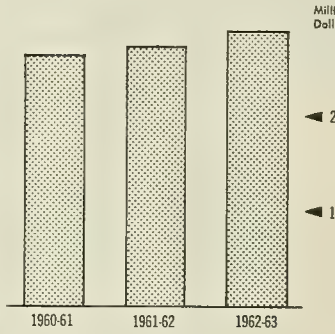
The decline in gasoline consumption per vehicle is expected to continue, but at a decreasing rate, dropping to 627.0 gallons in 1962-63 from 628.5 in 1961-62 and 632.5 in 1960-61. With total registrations expected to reach 9,505,000, net taxable fuel consumption in the budget year should approach 6 billion gallons. The result of this rise in total gallonage subject to the 6 cent tax is an expected $357,600,000 in the budget year, compared with $340,100,000 in 1961-62 and actual receipts of $329,426,000 in 1960-61.

The use of piggyback hauling of trucks has curtailed the rate of growth in the use of diesel fuel, but the improvement in economic conditions should result in increased total consumption. As a result, total receipts from the 7 cent diesel tax and 6 cent tax on liquefied petroleum gas are expected to reach $22,900,000 in 1961-62 and $24,100,000 in the budget year, compared with $21,375,000 in 1960-61.

A comparison of the fuel tax estimates for the period covered by this document is shown below.

	(In millions)		
	1960-61 Actual	*1961-62 Estimated*	*1962-63 Estimated*
Motor vehicle (gasoline) fuel	$329.4	$340.1	$357.6
Use (diesel & lpg) fuel	21.4	22.9	24.1
Total	$350.8	$363.0	$381.7

Motor Vehicle Fees—$289,265,000



The bulk of revenue from this source is obtained from registration, weight and vehicle license fees. As stated earlier, new car sales during 1962 are expected to total 720,000, and there will be an estimated 225,000 vehicles brought into the State by people moving to California. Allowing for disappearance due to scrappage, exports and other reasons, total automobile registration should approximate 7,367,000 in 1962. The decline in average weight fee per vehicle is expected to continue, and in addition, there will be a drop in the late registration penalties as a result of legislation lowering the penalty if these fees are paid within the first 30 days after becoming delinquent. The expected fee-paid registrations of 9,380,000 autos, trucks, trailers, and motorcycles should yield an average fee of $13.95 in 1962. The fluctuation in driver license receipts is due to the pattern created by the issuance of two, three, and five-year licenses as provided in legislation enacted in 1959.

Total registration and weight fees, drivers' licenses and other charges amounted to $137,187,000 in 1960-61, and are expected to total $140,380,000 in 1961-62 and $146,900,000 in the budget year.

The number of fee-paid vehicles, original market value and age distribution are the determining factors underlying the vehicle license fee revenue estimate. As noted above, registrations are expected to increase significantly during 1962. The average value of new cars has apparently stabilized after a decline in 1960, and is expected to remain at about the current level during 1962-63. Average automobile renewal fees will show a slight increase. Taken together, these factors indicate a substantial gain in vehicle license fees on passenger cars.

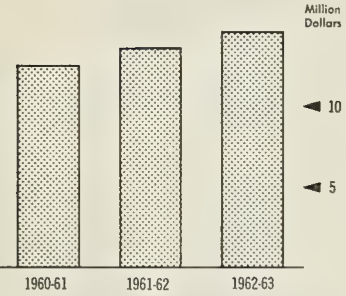
Vehicle license fees attributable to trucks, trailers and motorcycles, which account for about 18% of the total, are also expected to show substantial increases.

Comparative revenue, by year, is shown below.

	(In millions)		
	1960-61 Actual	*1961-62 Estimated*	*1962-63 Estimated*
Vehicle license fee	$127.7 *	$135.7 *	$143.5 *
Registration and weight fees	124.1	129.8	135.2
Driver's license fee	9.5	7.0	7.8
Other	3.6	3.6	3.9
Totals	$264.8	$276.1	$290.4

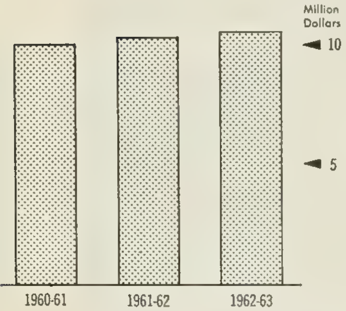
* Includes General Fund share.

Transportation Tax—$14,500,000



This is a tax of 1.5% on the gross receipts from the operation of motor vehicles used in the transportation of persons or property for hire and operating outside of city limits. This form of business, also, is dependent on economic conditions, and should increase substantially due to the expansion of the economy in the current period. However, the contraction of the tax base due to certain bus lines coming under public ownership and the rise of competing forms of transportation will have a depressing effect upon the growth in revenue from this source. As a result of these considerations, this tax is estimated at $14,500,000 for the budget year versus $13,500,000 for the current fiscal year and actual receipts of $12,475,000 in 1960-61.

Alcoholic Beverage License Fees—$10,640,000



Revenue from liquor license fees accrues to both the Alcoholic Beverage Control Fund and the General Fund. Ninety percent of the annual fees account for the bulk of the special fund revenue. The remaining 10 percent plus receipts from application fees for new licenses, service charges, and the new $3,000 intercounty transfer account for most of the General Fund portion.

The General Fund share of liquor license fees was significantly affected by 1961 legislation. Under the prior law, a large number of licenses would have been issued following the 1960 census. In order to prevent overcrowding in certain counties, the ratio of liquor licenses to population was reduced and provision was made for intercounty transfers. The increase in the number of licenses in any one county was limited to a maximum of 25 per year. Furthermore, the fee for general off-sale licenses was raised from $3,000 to $6,000, equalling the fee for on-sale licenses. As a result, General Fund revenue is estimated at $4,100,000 for the current year and $4,160,000 for the budget year, compared with actual receipts of $2,926,000 in 1960-61.

A moderate increase in special fund revenue is estimated for the current and budget years as a result of the new licenses issued. Revenue during the 1962-63 year has been estimated at $10,640,000, compared with $10,400,000 in 1961-62 and $10,118,000 during 1960-61.

Total receipts from levies on liquor licenses are shown in the table below.

	(In thousands)		
	1960-61 Actual	*1961-62 Estimated*	*1962-63 Estimated*
For General Fund	$2,926	$4,100	$4,160
For cities and counties	10,118	10,400	10,640
Totals	$13,044	$14,500	$14,800

Other Special Fund Revenue—$65,096,000

In the most part, nontax revenue accruing to special funds represents regulatory fees self-imposed by industries and professions, or charges for special services to designated groups. In many instances the distinction between a license fee and a service charge is somewhat vague.

In total, fees and charges during 1962-63 will amount to $35,362,000, with fishing and hunting licenses the major item, followed by the various license fees for business and the professions.

Oil and gas royalties earmarked for the State Water Fund and for support of public schools will amount to $11,589,000. Interest receipts from investments held for the various special funds are estimated at $9,332,000, while miscellaneous items—chiefly State Fair revenues and certain charges related to unemployment contributions—will reach an estimated $8,814,000 during the budget year.

TAX TRENDS

In view of the interest in California's "tax climate" and the possible effect upon economic growth, it is appropriate in this revenue statement to consider briefly recent tax trends, particularly in relation to similar trends in other states. Totals are important, and per capita amounts are significant. It is more important, however, and more meaningful to go behind the totals and the per capita ratios by relating taxes to personal income.

There are, of course, many other factors which should be considered in appraising comparative state tax collections. It must be clearly recognized that a tax in one state may be a service charge in another. Gas tax versus toll road charges, tax support of higher education versus tuition fees are typical examples. In addition, there are differences among the states in the traditional role of government, such, for example, as reliance on public education or private schools. Rate of population growth is also an important element in governmental costs and tax need. States such as California must concentrate on providing many new facilities—schools, universities and colleges, highways, recreational areas. Older places may furnish only replacements or modernizations which can be undertaken at a more leisurely pace.

Urbanization is still another element. California is the third most urbanized state, following New Jersey and Rhode Island, with 86.4 percent of its population living in urban areas. This is an important factor in the comparative cost of government and tax burden.

Finally, there is the level and quality of governmental services. These characteristics do not lend themselves to statistical treatment, but they are apparent to even the casual observer in the condition of public thoroughfares, health and safety programs and in the responsiveness to governmental problems.

It is not possible to discuss these intangible values in a short presentation, but it is possible to provide comparative data on the relative tax burden in reasonably comparable states. In such a setting California appears in quite favorable light.

Tax revision programs were the rule among states during the last decade. Those which did not make a major change in tax structure were in the minority. The result of these changes, combined with growth and inflation, was a 112.7 percent increase in aggregate collection of taxes by the 48 states, from $8.9 billion in 1950-51 to $18.8 billion in 1960-61. The addition of Alaska and Hawaii brought total state taxes slightly above $19 billion * in the latter year. In the same period, intergovernmental revenue of states—chiefly receipts from the Federal Government—and miscellaneous collections each nearly tripled.

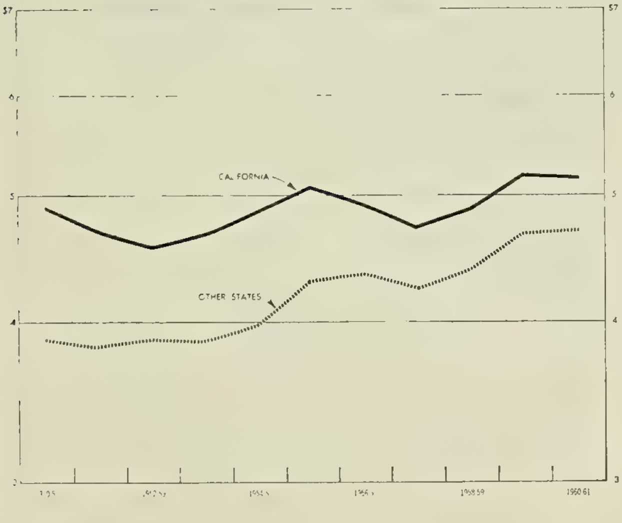
However, the income of the American people also rose sharply—from $225.5 billion in 1950 to $400 billion in 1960. Hence the burden of state taxes last year was not as great as the tax totals would seem to indicate. The ratio of total state taxes to total personal income rose from 3.96 percent in 1950-51 to 4.75 percent in the latest fiscal year.** In other words, ten years ago state taxes were the equivalent of $3.96 per $100 of personal income. Last year they were the equivalent of $4.75 † per hundred. Thus, the burden of aggregate taxes on total income rose 19.9 percent during the decade.

The trend of state tax collections in California was not significantly different from the all-state pattern during this period. However, the change in state tax burden per $100 of personal income was materially less in California than in most of the other states.

CHART 5

TRENDS IN STATE TAX BURDEN SINCE 1950

CHANGES IN STATE TAX REVENUE
PER $100 OF PERSONAL INCOME
CALIFORNIA AND ALL OTHER STATES



From $4.88 per $100 of personal income, the California ratio rose to $5.16 in 1960-61. This represented an increase of 5.7 percent, or roughly one-fourth of the 21.5 percent shown in the combined data for other states. As Chart 5 shows, this was not a chance relationship of one year with another, but clearly the result of a more rapid advance of the state tax burden in other states than in California throughout the decade.

Moreover, the increase in the "other states" data was not the result of a few large rises which distorted the figures. Of the 47 states, 40 showed an increase in the ratio of state taxes to personal income between fiscal years 1951 and 1961. The largest rise was 50 percent, but there were nine states in which the burden rose more than 30 percent, and 36 reported greater relative increases in the tax-income ratio than California's 5.7 percent.

Major Industrial States

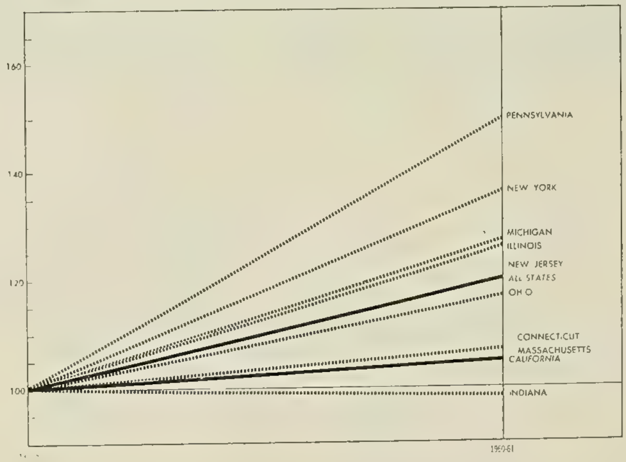
The ten major industrial states ‡ account for more than half of all state taxes. Combined collections amounted to $9.8 billion in 1960-61, out of the $19.0 billion total. The ratio of state taxes to personal income was below the national average, ranging from $2.37 in New Jersey to $5.32 in Michigan and averaging $4.24 per hundred—51 cents below the all-state average.

As the accompanying table shows, of the ten top industrial states, one—Indiana—recorded a slight drop in the ratio of taxes to income. California showed the lowest rate of increase among the remaining nine, one-fourth the average for all ten industrial states, about one-sixth that of New York and roughly one-ninth of the Pennsylvania rate. These ten year relationships are illustrated in Chart 6.

CHART 6

CHANGES IN STATE TAX BURDEN

STATE TAXES PER $100 OF PERSONAL INCOME
1950-51 AND 1960-61
ALL STATE AVERAGE AND 10 MAJOR INDUSTRIAL STATES



---

* *Compendium of State Government Finances*, an annual report of the United States Bureau of the Census, Governments Division. Amounts shown for California differ somewhat from State Budget data.

** Throughout this material taxes in a given fiscal year have been related to personal income in the previous calendar year.

† Excluding Alaska and Hawaii, which were not represented in the 1950-51 totals, the ratio in 1960-61 was $4.74.

‡ California, Connecticut, Illinois, Indiana, Massachusetts, Michigan, New Jersey, New York, Pennsylvania, and Ohio, as measured by personal income derived from manufacturing.

Population growth brought more than 5 million people to California during the last decade and industrial development materially altered the economic pattern of this State. This growth and development confronted all governmental levels with new problems and new service needs. Yet the relative change in the State tax burden for the expanded services of government has been less than those which occurred in 36 of the other states.

* Amounts shown during period of World War II represent civilian population, estimated income of civilians, and per capita civilian income.

† Estimated.

Population data, 1936 through 1949, are based on United States Census Bureau estimates; population, 1950 to date, estimated by the State Department of Finance.

Personal income, 1936 through 1960, from estimates by the Office of Business Economics, United States Department of Commerce. Reported totals for 1941 through 1945 have been adjusted to exclude income of armed forces personnel. Data for 1961 and 1962 are estimates by the State Department of Finance.

Income per capita computed from population and income data shown. Amounts differ somewhat from U. S. Department of Commerce estimates.

Taxes per capita computed on the basis of population January 1st, the midpoint of the fiscal year.

---

[1] Includes the corporation income tax and includes amounts credited to the postwar employment reserve in 1945-46.

[2] Including special fund share of horse racing revenue.

[3] Includes the motor vehicle (gasoline) fuel tax, use (diesel) fuel tax, and brokers and producers fees.

[4] Includes registration and weight fees, motor vehicle license fee (in lieu tax) and other fees. Part of the revenue from the motor vehicle license fee is credited to the General Fund.

[5] Motor vehicle transportation tax and permit fees. All revenue from this source accrued to the General Fund in 1945-46 and 1946-47 and the early months of 1947-48.

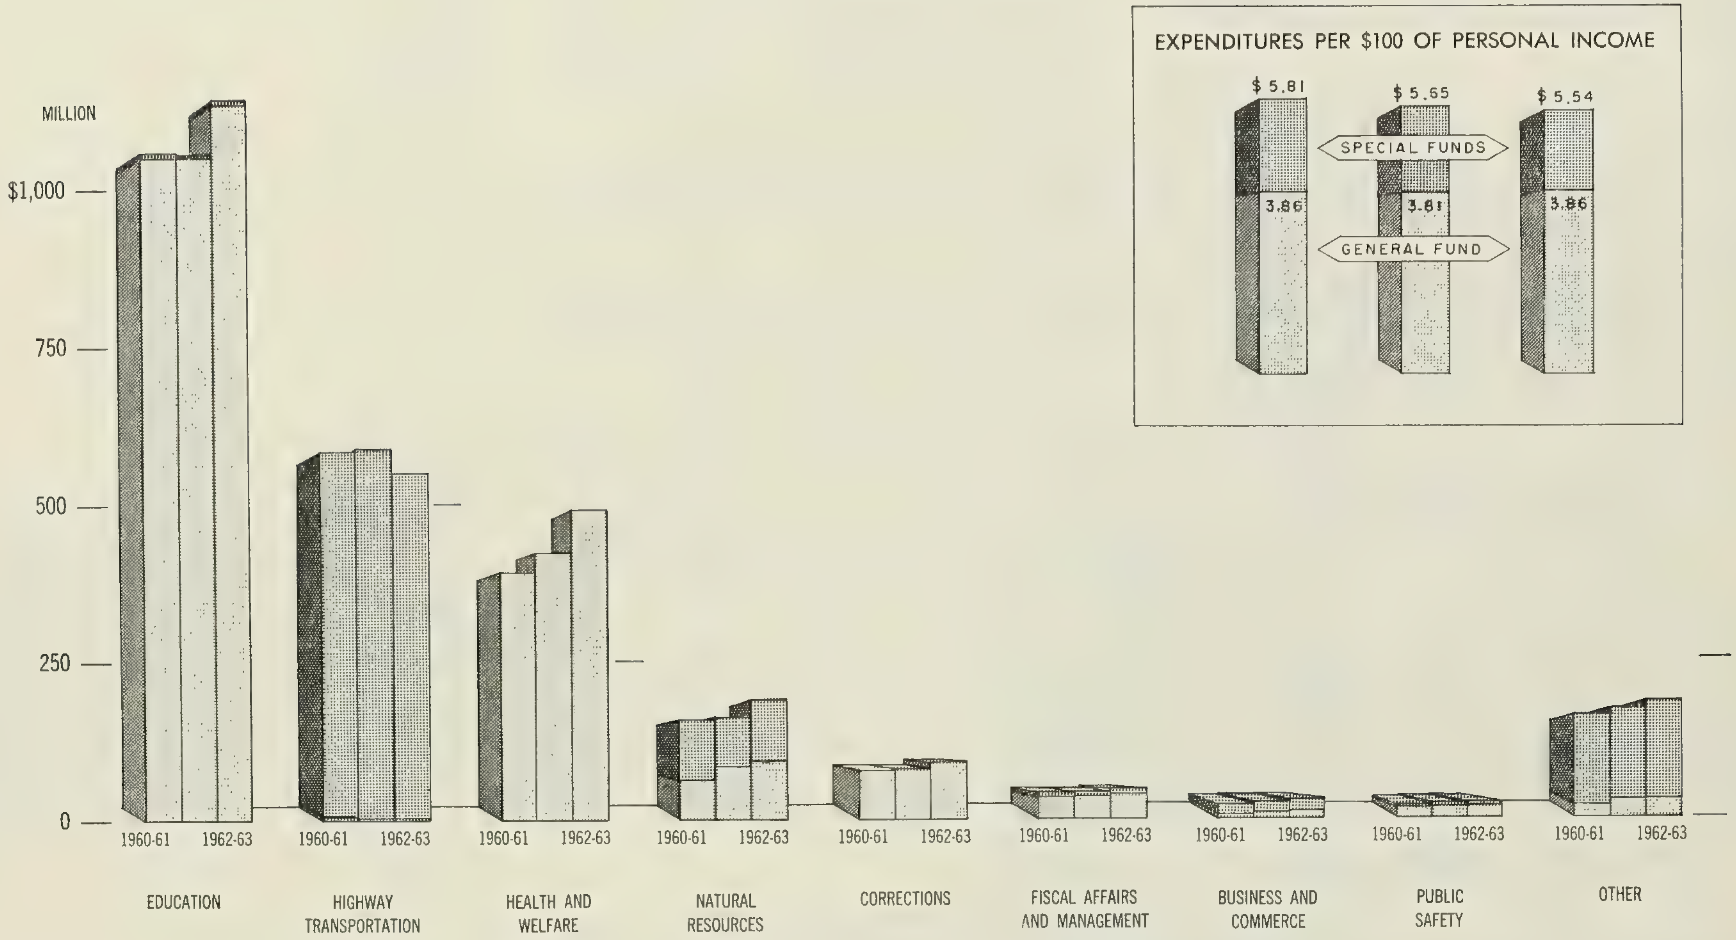
[6] Includes General Fund share of revenue from liquor license fees.

NOTE: Changes in rates and other features of these taxes have affected revenue yields during the period covered by this table hence. the data shown are not strictly comparable.

CHART 7

COMPARATIVE EXPENDITURES

1960-61, 1961-62, 1962-63



Expenditure Program, 1962-63

For more than a century, California's population has doubled every 20 years, and by the midpoint of the budget period, the State will be the most populous in the union. The 1962-63 Budget reflects this dramatic and sustained growth. An ever-increasing population coupled with demands for continuing improvement in public education, health and welfare services, development of natural resources, and highway construction must be recognized in the form of higher expenditures. Economies have been instituted and fiscal responsibility emphasized to minimize the financial impact of these demands upon the government of this State. These actions have produced a budget, balanced not only in terms of resources and expenditure requirements, but balanced also in recognition of the intellectual, social, and economic needs of the people.

This budget maintains past levels of service and, in addition, provides a modest degree of improvement in certain areas of urgent need. Consideration has been given to educational programs, the care and treatment of mentally ill and mentally retarded, and to needs of our senior citizens. Water development is also given major attention in this budget. With the preliminary work completed, State Government is now undertaking active construction of the project which ultimately will fill one of the most vital economic needs of California—the transfer of water from the northern areas of surplus to the southern areas of deficiency.

An expenditure program of $2,744,372,056 for the 1962-63 fiscal year has been developed to meet these requirements, representing an increase of $168,266,038, or 6.5 percent over the current year. This amount excludes $141,131,191 of bond financing for capital construction. In accordance with long-standing accounting practices of State Government, disbursements from the proceeds of bond issues are not included in budget totals, but amounts are shown in detailed departmental capital outlay programs. However, expenditures for bond interest and redemption are included, and this budget contains $56,818,658 to repay bonds issued to finance long-term construction needs of past years.

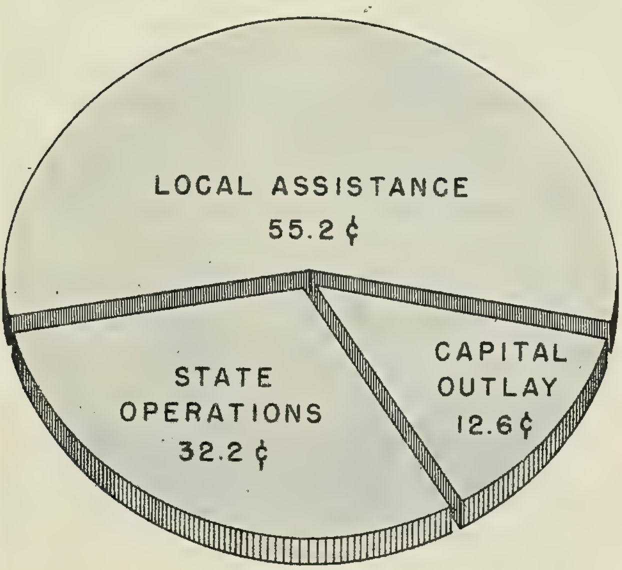
Although this budget has been prepared during a year of recovery, the unmet needs of our ever growing population, particularly in the areas of education, require a continuous emphasis on efficiency and economy in governmental expenditures in order to stretch our tax dollars to cover the tremendous demands of the decade ahead. To insure the greatest economy of approach, the budget has again been prepared under an allocation system which permits increases only for those areas of operation dealing directly with services to people. Since this system can be applied only to State department budgets, however, it can be used effectively only on approximately one-third of the expenditure total and even within this controllable amount certain cost increases are almost inevitably required by increased student enrollments, hospital admissions, and inmates of our prison system. Although budget revenues will increase at a faster pace than the total expenditure program for the budget year, additional expenditure requirements will necessitate use of a modest surplus accruing at the end of the current fiscal year.

As shown on the accompanying diagram, California's Budget is grouped in three major divisions of expenditure—assistance to local government, current operating costs of State Government, and funds for capital construction of highways, institutions, and other State facilities.

CHART 8

MAJOR DIVISION OF THE EXPENDITURE DOLLAR

1962-63



Local Assistance

In excess of one-half of the entire budget is programmed for State assistance to local governments—primarily for local public school support, assistance to the aged, blind, and needy and disabled, and allocations of revenue collected on behalf of cities and counties by the State. In the aggregate these local assistance payments will amount to $1,514,000,000, an increase of $145,000,000, or 10.6 percent, over the current year.

Capital Outlay

One-eighth of the total expenditures in this budget represents capital construction projects—primarily for State highways, water facilities, and recreational development. These construction expenditures will total $347,000,000, a decrease of $57,000,000 over the current year because of the higher rate of highway construction in the current year. All major construction projects for buildings and facilities at State colleges, university campuses, mental hospitals, and correctional institutions, are financed from bond proceeds and, as explained above, are not reflected in the above expenditure totals to the extent of $141,000,000. As only $52.5 million remains from existing bond authorizations for State construction, the remaining $88.5 million of projects are proposed to be financed from a proposed new State construction bond issue.

State Operations

The remaining third of the budget reflects the cost of operating State governmental activities—$883 million, or $79 million more than will be required in the current year. This includes the cost of operating the various State institutions, departments, boards, commissions, and independent offices. Since the most significant cost of State operations is contained in the staffing required to operate the various programs in State agencies, it is important to note that 129,000 State level positions will be required in the budget year at a cost of $820 million, including trust and revolving funds and other accounts not carried in the budget totals. Within this total are included 5,869 proposed new positions of which nearly one-half, or 2,490 are required for our higher educational institutions alone. Table 24 includes a breakdown of personnel man-years and dollar costs for the three fiscal years contained in this budget, subdivided by the type of positions used in State Government. Included also is a summary of proposed new positions contained in the 1962-63 fiscal year.

This budget also contains a $65 million lump sum appropriation to provide a general 5 percent salary increase to all of these State employees, retroactive to January 1, 1962.

In order to show as accurately as possible the total to be spent for each function of government, the cost of the recommended salary adjustment and the amounts required for interest and redemption on State bonds have been distributed to the various functions in the data presented in this analysis. Throughout the remainder of the budget document, these expenditures have been treated as lump sums. Adjustments in the data have also been made to reflect the unidentified savings anticipated in operating expenses during both the current and budget years. These revisions account entirely for the differences between amounts referred to in this statement and the details shown elsewhere in the budget document.

Total expenditures for the three major divisions of the budget for each of the three fiscal years covered in this document together with the increases in each category are given in the following table:

Table 12

STATE EXPENDITURES BY PRINCIPAL BUDGET DIVISIONS

(In millions)

	1960-61 Actual	1961-62 Estimated	1962-63 Proposed	Change from 1961-62 Amount	Change from 1961-62 Pct.
State Operations	$722.9	$804.2	$883.5	$79.3	9.9
Capital Outlay	503.9	403.3	346.8	—56.6	—14.0
Bonds	(—1.5)	(110.6)	(141.1)	(30.5)	27.6
Local Assistance	1,298.5	1,368.6	1,514.2	145.6	10.6
Totals	$2,525.4	$2,576.1	$2,744.4	$168.3	6.5

In order to better understand the program areas contained in this budget, this expenditure analysis divides the entire budget into nine functional categories. The various programs and the cost of activities included in each category are summarized in the following material. Comparative charts indicate the trend of these expenditures over the last 10 years.

Table 13

EXPENDITURES CLASSIFIED BY PRINCIPAL FUNCTIONS

(In millions)

Function *	Proposed 1962-63	Percent of total	Change from 1961-62 Amount	Change from 1961-62 Percent
Education	$1,140.6	41.6	$84.4	8.0
Highways	551.5	20.1	—37.6	—6.4

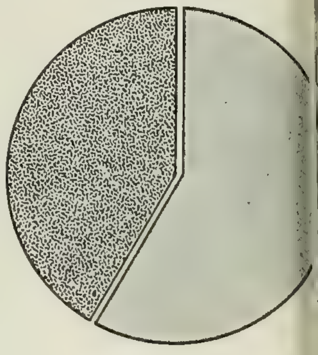
Other	184.9	6.7	12.0	6.9
Totals	$2,744.4	100.0	$168.3	6.5

* See Tables 14 through 22 and accompanying charts for details of activities included in these general functional categories.

Education—$1,140,570,000



41.6% OF TOTAL BUDGET

Viewed not only in terms of dollars, but also in terms of the training of this State's future citizens, education continues to receive the largest single share of our tax resources. Not only has California faced unprecedented rates of growth in its school age population, but the number of students served by the public education system is the largest in the nation. True to our western tradition, this State looks to its public sphere to finance its educational system, and California now spends more in this functional area than 43 other states combined. The demands upon all levels of education are manyfold, but two needs require continuing emphasis because of our future requirements: the first of these is to serve rapidly expanding school enrollments by providing properly trained teachers and funds for corollary expenses, together with physical facilities; and the second is the adaptation of our curriculums to the changing needs of an increasingly technological age.

In order to meet these needs, well over one billion dollars has been allocated to the total educational function, nearly 42 cents out of the total budget dollar, and approximately 60 percent of the general fund contribution therein. This total program includes such diversified operations as public school support and assistance to school districts for school buildings, a university which is recognized as one of the most eminent research and teaching centers in the nation and a separate State college system emphasizing liberal arts and teaching programs. California's two-year junior college structure, although constitutionally part of the public school system, is expected to contribute substantially to the higher education needs of our existing system, particularly in the next 15 years when the enrollments at all levels above the 12th year will almost triple.

The State Department of Education is responsible for the administration of public school education through the junior college level. Among the specialized programs administered by this department are school apportionments, free textbooks for the elementary grades, special schools for physically handicapped children, and centers for the adult blind. The department is also the co-operating agency in Federal-State programs for vocational rehabilitation, vocational education, national defense education, and surplus property distribution to public schools and other eligible institutions.

In the area supervised by this department, the 1962-63 Budget proposes a greater effort in the rehabilitation of persons receiving public assistance, so that they may be restored to self-support. The budget also proposes additional training of the mentally retarded in private rehabilitation workshops, to identify and strengthen the work skills of this group.

Local Assistance

Apportionments for public school support provide $771.1 million in assistance to local school districts for the public school program. This represents an increase of $46.5 million over the current year for 212,000 additional students. We are now educating 3,775,000 students in the elementary and secondary grades through junior college, with 22.5 percent of our total population attending these grades. The trend in school-age groups has seen a growth at a rate 50 percent faster than the State's general population over the past 10 years, and a continued above-average growth rate is anticipated. Included in public school support is an initial allocation for special educational programs for mentally gifted students.

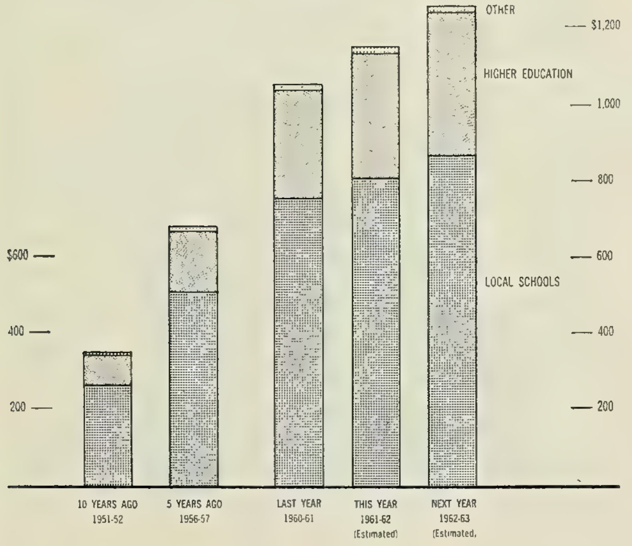
California has long furnished State-printed free textbooks to the elementary schools. This budget of $9.4 million includes funds for new adoptions in 5th and 8th grades history, geography and civics, which are scheduled for distribution to the public schools by fall of 1963.

Funds for child care centers of $5.9 million reflect a 1.8% increase in hours of attendance over 1961-62. These centers are operated by 48 school districts in primarily urbanized areas of the State and provide low cost care and supervision of children whose parents must work to provide a livelihood for the family. 1961 legislation granting a cost-of-living increase in State support and increasing the income eligibility of parents will require an additional $433,000 in the current year.

CHART 9

COMPARATIVE EXPENDITURES FOR EDUCATION

(In millions)



The State will also contribute $43 million toward the retirement costs of 26,400 retired teachers in 1962-63, an increase of $1.8 million. Additional debt service costs on construction bonds for financially distressed public school districts will require $6.5 million more than the current year. Over 100,000 children per year are housed in new school facilities purchased under this equalization program for hard pressed districts.

In total, including debt service expenditures of $33 million but not including current bond allocations, the State will provide $863 million in 1962-63 in assistance to local schools, an increase of $58 million over the current year, and $107 million more than was spent for this purpose in 1960-61.

Higher Education

California's system of public higher education is tripartite in nature, consisting of: public junior colleges which are locally controlled, tuition free, and jointly supported by local districts and the State; multipurpose four and five-year liberal arts state colleges; and a State University offering advanced graduate and professional education. In order that the three entities representing higher education might better serve the growing needs of California, a Coordinating Council for Higher Education was created, effective July 1, 1961. This advisory agency representing public and private higher education and the general public is charged with coordinating orderly growth and delineating the various functions in this field, and in advising the Governor and the Legislature regarding levels of State support for the University, State Colleges, and Junior Colleges.

University of California

During 1962-63, an additional 5,128 students will be admitted within the University, bringing the total to 57,203 students or an increase of 9.8% over the previous year. Not only is this enrollment increase the highest in the past decade, but the composition of the enrollments shows a dramatic upward rise at the graduate level. During 1960-61 fiscal year, 28.5% of the University's enrollment was post graduate; in 1962-63 it is estimated at 32.1%, and this enrollment increase of 5,128 will be composed of approximately 50% graduate level students.

In order to provide for present and future operating needs of the University, $157 million from State sources will be required, an increase of $16 million. Future growth requires continuation of planning and programming at the three new general campuses at San Diego, Irvine (Orange County) and Santa Cruz. $600,000 is also provided to initiate a year-round (trimester) operation at Berkeley, Los Angeles, and Santa Barbara, to more fully utilize the costly facilities of these campuses. Several new instruction and research programs are also planned for various campuses.

Continuing capital construction requirements for classrooms as well as research facilities and necessary land acquisition programs are budgeted at $54 million to provide for student capacity and research needs through 1965. Planned expansion of several smaller campus sites is necessitated by indicated future growth, and construction of the basic sciences unit at the Los Angeles Medical Center is needed to provide for larger classes in medicine and dentistry.

State Colleges

The State College system, comprising 16 existing and 2 newly planned campuses, will admit 86,440 students in 1962-63, an increase of 8,500 over current enrollments. This system has already tripled in the last ten years and is again expecting to more than double in the decade ahead. The 1962-63 budget is directed at not only keeping abreast of quantitative needs but also strengthening qualitative aspects of college operations.

This $99.6 million budget contains several improvements which the new Board of Trustees feels are essential to future orderly development in the expanding decade ahead. Of primary importance is the recognition of faculty research for the 5,100 college instructors in the system, at an initial cost of $645,000. Master planning for future growth at each campus will be available through a $127,000 appropriation for consulting architects and through formation of campus planning committees. In addition, a special library allowance of $640,000 will provide acceleration of library book acquisitions.

In the Capital Outlay budget, $61 million is earmarked for student needs through 1965, including site acquisition for the two new campuses in Southern California which will be required in the near future.

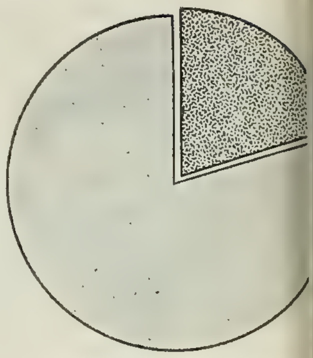
Highway Transportation—$551,490,000



20.1% OF TOTAL BUDGET

Operation of the motor vehicle and all of the responsibilities it places on government will require an expenditure in excess of a half billion dollars during the 1962-63 fiscal year. This amount will be spent for highway construction and maintenance, motor vehicle registrations and drivers' licensing, traffic enforcement, and distribution of funds to cities and counties for street and road purposes. In addition, $287 million of federal highway funds will be utilized in California but are not included in the above total.

Highways

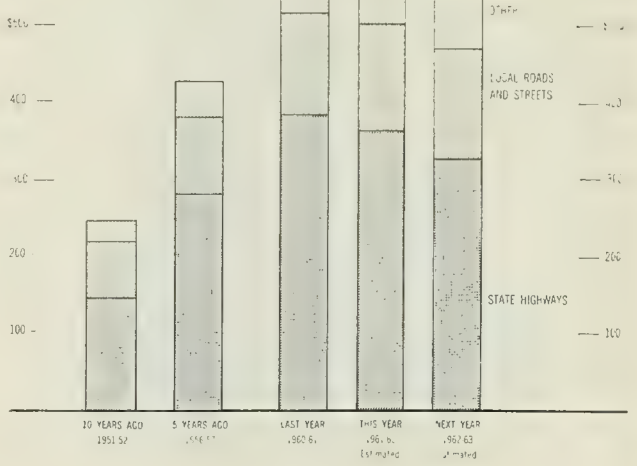
The California Highway Commission allocates funds for construction and rights-of-way of this State's highway system from revenues dedicated to highway use. By statutory direction, the State Highway Budget cannot be altered by the Governor, and is included here for expenditure reporting purposes only. The budget for 1962-63, including federal financing, aggregates $659 million. This amount includes the maintenance and operation of the 16,000 mile State highway system, together with a capital outlay budget of $537 million for State highway construction purposes including purchase of rights-of-way. Funds are provided for 202 projects, including construction of 278 miles of multi-lane freeway and expressway and 110 miles of two-lane expressway.

The budget also contains $58 million for functions other than State Highway work. This includes $36 million for major city streets, federal aid for county roads under the Federal Aid Secondary System, $9.2 million; State funds to counties for use in matching these federal funds, $4.2 million; State funds to help finance railroad grade separation projects on local streets and roads, $5 million; engineering funds to cities, $1.5

CHART 10

COMPARATIVE EXPENDITURES FOR HIGHWAY TRANSPORTATION

(In millions)



million; and State funds to pay part of the cost of government extensions of Federal Aid Secondary county roads, $1.4 million.

California's 58 counties receive 1⅜ cents per gallon from the State gasoline tax plus a portion of the Motor Vehicle fees. These funds are disbursed directly by the State Controller and are not listed in the budget. For the 1962-63 fiscal year, the State-collected funds for county roads will total an estimated $94 million.

Highway Patrol

The California Highway Patrol operating budget of $41.5 million, for the 1962-63 fiscal year, is designed to keep pace with the expanding number of vehicles in the State, as well as increasing freeway mileage. To this end an additional 100 traffic officers, 10 sergeants and 2 lieutenants are included in next year's budget. It is expected that this complement will aid in reducing California's record of 3,800 deaths and 160,000 injuries during 1961. Intensified enforcement, statistical evaluation, and a study of aerial survey effectiveness represent some of the activities directed towards this objective.

In order to attract the highest caliber of manpower for enforcement work, a one-step salary adjustment at a cost of $1,058,000 is proposed in 1962-63 for uniformed personnel of the Patrol. This would be in addition to the general salary increase proposed for all State employees.

Motor Vehicles

Among the major regulatory activities of the Department of Motor Vehicles are the registration, the licensing of this State's drivers and ascertaining the financial responsibility of individuals invloved in vehicle accidents. The department will register an estimated 9,548,000 vehicles and issue an estimated 2,827,300 licenses to operate vehicles during the 1962-63 fiscal year.

Increased expenditures of $3.2 million reflect a part of the cost of the issuance of new license plates in 1963, the move to the new Sacramento headquarters building, and preliminary expenses related to installation of electronic data processing equipment, which by 1963-64 will provide high speed mechanization of the registration records that have outgrown capacity of existing equipment.

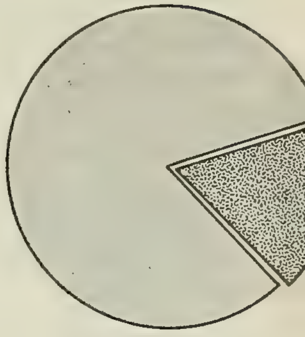
Health and Welfare—$490,957,000



17.9% OF TOTAL BUDGET

These programs are directed toward the general well-being of the citizens of California. A number of these programs are financed jointly by local, State and Federal Governments and range from State-operated mental hospitals to direct assistance to the needy. State contributions include $295.4 million for welfare, $157.0 million for mental health, and $38.5 million for public health, bringing state expenditures for all three programs to $491 million.

Social Welfare

One of the most important programs proposed by the Governor in 1961, and enacted into law substantially as presented, places considerable emphasis on the need to provide more of California's aged and handicapped with suitable living conditions and medical care. These improvements are reflected in the Department of Social Welfare's budgets for support and local assistance which propose expenditures of $295 million in State funds, an increase of $55 million over the 1961-62 fiscal year.

Most of the additional payments to local government will finance full year cost of new and revised programs that were implemented January 1, 1962. Possibly the most significant of these is the medical assistance to the aged provision, which permits those older citizens who are not recipients of old age security benefits, and who are without sufficient personal resources, to meet their medical expenses. Cost-of-living grant increases are also provided for the aged, the blind, and the disabled, and maximum limits for special needs are raised. Relative responsibility provisions are modified in order to ease the financial burden of children required to provide support to parents who are old age security, blind and disabled recipients. Aged and disabled non-citizen Californians are also provided with the same benefits enjoyed by citizens. Also the maximum amount payable per child in foster homes is increased to meet rising operating costs.

Of the $54.6 million increase in State funds for aid recipients, $34 million will benefit our older citizens, $7 million will be used for assistance to the disabled, and $2 million will be expended to aid the blind. The remaining funds will be devoted to children who lack adequate parental support, who are in foster or boarding homes, and who are part of the State adoption program.

Mental Hygiene

Modern techniques for treating mental illness now require an attack on this problem from four basic areas—treatment, training, research, and prevention.

Treatment is directed primarily to restoration of the patient to effective functioning in society at a level which is acceptable to him and to the groups which he re-enters. The success of the treatment program is indicated by the fact that the 1960-61 year end resident population of 35,381 was the lowest in the last eight years. This budget provides $290,000 for additional drugs and supplies, and $384,000 for increased clinical services, two additional after-care facilities, and 100 additional family care home placements, to prevent a buildup of the mentally ill resident population which would otherwise result from the growing admissions burden of 29,000. Improved hospital treatment for the mentally retarded requires an additional $394,360 for medical and hospital, rehabilitation, and feeding supplies, and a small increase in drugs. In order to continue efforts started in 1961 to eliminate the waiting list for our retarded facilities, 100 additional family care home placements are budgeted, and $1 million has been provided in the General Fund surplus account to support an augmented program to reach this goal. This program is still being developed and will be presented in detail to the Legislature during the budget session.

Recruitment of qualified personnel is a crucial problem faced in meeting the needs of California's mental health services. In addition to training its own personnel, the Department of Mental Hygiene has the responsibility for training personnel for other agencies and institutions. To meet this challenge, the 1962-63 Budget provides for an expansion in the training program of $194,186, covering additional psychiatric residents, career residents, scholarships, and internships.

The research program is divided between hospital and project support in order to insure a comprehensive and balanced program that includes both applied and basic research. This budget provides $1.4 million for this area of attack.

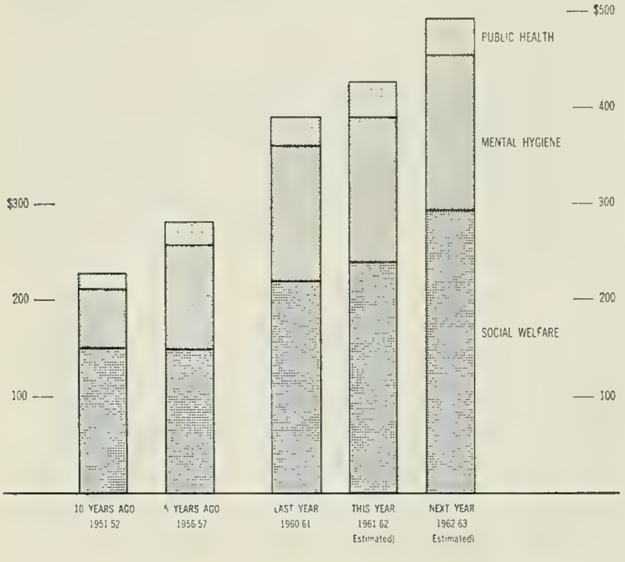
Continued expansion of community mental health services (Short-Doyle) is provided in an allocation of $3.3 million to alleviate the need for large numbers of citizens to leave their home communities because of mental disorders.

Capital Outlay needs in the budget year of less than $5 million are confined to additional auxiliary facilities, remodeling of outdated ward buildings, and projects to correct deficiencies and improve physical plants. The fiscal byproducts of the successful new concepts of treatment are illustrated directly in the capital budget by avoidance of new construction of hospitals for the mentally ill which otherwise would have been inevitable.

CHART 11

COMPARATIVE EXPENDITURES FOR HEALTH AND WELFARE

(In millions)



Moderate expansion of the total mental health program will require $157 million in 1962-63, an increase of $8.3 million over the current expenditure.

Public Health

Within the responsibility of the Department of Public Health to maintain a healthful environment, air pollution is one of the major problems currently facing the State, particularly in the area of vehicle exhaust pollution. To meet this problem, a $390,000 program expansion is proposed for the improvement of existing air quality standards. Studies are to be directed toward refining standards for atmospheric pollution as well as studies of motor vehicle emissions. Another $280,000 in program expansion is planned for air quality monitoring. The network of sampling stations will be increased in number and scope in order to permit the evaluation of the effectiveness of the State's motor vehicle pollution control program as it goes into operation. Continuing expenditures in this field include $500,000 by the Motor Vehicle Pollution Control Board and approximately $300,000 by the Bureau of Air Sanitation and the Division of Laboratories.

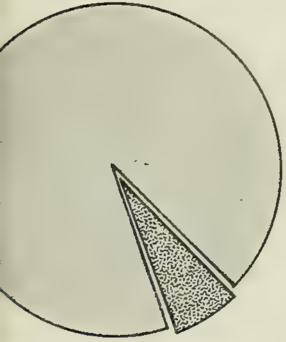
Regional hospital planning in two areas of the State will increase expenditures by $50,000. Information will be developed in San Francisco and Los Angeles to guide these communities in developing hospitals of desirable size, location and service.

State assistance to local agencies for public health will increase to $28 million in 1962-63. Of a $3.2 million increase, two-thirds can be attributed to stepped up State and federal participation in the construction of non-profit hospitals, where over 1,100 new hospital beds will be provided each year. Aid to counties for the care of crippled children will increase $1 million due to normal program growth and price increases for surgical services. Other increases have occurred in the physical therapy subvention due to greater numbers of handicapped children who qualify and in assistance to counties without health departments. Tuberculosis sanitoria expenditures will decrease $0.4 million due to the reduction in patient days brought about by improved techniques of early case finding and treatment.

Resources—$189,797,000



6.9% OF TOTAL BUDGET

The various agencies dedicated to conservation, development, and beneficial utilization of our natural resources are included in this category. The activities covered here include water development and conservation; timber and watershed protection; conservation and management of fish and game; acquisition, development, and operation of parks and beaches; assistance in the construction of small craft harbors; and assistance to the agricultural and mining industries of the State. Reorganization in 1961 abolished the Department of Natural Resources and established the Department of Conservation and the Department of Parks and Recreation within the new Resources Agency.

Water Resources

Water conservation and development continue to be among the most pressing problems of California. As a result of voter approval of the $1.75 billion resources development bond issue, accelerated construction on State water facilities to speed the delivery of water to present and potential users will be undertaken. Proposed expenditures of $65.7 million in this budget reflect the first full-scale implementation of this program.

The current budget included construction of the diversion tunnel required for Oroville Dam. The major embankment contract also will be let during this year, with work on the main body of the structure to continue in 1962-63 at a cost of $8 million. The first federal contribution to flood control at Oroville of $15 million is anticipated early in 1962-63.

Frenchman Dam in the upper Oroville Project area has been completed, and $106,000 is provided in the 1962-63 budget to complete the on-shore recreational development preparatory to operation of the allied recreational facilities.

The 1962-63 budget provides $12.3 million to permit the San Luis Dam and Reservoir to proceed at an accelerated pace. This project will be designed and constructed by the Bureau of Reclamation with State assistance and inspection under sharing ratios of 55% State and 45% Federal funds. $3.1 million has been included for State financial assistance for local projects reflecting increased loans and grants to local agencies for that purpose.

Construction of the State Water Facilities is on the adopted schedule that will make power available at Oroville in 1968 and water available in Southern California in 1972.

No expansion has been provided in the water planning budget and, in effect, there have been many reductions. However, a continuation of the groundwater basin protection study is included at a cost of $297,000. Although long-range planning will continue, there will be shifts in the future to the more immediate needs of the construction and local projects programs.

Payments for flood control and watershed protection are included in the local assistance budget. For this purpose, $24 million is provided primarily for acquisition of rights-of-way for federally financed construction. Included in this amount is a continuation of the State constructed flood control project in the San Joaquin River.

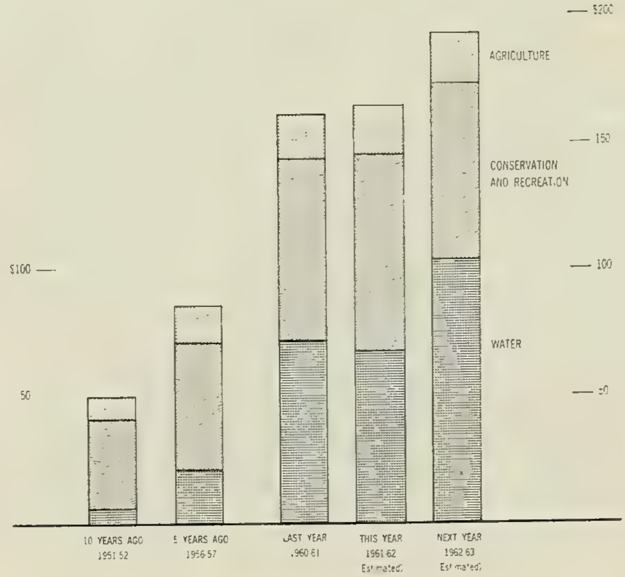
Conservation

This new department includes the functions of forestry, mines and geology, oil and gas, and soil conservation. The Division of Forestry continues its responsibility as a wildland fire protection agency by providing protection for over 39,000,000 acres of State and private lands having Statewide interest with regard to timber protection, range lands, recreational uses, and watershed values. On January 1, 1962, the Division of Forestry assumed direct fire protection

CHART 12

COMPARATIVE EXPENDITURES FOR NATURAL RESOURCES

(In millions)



within San Mateo County. Formerly, the county fire department had received payments from the State for protection of State responsibility lands in the county.

New conservation camps scheduled to be activated in the budget year are: Antelope Conservation Camp (100 men) located at Susanville; Konocti Conservation Camp (80 men) located in Lake County; and Mono-Inyo Conservation Camp (80 men) located in Inyo County. These facilities will bring the forestry camp working population to 2,240 Department of Corrections inmates and 345 Youth Authority wards located in 31 permanent camps, 3 mobile camps, and 3 tent camps.

Parks and Recreation

This newly created department includes the functions of beaches and parks, recreation, and small craft harbors. In addition, a Division of Administrative Services was established to provide centralized management services to the department.

Demand for recreational facilities throughout California has been growing for the past several years. Attendance at beach and park areas operated by the State has tripled in the last decade, and the resulting pressure has compounded the operating problems confronting the Division of Beaches and Parks as new areas are acquired and developed.

Three major park developments providing over 400 new camping sites will be opened to public use in 1962-63. These units will be at San Elijo Beach (San Diego County), Hendy Woods (Mendocino County), and Butano (San Mateo County). Three new museums will provide interpretive services to the public. These are the Marshall Gold Discovery Museum (El Dorado County), Morro Bay Museum (San Luis Obispo County) and Donner Memorial (Nevada and Placer County). Two areas new to the State Park System will be activated in the 1962-63 fiscal year. One of these areas is the Julie Pfeiffer Burns State Park (Monterey County) which will be opened for scenic purposes and trail use. The other area is Alameda County Beach. In addition to these new developments, several hundred additional camp units and day use facilities are scheduled to be activated at existing beaches and parks for public use in 1962-63.

In order that the State may meet the ever-increasing recreational demands of its people and secure lands immediately which might otherwise be lost to public use, a State park acquisition bond issue will be proposed to obtain such properties for present and future recreational needs. Corollary to this bond acquisition program is a $6,000,000 per year development program provided from current revenues. This 1962-63 Budget contains 700 new camp sites and augmented day use facilities, and represents the first step in an augmented development program to keep pace with the recreational demands of our population. It is anticipated that current funds will continue to be provided at a level sufficient to develop both newly acquired and existing recreational areas to meet such demands.

The Division of Small Craft Harbors will take over the small craft registration function from the Department of Motor Vehicles. New programs will be initiated in boating safety education and in the planning and construction of non-revenue producing features of coastal small craft harbors. Also proposed is a development loan to the Division of Beaches and Parks for certain water recreation facilities and the purchase of water at Lake Elsinore State Park. Fees charged users of these facilities will repay the loan which is to come from the Small Craft Harbor Revolving Fund.

Fish and Game

By legislative direction, the Department has centralized its licensing function in the 1961-62 fiscal year. The Delta Fish and Wildlife Protection Study was initiated by contract with the Department of Water Resources during the current year and will continue in the budget year. Two new fisheries management projects are proposed under the Dingell-Johnson program to replace the Trout Management and Barracuda and White Sea Bass Management studies. The new studies are the Southern California Marine Sport Fish Survey and the Lake Tahoe Fisheries Study.

Agriculture

The budget for the Department of Agriculture provides $19.1 million for the 1962-63 fiscal year, an increase of $530,000. Funds are included to continue the fight against the infestation of the Japanese Beetle, first discovered in 1961. An allocation of $100,000 made for this purpose will be offset by a decline in indemnities needed for bovine brucellosis, since effective control measures have markedly reduced the incidence of this cattle disease. Additional personnel are also provided to handle the increased enforcement workload engendered by the growth in variety and use of milk products.

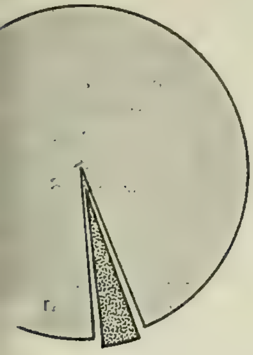
Corrections—$88,883,000



% OF TOTAL BUDGET

The two major functions of a modern penal system—institutionalization and parole—is necessary to effect the greatest return on the money invested to isolate and rehabilitate the offender and return him to society as a useful citizen.

Twenty institutions and training schools, two branch institutions and 41 conservation camps will be operated by the Department of Corrections and the Department of the Youth Authority in 1962-63 year. Supervision of over 20,000 adults and minors on parole will also be accomplished. Local governments also participate in the rehabilitation of the juvenile offender through the establishment of juvenile homes and camps, with financial assistance from the State for the construction and operation of such facilities.

Corrections

The Department of Corrections institutional population will rise significantly in 1962-63, reflecting the State's new role in the apprehension and commitment of non-felon narcotic addicts. The normal felon increase will continue at approximately 1,000 per year and the non-felon addict population will add another 000 in 1962-63. New facilities will provide a broad application of successful rehabilitation treatment techniques, as well as new methods of treatment for the narcotics offender.

Included in the total support budget of $59.4 million is $4.5 million for the treatment and rehabilitation on non-felon narcotic addicts. This program, authorized in 1961, provides for the confinement, treatment, and release to intensive parole supervision of these addicts for the purpose of isolation from society, determining the cause and effect and, hopefully, the cure for addiction, rehabilitation of the addict, and controlling addiction after release from the institution. The institutional program will include intensive counseling, educational programs, work projects and vigorous physical conditioning activities. On parole the addict will be closely supervised and subject to chemical testing for narcotics usage. While every effort will be made to prevent the return to narcotics use, chemical testing will identify such use before the individual can become readdicted. Reconfinement will then prevent such user from committing non-violent crimes to support his habit.

Although treatment methods improve, and time for rehabilitation is shortened, an ever-increasing population creates a greater demand for prison bed capacity. To meet this demand, a 1,200-man conservation center in Lassen County will begin receiving inmates in the 1962-63 fiscal year. This institution will be utilized as a training and staging center to supply the various conservation camps with supplies and trained inmates. The Southern Conservation Center Branch at Chino is scheduled for completion late in 1961-62 and will provide temporary housing for 1,960 non-felon narcotic addicts until the new 2,300 capacity Rehabilitation Center for addicts is available.

New capital outlay facilities and other projects proposed for the 1962-63 fiscal year total $12.9 million and will provide a new 1,200-man conservation center branch in Tuolumne County, specialized facilities of 72 beds at the Institution for Women for female felons with personality disorders, and 129 beds in an acute psychotic treatment center for male felons at the Vacaville Medical Facility.

Youth Authority

The institution population of the Department of the Youth Authority during the next fiscal year will average 4,777, an increase of 443 wards, or 10.2 percent, over the current year. Parole population will average 11,464, an increase of 1,100, or approximately 10.5 percent over the estimated number on parole during 1961-62. Cost of maintaining this population in our youth facilities during 1962-63 will be $25.4 million, an increase of 12.2 percent, or $2.7 million over the current year.

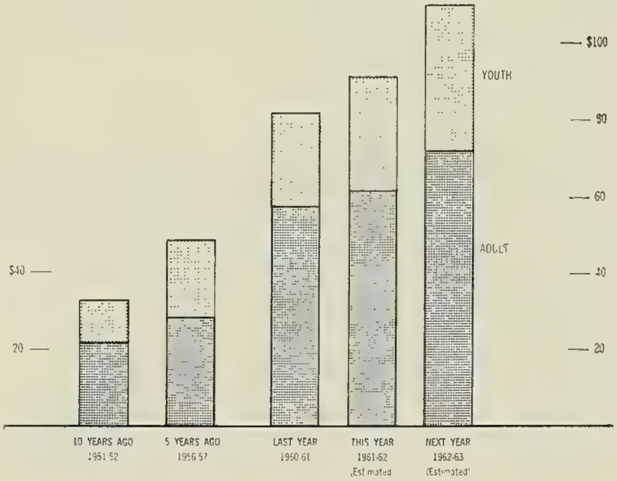
This budget provides for extension of the special psychiatric treatment program to Fricot Ranch School for Boys, which will complete the planned integration of this program for the severest problem cases into all existing institutions.

In addition to institutional and parole treatment, the Youth Authority provides assistance to public and private agencies who seek to combat the problem of juvenile delinquency and rehabilitation on a local level. Besides assistance in the form of consultation and advice, monetary subventions are distributed to the various counties and cities applying for such assistance and complying with established standards. The Department will, in this phase, administer a proposed $3.2 million program in 1962-63 to cities and counties for the construction and maintenance of local juvenile homes and camps. The State will also share with the City of San Diego the cost of a juvenile check station at San Ysidro. Since most juveniles do not come from the San Diego area, the budget contribution recognizes the statewide responsibility.

CHART 13

COMPARATIVE EXPENDITURES FOR CORRECTIONS

(In millions)



A capital outlay budget of $9.2 million will provide for construction of central facilities and the first 400-bed institution of the Northern California Youth Center. This center will ultimately house 4,800 wards in 12 separate institutions of 400 wards each, and will retain the relatively small institution setting and yet accomplish economies through centralized services.

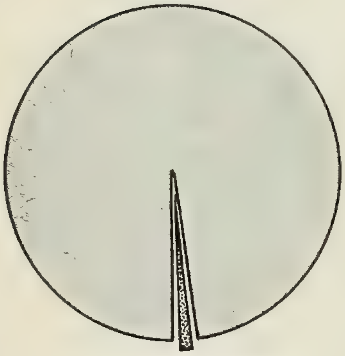
Fiscal Affairs and General Administration—$45,805,000



1.7% OF TOTAL BUDGET

This category includes tax collection, business management and executive functions, fiscal control and general housekeeping activities, and other operations essential to governmental efficiency.

Over 60 percent of this category, $28 million, will be used for tax collection and tax law enforcement. The remaining $18 million relating to fiscal and general administration includes the fiscal and management of activities of the Department of Finance; the services performed by State Personnel Board, the Treasurer's office, and the Secretary of State; and the executive management provided by the Governor and his staff.

Tax Collection

Under California's statutes, the major tax collection functions are divided among the State Board of Equalization, the Franchise Tax Board, and the State Controller. In order to improve the enforcement of existing tax laws and obtain proper revenue return for the operation of State Government, $1.8 million is provided for staff increases in these collection departments. This investment will assure a better return on our tax base and protect the honest taxpayer from those who seek to avoid their fair share of the cost of government. Of this amount, $919,000 is allocated to the Board of Equalization to augment the business tax staff for better enforcement of such levies as the sales tax, and $787,000 is provided the Franchise Tax Board for additional audit coverage of the personal and corporate income taxes and to fully utilize federal comparison data.

During 1961-62 the Office of State Controller has had the responsibility of programming, equipping, and putting into operation the payroll function and certain reporting requirements involved with the State Employees' Medical and Hospital Care Act and the integration of the Employees' Retirement System with Social Security. Through the use of experienced State employees and an accelerated recruiting and training plan for new employees, the State Controller has been able to accomplish the programming for electronic data processing at a cost of approximately $200,000 as compared to a price of $800,000 bid by private industry for the job. On-going servicing of these programs as a result of electronic data processing will be considerably less expensive than estimated under the former processing methods used in the disbursement function.

Finance

In the Department of Finance provision is made for the Commission on State Government Organization and Economy created by the 1961 Legislature. Additional costs to service this commission are estimated to be $40,000.

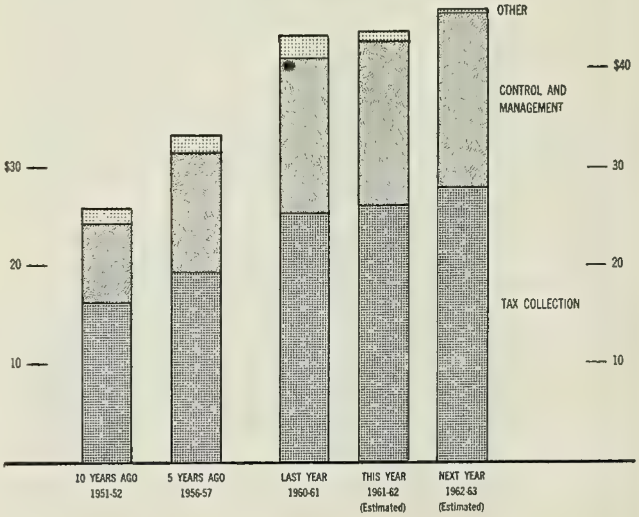
The Department of Finance has also been assigned responsibility for an area redevelopment program made possible by the Federal Area Redevelopment Act of 1961, which makes available federal assistance to counties suffering substantial and persistent unemployment. The State will assist counties so designated in the formation of an economic development plan which through local funds and federal grants will restore the economy of these counties to the high level enjoyed by most California areas. State cost for the program is estimated at $32,000.

The Office of Administrative Procedures has been transferred to the general services function of Department of Finance from its former location in the

CHART 14

COMPARATIVE EXPENDITURES FOR FISCAL AFFAIRS AND MANAGEMENT

(In millions)



Department of Professional and Vocational Standards. This office provides the quasi-judicial hearing function through trained hearing officers and reporters for various State agencies. The cost of this ervice is fully reimbursed by the using agency.

Completion of the San Diego State Building, the ew Motor Vehicle Building in Sacramento, and new nnexes to the Public Works Building and Agriculture Building in Sacramento will require expansion of aintenance and janitorial staff in the Buildings and rounds Division during 1962-63 for comparable ervicing provided to other State office buildings offset n part by reducing the number of authorized posiions in the current year as a result of more efficient nethods and use of personnel being developed in office uilding management.

Not included in the expenditure table are capital utlay projects to be financed by loans from trust unds. Buildings constructed by trust certificates are ledged to the trust fund involved until annual paynents eliminate the obligation, at which time clear itle passes to the State. This budget provides for acuisition of land for a parking lot to service the San Diego State Building. The $950,000 required for land nd subsequent development is proposed from trust inancing.

ecretary of State

The Central Records Depository program under the ecretary of State is being expanded to include a ecords center in the Los Angeles area. This move vill provide the space necessary to house an increased low of record material due to the Statewide paperwork management program. This program is intended o increase efficiencies and to realize savings in the osts of filing equipment, file space, and the personnel xpense of file maintenance.

During election years there is in the budget of the ecretary of State the cost of publishing and disributing pamphlets containing the text of proposed mendments to the Constitution, propositions and ther ballot measures together with arguments. During the 1961-62 fiscal year, there will be a special requirement of $30,000 for this material at the June, 1962 primary election. In 1962-63, it is estimated the cost of ballot pamphlets will amount to $262,500.

Housing Problems

The Governor's Advisory Commission on Housing Problems created in 1961 is a new addition to the executive group. An appropriation of $75,000 is provided the Commission to study housing needs in California, both public and private, and to determine how best the State can use its powers to meet those needs. A progress report to the Governor and Legislature at the 1962 Regular Session and final report at the 1963 Regular Session are to cover housing needs as they affect all persons within the State, the home building industry, and the various systems of home financing.

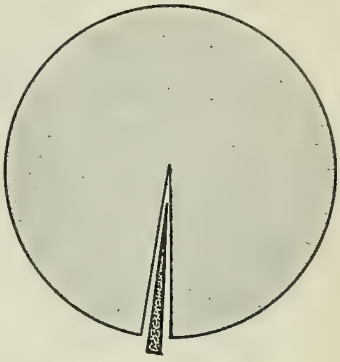
Business and Commerce—$28,995,000



1.1% OF TOTAL BUDGET

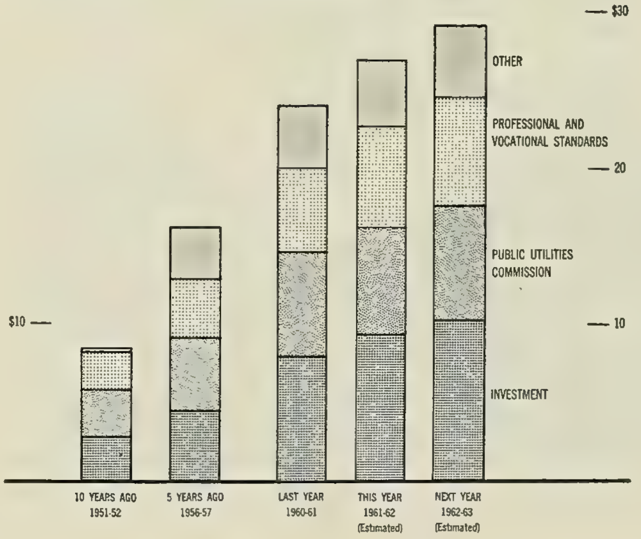
Functions included in this category are those primarily concerned with regulatory activities, and its agencies cover a wide field of activity and affect the majority of the citizens of California. These agencies include the Public Utilities Commission, Department of Investment, the Departments of Professional and Vocational Standards and Alcoholic Beverage Control; the Horse Racing Board, and the Consumer Counsel.

Consistent with the administration's policy of seeking improved governmental efficiency, the budgets of two regulatory departments reflect modest organization and operational changes. The Department of Alcoholic Beverage Control has budgeted $24,000 in 1962-63 for the purpose of converting their licensing activity to a machine operation and at the same time issuing a permanent type license. Savings, after initial conver-

CHART 15

COMPARATIVE EXPENDITURES FOR BUSINESS AND COMMERCE

(In millions)



sion costs are absorbed, will approximate $15,000 a year. The Department of Professional and Vocational Standards, upon executive order of the Governor, activated the Division of Investigation. This new organization centralizes the investigation and inspection activities of 22 member boards and commissions in the department and is designed to improve the quality of investigation and inspection, and provide better service to the public.

The Public Utilities Commission is entering a new phase of the out-of-State gas rate proceedings by participating in Federal Power Commission hearings on area pricing of gas at wellhead. This new concept, if proven feasible, will make it possible to eliminate many individual rate proceedings and secure better rates for out-of-State gas consumers. Since California imports about three-fourths of its supply from these sources, it is essential that the Commission continue to intervene for the protection of the consuming public of California.

Fiscal year 1961-62 was climaxed by intensive investigation of the so-called "10 percenter" commercial frauds by member divisions of the Department of Investment. To discourage further crimes of this nature, legislation was enacted at the 1961 General Session with the Division of Real Estate and the Division of Corporations having prime responsibility for regulations, licensing and control. However, for other types of business and commercial frauds, the Attorney General has organized the Investment Frauds and Business Crimes Unit to centralize the commercial fraud investigation activities in one department. Member divisions of the Department of Investment will furnish experienced personnel to the Attorney General on an emergency basis.

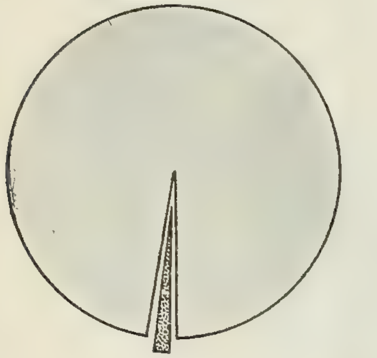
Public Safety—$22,985,000



0.8% OF TOTAL BUDGET

The category of public safety represents those State agencies concerned with protection of the public on a statewide basis, exclusive of the California Highway Patrol which has a closer working relation with the Transportation Agency. Included in this group are such activities as the California Disaster Office, the State Fire Marshal, the Department of Justice, the Military Department, and the Department of Veterans Affairs.

With the resumption of atomic testing and the increase in international tensions, the California Disaster Office has been faced with greater demands by both local government and the general public to provide information and training on how to cope with disaster situations, particularly in the event of an atomic explosion. A major concern has been in how to convert existing structures and build new structures to provide adequate protection against radioactive fallout. A survey of existing facilities is being made to locate and designate all potential facilities for protection of citizens of the State. Increased federal participation in local and State disaster programs through Public Law 85-606 has made available $741,000 in federal funds to the State program to carry out the increased responsibilities to the public. In addition, total State expenditures are increased by $67,000 to a level of $1,011,000 primarily to provide supplemental emergency fire service for the Los Angeles watershed area.

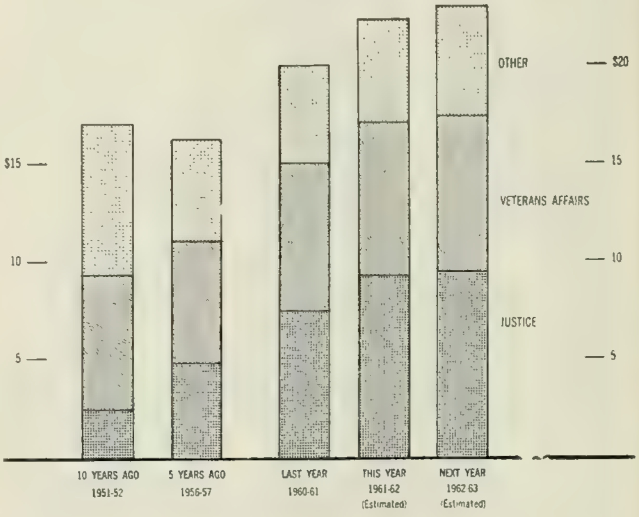
Provision has been made in the Military Department budget to increase the strength of the National Guard Reserve from 600 to 2,100 men at a cost of $100,000 in order to assure the availability of a rudimentary home guard organization, for civil defense purposes, in the event National Guard units are called to federal service.

The fire prevention and protection program of the Fire Marshal over the past few years has been shifting from a consultive role to more direct regulation and enforcement. This is emphasized by the recent addition of such regulatory programs as the transportation of flammable liquids and sale of servicing of fire extinguishers. In the consultive role the principal activity is the development and application of uniform standards of fire safety and protection.

In the Department of Justice, it is expected that the Supreme Court will render a decision which will result in termination of the need for the Colorado River Litigation Section by March 31, 1962. Positions are provided in the Bureau of Criminal Statistics to continue the narcotic reporting program on a permanent basis. Further step up in the narcotics program is

CHART 16

COMPARATIVE EXPENDITURES FOR PUBLIC SAFETY
(In millions)



evidenced by the provision of an in-service training program for narcotic agents.

It is proposed that a bond issue of $250,000,000 be authorized in 1962 in order that the Department of Veterans Affairs may continue its program of assisting California veterans in the purchase of farms and homes. All of the 180,000 applications for loans received to date have now been processed, and with the elimination of all backlogs this bond issue can now be curtailed from its former high level which would otherwise have required $400 million for the same period.

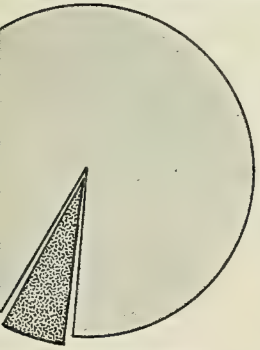
Other Expenditures—$184,891,000



% OF TOTAL BUDGET

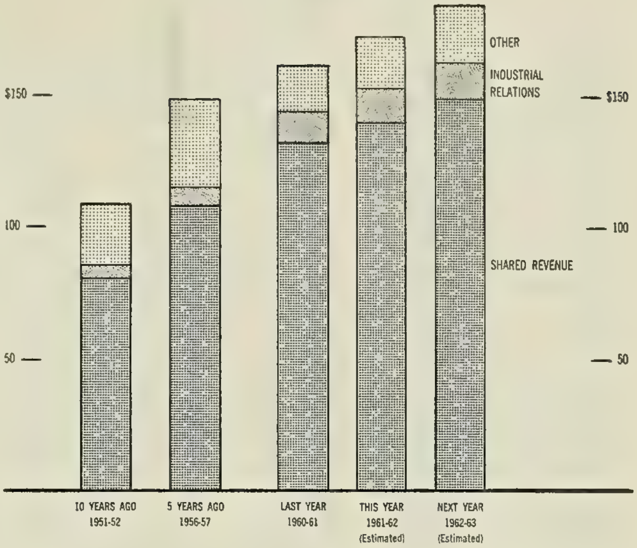
Activities of the State which are not conveniently classified into any of the foregoing eight broad functional groups are included in this category of costs. Covered here are such miscellaneous functions as legislative and judicial activities, and the Departments of Employment and Industrial Relations. The major portion of this category comprises the distribution of vehicle license fees and liquor permit receipts to city and county governments. Of the $184.9 million total, $149 million represents the return of these State-collected local revenues.

Expenditures for the Department of Industrial Relations are expected to increase from $12.3 million during the current year to $13.8 million during the budget year. Population pressures will again require an increase of 10 referee teams in the Industrial Accident Commission, at a cost of $410,000. Also included in this budget are the reopening of Industrial Welfare wage orders to review minimum wages for women and children and to permit implementation of 1961 legislative provisions for labor camp registration, State housing law enforcement in unincorporated areas, and mobile homes and mobile home parks inspection.

CHART 17

OTHER EXPENDITURES

(In millions)



Although expenditures of the State Department of Employment involve Federal subventions and trust funds and are not included in the budget total, the activities of this agency are of such magnitude and importance as to require review here. Program costs will increase from $659 million during the current year to $776 million during the budget year, and include an increase of unemployment benefit payments of $75 million and increased disability insurance benefits of about $40 million. This latter increase is primarily due to the extension of disability and hospital benefits to agricultural workers in accordance with 1961 legislation.

---

[1] There is $1,114,677.33 in the Sacramento State Building Interest and Sinking Fund in excess of $3,000,000 required to redeem all of the outstanding bonds.

[2] Funds were transferred from the General Fund to the Bond Sinking Fund of 1943 to pay the interest and principal on these issues to final maturity; however, $5,000,000 was loaned to the Highway Fund for the Golden Gate Bridge and Highway District.

[3] Money is transferred from the Motor Vehicle License Fee Fund to the General Fund in the amount required to pay the interest and redemption costs.

[4] Repayments from the school districts are available to pay part of the interest and redemption costs.

[5] Chapter 104, Statutes of 1958, First Extraordinary Session, authorizes bonds to be issued amounting to $20,000,000 to repay the amount paid directly out of the General Fund for the school building aid program. There is no intention to sell these bonds.

[6] The servicing of these bonds is primarily the responsibility of the San Francisco Harbor Improvement Fund, the Veterans Farm and Home Building Fund of 1943, the California Water Resources Development Bond Fund, and the Small Craft Harbor Improvement Fund.

[7] Chapter 1762, Statutes of 1959, Regular Session, Section 12937, appropriates from the General Fund such sum annually as may be necessary to pay the principal and interest due on the bonds issued and sold. Funds shall be transferred from the California Water Resources Development Bond Fund to the General Fund for the annual payment of principal and interest on bonds issued, but such payments shall be made only after the payment of the reasonable costs of the annual maintenance and operation of the State Water Resources Development System and the replacement of any parts thereof.

[8] Callable on and after January 2, 1951, in the amount available in the Sinking Fund.

[9] Callable on and after January 2, 1955, in the amount available in the Sinking Fund.

[10] Five hundred thousand dollars callable on and after March 1, 1971.

[11] Callable on and after January 2, 1941 in the amount available in the Sinking Fund.

[12] Chapter 103, Statutes of 1958, First Extraordinary Session, authorizes the issuance of bonds totaling $50,000,000 for the San Francisco Harbor and $10,000,000 for the development of small craft harbors.

Personnel man-years	69.2	59.6	71	11.4

GENERAL ANALYSIS

Objectives

The Legislative Counsel Bureau provides legal assistance to the Legislature and state officials in drafting legislative measures, gives legal advice, acts as counsel for committees of the Legislature, and represents the Legislature and legislators in litigation. It maintain indexes, tables and digests of all legislative measures, and edits, compiles and indexes state legal publications for the State Printer.

Program and Performance

Legal services furnished include opinions, bill drafting, counseling, and attendance as counsel at meetings of committees of the Legislature. The attorney-client relationship is maintained, and all work is confidential.

In addition, the office maintains an Indexing Section, which indexes all bills introduced, maintains a statutory record, and acts as editor and compiler of all state-published codes and the official publication of the statutes. The work of this section during the sessions is published as Interim Subject List, Tables of Sections Affected, and Final Subject List.

The overall increase in expenditures reflects the change from the 30-day Budget Session to the 120-day General Session.

GENERAL ANALYSIS

Objectives

The commission consists of a Member of the Senate appointed by the Committee on Rules, a Member of the Assembly appointed by the Speaker, and 7 additional members appointed by the Governor with the advice and consent of the Senate. The Legislative Counsel shall be an ex officio nonvoting member of the commission.

This commission examines the law to discover defects and recommends needed changes, receives proposed changes in law recommended by other bodies, recommends changes in the law necessary to modify or eliminate obsolete or unconstitutional provisions, and reports proposed studies to the Legislature.

Program and Performance

The workload of this commission is determined primarily the number of studies assigned to it by the Legislature. Beca studies are scheduled for completion just prior to the gen session of the Legislature, workload statistics presented be are discussed in terms of fiscal periods of 2 years.

	Actual 1957-59	Actual 1959-61	Estim 1961
Studies	12	10	7

A study on Sovereign Immunity is one of the studies schedu for completion in 1961-1963, and in addition substantial pr ress will be made on the study of the Uniform Rules of E dence.

SUMMARY				
TOTAL EXPENDITURES				
Senate apportionment study *(General Fund)*	—	$25,000	—	—$25,00

GENERAL ANALYSIS

The Study Commission on Senate Apportionment was established by Chapter 607, Statutes of 1961.

The commission consists of 2 members of the Senate, 2 members of the Assembly and 5 nonlegislative members appointed by the Governor.

The commission may do any and all things necessary or convenient to enable it to exercise the powers and perform the duties in studying and analyzing all facts relating to representation in the State Senate, including but not limited to, proposals designed to modify the present federal plan of apportionment by increasing the representation of extremely heavily populated counties without destroying or rendering ineffective the tes principals of equitable representation for all geographic ar of the State.

The commission shall report its findings to the Governor a the Legislature not later than February 10, 1962.

The members of the commission shall serve without comp sation, but each member shall be allowed actual expenses curred in the discharge of his duties, including necessary tra expense.

The existence of the commission shall terminate on the 9 day after final adjournment of the 1962 Regular Session.

CONTRIBUTION TO LEGISLATORS' RETIREMENT FUND

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	CHANGE FRO 1961-62
SUMMARY				
TOTAL EXPENDITURES				
Budget Act appropriation *(General Fund)*	$120,000	$140,000	$160,000	$20,000 (14.3%

GENERAL ANALYSIS

The State's contribution to the Legislators' Retirement Fund represents that portion of benefits to be paid from the fund which is not provided by the accumulated contributions of the members receiving such benefits. By reason of Chapter 1897, Statutes of 1961, the minimum age of retirement has been duced from age 63 to age 60 and retirement allowances f members of the Legislature having more than 15 years servi have been increased.

SUPREME COURT

Office in San Francisco

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	CHANGE FROM 1961-62
SUMMARY				
TOTAL EXPENDITURES				
Support *(General Fund)*	$890,465	$886,524	$916,299	$29,775 (3.4%)
Personnel man-years	63.7	63.6	65.8	2.2

GENERAL ANALYSIS

The Supreme Court reviews cases including appeals in cases of equity, cases at law involving title or possession of real estate, taxation and probate matters, and death penalty cases. It also has jurisdiction to review all cases decided by the several district courts of appeal. In addition, it has original jurisdiction to issue writs of habeas corpus, mandamus, prohibition, and certiorari. The court admits to the bar. It must also consider all executive clemency applications submitted to the Governor where the applicant has suffered 2 or more felony convictions.

This budget continues existing level of service. The proposed addition of 1 assistant reporter of decisions and 1 legal secretary to the chief justice's staff are necessary to match the workload increases in those areas created in part by the addition of 2 new appellate divisions and 1 new District Court of Appeals. The greater caseloads necessitating increases in most of the lower courts recently are imposing a like burden on this court.

GENERAL ANALYSIS

Objectives

The Judicial Council is a constitutional agency which is composed of 12 judges, 4 lawyers and 2 legislators. The council is under the chairmanship of the chief justice. Its duties include: (1) surveying the business of all courts with a view toward simplifying and improving the administration of justice; (2) submitting suggestions to the courts in the interest of the uniform and expeditious conduct of business; (3) submitting recommendations to the Governor and the Legislature; and (4) adopting rules of procedure for the courts.

Program and Performance

The chairman expedites and equalizes the conduct of judicial business by assigning judges to act where calendars are congested, judges are disqualified, or vacancies exist. Judges are required to serve as assigned and to report to the chairman concerning the conduct of business in their courts.

The Judicial Council employs a staff, known as the Admini trative Office of the California Courts, which is under tl supervision of an administrative director of the courts select by the council. This office performs staff functions for the cou cil and its chairman in connection with the work of its co mittees, in the making of specialized reports and studies, and i the gathering of statistical information concerning the busine of the courts.

This budget continues the existing level of service, except follows: 4 positions are reclassified and 5 additional sten graphic positions are provided in order that the office may begi to function as an administrative and management agency f the courts.

The item covering extra compensation and expenses of a signed judges reflects a reduction of $14,000 due to the workloa that will be absorbed by the expansion of the number of justic authorized by the 1961 Legislature.

GENERAL ANALYSIS

The Commission on Judicial Qualifications, established pursuant to Article VI, Section 1b and 10b of the Constitution, has authority to hear charges against any judge of a California court and to recommend to the State Supreme Court the removal of a judge for wilful misconduct in office, wilful and persistent failure to perform his duties or habitual intemperance, or his retirement for permanent disability seriously interfering with the performance of his duties.

The commission receives information concerning California judges under those provisions and investigates such matters. Statutory provisions to implement the Constitution were enacted at the 1961 Session of the Legislature and are in effect (Chapter 564, Statutes of 1961, Government Code Sections 68701-68755). The Rules for Removal or Retirement of Judges were effective August 1, 1961 and were published in the August 4 issue of the California Supreme Court Advance Sheets (56 A.C. 307).

The Commission on Judicial Qualifications consists of 9 members: 2 justices of district courts of appeal, 2 judges of superior courts, 1 judge of a municipal court, 2 members of the State Bar, and 2 citizens appointed by the Governor in accordance with Section 1b of Article VI of the Constitution.

GENERAL ANALYSIS

The court has appellate jurisdiction in certain cases arising in the superior courts and cases on appeal within the original jurisdiction of the municipal and justice courts, where necessary to secure uniformity of decision or settle important questions of law, in Alameda, Contra Costa, Del Norte, Humboldt, Lake, Marin, Mendocino, Monterey, Napa, San Benito, San Francisco, San Mateo, Santa Clara, Santa Cruz, Solano, and Sonoma Counties. The court also handles appeals and original proceedings transferred to it by the Supreme Court. In addition, the court has power to issue writs of mandamus, certiorari, prohibition and habeas corpus. The court consists of 3 divisions of 3 justices each.

This budget contains the establishment of a third division effective September 15, 1961, as provided for by Chapter 845, Statutes of 1961.

The proposed legal research aid and stenographic positions are necessary to handle the large volume of writs. The addition of 7 counties to this district associated with the creation of the third division of this court will substantially increase this workload.

GENERAL ANALYSIS

The court has appellate jurisdiction in certain cases arising in the superior courts and cases on appeal within the original jurisdiction of the municipal and justice courts, where necessary to secure uniformity of decision or settle important questions of law, in Imperial, Inyo, Orange, Riverside, San Bernardino, and San Diego Counties.

The court also handles appeals and original proceedings transferred to it by the Supreme Court. In addition, the court has power to issue writs of mandamus, certiorari, prohibition and habeas corpus. The court consists of 1 division of 3 justices and holds its regular sessions at San Diego. The court also holds sessions at San Bernardino at least 3 times each year and, in addition, whenever necessary to keep its calendar current with respect to cases originating, or appealed from Superior Courts in the San Bernardino section.

The counties of Fresno, Kern, Kings, and Tulare were transferred from the responsibility of this court by Chapter 845, Statutes of 1961. This act, with the establishment of the Fifth Appellate District, eliminated the requirement of the court to meet 4 months each year in 3 different locations.

GENERAL ANALYSIS

The Constitution of the State of California vests the supreme executive power for State Government in the office of Governor. In order to effectively administer the far-reaching programs and services which government provides the people, the Governor has broad powers to plan, organize, direct, and co-ordinate the activities of state agencies and to appoint various state officers and members of many boards and commissions.

Along with his executive responsibilities, the Governor presents to the Legislature the state budget outlining anticipated programs and the means by which they will be financed. He also reports to the Legislature on the condition of the State and makes various legislative proposals.

GENERAL ANALYSIS

Objectives

This office is charged with broad responsibilities with respect to atomic energy development and radiation protection. In that field, the coordinator is required to: advise the Governor and the Legislature; co-ordinate the activities of all state agencies with each other, with the cities and counties, with other states, and with the Federal Government; act as liaison to other states and the Federal Government, including the Atomic Energy Commission; and disseminate information to the public and to state agencies.

Two advisory groups are prescribed by statute: an Advisory Council of 10 members appointed by the Governor, representing 10 areas of public interest in atomic energy matters, and a departmental co-ordinating committee of 16 members, who are the heads of those state agencies principally involved in atomic energy affairs.

Program and Performance

The principal current program of this office is concerned with developing a statewide, integrated system for optimum control of radiation hazards that is compatible with the federal system, so as to facilitate transfer of federal regulatory authority to the State; that will avoid unnecessary restriction of beneficial uses of atomic energy and radiation; and that will permit most effective use of the specially trained personnel of state and local governmental agencies. Measures enacted in the 1961 legislative session have established the necessary statutory framework within which regulations are being prepared and interagency agreements are being developed. Negotiations with the Atomic Energy Commission have been in progress working toward a contractual agreement for transfer of a substantial segment of the Atomic Energy Commission's statutory control over most radioactive materials.

With the resumption of nuclear testing, programs have been developed to assure interdepartmental co-ordination with respect to fallout information and plans for action in event of increased radioactivity, and to improve co-ordination of state and local agency efforts in disseminating information to the public.

GENERAL ANALYSIS

Objectives

This activity of the Governor's office, created by Chapter 467, Statutes of 1959, is responsible for advising the Governor on all matters affecting the interests of the people as consumers, and as to methods to increase the competence of the people as purchasers. The Consumer Counsel recommends to the Governor and to the Legislature the enactment of such legislation as is deemed necessary to protect and promote the interests of the people as consumers.

Program and Performance

The counsel makes such investigations and studies as are necessary to accomplish these functions, and renders reports to the people of the State. A 15-member advisory committee has been appointed by the Governor to assist the Consumer Counsel.

Included in the 1962-63 fiscal year is one clerical position to provide service for the field representative in Los Angeles. Workload in this area has increased and an office will be established.

GENERAL ANALYSIS

Objectives

This agency has the responsibility for planning and co-ordinating a statewide program for emergency relief operations in the event of natural or war-caused disaster, and for providing leadership and assistance to other state agencies and local governments in the development of an effective state of operational readiness, as provided in Chapter 1, Division 7, of the Military and Veterans Code. The objectives of this program are:

(1) A fully prepared State Government, with those departments and agencies having emergency responsibilities prepared to carry out their assigned emergency jobs under disaster conditions;
(2) Fully prepared county and city governments;
(3) A co-ordinated and integrated federal-state-local emergency preparedness program;
(4) A well-informed and adequately prepared public.

The California State Disaster Council, appointed pursuant to the California Disaster Act, Section 1510 of Military and Veterans Code, is composed of the Governor, Lieutenant Governor, Attorney General, President pro tempore of the Senate, Speaker of the Assembly, and representatives of city government, county government, the American Red Cross, city or county fire services, and city or county law enforcement services.

In addition to its general responsibility of acting "as an advisory body to the Governor in times of war or disaster and with reference thereto in order to minimize the effects of such occurrences by recommending ameliorative action," the Disaster Council is also charged with responsibility for certain specific duties: (1) to accredit city and county disaster councils; (2) to approve boundaries of mutual aid regions and inter-regional and regional mutual aid plans; (3) to recommend for approval a State Disaster Plan, certain rules, regulations and orders, assignment of disaster responsibilities to state departments, creation of advisory committees, and expenditures of monies appropriated for the objects or purposes of disaster preparedness and relief; (4) to encourage development of effective local mutual aid plans; (5) and to evaluate and report to the Governor on state communications systems with particular regard to their adequacy in case of disaster.

Program and Performance

This office has been organized with a central administrative staff and a group of specialists who are responsible for the pre-emergency planning, training, and organization for disaster operations; providing technical guidance and assistance to other state agencies and local governments in their efforts to prepare themselves for emergency operations; and specific services that would be required during an emergency.

A field organization has been established, which includes 6 regions staffed by coordinators whose assignments are to implement the program on a comprehensive basis.

Under the provisions of the California Disaster Act and Executive Order No. 60-CD-1, this office is responsible for:

(1) the development and maintenance of the master emergency plans and programs of the State;
(2) the assignment of appropriate emergency roles to the other agencies of California State Government and to the local governments in California;
(3) providing direct assistance to state agencies, and to the local governments of California in programing and planning, organizing, equipping, and training the necessary emergency organizations;
(4) effecting the necessary co-ordination between federal, state and local emergency plans;
(5) representing all agencies of State Government and the local governments of California in obtaining available federal funds and equipment to implement approved emergency plans and programs;
(6) co-ordination of planning activities pertaining to the post-attack resources management and economic stabilization functions which might have to be performed by state agencies, due to disruption of normal procedures on a national basis.

In addition to performing on a day-to-day basis, the function described in (1) through (6) above, this office must be in constant readiness to perform its own emergency role. As a result of a recently approved change in the organization of State Government for emergency purposes under which the cabinet acts as a Disaster Control Board for the Governor, the office functions as the immediate staff and co-ordinating organization of the Chief Executive and the emergency operating agencies of State Government in carrying out the State's responsibilities under the California Disaster Act and applicable federal statutes.

A large quantity of emergency equipment has been procured and stored throughout the State in the care of state and local agencies, all of which has to be inspected and maintained to insure its immediate availability for use in the event of a major disaster.

During the past year, a major increase in workload has resulted from increased demands by individuals and local governments for assistance in building or acquiring facilities for fallout protection. The Federal Government has instituted a program under which a survey of all existing facilities which offer a potential against radioactive fallout will be conducted. The initial phases of this program will be under federal control. The subsequent phases, however, will require staff support from the Disaster Office. The purpose of the survey is to locate, designate, and stockpile all potential facilities for protection of citizens in the State.

Increased federal participation in local and state disaster programs through Public Law 85-606 has led to a substantial increase in the California program. An additional 43 positions have been established and $47,500 provided for modifications to the existing microwave system during the current fiscal year to improve the State's capacity in dealing with any potential disaster. These additional positions have been added as a result of these federal matching funds being made available. This also has permitted more extensive co-ordination with and better development of local programs and better public information and training of the general public. The 43 positions are continued in the budget year.

A further expansion of this program is proposed in 1962-63 with the addition of another 20 proposed new positions. A continuation of the program to bring more outlying areas and different communications systems into central control points and certain modifications to the existing microwave system for greater disaster capability are proposed in the equipment allotments. Also, 3 additional fire pumpers for the Los Angeles area and the modification of existing pumpers for watershed fire protection is provided for in this budget.

GOVERNOR'S ADVISORY COMMISSION ON HOUSING PROBLEMS

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	CHANGE FROM 1961-62
SUMMARY				
TOTAL EXPENDITURES				
Support *(General Fund)*	–	$75,000	$75,000	–
Personnel man-years	–	1	2	1

GENERAL ANALYSIS

Objectives

The Governor's Advisory Commission on Housing Problems was created by Chapter 1242, Statutes of 1961 and terminates June 30, 1963. The commission consists of 11 members appointed by, and serving at the pleasure of the Governor. Two Members of the Assembly, appointed by the Speaker, and 2 Members of the Senate, appointed by the Senate Committee on Rules meet with and participate in the work of the commission. The commission has as its purpose the study of housing needs in California, both public and private to determine how best the State can use its powers to meet those needs.

Program and Performance

The commission is to make a detailed study of housing needs as they affect all persons within the State, the home-building industry, and the various systems of home financing.

A progress report will be submitted to the Governor and the Legislature at the beginning of the 1962 Regular Session, and a final report at the 1963 Regular Session.

An executive director and a clerical position have been appointed by the commission to assist in carrying out the provisions of Chapter 1242. It is anticipated that contracts will be let to provide services necessary to fulfill the commissions responsibilities.

GENERAL ANALYSIS

The Lieutenant Governor is elected to hold office for the same term as the Governor. In the absence of the Governor from the State, the Lieutenant Governor must assume the duties of the chief executive. He presides over the State Senate during its sessions. He is a Regent of the University of California, and member of the Board of Trustees of the State College System. He is chairman of the State Lands Commission and chairman of the Commission on Interstate Cooperation, member of the State Toll Bridge Authority, the California Disaster Council, the Re-apportionment Commission, and the California Reciprocity Commission.

Offices are maintained in both Sacramento and Los Angeles for the convenience of the public.

GENERAL ANALYSIS

Objectives

The primary purpose of the State Employees' Retirement System is to provide for the orderly retirement of employees who reach an age, or condition of disability, such that they cannot normally be expected to discharge their responsibilities with the desired proficiency, and to provide further that the retirement compensation offered be sufficient to attract and retain personnel of the required caliber. The policy-fixing body for the retirement system is its 8-member Board of Administration, consisting of the Director of Finance, a member of the State Personnel Board, 3 members elected from the members of the system, a life insurance company official, a bank officer, and a representative of the University of California. One of the board's most important functions is to invest money contributed by participants in the retirement system. The board also administers the Legislators' Retirement System.

Program and Performance

Members of the State Employees' Retirement System consist of state employees (including most University of California employees employed prior to October 1, 1961) and employees of more than 300 local governmental jurisdictions, participating on a contractual basis. During the 1960-61 fiscal year, 24 additional governmental jurisdictions came under contract with the system for retirement benefits. The total number now contracting is a lesser figure than that reported in prior fiscal years due to the fact that many school districts throughout the State contracting on an independent basis with the retirement system are now included in the contract of the County Superintendent of Schools. Members of the Legislators' Retirement System consist of Legislators and elective state officials who elect membership.

During the 1960-61 fiscal year, the number of members of the State Employees' Retirement System also covered by Social Security benefits exceed 48,000. The 1959 survivor benefits available within the framework of the State Employees' Retirement System now cover in excess of 70,000 members.

Legislation enacted during the 1961 Session extended Social Security coverage to state employees. The legislation permitted each state employee who was a member of the retirement system on or before November 6, 1961, to select or reject Social Security coverage on an individual basis. State employees becoming members of the system subsequent to November 6, 1961, will have Social Security coverage automatically, integrated with a modified retirement formula. It was also provided in the legislation that the costs of the administration of this extension of Social Security coverage for state employees during the 1961-62 and 1962-63 fiscal years would be borne by those who optionally selected such Social Security coverage. The Board of Administration is empowered to set a charge not to exceed $10 per person to fund these costs. The initial count shows 33,390 state employees optionally selecting Social Security coverage, and the Board of Administration has acted to set the administrative cost charge per individual at $10.

Thirteen permanent positions were added to the staff during the 1961-62 fiscal year, together with an augmentation for temporary help, operating expenses, and equipment to undertake the increased workload in extending the Social Security coverage to state employees so desiring, and to establish the necessary record keeping to continuously provide this coverage to new members of the system. Provision was also made to pay approximately $88,000 to the State Controller for additional electronic data processing programming costs incurred by the Disbursements Division in connection with the social security integration program. An increase was also required in operating expenses to provide for the pro rata fiscal charges which had originally been budgeted without the benefit of previous experience since the Retirement Fund changed over from a General Fund to a special fund operation during the period from July 1, 1959, through June 30, 1961.

The 1962-63 Budget includes 4 proposed new positions. One position is requested for the investment function resulting from the growth of the system's portfolio and the continuing diversification of areas being investigated for investments. Two positions are requested to augment the Los Angeles and San Francisco offices of the system based upon the increasing volume of members requesting information on the topics of retirement coverage and benefits, Social Security coverage, and their rights and benefits under the Meyers-Geddes State Employees' Medical and Hospital Care Act. The fourth position is a change from a contractual arrangement to a permanent position to provide staff administrative analyst services. This is a part of the ongoing program to develop improved work methods and procedures. Temporary help is increased 13.8 man-years in 1961-62 of which 3.8 man-years is continued into 1962-63 to meet the enrollment workload of the new legislative programs.

During the budget year 23 positions will be abolished as a result of the conversion to electronic data processing. The reduction in staff will mean a savings of $75,068 in salaries and wages during 1962-63 and a full-year savings of approximately $120,000 to be realized in subsequent years.

Increases in operating expenses in the 1962-63 fiscal year are mostly for expenses that will be incurred in the year of conversion from punched card to electronic data processing methods, and also further anticipated increases in the pro rata fiscal charges that will be levied on the State Employees' Retirement System.

---

[a] Trust funds, revenues and expenditures are excluded from overall budget totals.

OLD AGE, SURVIVORS' AND DISABILITY INSURANCE

Objectives

To act for the State in administering the Old Age, Survivors, and Disability Insurance Program for public employees within the State under such coverage.

Program and Performance

This program is conducted under the Federal Social Security Act and in accord with provisions of state law and a federal-state agreement. Financing of the program is derived basically from assessment of the political subdivisions participating in the program. Presently, there are 2,481 political subdivisions participating, with approximately 128,000 employees covered. It is anticipated that in the 1962-63 fiscal year, the number of participating political subdivisions, exclusive of the State, will reach 2,500. As indicated in the general analysis, extension of Social Security coverage to state employees affects the operations of this organizational unit of the system. During the 1961-62 fiscal year, 3 permanent positions were added to the staff to cope with the workload resulting from the initial coverage of 33,390 state employees, plus all of those who will subsequently have such coverage as a result of the legislation. Corresponding increases in operating expenses and equipment were needed. The increased costs in the 1961-62 and 1962-63 fiscal years will be borne by the state employees who elect to be covered by Social Security.

HEALTH BENEFITS

Objectives

To promote increased economy and efficiency in state service. To enable the State to attract and retain qualified employees by providing health benefit plans similar to those commonly provided in private industry. To recognize and protect the State's investment in each permanent employee by promoting and preserving good health in and among state employees.

Program and Performance

This program is conducted under the provisions of the Meyers-Geddes State Employees' Medical and Hospital Care Act. The program is administered by the Board of Administration of the State Employees' Retirement System whose composition, when acting in the administration of this act, is augmented by 3 members representing the public, appointed by the Governor.

The act provides that the board make contract with carriers for basic health benefit plans or approved basic health benefit plans offered by employee organizations under certain provisos. Within the limitations of the act, the board is also empowered to prescribe eligibility for participation in the plans and establish standards. For those employees who are eligible, the State

STATE EMPLOYEES' RETIREMENT SYSTEM—Continued

HEALTH BENEFITS—Continued

Program and Performance—Continued

will contribute up to a maximum of $5 per month toward the amount necessary to pay the cost of a basic health benefits plan approved under the act.

The State's contribution toward the cost of a basic health benefits plan is charged to the fund from which the employee's salary is derived.

The cost of administration of the program is also derived from the various state funds by which the employees are paid, and the amount assessed against the funds for each fiscal year is to be determined by the Board of Administration, but not to exceed 2 percent of the total of the contributions made by the employee or annuitant and the State on behalf of the employee or annuitants, under a plan approved under the act. It is anticipated that in the 1961-62 fiscal year, between 50,000 and 80,000 eligible employees and annuitants will enroll.

Retirement officers are proposed for both the San Francisco and Los Angeles offices in 1962-63 to provide service to local members on matters connected with the act. Cost of payroll deductions and initial programming costs in State Controller's Office for this program are provided in contractual expenses of this Division. This amounts to $93,402 in 1961-62 and $62,950 in 1962-63.

GENERAL ANALYSIS

Objectives

The Commission consisting of 7 Senators, 7 Assemblymen, and 5 officers of the State appointed by the Governor, formulates proposals for co-operation with other states and the Federal Government and participates in the regional and national councils of state governments.

Program and Performance

The principal item of expenditure by the Commission is California's proportionate share of the cost of operation of the National Council of State Governments.

The council is a research and service agency which assists the various interstate associations of state officials consisting of representatives from the several states.

GENERAL ANALYSIS

Objectives

Under the State Civil Service Act, the Personnel Board is responsible for serving the personnel needs of state agencies as well as providing leadership for these agencies in improvement of personnel practices and procedures and in personnel management. The board which consists of 5 members appointed by the Governor for 10-year terms, prescribes, amends, and repeals rules as necessary to administer the State Civil Service Act, and sets the general policies for the Personnel Board. Technical personnel services are provided for political subdivisions on request.

Program and Performance

Under the general policies of the Personnel Board, the executive officer directs the various divisions in recruiting, examining, certifying, adopting suitable pay rates, co-operating in training, and establishing standards of health and safety. The functions of the divisions have become more complex during the past few years due in part to the continued growth in number of state employees and the condition of the labor market.

Continuing emphasis is being put on research to develop methods to improve and save on time and staff. New procedures have been and are being introduced due to this work. Training courses are being conducted for various state departments to develop personnel efficiency and promote better departmental training programs.

This budget contains a request for 1 additional technical position, 1 additional clerical position, and 0.8 man-year in temporary help to service the expanding needs of the agencies in engineering recruitment. Increases in advertising and travel provide the necessary operating expenses for the engineering recruitment positions. Increased workload in examination proctoring will require 0.9 of a position in temporary help.

BOARD

Objectives

The board adopts general policies and rules, establishes job classes and pay ranges, and hears and decides appeals from disciplinary and other actions.

The board consists of 5 members appointed by the Governor to carry out the administration's policy and provide effective, economical administration of laws affecting this department.

Program and Performance

The board meets once every 2 weeks for 2 days. The meetings are scheduled at Sacramento, San Francisco, or Los Angeles.

The hearing officer presides at hearings on appeals concerning civil service status. The number of these hearings has become too numerous for the Personnel Board and its hearing officer and assistance from the Office of Administrative Procedure is required.

ADMINISTRATION

Objectives

Within the general policies, this division plans, directs, coordinates, and controls the work of the various divisions of the board.

Program and Performance

The executive officer directs the line functions of the board through the assistant executive officer who directly supervises the chiefs of the Personnel Services Division, Recruitment and Field Services Division, Examining Standards Division, and Office Services Division. The chiefs of the staff divisions, including Co-operative Personnel Services Division, Standards and Surveys Division, Training Division, the Administrative Service Officer, and Personnel Management Consultant report directly to the executive officer.

PERSONNEL SERVICES DIVISION

Objectives

This division maintains and revises the classification and pay plans for civil service employees. The division is charged with the responsibility for the preparation of examinations utilized in the state selection program for civil service employees. Upon specific request, the division also conducts classification and pay studies for certain exempt employees.

Program and Performance

Operations Section, consisting of 5 units, performs the day-to-day classification and examining work of the Personnel Board. These units also analyze and prepare recommendations concerning salary ranges for civil service classes and establish new or revised civil service classes.

Examining Services Section is responsible for scheduling activities such as the written examinations, oral interviews, and the conducting of investigations of applicants for state employment. Workload in this section includes examination proctoring which function will require an additional 0.9 man-year in temporary help in the budget year.

The activities of this division are influenced by such factors as growth in the number of state employees, changes in the scope and variety of state programs and functions, labor market conditions, the activity of employee and other organized groups, and changes or additions to laws and rules affecting the State Civil Service System.

As state service enlarges, various steps have been and are being taken to streamline and update technical processes to best utilize technical staff time. In recent years, clerical assistance has been added to relieve technicians of certain detail work; in the interest of efficient use of technical staff, changes in procedures have been implemented; continuing effort is being placed in reviewing operating procedures to develop the most effective and economical methods of fulfilling the legal responsibilities vested in the board.

RECRUITMENT AND FIELD SERVICES DIVISION

Objectives

The primary functions of the division are to attract qualified applicants to compete for positions in the state service, to provide information concerning state employment, to administer continuous testing programs, and to provide assistance in personnel matters to state agencies. Branch offices are maintained in San Francisco and Los Angeles to provide assistance to state departments and the public.

Program and Performance

The public information counters at Sacramento, Los Angeles, and San Francisco give information concerning the state civil service to state employees and the public. The number of contacts at these information counters is increasing with the population growth and the increased economic activity in the State.

The division also supervises the proctoring of state examinations in the metropolitan centers and administers continuous clerical testing. As a result of several studies, a number of other examining programs are being decentralized to the field offices.

The division has programs designed to provide direct and continuing contact with employment sources such as colleges, labor unions, placement services, technical and professional associations, and other organizations to create favorable long-term interest in state employment as a career in schools and colleges and to advertise and personally recruit at sources of labor supply. The workload has increased with the rise in the number of authorized positions in the state departments. The division is attempting to measure the effectiveness of various recruitment media and techniques. It is planned to offset, in part, workload increases and improve recruiting by effecting closer co-operation with operating departments and their field offices throughout the State and through extension of the practice of recruitment through employees.

This budget contains a request for 1 additional technical position, 1 additional clerical position, and 0.8 man-year of assistance in temporary help to service the expanding needs of the agencies in engineering recruitment. Increases in advertising and travel provide the necessary operating expenses for the engineering recruitment positions.

[a] One-half position transferred from temporary help to Los Angeles and temporary help increased 0.4 position.

PERSONNEL BOARD—Continued

STANDARDS AND SURVEYS DIVISION

Objectives

This division develops classification and pay policy, standards, and techniques. It conducts general wage, salary, and employee benefits surveys to facilitate keeping state salaries in reasonable relation to those paid in other governmental jurisdictions and private employment. It conducts agency classification and personnel management surveys. It develops physical standards for jobs, directs the program of pre-employment physical examinations, and advises agencies on medical phases of personnel programs. It reviews procedures of various operating units of the board to eliminate unnecessary activities and develop improved procedures.

Program and Performance

In conjunction with the agency classification survey program, emphasis is being placed on the development and improvement of classification standards and encouraging the participation of line supervisors in the classification process. In an effort to meet the future needs of state service, the division is engaged in long-range studies of various plans to cope with the problems inherent in the increasing size and complexity of State Government. These include the experimental development of allocation controls by postaudit reviews to replace preaudit of individual appointment documents.

EXAMINING STANDARDS DIVISION

Objectives

The function of this division is to insure the adequacy of the State's personnel selection program. One of its units develops policies and standards and prepares operating manuals for the guidance of the staff, evaluates the effectiveness of the selection program, develops and co-ordinates improved methods of selection such as continuous testing, trains the staff in examining techniques, and produces form or standardized tests for long-term use. Another unit maintains files of test materials and assists the technical staff by preparing both new and old material for use.

Program and Performance

Emphasis has been given to the development of methods that attract better employees to state service, that will result in filling vacancies more quickly, or will effect economies in operating procedures. A common type of assignment is the correction of a situation in which the operating agencies are not satisfied with the quality of numbers of persons available for appointment in a class. The solution to the problem may include changes in the classification structure as well as improvement of the recruiting and testing methods, and sometimes delegation of the testing program to the agencies.

A major function is the construction of standardized written tests. High quality tests of known difficulty are a necessity in continuous testing programs. Their increased validity has favorably affected the quality of employees hired. Their repeated use over a period of several years makes their cost comparable to custom made tests and frequently effects savings in cost.

PERSONNEL BOARD—Continued

OFFICE SERVICES DIVISION

Objectives

This division performs clerical work; processes applications; arranges, administers, scores, and processes examinations and establishes eligible lists; maintains statistical data and the employee roster; and conducts certification activities.

Program and Performance

Processing and operating procedures in this central service unit are constantly being reviewed for simplification and improvement. Increased use of mechanical aids such as punched cards, mechanized files, photographic reproduction, offset duplication, and microfilming has speeded production and increased capacity.

TRAINING DIVISION

Objectives

The Training Division devises plans for and co-operates with state agencies in the conduct of employee training, staff development programs, and safety programs. Training functions are designed to improve the quality of service rendered by California civil service employees; safety functions to minimize accident rates within state service.

Program and Performance

The division is instrumental in encouraging and developing continuous training activities in state agencies, resulting in increased organizational efficiency and improvement of morale, communications, and productivity. Emphasis has been placed upon the attainment of greater management effectiveness through direct training and consultative assistance to agencies, line officials, and their staffs. The division encourages and assists agencies to develop training aimed at improvement of work methods, increased professional and technical skills, and knowledge which makes possible more economical and efficient operation of departmental programs. To augment the above programs, the division maintains a library of reading material and audio-visual aids. The division also sponsors and co-ordinates the State's Inter-Agency Management Development Programs, aimed at improved administrative performance in present positions and future assignments. Encouraging the development of supervisory training is also of prime interest to the division and continual emphasis is placed upon it.

The State Safety Coordinator stimulates interest among state agencies and encourages training efforts designed to increase employee safety and reduce industrial accidents. The division provides leadership and technical assistance for a broad driver safety program to reduce vehicle accidents and resultant costs.

CO-OPERATIVE PERSONNEL SERVICES

Objectives

This division provides personnel services to local agencies on their request and on a contract basis by which all costs are reimbursed.

Program and Performance

An increasing trend in local government to employ staff through merit selection methods has led to this program serving more than 140 agencies and giving almost 1,150 examinations for such agencies during 1960-61. These agencies find this service more effective and economical than providing their ow testing service. Methods are being reviewed constantly to low these costs without sacrifice of quality.

An increasing number of local agencies have turned to th State for experienced help in installing and maintaining moder job classification and standardization plans. During 1960-6 37 agencies including over 9,000 jobs were studied by this div sion.

Temporary help is increased 0.5 man-year based on projecte workload.

GENERAL ANALYSIS

Objectives

Examines and files articles of incorporation, amendments thereto, elections to dissolve and final dissolutions; statements of trust receipt financing; certificates of recordation relating to mortgaged personal property; registers trademarks; exercises general supervision of elections; maintains the Archives of the State and the Central Record Depository; and attests the official acts of the Governor and Legislature.

Program and Performance

Before a corporation can operate in California, its articles must first be reviewed, and if approved, filed with the Secretary of State. Likewise, all amendments to corporate articles, as well as dissolutions, agreements of merger, and consolidations must be filed with this office. In the 1960-61 fiscal year, there were 37,181 corporate documents reviewed. This represents a decrease of 2,562 or 6.4 percent when compared to the 1959-60

---

[a] Composed of savings in salaries and wages, $68,396; operating expenses, $172; equipment, $35,908; and a decrease in reimbursements, —$33,187.

[b] Composed of savings in salaries and wages, $55,465; and operating expenses, $221.

GENERAL ANALYSIS—Continued

Program and Performance—Continued

fiscal year. Of this total 30,103 were filed of which 17,892 represented articles of new corporations in California. The workload decrease can be attributed to reduced business activity. It is estimated that the continuous population increase along with economic recoveries will reflect slight increases in workload.

The Secretary of State will collect cash receipts of approximately $3,425,857 in 1962-63. This includes franchise tax prepayments of about $1,581,800.

Following each statewide election, the Secretary of State must immediately conduct a semiofficial canvass of the vote cast at said election and shall immediately make public the results of his compilation. The cost of making such a compilation is approximately $2,000.

A new program relating to voter registration was added to the Secretary of State's office by Chapter 133, Statutes of 1961. Immediately following the cancellation of voter registrations; on the 135th day before each presidential primary and before each direct primary; on the 35th day before each statewide election, each county clerk or registrar of voters must transm to the Secretary of State listings showing the number of vote by party affiliation, and the number who declined to state part affiliations. The statement shall also show the number of vote by party affiliations, in each city, assembly district, senatori district, supervisorial district, and congressional district locate in whole or in part within the county. The Secretary of Stat on the basis of the statements transmitted to him must compil a statewide list showing the above mentioned information an copies of said compilations must be made available upon r quest, to any elector of this State. The cost of this new progra is estimated at $2,820.

The publishing and distribution of election pamphlets no mally occurs in alternating fiscal years. In the 1962-63 fisca year, election pamphlets for the November 1962 general electio must be provided at an estimated cost of $262,500. As a resul of this pattern, there is a large fluctuation in the budget fo this office from year to year. In the 1961-62 fiscal year $30,00 has been provided for the 1962 primary election pamphlets.

CENTRAL RECORD DEPOSITORY

Objectives

This unit receives and has custody of all records required or permitted by law to be deposited in the office of the Secretary of State.

Program and Performance

The Central Record Depository was established in 1947. The use of modern record center systems, procedures, techniques, and equipment enables the depository to efficiently service records for the depositing agencies and the general public. Through the transfer of inactive material to the record center, depositing agencies are able to effect economies due to reduced purchasing of filing equipment and the need for less space for records retention.

As of June 30, 1961, a total of 89,893 cubic feet of records were housed in the record center. Holdings are increasing at the rate of 5,900 cubic feet per year and have filled all available equipment and are now stored in the aisles and on top of file stacks in an unsatisfactory manner. In order to meet this situation, funds in the amount of $21,375 have been included in the current year to provide for establishment of a branch depository in the Los Angeles area in rental facilities on or about March 1, 1962. It is expected that savings in purchase of filing equipment by depositing agencies will at least offset this cost. The cost in the budget year is expected to be $14,399. After the paperwork management program gains momentum efficiencies in the utilization of office space may develop to offset the cost of this program in later years. Utilization of rental facilities will give flexibility to the program and an opportunity for further evaluation of volumes of records to be retired under the management program before capital outlay funds are committed.

GENERAL ANALYSIS

Objectives

This department is responsible for the protection of plants and animals from infectious disease, pest animals, weeds and injurious insects, and the prevention of the introduction and spread of crop and livestock pests and diseases. The department is charged with the administration of programs designed to assist in the marketing of agriculture products, and the protection of the public by assuring quality controls and preventing fraud and deception.

Program and Performance

As a result of a study by the Organization and Cost Control Division of the Department of Finance, a major reorganization of the department along functional lines is now in progress. The division is being emphasized as the major line administrative and operating unit, rather than the bureau as in the past. The department will operate through 8 divisions with field offices, crews, and advisers and consultants operating throughout the State. A major portion of the department's program is accomplished in co-operation with the 54 offices of county agricultural commissioners. The department gives technical assistance, co-ordinates various county programs and surveys, and assists in training field personnel.

Increasing workload and program changes will require 23 additional positions during the budget year.

In the Division of Administration, 1 junior-intermediate stenographer is included to provide clerical assistance to the regional coordinator in San Francisco. One junior-intermediate typist is included in the Data Processing Unit, in accordance with workload and recommended staffing plans. One junior-intermediate clerk is included for increased workload.

In the Division of Agricultural Economics, 1 junior marketing specialist and 1 junior-intermediate stenographer are included in the Bureau of Market News for increased workload in crop and price reporting.

In the Division of Dairy Industry, 2 general auditors are required in the Bureau of Milk Stabilization to handle increased workload in connection with increased variety and use of milk products.

In the Weights and Measures function of the Division of Compliance, 1 senior weights and measures investigator is provided for necessary coverage of the public weighmaster area. Chapter 2219, Statutes of 1961, expanded the Public Weighmasters' law and 2 additional senior weights and measures investigators and 1 junior-intermediate stenographer-clerk are added for resulting workload. Two investigators and 1 chemist are included for increased Southern California petroleum testing workload. One electric meter technician is included to develop a code and train county personnel in meter testing.

An additional district supervisor of seed inspection is included in the Division of Standardization and Inspection for workload in policing the increase in seed production in the San Joaquin Valley.

In the Division of Plant Industry, 2 rodent and weed control assistants are required by the Weed and Vertebrate Pest Control function to maintain the present level of service. The equivalent of 1 man-year seasonal help is necessary in the Bureau of Plant Quarantine to meet seasonal requirements at the Meyers and Hornbrook Inspection Stations. In the Bureau of Entomology, 1 field assistant II is needed to handle an increased workload at the Riverside warehouse. Increased workload in the Taxonomy Laboratory requires a full-time junior-intermediate typist-clerk. These latter two positions are offset by a reduction in seasonal help of 1.5 man-years.

In the Division of Animal Industry, 1 laboratory technician I is included at the Fresno Animal Laboratory in order to pick up an increasing workload at that point and 1 meat inspector is included for increased workload in packing plant inspections.

DIVISION OF ADMINISTRATION

Objectives

The director and his assistants are responsible for departmental policy, and the direction of the efforts of the operating divisions to insure efficient administration of the agriculture laws.

Program and Performance

The Division of Administration provides agricultural and related economic information for the Governor and the Legislature and maintains co-operative relations with federal, state, and county agencies and institutions. The fiscal office administers all fiscal matters of the department relating to budget, accounts, collections, payrolls, and disbursements. The personnel office conducts job classification studies, salary surveys, investigates cases requiring disciplinary action and co-ordinates training programs for departmental and related county employees.

One junior-intermediate stenographer is provided for clerical assistance to the regional coordinator in San Francisco. One junior-intermediate typist is provided in the Data Processing Unit in accordance with staffing plans and increased workload. One junior-intermediate clerk is provided in order to handle increasing workload.

---

[a] Includes $15,000 expenditure and reimbursement in accordance with provisions of Chapter 1391, Statutes of 1961, to pay costs of elections to be conducted by the Table Grape Commission concerning a possible marketing order.

[b] Grants from the Federal Government and expenditures therefrom are not included in the overall budget totals.

DIVISION OF ANIMAL INDUSTRY

Objectives

This division is responsible for the protection of the livestock and poultry resources of the State from diseases and enforces laws and regulations designed to assure the consuming public of an abundant supply of wholesome, high quality, non-adulterated, properly labeled foods of animal origin.

Program and Performance

Animal Health—Prevention of diseases of livestock and poultry is accomplished by the Bureau of Animal Health through the enforcement of state restrictions and quarantines on livestock and poultry shipped into the State. Control and eradication are accomplished by veterinarians operating out of 10 regional offices. Co-operative programs are conducted with the Federal Government and include the eradication of tuberculosis and brucellosis in cattle, supervision of garbage feeding ranches, and scabies and scrapie eradication. Veterinarians conduct tests for these diseases, vaccinate calves for brucellosis, and appraise and identify reacting animals. They also diagnose outbreaks of other transmissible diseases and take appropriate measures to suppress them. Provision is made for the continuation of the brucellosis eradication program during the budget year. This program was expanded on July 1, 1960, to include all counties in the State. January 1, 1962, has been set as a target date for declaration of the entire State as a modified certified brucellosis area. The program will then go into the phase of complete eradication and the counties accomplishing this will be designated as certified brucellosis-free areas.

Dairy Service—A further responsibility is the enforcement of provisions of the Agricultural Code relating to standards of quality and wholesomeness of dairy products and the prevention of fraud and deception in the sale of these items. Sanitary inspection of dairy products plants and dairy farms is conducted. Supervision is maintained over local inspection agencies, licensed testers, weighers, pasteurizers, and quality determination technicians. Inspections and checks are made of milk products, milk products plants, recording thermometers, imitation dairy products, water supplies, pasteurizers, and many other places and activities involved in the production and sale of milk and milk products. An important new activity of this bureau is to prevent the adulteration of dairy products with pesticides found in the feeds used for dairy animals.

Meat Inspection—This division also enforces the provisions of the Agricultural Code providing for federal, state, or state-approved municipal inspection of all meats from animals slaughtered and meat products produced in counties of over 28,000 population. A program of slaughterhouse sanitation is conducted. Supervision is extended over the preparation and composition of meat products to insure wholesomeness, prevent deception, fraud, and adulteration with pesticides and chemicals. This division licenses importers and handlers of foreign cold storage meats and inspects such products. The volume of such importations is expected to continue at a high level. Three additional counties, El Dorado, Sutter, and Yuba, were required to come under the scope of the Meat Inspection Law on July 1, 1961, as the result of the 1960 census, putting these counties over 28,000 population. One additional meat inspector position is included to continue 1 position temporarily approved during 1960-61 and 1961-62 for increased workload.

Poultry Inspection—Poultry processing plants are licensed and required to meet uniform standards for building construction, equipment, and sanitation. Poultry meat inspectors are trained and licensed. Inspections are made for sanitation, and to assure that diseased or otherwise unwholesome poultry or rabbit meat is not offered for human consumption. Appropriate approval and supervision of labeling is effected to prevent fraud and deception.

Veterinary Laboratory Services—As the result of a departmental reorganization program, the diagnostic laboratory services, formerly a function of the Bureau of Animal Health, have been set up in a separate unit designated as "Veterinary Laboratory Services." There are 6 laboratories located throughout the State that furnish diagnostic services for the Bureau of Animal Health, certain poultry disease projects, and render general services to other bureaus in the division as indicated.

One additional laboratory technician I is provided for the Fresno Laboratory to handle increased workload.

DIVISION OF CHEMISTRY

Objectives

This division provides analytical and other technical services to the other divisions of the department.

Program and Performance

Samples of pesticides, fertilizing materials, commercial feeding stuffs, and livestock remedies are examined and analyzed for Field Crops and Agricultural Chemicals.

Samples of fruits, vegetables, hay, and other produce are analyzed for pesticide residues for Field Crops and Agricultural Chemicals. To expedite prompt handling of these samples, field laboratories are maintained in Los Angeles and San Francisco. An additional field laboratory, formerly operating in Bakersfield, has been moved to Fresno.

Samples of milk and other dairy products are examined bacteriologically and chemically analyzed for the Bureau of Dairy Service.

Samples of meat, meat products, and materials used in processing them are analyzed for the Bureau of Meat Inspection and the Bureau of Poultry Inspection.

Samples of miscellaneous materials are analyzed for other units of the Department of Agriculture; for the Department of Finance Purchasing Division, Department of Public Health, Department of Fish and Game, University of California, the County Agricultural Commissioners, law enforcement activities, and other cooperating agencies.

DIVISION OF DAIRY INDUSTRY

Objectives

This division is responsible for the administration of the milk marketing and stabilization program and enforcement of the laws and regulations related thereto. Also, the division is responsible for the administration of programs designed to expand markets for dairy products and programs for sales stimulation and consumer education.

Program and Performance

The Division of Dairy Industry was established in 1961-62 as part of the departmental reorganization. The division presently consists of the Bureau of Milk Stabilization and the Dairy Council of California.

The Bureau of Milk Stabilization fixes minimum wholesale and retail prices in each of the 27 marketing areas of the State for fluid milk, fluid cream, and fluid nonfat milk. The administration of these activities under the provisions of Chapter 17, Division 6 of the Agricultural Code comprises about 85 percent of the work of the bureau. Approximately 98 percent of the fluid milk sold in California is subject to established minimum prices. Milk distributors are licensed and the sale of dairy products is regulated. Additionally, unfair practice provisions of the Dairy Products Act are enforced as a part of the activities of this unit.

The Dairy Council of California enables the dairy industry to develop, maintain, and expand its markets through sales stimulation, research, and educational programs. The council collects the assessments, supervises the expenditure of funds, and conducts the meetings required by statute to receive nominations for membership on the board. For budget of Dairy Council of California see page 52.

Two general auditor II positions have been included in the budget year to meet requirements of increased enforcement workload under the provisions of the Milk Control Law.

DEPARTMENT OF AGRICULTURE—Continued

DIVISION OF COMPLIANCE

Objectives

This division is responsible for the protection of producers and consumers in the handling of agricultural products. It protects consumers by the regulation of weights and measures of purchased commodities, and the regulation, inspection, and control of automotive fuels, including antifreeze, brake fluids, and automatic transmission lubricants. It protects the livestock industry from losses through theft, straying, or unintentional movement.

Program and Performance

The provisions of the Produce Dealers Act and Processors Law are administered by the Bureau of Market Enforcement to protect producers from improper reporting, accounting, and payment for crops marketed either in fresh outlets or in the processing outlets. Processors and dealers are bonded for proper performance and financial responsibility. The enforcement of marketing orders and programs, the auditing of industry records for these programs as well as for fertilizer, agricultural mineral, and field crops tonnage tax laws, are the responsibility of this bureau.

This division, through its Bureau of Weights and Measures, enforces the sections of the Business and Professions Code pertaining to weighing and measuring devices; the sale of commodities in containers; public weighmasters; gasoline, antifreeze, and brake fluids; bread loaf standards; and special provisions relating to farm products. During the current year, the Los Angeles County Sealer of Weights and Measures discontinue a laboratory for conducting petroleum product investigation and inspections. Two investigators and 1 chemist are include to take over this enforcement workload in the Los Angeles are

Two senior weights and measures investigators and 1 junio intermediate stenographer are proposed for the administratio of provisions of Chapter 2219, Statutes of 1961, which create additional enforcement workload by providing for 2 ne classes of public weighmasters and their deputies. One electri meter technician is proposed to develop a code and train count personnel for meter testing not under the jurisdiction of th Public Utilities Commission. One senior weights and measure investigator is proposed to investigate complaints against publi weighmasters and to instruct licensees in the proper service t be rendered as public weighmasters. A total of 8 new position are included for the Division of Compliance.

The division protects producers of livestock from loss by thef or straying of animals through its Bureau of Livestock Identification. Brand records are maintained statewide, cattle are inspected for ownership prior to shipment, sale or slaughter hides are inspected, and salesyards, horse and cattle slaughterers, and horse transporters are licensed and inspected. Bee promotion fees are collected for the California Beef Counci Strayed animals are taken into custody, and, if the owners ar not found, the animals are sold and the proceeds held in trus for 1 year.

DIVISION OF AGRICULTURAL ECONOMICS

Objectives

This division is responsible for the administration of services designed to assist producers and handlers in the marketing of agricultural products.

Program and Performance

The Market News Service reports current price and movement information covering agricultural commodities in intrastate, interstate, and foreign markets. Information gathered in California is assembled and released over leased-wire systems to other states and markets, and similar information gathered in federal offices pertaining to California crops is received on these leased-wires and in turn disseminated to California points.

The Crop Reporting Service develops and releases forecasts of production of our major agricultural commodities and prepares and publishes annual estimates of the acreage, production, and value of most crops in the State.

The division assists grower and handler groups in formulating marketing orders and programs designed to control surpluses, establish acceptable standards of quality, size, condition, or pack, carry on promotional activities and research, and to control or prevent unfair trade practices in the handling of farm products. This function includes assistance in the preparation of an acceptable form of marketing order, conducts public hearings upon such proposed orders and programs, and supervises the administration of the programs after they become effective. Surveys are also made of marketing and distribution problems for various agricultural groups of the State to develop new and larger markets. Additional duties include the development of economic material for use by the director and the staff of the department as well as by the industry. This includes material in the fields of co-operative bargaining and marketing associations, transportation, land taxation, urban sprawl, import and export of agricultural commodities, tariffs, and agricultural policy.

In order to meet increased marketing workload caused by the greater use of rapid transportation, 1 junior marketing specialist position and 1 junior-intermediate stenographer are included in the Bureau of Market News.

DIVISION OF PLANT INDUSTRY

Objectives

This division is charged with preventing the introduction and spread of crop pests, and with the protection of the farmer and consumer in respect to plants and related activities.

Program and Performance

The first line of defense against the introduction of plant pests, including harmful insects, plant diseases, nematodes, and noxious weeds, consists of agricultural inspection stations maintained at 18 border locations for the purpose of inspecting vehicular traffic and enforcing plant quarantine regulations. Stations are also maintained in San Francisco, San Pedro, and San Diego to inspect ships and airplanes. Quarantine enforcement at interior points, consisting largely of the inspection of freight, express, and mail shipments, is carried out by county agricultural commissioners.

Leadership, co-ordination, and technical assistance are supplied to the counties. Field surveys are conducted in co-operation with the counties to detect crop pests present, but not yet widely distributed in the State. When they are discovered, particularly in incipient stages, suppressive and eradicative measures are initiated.

This division provides identification and classification of pests intercepted during surveys or quarantine inspections.

Co-operative programs are developed with local governments and landowners to control noxious weeds and rodents harboring diseases transmissible to humans. A joint program is carried on with the United States Fish and Wildlife Service to control predatory animals to protect livestock, poultry, crops such as melons and grapes, and as an aid in the suppression of rabies.

The co-ordination of nursery inspection to insure uniformity of inspection procedures in all counties is accomplished through the county agricultural commissioners and county inspectors who are trained by the department in the detection and control of insects, nematodes, plant diseases, and weeds. Nurseries meeting minimum plant pest cleanliness requirements are issued certificates which permit them to ship their stock to 56 of the 58 counties without inspection at destination. During 1960-61, 8,264 nurseries were licensed to sell and ship nursery stock.

The discovery of Japanese beetle, *Popillia japonica* in Sacramento in June 1961 represented the first and only known established infestation of this serious pest in California. In the eastern United States this beetle causes nearly ten million dollars damage annually. An eradication program was organized immediately with foliage and soil treatments scheduled to be carried on for several years. Program costs estimated to be over $200,000 annually will be shared with the Federal Government on an equal basis.

Eleven man-months of seasonal junior plant quarantine inspector help is provided in the budget year to care for increased workload at the Meyers and Hornbrook Plant Quarantine Inspection Stations.

Two rodent and weed control assistants are provided to care for an increasing workload in the Weed and Vertebrate Pest Control function.

Provisions for a permanent field assistant II in the Riverside warehouse of the Bureau of Entomology and an additional typist-clerk in the Taxonomy Laboratory is offset by a reduction of 18 man-months seasonal help.

DIVISION OF STANDARDIZATION AND INSPECTION

Objectives

This division is responsible for the enforcement of laws and the administration of services designed to assist producers and handlers in the marketing of agricultural products; and to protect farmers and consumers by regulating seeds, fertilizers, pesticides, livestock feeds and remedies, and activities of pest control operators.

Program and Performance

The enforcement activities of this division include enforcement of the minimum standards of the Agricultural Code relating to fruits, nuts, vegetables, honey, eggs, and poultry meat designed to maintain and improve their quality and to protect consumers from fraud, mislabeling, and deception. These laws are enforced by the county agricultural commissioners in each county of the State under the supervision of this division. In 1960 the equivalent of 358,530 carloads of fruits, nuts, and vegetables were inspected.

The canning tomato inspection provisions of the Agricultural Code, administered by this division, require that all canning tomatoes delivered by producers to canners be inspected to determine compliance with minimum standards. Fees to cover the cost of this service are collected from the canner, payable one-half by the grower and one-half by the canner. In 1960, 2,315,499 tons were inspected.

Grapes for crushing at wineries are also inspected on an optional basis at the request of certain wineries to determine the presence or absence of rot defects. Certification of the percent of rot defects assists the processor to determine the utilization of the grapes for wine or distilled products. The cost of this service is supported by the collection of fees. In 1960, 13,910 loads were inspected at 17 wineries.

The division is also responsible for inspection and certification of fields of potatoes being produced for seed to provide potato growers in California and elsewhere with disease-free stocks. In 1960, 5,232 acres were inspected. Most of the production was approved as California Certified Seed.

The Federal-State Shipping Point Inspection Service, conducted in this division, is rendered at the request of growers, shippers, or other financially interested parties and consists of the inspection and certification of fruits, nuts, and vegetables, generally on the basis of United States Standards. This is a self-supporting service supported by the collection of fees and is operated co-operatively with the United States Department of Agriculture. In 1960, individual inspections and certifications totaled 183,686 of almost 60 different commodities.

This division samples fruits, vegetables, hay, and fodder to determine whether they contain deleterious spray residues which would be injurious to persons or animals. In co-operation with county agricultural commissioners, regulations are enforced pertaining to injurious herbicides and other injurious materials requiring a permit to use.

This division enforces the laws relating to commercial feeds and livestock remedies, grain warehouse registration, and bonded agricultural warehouses. All commercial feeds must be labeled to show analysis and ingredients. Livestock remedies must be registered before sale in California. Approximately 8,000 regulatory samples of feeds and remedies are taken each year.

In the inspection and certification of grain and commodities, approximately 60,000 samples are examined and certificates issued each year. This is a service function, supported from inspection fees, by personnel licensed under the Grain Standards Act or through a co-operative agreement with the United States Department of Agriculture.

The enforcement of the Seed Law is conducted in co-operation with the county agricultural commissioners in each county of the State. Proper labeling as to purity, germination, and presence of weed seeds, if any, is secured through the inspection of over 2,000 lots of vegetables and agricultural seeds yearly. One additional position is proposed to assist in handling the increased workload in seed inspection enforcement.

This division is responsible for the registration of economic poisons, commercial fertilizers, agricultural minerals, and auxiliary plant chemicals in order to prevent the sale of ineffective, unsuitable, or dangerous products. During the 1960-61 fiscal year there were 1,933 firms that secured certificates of registration to sell these materials and 14,997 economic poisons were licensed. Approximately 5,100 samples are drawn each year from materials offered for sale to check conformity of composition with accepted standards of labeling and chemical content. In the 1960-61 fiscal year, 2,403 fertilizer salesmen were licensed.

This division licenses agricultural pest control operators for the specific types of pest control for which they are qualified. During the 1960-61 fiscal year there were 1,363 licensed operators in this State. Approximately 636 aircraft pilots are certified for pest control work.

FEDERAL CO-OPERATIVE MARKETING RESEARCH

Objectives

The matched funds marketing service work being carried on by the State Department of Agriculture, under the authority of the Agricultural Marketing Act of 1946, has these aims: to help marketing agencies at each level of distribution to put into use the best known marketing practices as they are brought to light by research under the act and by other agencies, both private and public; to provide more timely and better marketing information; and to increase the consumption of farm products.

Program and Performance

For the operation of marketing service activities on the matched fund basis, allotments are made to states under cooperative agreements between the United States Department of Agriculture and the State Department of Agriculture, bureaus of markets, and similar state agencies. The states engaged in the program submit projects each year to the Agricultural Marketing Service for approval.

In California, advantage of the matched fund program is made available by the provisions of Section 1286 of the Agricultural Code and by co-operation with the Federal Government in marketing research under the provisions of Public Law 733 (79th Congress).

Currently, there are 4 separate projects effective in California, concerned with checks of bearing and nonbearing acreages of fruits and tree nut crops; and surveys of the acreages and production of minor crops. One survey covers improvement of marketing efficiency, overcoming obstacles to distribution and sales, achieving market stability, expanding markets and effecting improvements in quality, packaging, and methods of sales promotion. Another project is directed toward the development of maturity standards, studies of containers, and packaging methods. Studies concerned with the development of a methodology for certification that fruit and nut tree and vine nursery stocks are free of serious virus diseases are also carried on.

GENERAL ANALYSIS

Objectives

The Dairy Council of California provides the means for the dairy industry to develop, maintain, and expand markets for California dairy products.

Program and Performance

The board, made up of 25 industry representatives, nominated by dairy producers, producer-handlers, and handlers, and appointed by the Director of the Department of Agriculture for a 3-year term, acts in an advisory capacity to the Director of the Department of Agriculture, who is designated as the administrative and enforcement officer for duties outlined in Division 4, Chapter 14, of the Agricultural Code. The use of dairy products throughout the State is encouraged by providing health and educational materials to schools and carrying on advertising and research programs. The cost of this program is defrayed entirely by fees paid by producers and handlers of dairy products. Expenditures for 1961-62 and 1962-63 are estimates subject to revision by the Dairy Council at its budget meeting in May of 1962.

GENERAL ANALYSIS

Objectives

The Poultry Improvement Commission provides California's poultry industry with accurate production data on the various types and strains of chickens and turkeys.

The commission consists of 10 members. Three are ex officio members—2 representing the University of California and 1, the Director of the Department of Agriculture. Seven are appointed by the Governor for 4-year terms and are chosen so far as possible to give representation to the 7 major poultry districts of the State.

Program and Performance

The work of this commission is divided into 2 distinct areas, the chicken project which is located near Modesto and the turkey project which is located near Keyes. Specific tests, requested by the poultry industry, are conducted to provide a means whereby commercial poultrymen may judge the merits of available strains of chicks and poults. A representative sample, randomly collected, of each entrant's stock, is raised on the testing grounds and periodic reports are made to breeders, hatcherymen, poultrymen, and the general public. Measurements of the productivity and efficiency of each sample are biometrically compared with similar data of all entrants and the results recorded and distributed.

During the current year, the poultry testing program will be expanded to include 3 commercial ranches for "on-the-farm" testing and comparative evaluation with the Modesto tests. Anticipated income from this project is expected to exceed estimated expenditures.

GENERAL ANALYSIS

The Agricultural Labor Commission was established by Chapter 1785, Statutes of 1961, which provides for 5 members appointed by the Governor to act as a fact-finding body to ascertain, study, and analyze the problems of labor-management relations in California agriculture. A written report to the Governor and to the Legislature is required to be filed o January 31, 1963, embodying the findings and recommendation of the commission. Expenses are primarily for traveling cost of commission members and the preparation and printing o the report.

DEPARTMENT OF CORRECTIONS—Continued

GENERAL ANALYSIS

Objectives

The protection of society is the primary purpose of the Department of Corrections. Since 98 percent of the prisoners are eventually released, adequate protection not only includes segregation from society by imprisonment, but also preparation for release and adequate supervision while on parole. To be most effective, the correctional process must continue throughout both the institutional and parole periods. The aim is rehabilitation of the person in the shortest period possible and restoring him to a constructive life in the community.

Program and Performance

The Agency Administrator of the Youth and Adult Corrections Agency is responsible for the policy formulation and implementation of the Department of Corrections and the Department of the Youth Authority. This concept was initiated in accordance with law on October 1, 1961.

The Department of Corrections, established in 1944, is currently composed of the Director of Corrections, the Adult Authority, the Board of Trustees of the California Institution for Women, the Correctional Industries Commission, and the Board of Corrections. The director and members of all of the boards are appointed by the Governor.

The Director of Corrections is the chief administrative officer of the department. He is directly responsible for management of the state prisons and for the custody, care, treatment, training, discipline, and employment of the prisoners. He is likewise responsible for administration of the Adult Paroles Division, which supervises adult male parolees.

The Adult Authority is responsible under California's indeterminate sentence law for determining the sentences of male prisoners and granting or revoking parole. Like responsibility for women prisoners is placed in the Board of Trustees, California Institution for Women.

The Correctional Industries Commission recommends industrial and agricultural enterprises to eliminate prison idleness by providing work and training. Such enterprises may be started only when authorized by the commission after a public hearing.

The Board of Corrections is composed of the Administrator of the Youth and Adult Corrections Agency, the Director of Corrections, the Director of the Youth Authority, the chairman of the Adult Authority, the vice chairman of the Youth Authority, the Chairman of the Board of Trustees of the California Institution for Women, and 2 qualified persons appointed by the Governor, with the advice and consent of the Senate. It is responsible for the correlation of the State's correctional programs, the study of the entire subject of crime, inspection of jails, and the provision of advisory services to cities and counties regarding jail and detention facilities.

During 1962-63, the department will be faced with caring for an estimated average population of 26,515 inmates, including 1,780 male Youth Authority wards over 18, and 1,160 women. This prison population will be confined in 10 institutional facilities for males, highway and forestry conservation camps and 1 institution for women. During 1962-63, an average of 10,690 males and 1,111 females will be under parole supervision.

The increase in the felon prison and parole population is primarily a reflection of the increase in the population of the State rather than an increased rate of crime.

The institutions and camps under the control of the department comprise a diversified correctional system. This is promoted through facilities with planned capacities with varying degrees of custodial control of inmates and provisions for special and general programs of training and treatment for different types of prisoner groups.

Maintaining persons under control in prison while treating them until evaluated safe for release is the goal for protection of the public. It is therefore essential to know what the characteristics of these people are, how to control and treat them, and what facilities are required.

The prison population for 1962-63 will represent the most serious behavior problems among the State's inmates, since only 25-30 percent of the persons convicted of felonies are committed to the department. The balance serve county jail terms or are granted probation. The prison population may be described in general in terms of the "average" inmate: A male about 32 years old with a prior juvenile, jail, or prison record, with about 10 years' residence in California, with only a 7th grade education but normal intelligence, lacking in work skills, and having a serious personality difficulty. In addition to the "average" inmate there are groups requiring specialized custody and treatment such as the aged, the psychotic, the sex deviate, the tuberculous, the physically defective, the chronic behavior problems, and condemned cases.

The program for handling 38,316 individuals daily in prison and on parole during 1962-63 will include:

Diagnosis: This is the study of each prisoner upon receipt to recommend an individualized program for his control and treatment.

Classification: This is the designation of a degree of custodial control, educational assignment, medical care, psychological therapy, religious training, and avocational training for each inmate.

Care: All inmates must be fed and clothed. A basic food ration is maintained in all institutions under the general supervision of the Departmental Food Administrator. Rations are modified to meet age, activity, and health needs of the inmates. Clothing is also controlled on a ration or formula basis in the institutions based on recorded usage and actual experience.

Treatment: Programs with staff are utilized to effect the treatment process. Treatment involves the integrated activities of a number of subsections. Together, and in co-operation with effective custodial control, the treatment programs make possible the operation of a productive correctional process during the time the inmate is confined and prepared for release. The major activities are as follows:

Academic and Vocational Education: About 11,000 inmates are in educational programs during the year. Academic education provides elementary and high school courses, both by contracting with the local school district and by institution staff. Vocational training, conducted by the institution staff, is available in approximately 30 trades. Educational services include library programs used extensively by inmates.

Medical Care: Hospital facilities exist at all institutions. Virtually any medical or surgical problem can be handled within the department. Complicated surgical procedures are generally performed at San Quentin due to the availability of specialists.

Psychiatric Treatment: Specialized psychiatric service is provided principally at the California Medical Facility. Psychiatric positions are also authorized at the other institutions and the parole outpatient clinic. Psychiatric treatment includes ward management of psychotics and other highly disturbed persons. Extensive programs for individual and group psychotherapy for more than 2,000 inmates are also provided under psychiatric direction.

Counseling Services: A professional staff of correctional counselors at each institution deals with social and personal problems of inmates and families and prepares progress reports for the Adult Authority. Two specialized units of correctional counselors are engaged in pilot programs of intensive counseling with small case loads. About 10,500 inmates currently participate in weekly group counseling sessions conducted by custodial, educational, and maintenance staff employees who have received in-service training in counseling.

Religion: The religious program includes full-time Catholic and Protestant chaplains at each institution and part-time services for the other faiths. In addition to conventional religious activities, chaplains participate in case counseling and in total classification and treatment activities of the institution.

Recreation: Programs of physical and interest-type recreational activities are maintained at each facility under the leadership of persons trained in recreation. Balance is maintained between spectator and participation programs. Such programs boost morale, encourage constructive use of off-duty time, and teach sportsmanship and teamwork.

Employment: The constructive employment of as many inmates as possible is one of the keys to the total treatment program. Prisoners work in factories, maintenance and culinary sections, offices, farms and camps, obtaining diversified work experience. Constructive use of inmate assignments has economic benefit to the institutions and carryover value for work placement after release. Idleness, on the other hand, results in low morale and mental and physical degeneration. Conservation centers and camps operated by the department provide added opportunity for outdoor projects of a type which are also beneficial to the development of California's natural resources.

Release Procedures: Each of the 13,358 inmates to be released during 1962-63 will participate in preparole instruction classes to prepare for adjustment after prison. In addition, each release will be interviewed regarding release plans and a report will be prepared to assist with employment and living placements.

Parole Procedure: Of the total number released from the institutions, the great majority will be released under parole supervision. The basic treatment process, which is directed toward successful adjustment in society, is continued in the parole program. In addition, the jurisdiction of the Director

DEPARTMENT OF CORRECTIONS—Continued

GENERAL ANALYSIS—Continued

Program and Performance—Continued

of the Department of Corrections is maintained over the parolee while he is serving the remainder of his term as a productive member of society.

Narcotic Treatment-control: This is the fourth year of a 5-year experimental program, begun in 1959-60, to study the detection, diagnosis, custody, and clinical treatment of addicts and suspected addicts, in order to develop better methods of rehabilitating such persons.

Additional Facilities

The California Conservation Center at Susanville will begin receiving inmates in September 1962, and is expected to reach capacity by June 30, 1963. A new conservation camp with a capacity of 100 inmates within the Conservation Center will be activated in the 1962-63 fiscal year. Two additional 80-man camps, Konocti and Mono-Inyo, will be activated in 1962-63. With these additional 160 inmates in camps, the department will have an average population of 2,130 in year-round camps plus 118 in summer United States Forestry Service camps.

The California Rehabilitation Center with a capacity of 2,300 non-felon addict inmates is planned for activation in October 1962. It is expected to house 1,025 inmates by June 30, 1963, and be at full capacity in the 1963-64 fiscal year.

The California Rehabilitation Branch at Chino, with a capacity of 960 inmates, is scheduled for completion June 1, 1962. This facility will begin receiving inmates immediately to relieve the load of the narcotic program temporarily carried at the Institution for Men, Tehachapi Branch, and by Men's Colony—East Facility. Upon concentration of the narcotic program in the California Rehabilitation Center, this branch facility will ultimately be utilized as the Southern Conservation Center.

Expanded Program

Narcotics Control

Pursuant to the enactment into law by the 1961 Legislature of the non-felon narcotics addicts control bill, the Department of Corrections has begun a program of institutional treatment of such non-felon addicts which is to be followed by research projects and finally by an intensive parole program, all for the purpose of controlling narcotics usage and finding pathways to its causes and cures.

1. Institutional Treatment

The designation of California Rehabilitation Center has been given to the institution that will house these nonfelon addicts. This institution will receive the addicts for processing, provide a short reception-guidance program to determine proper inmate classification as well as medical needs, and in an institutional setting provide treatment and training for the remainder of the addicts stay.

The treatment and training will be four-fold in nature. (1) Each living unit will contain 60 men which will be denoted as a community living group. Under the supervision of a correctional counselor and a correctional officer each group will spend many hours per week in the group counseling, group therapy, and individual counseling and therapy programs prescribed as necessary in the treatment and rehabilitation process. (2) Vocational and academic education is available for those who are in need of such program to stimulate and enhance the process of rehabilitation. (3) Work programs are also scheduled to complement the more sophisticated treatment aspects. And (4) a rigorous physical education and recreation program is planned to counteract as much as possible the inevitable effect of narcotics usage, physical deterioration.

2. Research Program

The medical research program at this institution has already engendered great interest from the institutions of higher learning in California. The aims and goals of the research on addicts, addictives and addiction are to find the underlying causes, the physical and emotional effects, and hopefully, the curative and effective controlling devices.

3. Parole Program

The dichotomy of rehabilitation lies in institutional treatment and parole treatment and supervision, either of which, without the other, would not be a whole within itself. The parole program for the non-felon narcotics addicts continues the intensified treatment theme by providing a ratio of 25 parolees per professional parole agent position. This close supervision will facilitate more effective control of narcotics usage among the parolees as well as earlier control through a 60-day pre-parole pickup on the agent's caseload.

Also within this parole program are 2 narcotics testing clinics to provide for scheduled and surprise nalline testing to determine recent narcotics use by the tested parolee, another control on usage. Within the 2 areas of treatment, institution and parole, are the anticipated means of eventually effectively controlling addiction among those whom the program touches.

Correctional Program Supervisor Series

A new classification of personnel will be injected into California's correctional system in the 1962-63 fiscal year. This class, the Correctional Program Supervisor, will provide for the combination of the functions of the correctional officer and correctional counselor with anticipated resultant efficiency in custody and treatment. The individuals selected to be members of this new series will undergo rigorous training in both the concepts of custody and basic psychological counseling with on-the-job training at a designated conservation camp. This new series will begin its existence at the Conservation Center when it opens early in the 1962-63 fiscal year.

Reception Guidance Center—San Quentin

Without the addition of new physical facilities a reception-guidance function was established at San Quentin in the 1961-62 fiscal year for the purpose of receiving parole violators who have had their parole revoked and are being returned to prison. Partly because of the influx of non-felon narcotics addicts to the reception center at Chino and partly because of a necessary change in program, the operation of this function at San Quentin will continue indefinitely as a vital part of the reception process of the Department of Corrections.

Increased Correctional Effectiveness

This program was originally authorized in the 1961-62 fiscal year to secure increased correctional effectiveness through scientific selection of inmates for accelerated processing and parole with increased staff attention, utilizing knowledge and experience derived from research and operation of pilot projects.

MAJOR PROGRAM AUGMENTATION AND COSTS

The following summary by program accounts for the proposed increase of $7,802,696 over the 1961-62 expenditures. These increases provide for the necessary adjustments to meet population changes, the staffing of new facilities, and the correction of various deficiencies in staffing.

Additional personnel for staffing new facilities and new program:		
a. California Conservation Program (252)		$1,150,199
b. Narcotic Control Program		
1. California Rehabilitation Branch (Chino) (69.1)	$331,154	
2. California Rehabilitation Center (244.8)	925,494	
3. Additional personnel for confinement and parole of non-felon addicts (78.5)	318,015	
		$1,574,663
Additional personnel for increased correctional effectiveness (8)		26,487
Additional staff and management personnel (7)		48,441
Additional custody personnel (5.5)		18,884
Additional medical care personnel (4.5)		58,867
Additional treatment and classification personnel (3.6)		23,896
Additional reception-guidance personnel (14)		84,639
Additional personnel for other institutional activities (5.5)		27,950

DEPARTMENT OF CORRECTIONS—Continued

MAJOR PROGRAM AUGMENTATION AND COSTS—Continued

Additional research personnel (4)	$26,766
Additional personnel for felon parole and release activities (37)	180,355
Net increased cost in authorized positions due to full year costs of positions authorized during the current year, improved employment conditions, and salary changes	1,306,741
Increase in operating expenses and equipment:	
a. Increases primarily in feeding, clothing, education, and utilities, for price and population changes, and new facilities	3,043,055
b. Increase in equipment	9,758
c. Increase in reimbursements	—409,893
Increase in inmate pay—work projects for population growth and increased camp operations	50,728
Increase in State Employees' Retirement	405,042
Increase in State Employees' Health and Welfare	176,118
Total	$7,802,696

SUMMARY OF PROPOSED NEW POSITIONS

The following 733.5 new positions totaling $3,221,147 for the prisons and other correctional facilities and organizations represent standard classes used in all correctional facilities and are, therefore, discussed by program and function.

Conservation Program

243.8 Positions—Conservation Center $1,125,325

The requested positions will provide the balance of staffing for the Conservation Center. Initial staffing was budgeted in the 1961-62 fiscal year.

The Conservation Center is a permanent facility for 600 medium security and 600 minimum security inmates. The main objective of the center is to operate and supply conservation camps and maintain a constant flow of specially trained and physically fit inmates required to maintain full operating levels at conservation camps. The inmates received at the center will be given academic and vocational training as well as physical conditioning designed to prepare them for assignment to the conservation camps and their ultimate rehabilitation.

Each 600-man unit has been designed to provide living accommodations in 16-man dormitories. Staffing for the facility has been based on approved staffing standards taking into consideration the physical plant and types of inmates. A new class of correctional program supervisor is proposed which combines duties and functions now encompassed in the correctional officer series and a number of the duties performed by the correctional counselor series.

Effective dates of the positions required for the inmate population have been budgeted to provide 3 weeks for orientation and training prior to the arrival of inmates.

8.2 Positions—Conservation Camp 24,874

Two positions are requested for camp supervision due to increased number of camps. Staffing for the 80-man Mono-Inyo Camp, to be activated in January 1963, requires 6.2 new positions for custody and supervision.

252 Total—Conservation Program $1,150,199

Narcotics Control

69.1 Positions California Rehabilitation Branch $331,154

A total of 69.1 positions is proposed for staffing the new 960-inmate Rehabilitation Center Branch at Chino.

The unit is located adjacent to the facilities of the Institution for Men at Chino and will begin receiving non-felon narcotic addicts June 1, 1962. Services to be provided by the Institution for Men to the 960-inmate facility include: the reception-guidance function, laundry, food purchasing and preparation, maintenance of structures, medical and hospital services, and fire-fighting services. The physical facilities are designed to provide 60-man units for use as community-living groups.

244.8 Positions California Rehabilitation Center $925,494

A total of 244.8 positions is proposed for the 2,300-inmate unit planned for activation October 1, 1962. The positions are budgeted on the basis of approved staffing formulas, comparability to staffing authorized for similar functions at other prisons, and, if not based on either of these, minimum requirements due to considerations of physical plant and types of inmates.

The location of the 2,300-inmate institution is as yet undetermined. It is anticipated that surplus federal property will become available by the projected activation date. This institution will be self-contained with its own reception-guidance center and all other auxiliary services. It is planned that the physical facilities will provide for 60-man units for use as community-living groups.

The treatment program for the narcotic addicts includes group and individual treatment by lay and professional staff, including group counseling, group psychotherapy, individual psychiatric and psychological treatment, work assignments, academic education, vocational guidance, and physical conditioning.

The basic staffing pattern provides 1 correctional officer and 1 correctional counselor for each 60-man community-living group. Generally, the positions have been phased to provide adequate orientation and training prior to the arrival of the inmates.

78.5 Positions Confinement and Parole $318,015

5 Intermediate typist-clerk—California Institution for Women, and Tehachapi $18,318

In the interim between the effective date of the non-felons narcotics program and availability of space at the new narcotics treatment institutions, temporary facilities have been established at Institution for Men, California Institution for Women, and Men's Colony—East Facility. These temporary operations as well as certain operations in other units of the Department of Corrections which carry workload precipitated by the narcotic program are reimbursed by the Rehabilitation Center. Intermediate typist-clerks, numbering 3 at California Institution for Women and 2 at Institution for Men, Tehachapi Branch, are included because of the classification and parole workload created by the narcotics program.

1	Assistant research technician	$6,672
0.5	Intermediate Typist-clerk	1,998
1.5	Total—Division of Research	$8,670

One assistant research technician is required for Departmental Administration for the parole research workload for narcotic addicts. A half-time intermediate typist-clerk is provided for clerical assistance to the research technician.

2	Physician and surgeon II	$22,008
6	Parole agent III	27,692
6	Parole agent II	23,360
34	Parole agent I	141,796
1	Women's parole agent II	7,008
4	Women's parole agent I	13,780
6	Correctional officer	21,160
13	Intermediate stenographer	34,223
72	Total—Adult Parole Division	$291,027

Two physicians and 2 correctional officers are requested for staffing 2 additional anti-narcotic test stations required to process the parolees from the Rehabilitation Center. Three correctional officers are requested to provide custodial supervision at the 3 existing test stations. One correctional officer is included for transportation of

DEPARTMENT OF CORRECTIONS—Continued

SUMMARY OF PROPOSED NEW POSITIONS—Continued

Narcotics Control—Continued

parolees from test stations and local facilities to a correctional facility for retreatment when narcotic usage is detected through the nalline testing.

Fifty-one parole agents and 13 stenographers are included to supervise parolees from the Rehabilitation Center and Branches. A special staffing standard of 25 addict parolees per professional position and 100 addict parolees per clerical position is established to more effectively control narcotics usage.

392.4 Total—Narcotics Control $1,574,663

Increased Correctional Effectiveness Program

1	Staff psychiatrist	$1,048	
1	Clinical psychologist II	3.864	
2	Parole agent II	7,592	
1	Women's parole agent I	4.770	
3	Intermediate stenographer	9,213	
8	Total		$26,487

These positions are proposed to continue the program for increased correctional effectiveness. This program is planned to reduce the projected prison population through scientific selection of inmates for special processing and parole with increased staff attention.

In Adult Parole Division, 1 staff psychiatrist, 1 clinical psychologist, 1 parole agent II and 1 intermediate stenographer are requested to complete the staffing of the Parole Outpatient Clinic in San Francisco. An additional parole agent II is also requested to cover preparole caseload within the scope of the increased correctional effectiveness program in Adult Parole Division.

A women's parole agent I and 1 intermediate stenographer are to provide staffing for supervision of the women parolees assigned to the increased correctional effectiveness program.

An intermediate stenographer is included to give clerical service to the increased correctional effectiveness program at the Medical Facility.

Staff and Management Personnel

1 Information officer I $7,728

This position is to provide public relations assistance to the California Rehabilitation Center and Adult Parole Division's handling of nonfelon addicts. This information activity is essential to develop public understanding and support of the State's narcotic control program.

1	Business manager II	$10,602	
1	Accounting officer II	7,008	
1	Accounting technician III	6,135	
3	Total		$23,745

These positions are provided to implement the reorganization of the Correctional Training Facility business services function. The reorganization is to provide a separate business unit more responsive to the needs of the North Facility administration. In addition to the requested new positions, 4 positions have been transferred from the Central Facility. These positions are budgeted on the basis of comparable staffing at other institutions.

1 Correctional captain (personnel officer) 8,112

This position is included for 1 year to administer the personnel management program at the Correctional Training Facility and improve the recruitment and training of employees by concentrating the presently dispersed authority and responsibility in 1 position.

1 Intermediate clerk 3,996

This position is requested for increased workload in personnel record maintenance in the central office personnel section. This workload is attributable to additional personnel at the California Conservation Center and the California Rehabilitation Center.

1 Storekeeper I 4,860

This position is required to handle the increased workload in the receipt, storage, and distribution of the supplies required for the increased population at the Institution for Women.

7 Total, Staff and Management $48,441

Custody Personnel

2 Correctional officer $9,720

One and six-tenths positions are required for the Deuel Vocational Institution to provide a 7-day tower post for the adjustment center yard. Also included is 0.4 position to provide yard coverage in the evenings during the summer months at this same institution.

0.5 Temporary help—escapes 2,600

Funds are requested to provide for payment of overtime for escapes and other institution emergencies at California Men's Colony, East Facility.

2 Correctional officer 2,370

These positions are required at the Institution for Men, Tehachapi Branch, to provide relief coverage for existing posts assigned to the new visiting room and inmate work crews.

1 Intermediate clerk 4,194

Based on approved staffing standards, an additional mail clerk is included for Institution for Men, Tehachapi Branch for censorship and contraband search of incoming and outgoing mail.

5.5 Total, Custody $18,884

Medical Care Personnel

2 Physician and surgeon II $29,287

The psychiatric residency program at California Medical Facility requires the continuation of these 2 positions which have been temporarily established in the 1961-62 fiscal year. The 2 residents receive training in psychiatry in conjunction with the training programs within the Department of Mental Hygiene. The residents will give 1 year of service at an institution of the Department of Corrections for each year of training received. The persistent need for psychiatrists within the Department of Corrections will be somewhat alleviated by the psychiatric residency program at the Medical Facility.

1 Physician and surgeon II 11,976

This position is included at Folsom based upon previously recognized but unmet workload.

0.5	Physician and surgeon II	$5,916	
1	Dentist II	11,688	
1.5	Total		17,604

These positions are required to continue authorized staffing for the reception-guidance center operation established at State Prison at San Quentin in the 1961-62 fiscal year.

4.5 Total, Medical Care $58,867

Treatment and Classification Personnel

1	Program administrator, correctional institution	$10,344	
0.6	Overtime—group counseling	3,196	
1.6	Total		$13,540

One program administrator is required at the Medical Facility to continue the position temporarily approved in 1960-61 in conjunction with the reorganization at that institution.

An increase in the group counseling blanket position at Men's Colony—East Facility is included based upon increased population.

1	Correctional counselor I	$6,360	
1	Intermediate typist-clerk	3,996	
2	Total		$10,356

One professional position and 1 clerical position are required at the California Institution for Women based on established formulae to handle the increase in inmate population and movement.

3.6 Total, Treatment and Classification $23,896

DEPARTMENT OF CORRECTIONS—Continued

SUMMARY OF PROPOSED NEW POSITIONS—Continued

Reception-Guidance Personnel

2	Clinical psychologist	$14,088	
1	Correctional counselor III	8,040	
1	Correctional counselor II	7,008	
5	Correctional counselor I	34,892	
1	Intermediate stenographer	4,350	
4	Intermediate typist-clerk	16,261	
14	Total		$84,639

One clinical psychologist, 4 correctional counselors I, 1 correctional counselor II, 1 correctional counselor III, 3 intermediate typist-clerks and 1 intermediate stenographer are required for the new reception-guidance center unit for parole violators at the State Prison at San Quentin.

One clinical psychologist II and 1 correctional counselor I are provided for the California Institution for Men, and 1 intermediate typist-clerk is included for Deuel Vocational Institution. These positions are required to process the workload resulting from an increase in intake of prisoners and are included in accordance with existing workload-staffing formulae.

Personnel for Other Institutional Activities

1	Supervising cook I	$4,860	
0.5	Instructor in cooking	2,886	
1.5	Total		$7,746

One supervising cook I is requested to correct a deficiency in the culinary staffing at Institution for Men, Tehachapi Branch.

At the State Prison at Folsom, 1 half-time instructor in cooking is included to provide training for inmates in culinary skills at the ranch kitchen. Benefits of the requested position include a source of trained inmate cooks for the conservation camp program, development of excellent employment skills for released inmates, and supervision at the ranch kitchen necessitated by increased workload.

1	Laundry supervisor	$4,404	
1	Women's correctional supervisor	4,760	
1	Stationary engineer	6,060	
3	Total		$15,224

Due to workload caused by increased population at the Institution for Women and by the assumption of laundry services for Youth Authority institutions in the vicinity of Corona, it is necessary to begin a second shift in the laundry at Institution for Women. The requested positions will provide custodial and technical supervision and maintenance necessary to operate the second shift. Funds to finance these positions are included in reimbursements.

1	Building maintenance man	$4,980

This position is included at Institution for Women based upon previously recognized but unmet workload.

5.5	Total, Other Institutional Activities	$27,950

Research Personnel

1	Program administrator	$9,618	
1	Correctional counselor II	7,920	
1	Supervising clerk I	5,232	
1	Intermediate clerk	3,996	
4	Total Research		$26,766

The research program administrator and the correctional counselor II, both financed by reimbursements from a UCLA-Foundation Grant, are included in Men's Colony, East Facility, and will serve as the research team for the Department of Corrections and act as a liaison between Department of Corrections and UCLA staff engaging in study of group counseling and community living.

A supervising clerk I and an intermediate clerk are requested to carry the increased workload of the Research Division, Administrative Statistics Section of Departmental Administration. The increased workload is due to the growth of prison and parole populations and the increased number of institutions, camps, and parole districts.

Personnel for Felon Parole and Release Activities

Parole Supervision:

2	Parole agent III	$7,728	
3	Parole agent II	12,848	
16	Parole agent I	69,960	
7	Intermediate stenographer	18,771	
4	Women's parole agent I	15,952	
32	Total		$125,259

These parole agent and clerical positions are included on the basis of the overall standard of 55 parolees per professional position and 188 parolees per clerical position.

2	Adult authority representative	$26,950

These positions are included in accordance with approved formula to meet the increased workload of the Adult Authority.

2	Staff psychiatrist	$23,952	
1	Intermediate stenographer	4,194	
3	Total		$28,146

These positions are required for increased workload in the Southern Out-Patient Clinic and are based on the standard of 1 therapist to 50 parolees requiring psychiatric treatment to aid in their adjustment process.

37	Totals, Felon Parole and Release Activities	$180,355

733.5 Totals, Proposed New Positions $3,221,147

SUMMARY OF OTHER INCREASED EXPENDITURES

Additional Cost—Authorized Positions

This increased expenditure is occasioned by full-year cost of positions authorized during the current year, improved employment conditions, annual merit salary increases and positions to be abolished during 1962-63 $1,306,741

Operating Expenses

Increased average daily population of 2,024 (8.2 percent) and some increases in prices will require an increase in operating expense of $3,043,055. The major areas of increase are expenses for new facilities preparing to receive inmates and expenditures relative to operation of new facilities $3,043,055

Equipment

Equipment increases reflect normal replacement needs and additional equipment primarily due to new positions $9,758

Inmate Pay—Work Projects and Reimbursements

Inmate pay-work projects increased $50,728 due to population growth, activation of new facilities and increased camp operation. The major increase in reimbursements is reflected in services furnished to the Rehabilitation Center. Total reimbursement increases amounted to $409,893 —$359,165

State Employees' Retirement	405,042
State Employees' Health and Welfare	176,118
Total Other Increased Expenditures	$4,581,549
GRAND TOTAL—INCREASES	$7,802,696

GENERAL ANALYSIS

Objectives

The Department of Corrections is responsible for public protection through the confinement, supervision, and rehabilitation of persons committed to it by the courts.

Program and Performance

The Director of Corrections is responsible for carrying out policies and programs to achieve the objectives of the department. The departmental administration is designed to provide adequate staff to fulfill these responsibilities. This is accomplished through the activities of the executive and 7 major divisions, each headed by a chief. These are: Correctional Program Services, Management Services, Research, Conservation, Correctional Industries, Adult Parole Division, and the Medical Services Division.

The Correctional Program Services Division includes staff responsibility for custodial activities, employee training, education and library services, inmate classification, case work and related professional disciplines, group counseling, records, recreation, and the chaplaincy services. Each of these is an important treatment activity or service at the institution level. During the past year, significant progress has been made in the selective reception, classification, and assignment of an exceptionally high intake. Continued progress has been made on new concepts of programming exemplified by planning for the New Men's Colony—East Facility at Los Padres, for the Conservation Centers and the California Rehabilitation Center. The new concepts include a closer merging of custodial and treatment goals, and this is emphasized by adding functional responsibility for custodial services and the training activity to the Correctional Program Services Division in the Central Office. Emphasis continues on the special treatment and custody of unusually violent individuals in adjustment centers and in the general population in the institutions. There has been a co-operative effort with the Research Division in introducing parole prediction measurement criteria into the reception process.

The Management Services Division staff is responsible for general fiscal management including budget preparation and control, management analysis, prison planning, personnel management, procurement and services, departmental construction and maintenance supervision, the feeding program, and accounting.

The Research Division through its studies of inmate and parole population characteristics and performance provides important data for present and future institution and parole correctional programs by developing and testing specific types of correctional programs for specific types of inmates. A major achievement in 1961-62 has been the initiation into the reception process of a classification system which states the expected parole performance for any group of parolees. This system is being continuously tested for increased effectiveness in both male and female parole assignment procedures.

The Conservation Division was established to provide for the central co-ordination and standardization of the center and camp program. This program calls for the expanded utilization of inmates in conservation and further development of California's natural resources, working co-operatively with other governmental agencies.

The Correctional Industries Division provides a balanced and diversified work program enabling inmates to acquire the good work habits and occupational skills necessary for successful adjustment to free society. The Correctional Industries program includes industrial and agricultural enterprises in the correctional institutions with the exception of the Medical Facility. The Adult Authority and Board of Trustees Institution for Women are shown functionally within Departmental Administration.

A total of 5.5 positions is proposed in the 1962-63 fiscal year. One information officer I is included for increased workload. One assistant research technician and 2.5 clerical positions are provided to handle increased workload in the research division. One intermediate clerk is proposed for the increased workload in the personnel office.

These positions are discussed in the General Analysis, Departmental Summary. (See pages 59 to 63.)

One clerk is abolished in the records office based upon increased efficiency in records management.

Department of Corrections

DEPARTMENTAL ADMINISTRATION—Continued

ADULT AUTHORITY

Main Office at Sacramento

GENERAL ANALYSIS

Objectives

The Adult Authority is composed of 7 members appointed by the Governor for a term of 4 years.

The Adult Authority is the term-fixing and parole-granting agency in California for the adult male felons. The authority is fundamentally concerned with rehabilitation of adult male felons and with the release of these individuals at a time which is compatible with the interests of both the inmate and society.

The Adult Authority acts as the Advisory Pardon Board to the Governor on matters of executive clemency as well as assuming responsibility for investigating and reporting to him on condemned cases. The chairman of the Adult Authority serves on the State Board of Corrections.

Program and Performance

The Adult Authority meets at each of the several state correctional institutions regularly and conducts hearings by organizing into panels for the purpose of fixing terms, granti paroles, determination and forfeiture of credits, and restorati of certain civil rights requested by inmates.

The authority meets weekly to consider reports and reco mendations submitted by the Adult Parole Division concerni revocation of parole, restoration of certain civil rights request by parolees, reinstatements, and refixing terms of parolees. T Adult Authority grants parole to the nonfelon narcotic addi committed to the Department of Corrections.

During the 1960-61 fiscal year, the Adult Authority heard total of 24,786 cases. It is estimated that a total of 29,1 cases will be reviewed by the board during the 1961-62 fisc year and 32,790 cases in 1962-63. Two additional Adult Autho ity representatives are included for this increased term-setti workload. These positions are discussed in General Analys Departmental Summary. (See pages 59 to 63.)

BOARD OF TRUSTEES—INSTITUTION FOR WOMEN

Main Office in Los Angeles

GENERAL ANALYSIS

Objectives

The Board of Trustees, California Institution for Women, is responsible under the Indeterminate Sentence Law for fixing the terms of adult female felons and the granting or revoking of parole to such women. In addition the board is responsible for the non-felon female narcotics addicts. The board is also responsible for administration of the Women's Parole Division which supervises all adult females released on parole from the Institution for Women and those women released from other co-operating states to parole programs in California. It als may advise the Director of Corrections on general policies fo the maintenance and operation of the California Institution fo Women and the care, custody, treatment, training, disciplin and the employment of women confined at the institution. Th objective of the board is the protection of society by the settin of appropriate terms, careful selection of those women to b released on parole, and their proper supervision while on parole

---

[a] Includes 1 position temporarily authorized in the 1961-62 fiscal year to handle increased workload.

Department of Corrections

DEPARTMENTAL ADMINISTRATION—Continued

BOARD OF TRUSTEES—INSTITUTION FOR WOMEN—Continued

GENERAL ANALYSIS—Continued

Program and Performance

The Board of Trustees consists of 5 members, 3 of whom shall be women. They are appointed by the Governor, with the advice and consent of the Senate, for a term of 4 years. The board maintains its office in Los Angeles; the parole division has offices in Los Angeles and San Francisco.

The board meets regularly, reviewing the individual cases and studying the histories of the women prisoners. A portion of increased workload of the board is reflected in increasing population of the Institution for Women, which has risen from an average of 835 in 1960-61 to an estimated 981 in 1961-62 and 1,160 in 1962-63.

The remaining increased workload of the board is reflected in the increased parole population. Parole agents responsible to the board will supervise an average of 1,111 parolees in 1962-63 compared to an average of 925 parolees in the 1961-62 fiscal year and 760 in the 1960-61 fiscal year. Twelve additional positions are included for this increased workload. These are comprised of 4 professional and 1 clerical position for regular parole supervision; and 5 professional and 1 clerical for the non-felon addict parolee supervision; and 1 professional position for the Increased Correctional Effectiveness program.

These positions are discussed in General Analysis, Departmental Summary. (See pages 59 to 63.)

GENERAL ANALYSIS

Objectives

The objective of the Adult Parole Division is the protection of society by supervising men released from prison and assisting them to fully readjust to life in the community. More than 90 percent of the men released from prison are released to parole supervision.

Program and Performance

The Adult Parole Division supervises all adult males released from California prisons to parole programs in this State. In addition, it supervises men released from prisons of other states to parole programs in California just as other states supervise California parolees residing there.

This division has its headquarters in Sacramento and 20 field offices throughout the State. For administrative purposes, the State is divided into 4 regions.

The work of the parole agent consists of investigating the proposed programs for parolees; assisting the parolee in vocational guidance, job placement, and counseling on personal problems; appraising the parolee's behavior, attitudes, work record, and associations; maintaining contact with other law enforcement agencies; and protecting the interests of society by taking the parolees into custody if he shows evidence of becoming a threat to the community.

Parole agents are budgeted on the basis of an overall ratio of 55 parolees per 1 professional employee. All professional employees, except the chief, deputy chief, and the interstate unit are included in computing the ratio. This ratio includes the regional supervisors, associate regional supervisors, district office supervisors, and staff specialists in placement and training. As a result, each agent actually supervises approximately 75 parolees.

As an aid to supervision, the division operates out-patient psychiatric clinics in Los Angeles and San Francisco. The Los Angeles facility serves a large portion of Southern California. The clinics provide professional psycho-therapy to parolees with emotional problems. Clinic staff also provides emergency psychiatric evaluations of parolees, consults with parole agents, and participates in the training of agents.

In addition to the regular supervision of parolees, the division operates 2 research projects designed to discover more effective and economical methods. The Special Intensive Parole Unit continues to evaluate the results of giving more intensive and specialized supervision. In its current phase, the unit is testing the effect of assigning specific groupings of parolees to selected parole agents.

The Narcotic Treatment Control Project brings a 3-phase attack to bear on the supervision of former felon narcotics addicts released to the community after serving their prison

ADULT PAROLE DIVISION—Continued

GENERAL ANALYSIS—Continued

Program and Performance—Continued

sentence. During 1961-62, the division will continue to operate 4 field units supervising a total of approximately 800 parolees all of whom were once narcotic addicts. Three of the field units are located in Los Angeles, where the problem is most acute, and 1 is located in San Francisco-Oakland area. The first phase of the project is intensive supervision of small 30-man caseloads made up exclusively of former addicts by agents specially trained to work them. The second phase is frequent chemical testing of the parolee by anti-narcotic injections which will disclose any recent use of addicting narcotics. The third phase is the provision for return of the parolee to special detention-treatment units at San Quentin, the California Institution for Men and the Institution for Women when appropriate.

In the latter part of the 1961-62 fiscal year the Adult Parole Division will start receiving non-felon narcotics addicts committed to the Department of Corrections in accordance with Chapter 850, Statutes of 1961, who will have been confined in and paroled from the California Rehabilitation Center and its branches. The treatment and control of such narcotic offenders will be on a budgeting ratio of 25 parolees per 1 professional employee. This will result in a 30-man caseload for the Parole Agent I. This is the same as for felon addicts under the Narcotic Treatment Control Project. This ratio will provide the close supervision and treatment setting necessary for the control and rehabilitation of these non-felon addicts.

A total of 102 additional positions are included for the division's increased workload. Twenty-one professional and 7 clerical positions are provided for regular parole supervision based on the workload formula. Forty-six professional and 12 clerical positions are requested for parole supervision of the non-felon narcotics addicts committed to the Department of Corrections. Two physicians and 6 correctional officers are included to staff 2 additional narcotic test stations necessary to handle the addict workload. Five positions are included for the Increased Correctional Effectiveness Program. Two psychiatrists and 1 clerical positions are provided for the northern out-patient clinic.

These positions are discussed in the General Analysis, Departmental Summary. (See pages 59 to 63.)

SPECIAL STUDY COMMISSIONS

Three special commissions were authorized to study the various aspects of chronic correctional problems in this State. The Insanity Commission and its objectives are described below. The Commissions on Juvenile Justice and the Commission on Narcotics expired as of June 30, 1961. The objectives of these two commissions culminated in the adoption by the 1961 Legislature of revised substantive and procedural juvenile court laws and more stringent and inclusive narcotics laws.

COMMISSION ON PROBLEMS OF INSANITY IN CRIMINAL CASES

Objectives

Broad objectives include study on problems of insanity relating to criminal offenders. Distinction is made in assignment of the problem between procedural and substantive aspects. Recommendations aimed at improving laws relating to procedures and the criminal responsibility of persons afflicted with mental diseases or disabilities are primary goals.

Program and Performance

This commission was divided into 2 special commissions of 5 members each, created by Executive Order of the Governor on May 4, 1960. Each special commission is authorized to make progress and interim reports on such subjects within the general scope of its assignment and at such times as may be deemed appropriate by said commission.

In view of the complexity and importance of the subject matter and the depth of the study required, it is anticipated that the work of the overall commission will be extended into the 1962-63 fiscal year. This budget, therefore, proposes to continue the overall commission until June 30, 1963.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS

Objectives

The Conservation Center and branches have as their objectives the confinement and rehabilitation of male offenders by training and employing them in natural resources and conservation practices.

Program and Performance

The Conservation Center and its branches were authorized by provisions of Section 6200 and 6208 of the Penal Code. The Conservation Center Superintendent will administer the center and branches located in Tuolumne County and the North Coast area. The Conservation Center is a permanent medium-minimum security facility for 1,200 inmates divided into two 600 inmate units. One unit will house medium security inmates. The second unit will house minimum custody inmates.

The center will receive inmates beginning on September 1, 1962. It is planned to receive inmates from the guidance centers and more secure prisons, and to train them in the skills necessary for their assignment to conservation camps operated in cooperation with the Division of Forestry, Division of Highways, and the United States Forest Service.

The 2 branch facilities are planned to be constructed with a capacity of 1,200 inmates each. Funds for the construction of the Tuolumne branch with a population of 1,200 are contained in the 1962-63 Capital Outlay budget. Preliminary work on the North Coast branch is also scheduled for the 1961-62 and 1962-63 fiscal years. A new facility is being built on the grounds of the California Institution for Men for the temporary use of non-felon addicts. This facility will become the southern center of the Conservation Camp program during 1963-64.

Camps presently administered by Folsom will be transferred to the Conservation Center during the 1962-63 fiscal year. A new conservation camp located in Inyo County with a capacity of 80 inmates is scheduled to be activated in January, 1963. The center and its branches will ultimately operate all the conservation camps.

Average Daily Population:	1962-63
Conservation Center	530
Camp operations	571
Total	1,101
Parole Releases:	
Conservation Center	700

A total of 242.4 positions is proposed in the 1962-63 fisca year to complete the staffing of the center. A staff of 1 for th Tuolumne branch and 8.6 for camps is proposed.

The staffing of this new institution utilizes the new class o correctional program supervisor to provide more adequate cus todial control and treatment in a minimum custody settin through closer inmate-staff relationships. The correctional pro gram supervisor will serve to combine in 1 person the dutie and functions now encompassed by the correctional officer an a number of the duties now performed by the correctiona counselor. In integrating these 2 functions, the department i combining in 1 person the staff responsibility for the custodia and rehabilitative functions to more efficiently utilize traine personnel.

The proposed positions are classified by function as follows

Conservation Center:	
Executive	1
Business services	13
Custody	160.
Classification and treatment	7.
Classification and parole	8
Education	10.
Religion	2.
Medical	13
Recreation	1
Feeding	8.
Laundry	2
Clothing	1
Housekeeping	1
Plant operation	13.
Total	242.4
Tuolumne Branch:	
Business services	1
Camps	8.6
Total	252

These positions are discussed in the General Analysis, Departmental Summary (See pages 59 to 63).

GENERAL ANALYSIS

Objectives

The Correctional Training Facility protects the public by confining male prisoners under medium custody and treating them to permit their safe release to the community. A camp program is operated to provide useful work in a minimum custody setting for carefully selected inmates who are expected to benefit from this experience.

Program and Performance

This institution is planned to operate with an average population of 3,475 during the 1962-63 fiscal year. Correctional treatment planned for inmate rehabilitation includes vocational and academic programs, industrial work, plant maintenance training, and one of the largest agricultural enterprises in the department. Group counseling, religious programs, and recreational activities also play an important role. While the institution and programs are designed for adult felons, vocational and academic education courses are emphasized in the North Facility, as 540 Youth Authority wards are housed there with 660 of the younger adult felons.

One cell wing of the central unit is used as an adjustment center, housing inmates with severe behavior problems.

Institution population in 1962-63 may be described in general by the following characteristics:

Adult Felons:

Median age, 27 years; 21 percent prior prison commitments; 22 percent prior escape records; offense groupings will include about 26 percent narcotic, 20 percent burglary, 21 percent robbery, and 11 percent forgery and illegal checks.

Youth Authority Wards:

Median age over 19 years: 53 percent prior commitments; offense groupings will include 21 percent robbery, 28 percent burglary, 12 percent auto theft, and 8 percent narcotic.

In addition, the institution is responsible for the administration of a conservation camp program. During the 1962-63 fiscal year 4 permanent state conservation camps will operate with inmate populations totaling 300 men. In addition to these permanent camps, a mobile camp with 40 inmates is operated for general conservation work.

The camps, manned by specially selected and trained minimum custody inmates, serve the public in the conservation of the State's natural resources through fire fighting and reforestation work. This provides valuable work and excellent training experience for the inmates.

Population and release of inmates from this institution are as follows:

	1960-61	1961-62	1962-63
Average Population:			
Adult felons	3,249	3,530	3,275
Youth Authority wards	530	505	540
Totals	3,779	4,035	3,815
Paroles and Discharges:			
Adult felons	1,020	1,350	1,250
Youth Authority	772	770	787
Totals	1,792	2,120	2,037

A total of 4 new positions is proposed in the 1962-63 fiscal year budget request—1 correctional captain for administration of the personnel program, 1 business manager II, 1 accounting officer II and 1 accounting technician III to facilitate reorganization of the business function at the North Facility. These positions are discussed in the General Analysis, Departmental Summary. (See pages 59 to 63).

GENERAL ANALYSIS

Objectives

The Deuel Vocational Institution provides custody, care, industrial, vocational and other training, guidance, and reformatory help for young men too mature to be benefited by the programs for correctional schools for juveniles and too immature for confinement in prisons.

Program and Performance

Treatment is designed to rehabilitate young offenders committed either to the Youth Authority or to the Department of Corrections. Academic and vocational instruction along with industrial work and training are emphasized. A research study to determine scientifically the results of intensive counseling is being conducted. A special program for young men with severe behavior problems is operated in the adjustment center. A group counseling program staffed generally by volunteer leaders under trained management provides a media wherein the majority of the inmate population have an opportunity to review with other inmates the causes of delinquency. A reception-guidance center for Youth Authority wards is operated within the institution.

Institution population in 1962-63 may be described in general by the following characteristics:

Adult Felons:

Fifteen and three-tenths percent under 21 years of age, median age 24.3 years; 5.3 percent serving life sentences, 26.2 percent prior prison commitments; offense grouping will include 25.7 percent robbery, 13.8 percent forgery and checks, 17.7 percent burglary, and 19 percent narcotics.

Youth Authority:

Median age approximately 19.7 years; 53.7 percent prior commitments; offense groupings will include 25.7 percent burglary, 17.8 percent robbery, 13.9 percent auto theft, and 9 percent narcotics.

Population and release of inmates from Deuel Vocational Institution are as follows:

	1960-61	1961-62	1962-63
Average Population:			
Main Institution:			
Adult felons	662	730	600
Youth Authority	749	755	715
Reception-guidance Center:			
Youth Authority	281	300	325
Adult felons	12	–	–
Totals	1,704	1,785	1,640
Paroles and Discharges:			
Adult felons	239	275	300
Youth Authority	697	767	776
Totals	936	1,042	1,076
Reception-guidance Center:			
(Intake for processing)	2,251	2,450	2,750

One clerical position is proposed in accordance with formula for the Reception-Guidance Center, and 2 correctional officer positions are proposed to provide custodial coverage at the Adjustment Centers. These positions are discussed in the General Analysis, Departmental Summary. (See pages 59 to 63.)

Two positions are abolished in the classification and parole unit in accordance with formula computations.

GENERAL ANALYSIS

Objectives

The State Prison at Folsom protects the public by confining chronic male adult offenders, 9 percent of whom require maximum or close custody supervision. The program is designed to protect the public through a treatment process to bring about an adjustment which will permit their safe release to the community.

Program and Performance

This institution was established in 1880 on a 1,700-acre site in Sacramento County. The institution is expected to confine an average of 2,985 inmates in 1961-62 and 2,730 inmates during 1962-63.

Correctional treatment designed to rehabilitate the inmate includes academic and vocational education, industrial work and training, plant maintenance work and training, group counseling, medical and dental care, religious, library and recreational activities. Because of the overcrowding of the institution, an idleness problem will exist during 1962-63 as well as during 1961-62.

A special unit, the 138 capacity adjustment center, provides control and treatment of many of the department's most severe behavior problem cases. The institutional population may be described in general by the following characteristics: Median age, 38; 86 percent prior prison commitments; 34 percent prior escape records; 7 percent serving life terms; offense groupings will include 22.9 percent robbery; 6.5 percent homicide; 19.4 percent burglary; 16.5 percent narcotics; and 11.7 percent forgery and checks.

The administration of the 7 year-round State Conservation Camps and the 2 seasonal camps will be transferred from Folsom State Prison to the California Conservation Center in the 1962-63 fiscal year. These camps, manned by specially selected minimum custody inmates, serve the public through conservation of this State's natural resources by fire fighting and reforestation work. This also provides a valuable work and training experience for the inmates.

Population and release of men from this institution and its camps are as follows:

	1960-61	1961-62	1962-63
Average population	3,217	3,486	2,730
Paroles and discharges	709	980	770

One and one-half new positions are proposed in the 1962-63 fiscal year. These are 1 additional physician and surgeon II for workload in the medical care program; and 0.5 instructor in cooking for workload in the ranch feeding program. These positions are discussed in the General Analysis, Departmental Summary. (See pages 59 to 63.)

---

[a] Composed of savings in salaries and wages, $7,419; operating expenses, $87,502; equipment, $3,046; inmate pay, $843; and an increase in reimbursements, $4,583.

INSTITUTION FOR MEN—Continued

SUMMARY AND GENERAL ANALYSIS				ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	CHANGE FROM 1961-62

GENERAL ANALYSIS

Objectives

The Institution for Men has as its objective the protection of the public by confining for training and treatment the more tractable young male offenders with the majority under minimum custody.

The Institution for Men is composed of the main institution and Reception-Guidance Center at Chino, a branch institution at Tehachapi, and an extensive conservation camp system.

Program and Performance

This institution was established in 1941 on a 2,500-acre tract south of Chino in San Bernardino County. Both temporary and permanent facilities of the main institution will house an average 1,670 inmates during 1962-63 and 1,700 in 1961-62.

The Reception-Guidance Center receives all new male felon and non-felon addict commitments from the southern counties. It will operate at an average of 615 inmates, including 80 non-felon addicts during the 1962-63 fiscal year, and will process an estimated 4,020 cases.

The Tehachapi branch was opened in 1955 after the earthquake-damaged facilities were repaired. It will operate at a capacity population of 655, including 325 non-felon addicts during the 1962-63 fiscal year. Tehachapi has been temporarily designated as a branch of the California Rehabilitation Center from September 15, 1961 to March 31, 1963.

Correctional treatment at the main institution is designed primarily for carefully screened young male offenders capable of profiting by the program and accepting its responsibilities. It covers a broad field of vocational and academic instruction, plus a wide variety of industrial activities, including an extensive agricultural program. A large number of medium security men, however, are held at the Tehachapi branch. That this has been successfully accomplished is attributed in large part to the community living concept which is particularly emphasized at the Tehachapi branch.

The main institution population, excluding camps, may be described in general by the following characteristics: median age is 30 years; 33 percent have prior commitment records; offense groupings include 29 percent forgery and illegal checks, 24 percent burglary, 20 percent robbery, and 7 percent narcotics.

The institution at present also administers 7 year-round conservation camps in co-operation with the state conservation program and the State Division of Forestry. The average camp population will be 520 in 1962-63.

The institution provides certain services to the Youth Training School, Fred C. Nelles School for Boys, and the Southern Reception Center and Clinic. It is planned to provide certain services to the Rehabilitation Center for narcotics addicts.

The processing of non-felon addicts at the Chino Reception-Guidance Center and the use of Tehachapi Branch for the treatment of non-felon addicts will terminate during the 1962-63 fiscal year when the programs will be transferred to the California Rehabilitation Center.

Population and release of men from this institution are as follows:

	1960-61	1961-62	1962-63
Average Population:			
Institution	1,540	1,625	1,595
Narcotic Clinic	56	75	75
Camps	604	538	520
Tehachapi:			
Felons	581	345	330
Non-felon addicts	–	315	325
Reception-Guidance Center:			
Felons	548	540	535
Non-felon addicts	–	110	80
Totals	3,329	3,548	3,460
Paroles and Discharges:			
Institution	1,343	1,650	1,600
Tehachapi—Felons	238	295	165
Tehachapi—Non-felon addicts	–	125	600
Totals	1,581	2,070	2,365
Reception-Guidance Center:			
Intake for Processing:			
Felons	3,439	3,200	3,420
Non-felon addicts	–	1,700	600
Totals	3,439	4,900	4,020

Eight new positions are proposed for 1962-63. These include 2 professional positions for the Reception-Guidance Center in accordance with formula and 6 positions at Tehachapi which consist of 2 correctional officers for relief for the work crew and the new visiting room, 1 clerk for the mail room, 1 cook based on workload, and 2 clerks for the Narcotic Rehabilitation Unit based on formula. These latter 2 clerical positions will terminate on March 31, 1963, due to transfer of addicts from this branch.

These positions are discussed in General Analysis, Departmental Summary. (See pages 59 to 63.)

Two positions at the main institution are abolished based upon formula computation.

GENERAL ANALYSIS

Objectives

The Medical Facility is the psychiatric, diagnostic, and treatment center of the department. It confines and treats adult male felons who are mentally ill or who have severe mental or emotional disorders. These include psychotic, severe neurotic, and antisocial character disorders. A small number of recalcitrant tuberculars are also housed.

A reception-guidance center located in facilities adjoining the main institution receives adult male felons from the 47 northern counties for diagnosis, classification, and recommended institutional placement. Also, it receives male parole violators returned to prison from the entire State. Effective October 1, 1961, to relieve overcrowded reception-guidance center facilities, some parole violators returned are being transferred to and processed at the San Quentin State Prison.

Program and Performance

The Medical Facility occupies permanent facilities in Solano County on a 900-acre site near Vacaville. The reception-guidance center of this facility will process an estimated 4,450 cases during 1962-63. The main institution will house an average 1,300 adult male felons and 100 Youth Authority wards during the 1962-63 fiscal year.

Group psychotherapy is a major treatment method at the Medical Facility. Programs of academic and vocational education, plant maintenance work and training, medical and dental care, occupational therapy, library, recreation, and religion are offered to all inmates to the degree to which they can participate. These programs are designed to provide intensive treatment for felons afflicted with major mental illnesses (psychoses) and severe emotional and personality disorders. A sizeable number of problem cases are also admitted expressly for psychiatric evaluation and recommendation with respect to disposition. Although the overwhelming majority are adult felons, there is a small number of wards from the Youth Authority and tuberculous recalcitrant misdemeanants from the Department of Public Health.

The prison population may be described in general as follows: Median age, 31 years; 40 percent prior prison commitments; 20 percent prior escape record; offense groupings will include 16.3 percent sex offenders; 16.6 percent burglary; 17.5 percent robbery; 13.1 percent forgery and checks, and 8.6 percent narcotics.

This prison population may also be described in terms of medical classifications as follows:

Psychiatric observation cases: 40—175 cases per year for diagnosis and evaluation for the Adult Authority, courts or other institutions;

Active treatment cases (consists of patients with treatable mental and emotional disorders), 760: intensive group psychotherapy, 500; supportive group psychotherapy, 170; and group counseling, 90;

Care cases for continuous treatment, 190: sexual deviates (including homosexuals, voyeurs, pedophilics, transvestites, etc.), 50; psychotics, 70; mental defectives, 50; severe ne logical 20;

Administrative cases, 110: awaiting transfer, parole, 54; departmental policy cases, 30; tuberculosis, 26;

Workers, 300: skilled craftsmen, cooks, clerks, nu technicians, etc.; assigned primarily for maintenance of institution. All of these men receive group counseling.

An extensive reorganization of the psychiatric, medical, todial, and care and treatment functions began July 1, 1 Patient housing wings will be divided into 2 administra units of 480 inmates each, with separate treatment teams each 240 inmates. The primary purpose of the reorganizatio to provide a more beneficial treatment setting and to ob more efficient utilization of existing personnel in the treatr process. Also, beginning in August, 1961, a psychiatric resid training program was established in conjunction with the dency training programs at Sonoma State Hospital and N State Hospital. Two residents will be in training for year period. They will rotate through the 3 institutions on completion of their training will serve the department the basis of 1 year of service for 1 year of training.

Population and release of men from this institution are as lows:

	1960-61	1961-62	196
Average Population:			
Main Institution:			
Adult felons	1,366	1,310	1,
Youth authority	–	90	
Reception-Guidance Center:			
Adult felons	737	718	
Non-felon addicts	–	7	
Totals	2,103	2,125	2,
Paroles and Discharges:			
Adult felons	279	320	
Youth authority	–	60	
Totals	279	380	
Reception-Guidance Center:			
Intake for processing	4,423	4,403	4,4

A total of 4 proposed new positions is included in 1962-63 fiscal year. These include 2 physician and surgeon positions for the psychiatric residency program; one progr administrator to administer a 480 inmate treatment unit; 1 intermediate stenographer for clerical workload in special treatment unit for increased correctional effectiven These positions are discussed in the General Analysis, Depa mental Summary. (See pages 59 to 63).

One teaching position is being abolished in the support budg The position will be funded in the future from the Inmate W fare Fund.

---

[a] Excludes cost of operating reception-guidance center, but includes cost of feeding, housing, and other expenses of inmates be processed therein.

GENERAL ANALYSIS

Objectives

This facility protects and serves the public by confining male prisoners under medium custody and treating them to permit their safe release to the community.

Program and Performance

East Facility of the Men's Colony is a permanent medium security institution for 2,400 inmates located adjacent to the minimum security West Facility.

The new institution is designed to make possible a more personal relationship between the inmate and the treatment staff, and, at the same time, effect economies by using central facilities for service and supply. It contains 4 segregated areas for 600 men each. Housing, feeding, recreation, education and group counseling facilities are provided for each unit.

Correctional treatment planned for inmate rehabilitation includes vocational and academic programs, industrial work, and plant maintenance training.

---

[a] Composed of savings in salaries and wages, $17,216; operating expenses, $15,080; equipment, $1,998; inmate pay-work project, $438; and increased reimbursements, $11,529.

MEN'S COLONY—EAST FACILITY—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS—Continued

Program and Performance—Continued

The staffing of the institution has utilized the treatment team concept. A program administrator is in charge of each of the four 600-man units and supervises both treatment and custodial personnel assigned to the unit.

An average population of 105 non-felon addicts will be temporarily housed at Men's Colony—East Facility in the 1962-63 fiscal year prior to the filling of the Rehabilitation Center for narcotics addicts.

Population and release of inmates from the Men's Colony—East Facility are as follows:

	1960-61	1961-62	1962-63
Average Population:			
Adult felons	75	1,545	2,295
Non-felon addicts	–	–	105

	1960-61	1961-62	1962-6
Parole and Discharges:			
Adult felons	–	560	91
Non-felon addicts	–	–	26

The 3.1 proposed new positions include 0.5 for emergencies 0.6 for group counseling overtime; and 2 positions for research in conjunction with a project financed by UCLA. These positions are discussed in the General Analysis, Departmental Summary. (See pages 59 to 63.)

One clerical position is abolished based upon formula application for classification and parole.

GENERAL ANALYSIS

Objectives

The California Men's Colony—West Facility protects the public by confining aged, infirm, and other handicapped male felons and treating and training them to permit their safe release to the community.

Program and Performance

The Men's Colony—West Facility was established in 1954 on a 220-acre site in the hospital area of Camp San Luis Obispo. The institution will house an average of 1,440 men in 1961-62 and 1,450 in 1962-63.

The correctional program is designed primarily for the retraining, rehabilitation, and return to civilian life of elderly and infirm offenders. This program includes a small vocational program, an academic program in conjunction with the San Luis Obispo School District, group counseling, organized recreation, Alcoholics Anonymous assistance, arts and crafts training, and religious guidance.

In addition, during the 1961-62 fiscal year the institution will open and operate 1 new permanent state conservation camp with an inmate population of 80 men. This camp, manned by specially selected and trained minimum custody inmates, serves the public in the conservation of this State's natural resources through fire fighting and reforestation work.

The institution's 1962-63 population may be described in general by the following characteristics: Median age about 53 years, 61 percent with prior prison commitments, 7 percent serving life sentences; offense groupings will include about 21 percent sex offenses, 20 percent forgery, 13 percent homicide, 11 percent burglary, 7 percent robbery, and 11 percent narcotic. Some are blind, paralyzed, senile, or amputees.

Release of inmates from the Men's Colony—West Facility are as follows:

	1960-61	1961-62	1962-63
Parole and discharges	518	650	670

No new positions are proposed for the 1962-63 fiscal year.

---

[a] Composed of savings in salaries and wages, $58,114; operating expenses, $1,054; equipment, $1,236; and increase in reimbursements, $351.

---

[a] Two and two-tenths positions temporarily authorized in the 1961-62 fiscal year for work crew due to increased institutional population. The opening of San Luis Obispo Conservation Camp late in 1961-62 fiscal year will reduce institutional overcrowding.

[b] One position temporarily authorized in the 1961-62 fiscal year to supervise special repairs and maintenance projects.

[c] Fire protection function transferred to East Facility in the 1961-62 fiscal year.

GENERAL ANALYSIS

Objectives

The California Rehabilitation Center facility and its program serve to protect society and control addiction through the removal of drug addicts from the community and by placement in facilities where they will receive intensive rehabilitative treatment. An extensive medical research program will be conducted to inquire into the causes and possible cures of drug addiction.

Program and Performance

The California rehabilitation program was authorized under Section 6550 of Chapter 12 of the Penal Code. Persons convicted of any crime in a municipal or justice court where the judge thinks that the defendant may be addicted or in danger of becoming addicted to narcotics are ordered to the Superior Court for hearing to determine if such is in fact true; and men and women convicted of certain felonies but not sentenced may be ordered into the program, if the judge feels they are fit subjects for the program.

All narcotic addicts handled under the California rehabilitation program are classified as non-felon addicts to differentiate from the regular inmate population. This applies to volunteers, misdemeanants, and nonsentenced felons.

During 1962-63, the department will be faced with caring for an estimated average daily population of 1,960 non-felon addicts with a year-end population of 2,145. Because of limited facilities available in the 1962-63 fiscal year those non-felon addicts not treated at the center or the Chino Branch will be cared for at other existing facilities.

Correctional program designed to alleviate the inmates' drug addiction problem includes specific programs of group and individual treatment by both professional and lay staff, community-living group treatment for the majority of the addict-inmates, academic and vocational education, medical and dental care, a physical fitness and recreational program, industrial work and training, plant maintenance and training, religious, and library activities.

The drug addict inmate will be assigned to a work-training or school placement for half the day; be involved in group treatment for a quarter of the day; the remaining quarter day will be utilized as needed to meet the physical fitness, individual counseling, and religious requirements of the inmate. The treatment program will be directed at the alleviation of the psychological and social problems of the individual which are basic to the problem of drug addiction. It is anticipated that treatment success will be difficult to obtain and the rehabilitative program must be continuous with provision for intensive supervision and continued treatment on parole, with provision for quick return to the California Rehabilitation Center for further control an treatment whenever a relapse into addiction is imminent. Th parole agents will carry a 30-man caseload in supervising th non-felon addict.

The rehabilitation center treatment program will be accompanied by an extensive research program into the causes of an more positive treatment for drug addiction.

It is planned to obtain and activate a 2,300-inmate unit in th 1962-63 fiscal year, which will enable the department to concentrate its non-felon addict program in one facility, with men an eventually women being programmed in the same facility. Thi facility is scheduled to begin receiving non-felon addicts i October 1962.

Pending acquisition of this unit and coinciding with the effective date, September 15, 1961, of the non-felon narcotic program temporary facilities were made available for addicts as follows

1. Use of a section of the Reception-Guidance Center at th Institution for Men, Chino, to process and house mal addicts and the Institution for Women to receive the female addicts.
2. Treatment of male addicts at the Tehachapi institutio and later, as needed, in a unit of the Men's Colony a Los Padres.
3. A total of 200 female non-felon addicts will be housed an treated at the Institution for Women during the 1962-6 fiscal year.

Space for 960 addict males is being provided in a new facilit being built on the grounds of the California Institution for Men This institution is scheduled for completion May 31, 1962 While this facility will be used initially for addicts, it is designed for long-range use as the southern center of the Department's Conservation Camp program. This institution will begi receiving inmates June 1, 1962.

Population and releases of men from this institution are as follows:

	1960-61	1961-62	1962-6

GENERAL ANALYSIS—Continued

Program and Performance—Continued

A total of 313.1 new positions is proposed in the 1962-63 fiscal year. These positions are classified by institution and functions as follows:

Center:	
Business services	4
Custody	162.4
Medical	19
Research	2.5
Care and treatment	15
Education	6
Classification and parole	10
Reception	2
Feeding	7.1
Clothing, laundry	4
Plant operation	12.8
Total, Center	244.8

Chino Branch:	
Business services	1
Custody	48
Care and treatment	11
Education	1
Classification and parole	8
Feeding	0.1
Total, Chino Branch	69.1
Grand Total	313.9

These positions are discussed in the General Analysis, Departmental Summary. (See pages 59 to 63.)

GENERAL ANALYSIS

Objectives

The State Prison at San Quentin protects the public by confining adult male felons and some Youth Authority wards under close-medium security and treating them to permit their safe release to the community. A camp program is operated to provide useful work in a minimum custody setting for carefully selected inmates who are expected to benefit from this experience.

Program and Performance

The institution is expected to confine an average of 4,645 inmates in 1962-63. Correctional treatment designed to rehabilitate the inmate includes academic and vocational education, industrial work and training, group counseling, medical and dental care, and religious, library, and recreational activities. Some idleness will result in 1962-63 as well as in 1961-62 due to overcrowding of the institution.

---

[a] Composed of savings in salaries and wages, $872,215; and inmate pay—work projects, $13,800.

STATE PRISON AT SAN QUENTIN—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS—Continued

Program and Performance—Continued

A special unit at San Quentin provides custody of inmates sentenced to death and provides for their execution under the death penalty.

A special unit, a 101-capacity adjustment center, provides control and treatment for inmates with severe behavior problems.

The Narcotic Treatment Control Project activated in August, 1960 will consist of an average population of 20 who will have a half-day treatment and a half-day work program.

The adult felon institution population may be described in general by the following characteristics: median age 31; 42 percent prior prison commitments; 24 percent prior escape records; 5.2 percent serving life sentences; offense grouping will include 6.6 percent homicide; 21.2 percent robbery; 14.5 percent burglary; and 29 percent narcotic.

Youth Authority wards: median age 20; 49 percent prior commitments; offense grouping will include 21 percent robbery, 15 percent burglary, 19 percent auto theft, 11 percent narcotic.

San Quentin is responsible for the administration of 8 year-round road and conservation camps, 1 mobile camp and 1 seasonal United States Forest Service camp. An additional 80-man camp at Konocti, formerly budgeted and scheduled to be activated in the current year, will be activated in the budget year. This will bring the year-end camp population to 750 inmates in the 1962-63 fiscal year. These camps, manned by specially selected minimum custody inmates, serve the public by aiding in the conservation of the State's natural resources through fire fighting and restoration work. The highway road camp inmates perform highway maintenance and construction work in remote areas of Northern California. This provides valuable work and training experience for the inmates.

Population and release of men from this institution and its camps are as follows:

	1960-61	1961-62	1962-63
Average Population:			
Adult felons	5,336	5,436	5,209
Youth Authority	–	100	100
Paroles and Discharges:			
Adult felons	1,137	1,760	1,615
Youth Authority	–	25	50

Additional capacity for the department's reception-guidance center operations was necessitated by the intake of nonfelon addicts at Southern Reception-Guidance Center. San Quentin will operate a reception-guidance center to process parole violators. Estimated cases processed at San Quentin Reception-Guidance Centers are 850 in the 1961-62 fiscal year and 1,530 in the 1962-63 fiscal year.

The 12.5 new positions included in this budget are proposed for the operation of the reception-guidance function. These positions are discussed in the General Analysis, Departmental Summary. (See pages 59 to 63.)

One professional and 2 clerical positions are abolished based upon formula computation.

GENERAL ANALYSIS

Objectives

The Institution for Women receives and confines all types of female prisoners committed to the Department of Corrections, including general felony cases, youth authority wards, narcotic commitments, mentally and emotionally disturbed under felony commitment, and recalcitrant tuberculous cases, treating them to permit their safe release to the community.

Program and Performance

The correctional treatment program is designed for the rehabilitation of women inmates. It includes courses of academic and vocational instruction, group psychotherapy and counseling, medical and dental care, library, and recreational activities. During 1961-62 the increased correctional effectiveness program was initiated. There is also an active industrial project consist-

---

[a] Composed of savings in salaries and wages, $14,630; operating expenses, $115,650; equipment, $7,598; inmate pay, $16,640; and decrease in reimbursements, $23,929.

[b] Composed of savings in inmate pay.

GENERAL ANALYSIS—Continued

Program and Performance—Continued

ing of the manufacture of garments as well as sewing projects such as designing, dressmaking, alterations, and tailoring. Laundry and food service training, nurse's aide and medical technician training, and landscape and nursery training are also available for the inmates.

A study is made of all women entering the institution and a classification committee works with the inmate to develop an individual treatment program based on her physical and mental condition, aptitudes and skills, educational background, and social history.

There is an active program of work, education, and recreation in which every woman is required to participate daily. Individual and group therapy for the more seriously disturbed inmates is conducted by a staff of a psychiatrist and psychologists. The majority of inmates receive individual and group counseling which is conducted by other staff members.

During 1961-62 a narcotic rehabilitation unit was established to provide continuous rehabilitation and intensive treatment to nonfelon narcotic addicts.

The present population of the institution may be described in general as having the following characteristics: median age, 32.4 years; 23 percent prior prison commitments; 4 percent serving life sentences; offense grouping includes 33 percent forgery and illegal checks; 25 percent narcotic; 12 percent homicide, and 10 percent thefts other than auto thefts.

While the present capacity of the institution is 801, an average population of 981 is estimated for 1961-62 which is anticipated to increase to 1,160 in 1962-63.

Population and release of women from this institution are as follows:

	1960-61	1961-62	1962-63
Average population			
Institution for Women	835	875	960
Narcotic Rehabilitation Unit	–	106	200
	835	981	1,160
Paroles and Discharges			
Institution for Women	584	485	550
Narcotic Rehabilitation Unit	–	45	400
	584	530	950

Ten new positions are proposed in the 1962-63 fiscal year: 1 storekeeper for increased workload; 1 correctional counselor and 1 clerk by formula; 1 laundry supervisor, 1 women's correctional supervisor, and 1 stationary engineer for a second laundry shift financed by reimbursements from the Youth Authority, and 1 building maintenance man for increased workload. Three clerical positions are to be provided for the Narcotic Rehabilitation Unit workload by formula and will be reimbursed by the California Rehabilitation Center. These positions are discussed in the General Analysis, Departmental Summary. (See pages 59 to 63.)

GENERAL ANALYSIS

Objectives

The objectives of the Youth Authority are first, the protection of society by substituting for retributive punishment, training, and treatment directed toward the correction and rehabilitation of young persons declared wards for delinquent causes or found guilty of public offenses; and second, prevention of the occurrence of delinquency. In addition, the department encourages improvements in juvenile law enforcement and probation and increased use of county juvenile homes and camps.

Program and Performance

The Department of the Youth Authority was originally conceived as the Youth Correction Authority by the Legislature in 1941. Amendments to the original law in 1943 created the present Department of the Youth Authority and gave it responsibility for the administration of the State's correctional schools and parole program for youths. The law provides that commitments can be made to the Youth Authority by judges of the superior court sitting in juvenile or criminal court and judges of the municipal court after they have determined that the youth is under 21 years of age at the time of apprehension and that there is no program at the county level to meet the special needs of the individual.

The director of the Youth Authority is the chief administrative officer of the department and chairman of the Youth Authority Board. He is directly responsible for the management of the State's correction schools, reception center-clinics, youth conservation camps, and for the operation of field services and branch offices. He is responsible for the custody, care, treatment, training, discipline, welfare, and supervision of wards committed to the Youth Authority, whether in the institutions or on parole in the community.

The Youth Authority Board is concerned with acceptance or rejection of wards committed to the Youth Authority and with parole and discharge of wards. It also works with the director in the formulation of policies concerning classification, transfer, training, and treatment of wards.

The years between 1941 and 1943 gave the Youth Authority time to develop a plan of organization and a pattern for diagnosis, training and treatment, and community organization. The 3 institutions transferred to the Youth Authority in 1943—Preston School of Industry, Fred C. Nelles School for Boys, and Ventura School for Girls—have increased to 7 institutions, 2 reception center-clinics, and 4 Youth Authority conservation camps for boys. The third and last 400-bed unit of the Youth Training School, a new institution for older boys, was occupied in August, 1961. A new Ventura School for Girls is under construction to replace the present school which was constructed in 1917, as a temporary institution. The first 400-bed capacity unit of this new institution is scheduled for occupancy beginning April, 1962.

The research division was authorized by the 1957 Legislature to provide the department with the means to conduct research into the fields of human behavior as related to its wards and in the specific field of delinquency, its causative factors, treatment, and prevention.

Research programs are now under way to test the effectiveness of psychiatric treatment in institutions, optimum parole caseloads base expectancy predictions, and other programs to aid in better measurement of existing programs and evaluation of proposed plans for improving the treatment of delinquent youth.

The research division also includes the records and statistics section which is responsible for population accounting for wards in institutions and on parole. This section also provides population forecasts used in planning for Capital Outlay and current operations.

The Department of the Youth Authority has centralized parole services by shifting the operation from the 3 original institutions into a separate division responsible for continuing the treatment and supervision of the ward after his release from a correctional school and upon his return to the community. Branch offices have been opened in a number of the larger cities to provide for more efficiency and better service. Institution and parole operations are carefully co-ordinated in the interests of maintaining a continuous program of rehabilitation and training for each ward.

During 1962-63, the institutions of the Department of the Youth Authority will have an estimated average daily population of 4,777. These facilities include 2 reception center-clinics, 5 schools for boys, 2 schools for girls, and 4 Youth Authority camps for boys. In addition, an average of 1,787 wards will be in Department of Corrections institutions. Also, during 1962-63 the Youth Authority will supervise an estimated average parole caseload of 11,464, as compared with 9,793 during 1960-61.

The division of probation and delinquency prevention services conducts a program to develop an awareness of the value of local delinquency prevention programs and the need for adequate community services, and assists in improving them. Training programs are provided for probation officers; counties are assisted in developing plans for new homes, camps and juvenile halls; the interstate compact for juveniles is administered; and publications are developed that are directed toward improving the quality of local services. The Delinquency Prevention Commission established in 1961 advises the director in the field of delinquency prevention.

The Department of the Youth Authority's institutional program for handling the wards committed to it by the various counties includes:

Diagnosis: A diagnostic study and evaluation is made of each ward committed to the Youth Authority. This study and evaluation, made during the ward's stay in a reception center and clinic is for the purpose of diagnosing the cause of the ward's delinquency and making recommendations for a program of individualized treatment to correct the ward's behavior pattern. This study and evaluation results in a recommendation of the degree of custodial supervision required, educational needs, medical and dental care, psychological or psychiatric therapy needed to treat the ward's mental and emotional needs, religious training, and other programs that will aid in the ward's return to society as a useful citizen.

Treatment: The correctional programs carried on in the institutions are designed to enable the Youth Authority to achieve a high degree of training and treatment in the institutional setting and to guide the ward in the development of good moral standards.

Special Treatment Programs: The 1957 Legislature gave the Youth Authority the responsibility for the custody and treatment of a group of wards who have severe emotional and behavioral problems and who are in need of professional, psychiatric-type treatment. The department was not previously equipped to provide both a custodial training program and psychological and psychiatric therapy services. Staff was authorized for the diagnosis and treatment division for the planning, control, and supervision of this program. Preston School of Industry, Fred C. Nelles School for Boys, Paso Robles School for Boys, Ventura School for Girls, and Los Guilucos School for Girls have been authorized staff for treatment units.

Expansion of this program to the Fricot Ranch School for Boys in the 1962-63 fiscal year is proposed. Salaries and wages costs for the 7.5 positions proposed for the Fricot Ranch School for Boys total $52,596.

An academic-physical development staff which will complement the special treatment program at Fricot Ranch School for Boys is proposed. This will require 2 positions at a cost of $13,344.

Capacity completed during the 1961-62 fiscal year for additional population include the following: Northern Reception Center and Clinic—50-boy living unit; Fricot Ranch School for Boys—50-boy living unit; Fred C. Nelles School for Boys—4 50-boy living units; Youth Training School—third 400-boy living unit; Ventura School for Girls—400-bed capacity at the new Ventura School for Girls; Los Guilucos School for Girls—41-bed psychiatric treatment program living unit; Washington Ridge Youth Conservation Camp—80-boy camp; and an 8-bed addition at Paso Robles School for Boys.

Presently financed construction to be completed in 1962-63 will add 1 50-boy living unit to the Fred C. Nelles School for Boys.

The department also administers programs to give financial assistance to counties in the construction and maintenance of juvenile homes and camps caring for wards who could otherwise be committed to the Youth Authority. During this fiscal year it is expected that there will be 41 county operated homes and camps. It is estimated that an average of 2,518 boys and girls will be housed in these facilities.

The Youth Authority is charged with responsibility for establishment of standards and the administration of this state aid. The construction subsidy program was established by the Legislature in 1957. A total of 1,640 county camps beds are either constructed, authorized, or proposed since the inception of this program.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

MAJOR PROGRAM AUGMENTATION AND COSTS

The following summary accounts for the $1,845,132 (8.6 percent) increase in 1962-63 expenditures over 1961-62. Increases are mainly due to operation of new facilities, increased parole caseload, extension of the special treatment program, and increase in wards processed through the reception centers.

Additional personnel for staffing new facilities		
a. Northern California Youth Center (4)	$18,034	
b. Ventura School for Girls (21.7)	104,705	
c. Fred C. Nelles School for Boys (17.5)	83,498	
Total (43.2)		$206,237
Special Treatment Program—Fricot (7.5)		52,596
Academic-Physical Development Program—Fricot (2)		13,344
Additional Staff and Management Personnel (3.5)		23,412
Additional Youth Authority Board Personnel (2)		22,800
Additional Delinquency Prevention Personnel (1.5)		9,156
Additional Research Personnel (5)		27,995
Additional Personnel for Parole Services (25.5)		97,710
Additional Reception Center Personnel (5)		25,974
Additional Custody and Treatment Personnel (9)		51,678
Additional Medical Care Personnel (0.5)		5,700
Additional Education and Religion Personnel (1)		6,672
Additional Personnel for Other Institutional Activities (3)		18,330
Net increased cost in authorized positions due to full year costs of positions authorized during the current year, and salary changes		742,057
Changes in operating expenses and equipment:		
a. Increase in feeding, medical care, parole costs, and utilities primarily due to population increases and new facilities		$257,630
b. Other items of operating expense		92,807
c. Increase in equipment		24,013
		$374,450
Additional reimbursements		—19,870
Increase in state employees' retirement		78,126
Increase in state employees' health and welfare		79,995
Special items of expense reflecting increased number of paroles		28,770
Total		$1,845,132

SUMMARY OF PROPOSED NEW POSITIONS

The following 108.7 proposed new positions, at a cost of $561,604, are included in the various institution budgets and Departmental Administration.

A total of 43.2 positions are budgeted for the staffing of new facilities. Of these positions 4 are proposed for the Northern California Youth Center, 21.7 for the Ventura School for Girls and 17.5 for the Fred C. Nelles School for Boys.

An additional 9.5 positions are budgeted for program improvement at the Fricot Ranch School for Boys. The other positions are discussed in the functional groupings in which they are used.

Northern California Youth Center

1	Youth Center administrator	$8,384	
1	Business manager II	5,960	
1	Senior stenographer	3,008	
1	Intermediate stenographer	682	
4	Total		$18,034

The Northern California Youth Center is being planned as a central facility serving a cluster of 12 semi-independent 400-ward institutions. Central facilities and the first 400-ward satellite are planned for completion by November, 1964. The proposed positions are required to do the necessary planning for the opening of the new institution. The work will include:

1. Preparation of operating plans for custody, education, and administration.
2. Determination of staff needs and preliminary plans for recruitment.
3. Preparation of the first operating budget for the new institution.
4. Determination of types and amounts of equipment required and preparation of orders for the purchase of required equipment.

Ventura School for Girls

21.7 Positions $104,70

Twenty-one and seven-tenths positions are proposed for the staffing of the new Ventura School for Girls for a population of 400 girls. The positions are proposed in the areas of custodial and personal care, classification and counseling, educating and religion, food preparation, housekeeping, plant operation, and business services. Positions are budgeted on the basis of approved staffing formulas, comparability to staffing authorized for similar functions at other institutions, and if not based on either of these, minimum requirements due to considerations of physical plant, type of ward, institutional program, and organizational structure.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

SUMMARY OF PROPOSED NEW POSITIONS—Continued

Ventura School for Girls—Continued

The effective dates of the new positions are based on availability of new construction and the population build-up to 400 wards by December 1, 1962. Generally, the positions have been phased to permit orientation and training prior to the arrival of the wards.

Fred C. Nelles School for Boys

17.5	Positions	$83,498

Seventeen and five-tenths positions are proposed to provide additional staff in the areas of custodial and personal care, education and religion, and classification and counseling. The effective dates of the new positions are based on the completion and occupancy of a new 50-boy living unit, a visiting and control unit, and an estimated buildup in ward population to 495 by January 1, 1963.

The proposed positions are budgeted on the basis of approved staffing formulas, comparability to staffing authorized for similar functions in other institutions, and minimum requirements due to considerations of physical plant, type of ward, institution program, and organizational structure. Generally, the positions are phased to permit approximately 2 weeks time for orientation and training prior to the arrival of wards necessitating the establishment of the proposed positions.

Fricot Ranch School for Boys

Special Treatment Program

1	Staff psychiatrist	$14,580	
1	Supervisor of special treatment	8,520	
3	Senior social workers	19,080	
1	Senior stenographer	4,512	
1.5	Intermediate typist-clerk	5,904	
7.5	Total		$52,596

The special treatment program is designed to meet the special needs of a group of wards regarded as in need of specialized treatment and therapy because of serious personality disturbances. Recent studies have shown that approximately 80 per cent of the wards at this younger boys' institution are in need of psychiatric treatment. The staff proposed above will provide treatment designed for boys with emotional problems.

Academic-Physical Development Program

1	Instructor in recreation and physical education	$6,672	
1	Remedial reading teacher	6,672	
2	Total		$13,344

More than 75 percent of the boys at Fricot are 3 years behind boys of comparable age groups in public schools, both in reading and physical development. One remedial reading teacher and 1 instructor in physical education are proposed to remedy this problem.

Staff and Management

1	Correctional facilities planning specialist	$12,576
0.5	Intermediate stenographer	2,148

This professional position, along with clerical assistance, provides the necessary guidance for program development and planning for the new Northern California Youth Center (ultimately planned for capacity of 4,800 wards) and for the Southern California Youth Center. These positions, now approved to June 30, 1962, are requested as permanent.

1	Transportation officer	$5,232

This position is required to augment existing staff to provide the necessary number of personnel to transport wards to and from institutions. The workload for the transportation unit relates directly to the number of institutions, their population and wards on parole.

1	Junior-intermediate clerk	3,456

This position is provided to meet increased institutional and parole population. The records office workload is related directly to the total ward population.

3.5	Total	$23,412

Youth Authority Board

2	Board hearing representatives	$22,800

These positions are included to assist in meeting the growing workload of the Youth Authority Board. The workload increases result from increased ward populations in institutions and on parole, and from the increase in the number of institutions and offices where Board Hearing must be held.

Delinquency Prevention

1	Field representative	$7,008	
0.5	Intermediate stenographer	2,148	
1.5	Total		$9,156

This position, along with clerical assistance, will provide for the establishment of standard inspection of jails and other places of detention used to house youths detained by the various law enforcement agencies. The 1961 Legislature amended the Welfare and Institutions Code to require the Department of the Youth Authority to inspect such places of detention to determine if they meet minimum standards.

Research

1	Accounting-tabulating machine supervisor I	$6,335	
2	Tabulating machine operator	8,808	
1	Key punch operator	4,740	
1	Data processing systems analyst	8,112	
5	Total		$27,995

One accounting-tabulating machine supervisor I, 1 tabulating machine operator, and 1 key punch operator now authorized on a temporary basis together with 1 additional tabulating machine operator are proposed as permanent positions. These positions, together with 2 positions transferred from the Department of Justice to the Department of the Youth Authority, provide machine tabulation services to the Department of the Youth Authority and Department of Corrections.

The data processing systems analyst position is included to provide the Department of the Youth Authority and Department of Corrections with the technical assistance needed to study and develop machine applications to existing procedures and to further improve and simplify machine tabulation services now in use by the 2 departments.

Parole Services

3	Parole agent III	$16,100	
3	Parole agent II	14,016	
13	Parole agent I	49,820	
6.5	Intermediate typist-clerk	17,774	
25.5	Total		$97,710

These positions are included for the Division of Parole to provide for the increased parole caseload in accordance with currently authorized caseload ratios.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

SUMMARY OF PROPOSED NEW POSITIONS—Continued

Reception Centers

1	Intermediate typist-clerk		$3,996

This position is provided for the increase in general office workload at the Northern California Reception Center-Clinic. The workload increases are the result of additional capacity and population added during the past several years.

1	Clinical psychologist II	$7,728	
1	Senior social worker	6,060	
1	Intermediate typist-clerk	3,996	
			17,784

These positions are provided for the Northern Reception Center-Clinic to meet the increase clinical workload resulting from increased admissions. The professional positions are based on accepted workload formulas of cases per social worker or psychologist and the clerical position is based on an accepted clerical-professional worker ratio.

1	Intermediate typist-clerk		4,194

This position is included in the Southern Reception Center-Clinic budget to provide clerical staff in accordance with the accepted clerical professional worker ratio.

5	Total		$25,974

Custody and Treatment

2	Program administrator	$17,382	
5	Group supervisor	24,300	
1	Senior social worker	6,000	
0.5	Intermediate typist-clerk	1,998	
0.5	Intermediate typist-clerk	1,998	
9	Total		$51,678

A gradual increase in ward population during the last several years together with an increase in the numbers and types of severely disturbed wards has necessitated a reorganization of Preston School of Industry to reduce span of supervision and to provide for more efficient organization of the custody and treatment program. Two program administrators temporarily authorized until June 30, 1962 are proposed as permanent positions. This will provide staff supervision over custody and treatment similar to that found at the Youth Training School.

Five group supervisors are proposed to continue 1 extra post with full relief on the B company living unit and the 2 posts with full relief for search and escort positions within the institution perimeter. These positions have resulted in improved supervision in the custody program with corresponding reduction in the number of incidents involving severely disturbed wards.

A continuation to permanent of a temporarily approved senior social worker and 0.5 intermediate typist-clerk are proposed to continue a strengthened Special Treatment program for the increased number of severely disturbed youths received at this institution.

An increase of 0.5 intermediate typist-clerk position is proposed on a permanent basis to handle the workload resulting from the increased number of admissions into and parole releases from this institution.

Medical Care

0.5	Dentist II		$5,

The 0.5 dentist is included in the Northern Reception Center-Clinic to provide for adequate dental care based on the increase in ward population and related increased admissions. The position is based on a formula relating to the number of caries per ward.

Education and Religion

1	Instructor in general shop		$6,6

This position is included in the Youth Training School's budget to provide vacation relief for existing staff in accordance with the accepted formula.

Other Institutional Activities

1	Stationary engineer	$6,060	
1	Electrician	6,060	
2	Total		$12,1

These positions are included in the Youth Training School budget to provide adequate maintenance of increased building areas and in existing buildings where equipment to be maintained or repaired is inaccessible to ward work crews or is of such a technical nature as to be beyond the scope and ability of the wards.

1	Tailor		$6,2

A tailor position at Preston School of Industry has been provided in the past on a year-to-year basis in the belief that the increase in admissions and parole releases were temporary in nature. Increases in capacity have stabilized admissions and departures workload at a level requiring a permanent position for the tailoring and alterations of clothing for wards released on parole.

3	Total		$18,3

108.7 Totals, Proposed New Positions $561,604

SUMMARY OF OTHER INCREASED EXPENDITURES

Additional Cost—Authorized Positions

This increased expenditure is occasioned by full-year cost of positions authorized during the current year, improved employment conditions, and merit salary increases	$742,057

Operating Expenses

This 7.2 percent increase results from a 8.1 percent increase in average annual population, new facilities, and 10.4 percent increase in parole caseload supervision. The major items of increase are food, clothing, and utilities	350,437

Equipment

Increased equipment needs are primarily applicable to new positions added because of additional workload and replacement of equipment worn beyond economical repair	24,013

Reimbursements

Increase in reimbursements primarily attributed to opening of new housing units, sale of publications, and charging fee for training sessions conducted for other governmental units	—$19,8

State Employees' Retirement

This item is related to salaries and wages cost	78,1

State Employees' Health and Welfare

The increased expenditure is primarily the result of the full-year cost of this program	79,9

Special Items of Expense

This increased expenditure results primarily from increased parolees placed in foster homes	28,7

Totals, Other Increased Expenditures $1,283,5

GRAND TOTAL—INCREASES $1,845,1

YOUTH AUTHORITY BOARD AND ADMINISTRATION

GENERAL ANALYSIS

This division includes the Youth Authority Board, director, administrative services, and supervision of the diagnosis and treatment, special treatment, and departmental research programs.

The Youth Authority Board consists of 6 members, each of whom is appointed by the Governor, with the advice and consent of the Senate, for a term of 4 years. It is concerned with acceptance or rejection of wards committed to the Youth Authority and with classification, length of institutional training and parole periods, and formulation of policies concerning wards. Two youth authority board representatives assist the board in meeting part of its workload. Two additional board hearing representatives are proposed in the 1962-63 budget program to meet the requirements placed on the Youth Authority Board by increased institution and parole population.

The executive group is composed of the director, who is chairman of the Youth Authority Board, and his staff. The director is the administrative head of the department and is charged with those duties and responsibilities of the department in carrying out its objectives not specifically assigned to the Youth Authority Board.

The youth authority clerk and records office maintains the master files on all wards committed to the Youth Authority. This office is also responsible for recording actions taken and for orders issued by the Youth Authority Board. The workload of this office grows with the increase in commitment rate, institution bed capacity, or in the number of wards on parole. One clerical position is proposed in 1962-63 to meet the increasing workload.

Administrative services are furnished in the fields of accounting, budgeting, personnel management, food administration, maintenance and construction, and general administration. The administrative services division also operates as the link between the department and the other agencies concerned with the financial and managerial services of State Government.

The diagnosis and treatment division is responsible for supervision and operation of the department's reception centers, institutions, and conservation camps. This responsibility includes the training and treatment program in the institutions, as well as reception, diagnostic evaluation, and transportation of wards between institutions. It also includes supervision and operation of the department's special treatment program which was started during the 1957-58 fiscal year. This program is designed to meet the needs of special problem delinquents who, because of emotional disturbances or other severe personality problems, do not fit into nor benefit materially from the regular treatment program. Proposed new positions include one professional position and 0.5 clerk previously approved on a temporary basis for planning in connection with the Northern California Youth Center. One transportation officer is proposed to provide for the increased ward movement resulting from increased admissions and additional bed capacity to be occupied during the 1962-63 fiscal year.

The research division is responsible for research programs being developed and undertaken by the department as well as accounting for the ward population in institutions and on parole. Basic research is planned and being conducted in the fields of human behavior and in the specific fields of delinquency, its causative factors, treatment, and prevention. One professional position is proposed to plan for and assist in the development of new systems of machine application and processing of existing and potential workload that can be channeled more rapidly, efficiently, and economically by machine data processing.

Continuation of 3 temporary positions, in the machine tabulation unit, on a permanent basis is also proposed. An additional position is also proposed to handle workload requirements in 1962-63.

All of these 11 positions are discussed in the General Analysis, Departmental Summary. (See page 129.)

DIVISION OF PROBATION AND DELINQUENCY PREVENTION SERVICES

GENERAL ANALYSIS

The Division of Probation and Delinquency Prevention Services provides assistance, leadership, and guidance to the counties and cities of the State in studying youth problems, and encourages them to provide more effective programs to meet their needs. It is concerned with the encouragement of improved juvenile law enforcement and probation. The division administers the program for maintenance of juvenile homes and camps partially subsidized by the State as well as inspection and consultative services to county and city operated juvenile halls. The division includes the interstate compact unit which administers the Interstate Probation Compact and the Interstate Compact on Juveniles.

One field representative and 0.5 clerical positions are included in the 1962-63 fiscal year to provide staff to carry out statutory requirements for the inspection of jails and other places where juveniles may be detained. The 1.5 proposed new positions are discussed in the General Analysis, Departmental Summary (see page 129).

DIVISION OF PAROLE

GENERAL ANALYSIS

The Division of Parole provides direct supervision and casework counseling for wards of the Youth Authority who are on parole. Parole agents make use of all available local services in directing wards toward a normal life in the community. The division is currently engaged in a program to determine the feasibility of the substitution of treatment within the community for institution training for wards who are amenable to this type of program. The research aspects of this program are being provided by the National Institute of Mental Health.

The increase in parole caseload will require 19 new par agent positions which will be established as the increase parole caseload is realized. This will be in accordance with overall ratio of 55 parolees per parole agent. Six and five-ten clerical positions are also included on a workload basis. Th 25.5 proposed new positions are discussed in the General An ysis, Departmental Summary (see page 129).

Department of the Youth Authority

DEPARTMENTAL ADMINISTRATION—Continued

SPECIAL PROJECT ACTIVITIES

Objectives

Research, investigation, and demonstration of methods and techniques that can be of value to the Department of the Youth Authority in the rehabilitation of certain types of youthful offenders are the goals of these projects.

Program

Public and private organizations interested in the prevention of delinquency and the treatment of youthful delinquents make funds available to the department for research activities not financed by the State. The activities must be concerned with the treatment of youthful offenders in California. Projects financed by non-State funds generally include overhead charges to reimburse the State for additional costs incurred. Expenditures are not included in budget totals.

Activities are listed indicating the type of activity and source of funding. Project fiscal years do not correspond to the State fiscal year, and as a result are assigned to the fiscal year which most nearly coincides with the State fiscal year.

COMMUNITY TREATMENT PROGRAM (National Institute of Mental Health)

The Community Treatment Project substitutes a program of intensive treatment and control within the community for institutionalization of selected juvenile court cases.

A highly skilled staff works closely with 100 wards paroled directly from the Northern California Reception Center and Clinic each year, their families, and appropriate public and private agencies. Wards will be given intensive treatment during a period of time comparable to the regular institutional stay. Each ward is treated according to a plan which will insure maximum control and treatment possibilities in each individual case. Wards who represent a serious menace to persons or property in the community are excluded from the study.

The project is being carried out in the Sacramento and Stockton metropolitan areas.

SMALL LIVING UNIT PROJECT (Rosenberg Foundation)

The Small Living Unit Project is designed to compare the performance of wards housed in large and small living units. The purpose of the program is to determine whether the smaller living unit with increased staff-ward ratios produces desirable attitude and value changes in wards, whether the treatment program conducted results in better ward adjustment and an improved behavior pattern upon return to the community, and the kind of wards that are helped the most by the smaller living unit.

The project is being carried out at the Fricot Ranch School for Boys located near San Andreas.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	CHANGE FRO 1961-62

GENERAL ANALYSIS

Objectives

The Northern California Reception Center and Clinic is a reception and diagnostic center for boys and girls committed to the Youth Authority from Northern California. The purpose of the reception center is to receive, examine, and classify boys and girls for transfer to the training and treatment program best suited to correct the causes of their delinquency.

Program and Performance

This institution's program is centered in the reception and diagnostic evaluation of boys and girls committed to the Youth Authority. A diagnostic study is made on each boy and girl to determine his delinquency characteristics, mental attitude, and abilities. Recommendations based on such study are made to the Youth Authority Board regarding type of training, treatment, and custodial program best suited to correct the causes of delinquent behavior and to return the boy or girl to society as a useful citizen. Remedial medical, dental, and initial psychiatric treatment is provided if necessary. Wards from nearby Youth Authority institutions are transferred to this facility for major surgical and limited psychiatric treatment. Limited use is made of ward help in the reception center because of the short length of stay and the intensive diagnostic evaluation program.

Ward movement and average daily population at this insti
tion are as follows:

	1960-61	1961-62	1962
Average Daily Population:			
Boys	189	240	25
Girls	52	54	5
Totals	241	294	30
Parole Releases and Processed Cases Transferred:			
Boys	1,658	2,072	2,27
Girls	414	462	49
Totals	2,072	2,534	2,77

The 4.5 pew positions included in this budget are 1 typi
based on the increased admissions workload; 1 clinical ps
chologist, 1 social worker, and 1 typist required to handle i
creased admissions due to new clinic process of a 4-week dur
tion, and 0.5 dentist based on increased admissions. The
positions are discussed in the General Analysis Department
Summary. (See page 130.)

GENERAL ANALYSIS

Objectives

The Southern California Reception Center and Clinic is a a reception and diagnostic center for boys and girls committed to the Youth Authority from Southern California. The purpose of the reception center is to receive, examine, and classify boys and girls for transfer to the training and treatment program best suited to correct the causes of their delinquency.

Program and Performance

This institution's program is centered on the reception and diagnostic evaluation of boys and girls committed to the Youth Authority. A diagnostic study is made on each boy and girl to determine his delinquency characteristics, mental attitude, and abilities. Recommendations based upon such study are made to the Youth Authority Board regarding type of training, treatment, and custodial program best suited to correct the causes of delinquent behavior and to return the boy or girl to society as a useful citizen. Remedial, medical, dental, and initial psychiatric treatment is provided if necessary. Wards from nearby Youth Authority institutions are transferred to this facility for major surgical and limited psychiatric treatment.

Limited use is made of ward help in the reception center becau of the short length of stay and intensive diagnostic evaluati program.

Ward movement and population at this institution are follows:

GENERAL ANALYSIS

Objectives

The Youth Authority conservation camps for boys are operated jointly by the Youth Authority and the Division of Forestry. Their primary purpose is the rehabilitation of older delinquent boys through useful work including suppression of forest fires, reforestation, road construction, and general maintenance of the State's forests. Selected boys primarily in the 17 to 21 age group are sent to these camps as an intermediate stage between training in an institution and return to society. These wards include both criminal court commitments transferred from Deuel Vocational Institution and the Correctional Training Facility at Soledad, and juvenile court commitments from the Youth Authority institutions.

Program and Performance

The four conservation camps emphasize work programs both in the forest and in the camp. A few boys are held in each camp for operation of the kitchen, dining room, laundry, g eral housekeeping, and building maintenance. A recreation p gram is conducted after working hours including activit ranging from sports to arts and crafts. A counseling progr to aid in removing the causes of delinquent behavior is c ducted concurrently with the work and recreational progra

The main camps are Pine Grove, located east of Jackso Ben Lomond, in the mountains near Santa Cruz; Mount B lion, near Mariposa; and the new Washington Ridge Ca located near Nevada City. Three 20-boy spike camps are op ated as branches of the main camps, 2 from Mount Bulli and 1 from Washington Ridge.

Camp population will increase to an estimated 318 duri 1961-62, and to 331 during 1962-63.

GENERAL ANALYSIS

Objectives

The Fricot Ranch School for Boys is a correctional school for training, education, and rehabilitation of delinquent boys primarily between 8 and 13 years of age. The purpose of the school is to provide a residential treatment center for the youngest and most immature boys committed to the Youth Authority and to return them to society as useful citizens.

Program and Performance

This institution places major emphasis upon a program of academic education and counseling. Minimum custodial standards are maintained as part of the treatment program. Because of its location in the mountainous Mother Lode Country the school is able to carry on a program of scouting, hiking, and outdoor living as part of its total rehabilitation program.

---

[a] Composed of savings in salaries and wages, $12,894; operating expenses, $18,275; equipment, $5,472; inmate pay—work projects, $2,386; and a decrease in reimbursements, $1,241.

GENERAL ANALYSIS

Objectives

The Fred C. Nelles School for Boys is a correctional school for the rehabilitation of delinquent boys, primarily between the ages of 13 and 15. The purpose of the school is to return the youths to society as useful citizens.

Program and Performance

The school conducts a program of education, training, and treatment, designed to guide the delinquent youth into accepted behavior patterns. The educational program covers the elementary and junior high school grades and is remedial in nature. Academic and Industrial arts shop program is similar to public school programs, and conducted to enable wards to return to the public schools system at the grade level commensurate with their age. Average age of wards at this institution is approximately 14 years. In addition to the regular academic arts and crafts, and physical education program provided by the education section, there is being developed a small flower garden and landscaping program, which will be operated in conjunction with the academic school, and which will help train wards who would benefit from work experience.

Ward movement and average population at this institution are as follows:

	1960-61	1961-62	1962-63
Average daily population	321	393	476
Parole releases	532	452	592

Included in this budget are 17.5 new positions distributed in the following manner: 11 group supervisors for custodial supervision of wards in new living units; 4 teaching personnel based on the teacher-pupil ratio; temporary help funds to provide vacation relief for increases in teaching staff; and 1 parole agent and 0.5 clerical help for the classification and counseling unit based on increased population. These positions are discussed in General Analysis, Departmental Summary. (See page 129.)

GENERAL ANALYSIS

Objectives

The Northern California Youth Center is planned as a group of institutions (eventually 12) clustered around a central core of administrative and housekeeping services, i.e.—central ward housing, plant and equipment maintenance, hospital, food preparation and employee feeding, and business services. Eventually the total program will serve Youth Authority wards from 8 to 25 years of age and of both sexes. It will provide academic and vocational training as well as psychological counseling and treatment for youths committed from the Juvenile and Criminal Courts to the Department of the Youth Authority.

Program

The initial phase of the projected program includes a 400-bed institution for the younger adolescent aged boy together with limited facilities for the central administrative core (i.e.—hospital, warehouse, plant maintenance). This constellation of institutions will be located on ground recently acquired by the State, a short distance south and east of Stockton, and will have an ultimate capacity of 4,800 Youth Authority wards. The first phase of the construction is planned for completion in 1964. The 4 positions requested are discussed in General Analysis, Departmental Summary. (See page 128.)

GENERAL ANALYSIS

Objectives

The Paso Robles School for Boys is a correctional school for the rehabilitation of delinquent boys primarily between 15 and 17 years of age. The purpose of the school is to rehabilitate these boys and return them to society as useful citizens.

Program and Performance

The rehabilitation process is carried out through a program of education, training, counseling, and treatment designed to resolve basic emotional conflicts and to guide boys into acceptable behavior patterns. The education program is both academic and prevocational. It is remedial in nature and covers junior and senior high school subjects with provision for graduation from high school for those who successfully complete the required courses.

Major emphasis is placed on individual and group counseling of wards, and the use of every available professional service to provide for the special treatment needs of wards. This includes psychological and psychiatric therapy.

Wards are used to help in the operation of the kitchen, dining room, laundry, shoe repair shop, and maintenance functions. Training and supervision are given in these areas as part of the total rehabilitation program. A farm and garden operation is also conducted as part of the education program, to train wards interested in this field. The farm furnishes eggs, poultry, ham and pork products, and a limited amount of fresh vegetables to the school feeding program.

Ward movement and average daily population at this institution are as follows:

GENERAL ANALYSIS

Objectives

The Preston School of Industry is a correctional school for the custody, training, and treatment of delinquent boys, primarily between the ages of 17 and 21 years. The purpose of the school is to rehabilitate these youths and return them to society as useful citizens.

Program and Performance

The Preston School of Industry conducts an educational program in 3 general areas. These are:

1. Academic instruction for wards who are from 3 to 5 years behind the educational level commensurate with their chronological age. The program is of elementary and high school level, including graduation from high school for those successfully completing the necessary courses.
2. Vocational training in various trades such as printing, auto mechanics, cabinet work, electrical work, sheet metal, and others.
3. Farm program with basic education in the operation of dairy, poultry unit, hog ranch, and field crops.

Wards are used to help in the operation of the kitchen, dining room, laundry and maintenance program.

Training and supervision are given in these areas as a part of the total program.

A program of counseling to understand and remove the causes of delinquent behavior is conducted concurrently with the educational and custodial program. Also a program for special treatment of wards with serious personality problems or in need of psychiatric therapy has been in operation since the 1957-58 fiscal year.

Average ward population and paroles at this institution are as follows:

	1960-61	1961-62	1962-63
Average daily population	816	830	846
Released on parole	1,361	1,293	1,306

Proposed new positions include 2 program administrators for improved treatment; 5 group supervisors for custodial supervision; 0.5 intermediate typist-clerk to meet existing workload: 1 senior social worker and 0.5 intermediate typist-clerk based on workload; and 1 tailor to meet existing workload.

These positions are discussed in General Analysis, Departmental Summary. (See page 130.)

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	CHANGE FROM 1961-62

GENERAL ANALYSIS

Objectives

The Youth Training School is a correctional facility for the rehabilitation of delinquent boys primarily between 17 and 21 years of age. The purpose of the school is to rehabilitate these wards through an emphasis on vocational training with meaningful work experience and to return them to society as useful citizens.

Program and Performance

The Youth Training School is located near Ontario, California. The first units of permanent construction were occupied January 4, 1960. The total construction program was planned in three phases with provisions for housing and program for 1,200 wards. Facilities include three two-story 400-bed housing units, administration and hospital building, vocational shops, academic school, kitchen and commissary, boiler plant, and other related buildings.

The rehabilitation process is carried out through an intensive program of education, training, counseling, and treatment designed to guide young adults into acceptable behavior patterns. The program is designed to give wards pre-employment training in the various vocational fields and to provide an opportunity for completion of the requirements for high school graduation. The vocational training program consists of 3 major divisions: (1) formal vocational instruction, (2) related work experience in maintenance and operation of the institution, and (3) work experience-education areas not related to the maintenance and operation of the institution, i.e., offset printing, business machine repair, electronics, etc. The work experience program will be conducted in 2 major areas: (1) plant maintenance and operation, and (2) food service. The auxiliary functions vital to institutional administration will be performed by wards under close supervision of journeyman instructors in a program generally consisting of one-half day vocational training in the shops and one-half day related work experience.

Average ward population and releases at this institution are as follows:

	1960-61	1961-62	1962-63
Average daily population	461	1,025	1,170
Parole releases	532	1,339	1,824

Three new positions are proposed in this budget for maintenance workload and the vocational training program. These positions are discussed in the General Analysis Departmental Summary. (See page 130.)

GENERAL ANALYSIS

Objectives

The Los Guilucos School for Girls is a correctional school with a resident population of girls between the ages of 10 and 18. The purpose of the school is to rehabilitate these girls and to return them to society as useful citizens.

Program and Performance

The program is primarily educational and stresses remedial academic instruction, home economics, and arts and crafts with provision for graduation from high school for those who successfully complete the required courses. A counseling program to remove the causes of delinquent behavior is conducted concurrently with the education and custodial program.

Girls are used to help in operation of the kitchen, dining room, hospital, and dental unit as part of the total program. Girls are responsible for housekeeping in the dormitories and also assist the housekeepers in maintenance of less critical areas in the school.

Average ward population and releases at this institution are as follows:

	1960-61	1961-62	1962-63
Average daily population	214	257	260
Parole releases	260	274	319

GENERAL ANALYSIS

Objectives

The Ventura School for Girls is a correctional school for rehabilitation of the older delinquent girls, primarily in the 16 to 21 age group. The purpose of the school is to rehabilitate girls and return them to society as useful citizens.

Program and Performance

The Ventura School for Girls conducts a program of educational training and counseling to treat the causes of delinquent behavior. The education department offers a remedial program at the junior and senior high level, with graduation from high school for those who successfully complete the required courses.

A vocational training program is emphasized to prepare girls for employment when paroled. Training is given in practical nursing, laundry operation, production sewing, stenography, accounting, and related clerical work. A co-operative effort with the State Department of Employment seeks to make the educational program fit these girls for work when paroled.

A new institution is under construction and will be activated in April 1962.

Paroles and average ward population at this institution are as follows:

	1960-61	1961-62	1962-63
Average daily population	193	213	379
Paroles	370	407	452

The 21.7 new positions included in this budget are composed of 1 accounting technician to meet workload; 8 group supervisors to provide custodial supervision; 1 supervisor of academic instruction based on a departmental workload standard plus 0.5 clerical help; 6.7 teaching personnel based on teacher-pupil ratios; 1 parole agent and 0.5 clerical help for the classification counseling unit based on increased population; and 1 baker II, 1 janitor foreman II, 1 building maintenance man, based on increased population and workload. These positions are discussed in General Analysis, Departmental Summary. (See page 128.)

---

[a] Composed of savings in salaries and wages, $55,701; operating expenses, $74,369; equipment, $1,548; decrease in reimbursements of $160.

[b] Composed of savings in salaries and wages, $310; operating expenses, $8,631; and increase in reimbursements, $290.

GENERAL ANALYSIS

Objectives

The Department of Education, under the direction of the Board of Education, seeks to insure that all children of the State have an opportunity to attend the Public School System, and that once enrolled, they receive adequate instruction by qualified teachers. The Superintendent of Public Instruction, an elected official, is ex officio Director of Education and secretary and executive officer of the State Board of Education, which is the policy determining body of the department. The board consists of 10 members appointed by the Governor for 4-year terms.

Physically handicapped children and adults may receive an education, physical rehabilitation services, or sheltered employment through the special schools and centers operated by the department. The department also administers joint federal-state programs dealing with the distribution of surplus commodities for educational purposes and administers jointly financed e cation programs. A new program to train teachers for defense classes is proposed with the total cost of progr financed from federal funds.

Program and Performance

The department is divided into 6 divisions to handle spec areas of responsibility: Departmental Administration; Hig Education; Instruction; Public School Administration; Spec Schools and Services; and the Division of Libraries, which budgetary purposes is a separate unit. The program of division is discussed in conjunction with its detailed bud presentation.

DIVISION OF DEPARTMENTAL ADMINISTRATION

GENERAL ANALYSIS

The Division of Departmental Administration, headed by a deputy superintendent of public instruction, furnishes executive, accounting, personnel, research, and legal services to the Department of Education.

The Accounting Office of the division administers certain trust funds, and provides budgeting, purchasing, and internal auditing services. The accounting functions for the special schools and the Industries for the Blind are performed by those respective agencies. The expenditures of the State Board of Education are included and administered through the departmental budget.

The Personnel Office exercises general direction over the personnel program of the Department of Education.

The Administrative Adviser's Office acts as legal adviser to the Superintendent of Public Instruction and his staff, the State Board of Education, and to the staffs of the special schools and special service agencies in the department. It represents these agencies and officers in disciplinary actions, both contested and uncontested, involving disciplinary action against public school teachers and employees of the department.

During general sessions of the Legislature, the office prepares department-sponsored legislative bills, and prepares recommendations to the Governor on those bills of concern to the department. It drafts and passes on the legal adequacy of contracts, including those for the purchase of state-adopted textbooks, leases, deeds, easements, and probate documents affecting department and the agencies under its jurisdiction.

The Bureau of Education Research is responsible for stud in the evaluation of public school curriculum, educational me urements, and in the area of school administration, such finance, teacher preparation, class size, and enrollment data. also furnishes consultant services to school districts in advisi and planning test programs. It assists in the administration Title 10, National Defense Education Act. The tabulating m chine section renders services to the various bureaus and di sions of the department. In the apportionments to the pub schools, the bureau assumes the responsibility for mechani computations of the school apportionment.

The positions of associate statistician and intermediate cle are proposed to administer the testing program required Chapter 994, Statutes of 1961. An increase in data processi in the amount of $30,000 is requested for the installation higher capacity data processing equipment. The apportionme to the public schools has reached such complexity that t present equipment cannot meet the deadlines required by la The growth in volume caused by recent legislation in the fiel of testing and credentials has further served to make the prese equipment inadequate. To properly staff this function, 2 pr grammers and 2 key punch positions are proposed in the 196 63 fiscal year.

DEPARTMENT OF EDUCATION

General Activities—Continued

DIVISION OF HIGHER EDUCATION

GENERAL ANALYSIS

This division was established in 1961 for the purpose of consolidating and co-ordinating those functions of the department which deal with adult education and education beyond the secondary school. The Bureaus of Adult Education and Junior College Education were transferred here from the Division of Instruction, the Bureau of Readjustment Education was transferred from the Division of School Administration, the Credentials Office and the consultant in certificated employment practices were transferred from the Division of Departmental Administration, and the teacher education and recruitment staff was transferred from the Division of State Colleges.

The Bureau of Adult Education has the responsibility for co-ordinating and improving programs of adult and continuation education. In addition, this unit is required to approve more than 20,000 adult classes annually and to approve forum and lecture series, and special and evening classes and summer sessions in elementary schools.

The Credentials Office evaluates applications for credentials and recommends issuance of the credential to the State Board of Education. In 1960-61, 175,036 evaluations were made, a it is estimated that the number made will increase by 10,0 in 1961-62 and by 20,000 in 1962-63. The greater increase f 1962-63 is predicated on the fact that the new credential stru ture will stimulate interest in applying for credentials. Prov sion is made in this budget for the addition of 5 credenti technicians and 7 clerks to handle the estimated increase workload. An increase in the credential fee from $4 to $8 authorized by Chapter 1691, Statutes of 1961 puts the credenti function on a completely self-supporting basis.

The Bureau of Junior College Education is responsible f the co-ordination and improvement of instruction in the publ junior colleges. It is believed that the Master Plan for Educ tion will stimulate considerable growth in the number of juni colleges in the State. Included in this bureau is a progra financed from Kellogg Foundation grant funds to train regi tered nurses in an accelerated junior college program.

DIVISION OF INSTRUCTION

GENERAL ANALYSIS

The Division of Instruction is the operating division through which the Department of Education co-ordinates the instructional program in the State's public school system. In addition, the department's services for upgrading and improving the statewide instructional program are provided through this division. Although the 2 major functions of this unit are the co-ordination and improvement of instruction, its functions in specific fields vary widely. In certain vocational fields the division provides classroom supervision services, and in 2 programs, police officer training and fire training, division staff members regularly organize and conduct classes.

The Bureau of Audio-Visual Education is responsible for the co-ordination and improvement of programs of audio-visual education in counties and school districts. The bureau is also a service unit for the department and for other state agencies and maintains materials and equipment to be used on a loan basis by departmental staff members and other state agencies where necessary. Library consultant assistance is also provided by this bureau to public school libraries as authorized by Chapter 2052, Statutes of 1959.

The Bureau of Elementary Education is responsible for the co-ordination and improvement of instruction in the elementary grades of the elementary and unified districts in the State. The efforts of the bureau staff are concentrated on working with key personnel in state and regional meetings and on the preparation of instruction materials such as teachers' guides and similar publications. No staff time is used for programs of inspection and/or approvals, for accreditations or for direct instructional services.

The Bureau of Secondary Education is responsible for the co-ordination and improvement of instruction in high schools and in this capacity works with the county superintendents and the high school and unified school districts maintaining junior, senior, and 4-year high schools. In addition, the bureau is required by law to approve the courses of study of all secondary schools. It collects and analyzes the annual reports from high schools and represents the department in the accreditation of high schools.

The Bureau of Physical Education, Health Education and Recreation is assigned the responsibility for the co-ordination of physical and health education and recreation programs in counties and districts. This includes responsibility for athletic services, medical and nursing services, and school district co-operation in community recreation programs of various types.

The Bureau of Pupil Personnel Services was formerly known as the Bureau of Guidance. It is responsible for the co-ordination and improvement of guidance programs in counties and in school districts and represents the department in working with other state agencies that provide services related to the guidance and placement of school pupils. This bureau also co-operates in the administration of Title 5 of the National Defense Education Act.

Two positions of consultant in education of the gifted and a position of intermediate stenographer have been added to this bureau to administer Chapter 883, Statutes of 1961, relating to special education programs for mentally gifted minors.

DIVISION OF PUBLIC SCHOOL ADMINISTRATION

GENERAL ANALYSIS

The Division of Public School Administration assists school districts by rendering assistance in noninstructional areas. The services furnished include school planning, school district organization, school lunch, free textbooks, surplus federal property, the child care program, advisory service in school finance and attendance and federal financial assistance under Public La 874 and 815.

The Administrative Services Bureau advises school distric on financial and administrative matters, including child ca

GENERAL ANALYSIS—Continued

centers. The bureau also reviews the audit reports of all school districts and takes appropriate action as indicated by the review.

The Bureau of School Apportionments and Reports verifies reports of school districts and compiles data for use by the public schools. The apportionments are made in 5 major stages to local jurisdictions by this unit. The bureau prepares for publication such materials as are necessary to establish and maintain uniformity of practices and procedures throughout the State in public school financial accounting. It is proposed that 1 associate budget analyst position be provided this bureau to establish new rules and regulations which will provide a system whereby the budgets of the various County Superintendents of Schools represent actual expenditure programs based upon a determination of the necessity for each item of expenditure.

The Bureau of School District Organization assists county committees with district reorganizations, taking into account population, transportation, economics, and school building facilities. A measure of the success of this program is the steady decline in the number of elementary and high school districts and the increase in the number of unified and junior college districts as shown in the table below:

	1956-57	1957-58	1958-59	1959-60	1960-61	CHANGE FROM 1959-60
Elementary	1,499	1,463	1,402	1,361	1,316	—45
High school	232	232	229	225	221	—4
Junior college	23	26	27	28	30	2
Unified	95	97	103	107	119	12

The school lunch and the special milk programs are federal grant-in-aid programs in which cash reimbursement and commodities are allocated to participating schools. The expenditures for these subventions are shown in the Local Assistance for Education portion of the budget.

The Bureau of School Planning assists and advises school districts in regard to acquisition of sites and construction of school buildings.

The Bureau of Textbooks and Publications is responsible for the editorial policy of all department bulletins and for administration of the free textbook program. Two clerical and 1 temporary help positions are proposed new for 1962-63 to handle the increased workload and also to aid in improving the management control of the free textbook program.

DIVISION OF SPECIAL SCHOOLS AND SERVICES

GENERAL ANALYSIS

The Division of Special Schools and Services provides administrative and educational supervision to the state residential schools for the deaf, blind, and cerebral palsied children and directs the programs of the Industries for the Blind, Field Rehabilitation Services for the Adult Blind, the Opportunity Work Centers for the Blind, the Orientation Center for the Blind, and the Vocational Rehabilitation Section. It also provides co-ordination of programs of special education in the public schools through the Bureau of Special Education.

The program and budget details of the state residential schools, the Industries for the Blind, the Orientation Center and the Vocational Rehabilitation Section are shown separately in the department's budget.

The Field Rehabilitation Service for the Blind acquaints blinded adults with the state services available and assists with an orientation program designed to each individual's particular needs. All blind persons are eligible for such services regardless of their financial status. Instruction is given in braille, typing, travel training, techniques of daily living, and home economics. Close liaison with the Vocational Rehabilitation Section, Orientation Center, and the Department of Social Welfare is ma tained to eliminate duplicate services.

The Bureau of Special Education is the unit through whi the department co-ordinates, improves, and supervises the va ous programs for pupils with special needs. These include p grams on speech difficulties, hearing losses, sight limitations, a crippling conditions. Because these programs which are carri on by counties and school districts must meet specific requi ments in order to qualify for special state reimbursements, t bureau has certain responsibilities for program approvals. Ma of the districts are unable to provide qualified supervisors such specialized programs and, in these cases, members of t bureau engage in classroom supervision. Instructional materi available to blind pupils through the American Printing Hou for the Blind are requisitioned and made available to sch districts by this unit.

The 1962-63 Budget reflects the placement of the Opportuni Work Centers within the general activities budget of the partment to improve the fiscal management and control of t centers. No program change or expenditure increase is involv

---

[a] Expenditures for these centers previously reported separately.

[b] The existing Orientation Center for the Blind is moving from the present facilities due to Division of Highways construction. The new center in process of construction will not have facilities for housing of the blind residents as more economical arrangements can be made to contract for care of these residents.

[c] Payment formerly paid from the support funds of the Orientation Center for the Blind.

ADULT EDUCATION FOR CIVIL DEFENSE[b]

GENERAL ANALYSIS

Objectives

The program of Adult Education for Civil Defense in California was established to develop adult education programs in civil defense using existing state and local school adult education resources to teach the principles of individual, family, and community protection. The costs of this program are financed entirely by the Federal Government.

Program and Performance

There are 2 phases to the operation of this program: the training of teachers by the State Department of Education, and the conducting of classes for adults in the local schools.

Teacher training consists of an intensive 15-hour course conducted by staff members of the Bureau of Adult Education, and covering the following principal subjects:

1. The current world situation and America's vulnerability
2. Chemical warfare
3. Biological warfare
4. Nuclear warfare
5. Methods of surviving natural and man-made disaster

Upon completion of the 15-hour course, the teachers are certificated in Individual and Family Survival, qualified to conduct 12-hour classes for the adults of their communities. These 12-hour classes are organized as classes for adults, and a supplementary federal reimbursement is made to school districts that maintain such classes.

This program of Individual and Family Survival training is in no way related to civil defense courses that are conducted by the Office of Civil Defense or by local civil defense offices. However, the State Department of Education maintains close liaison with the California Disaster Office.

During the 1960-61 school year, foundations were laid for the development of a Civil Defense Adult Education Program that would be available to all citizens of California. Individual and Family Survival classes were conducted in 274 adult schools in 31 counties.

Mounting international tensions during the summer and early fall of the 1961-62 fiscal year resulted in a great interest in civil defense preparations in California. This increased interest has brought about a greater demand for Individual and Family Survival classes. During the first 5 months of the 1961-62 school year, 427 Individual and Family Survival classes were held in 39 counties of the State and a total of 15,288 citizens have been trained in local adult school classes.

GENERAL ANALYSIS

The National Defense Education Act of 1958 was enacted by Congress (Public Law 85-864) to provide assistance to states and their subdivisions in order to ensure trained manpower of sufficient quality and quantity to meet the national defense needs of the country. The portions of the act of concern to the Department of Education are:

Title 3—Improvement of Instruction. This title is composed of 2 programs: Title 3a provides federal funds to the Department of Education for reimbursement to local public school districts for the purchase of equipment and materials and for minor remodeling to improve instruction in science, mathematics, and modern foreign languages. These federal funds are matched by expenditures of the local school districts and are shown in the Local Assistance Section of the budget, Subventions for Education. Title 3b provides federal funds to the Department of Education for the costs of administering Title 3a and for expansion and improvement of supervisory and related services in the public schools in the fields of science, mathematics, and foreign languages. These funds are matched by the State.

Title 5—Improvement of Guidance. This program provides federal funds to be used to establish programs of testing and guidance for the identification and encouragement of able students. Existing state and local expenditures in guidance programs meet the matching requirements of this title so no General Fund appropriation is required. The Title 5 funds reimbursed to school districts are shown in the Local Assistance Section of the budget, Subventions for Education.

Title 8—Improvement of Technical Education. This program provides federal funds to improve vocational education and has been amended into the Vocational Education Act of 1946. Existing state and local expenditures in vocational education meet the matching requirements of this title so no General Fund appropriation is required. The budget and program for the title are shown in the Education Section of the budget, Vocational Education, and in the Local Assistance Section, Subventions for Education.

Title 10—Improvement of Statistical Services. These federal funds are provided to improve educational statistics so that more valid information is available about the condition and progress of education in the State. State matching funds are included for this program.

TITLE 3b—IMPROVEMENT OF INSTRUCTION

Objectives

Title 3 of the National Defense Education Act is concerned with the improvement of instruction in the fields of science, mathematics, and modern foreign languages. Federal funds for this program are matched by the state.

Program and Performance

Before a state can participate in the provisions of Title 3, it must prepare and have approved by the United States Commissioner of Education a state plan which becomes the State's contract with the Federal Government for participation. Federal funds are then released to the State in accordance with the approved state plan on the basis of a state allocation determined by the United States Commissioner of Education. This allocation is made on the basis of a formula as described in Section 302(a) of the act.

Title 3a provides federal funds which are matched by local public school agencies for the purchase of equipment, materials, and minor remodeling for instruction in science, mathematics, and modern foreign languages. These funds are shown in the Local Assistance Section of the budget, Subventions for Education.

Title 3b provides federal funds which are matched by the state for the administration of Title 3a and for expansion and improvement of supervisory and related services to public schools in the fields of science, mathematics, and foreign languages. Expenditures charged to administration are for the following major purposes:

1. To prepare and disseminate information statewide about the provisions of the act, the policies of the Federal Government and State Department of Education, and the procedures to be employed by local school agencies for participation.
2. To assist local school agencies in the preparation of applications for federal funds.
3. To evaluate, process, and approve applications for federal funds.
4. To maintain all records and prepare all reports as required by the Federal Government and as deemed necessary by the State Department of Education.
5. To disseminate information throughout the state on new developments and promising practices resulting from project activities.
6. To co-ordinate all activities in the State Department of Education related to the National Defense Education Act administration.
7. To co-operate with institutions of higher education in the state in developing program proposals and implementing the same under other titles of the act.

Expenditures charged to program supervision and special services are used for the following major purposes:

1. To supplement consultant staff in the instructional bureaus of the Department of Education, to extend and strengthen state leadership, and to meet the increased workload resulting from National Defense Education Act sponsored activities.
2. To finance statewide or regional studies, workshops, inservice education programs, and conferences initiated by the State Department of Education. During the 1962-63 fiscal year, it is anticipated that 4,000 administrators, supervisors, and teachers will be involved in such programs.
3. To provide special consultants upon request to local school districts. These consultants are recognized leaders in their

respective fields, and assist local school districts with special problems in the teaching of science, mathematics, and foreign languages. These problem areas include in-service education of staff, program evaluation, local research, and development of new instructional materials. It is anticipated that during the 1962-63 school year approximately 2,500 man-days of special consultant services will be provided.

4. To finance the publication for statewide distribution of n
materials and bulletins showing new techniques in t
teaching of mathematics, science, and foreign languages.

A major task undertaken during the past year has been th
of conducting a statewide evaluation of the impact of the N
tional Defense Education programs on instruction and the
fectiveness of the administration of the programs in Californ
A report of the findings of the exaluation will be available
the 1962 Budget Session of the Legislature.

TITLE 5—IMPROVEMENT OF GUIDANCE

Objectives

This program provides federal funds to be matched by local funds or by existing state program expenditures, to establish and maintain programs of testing, guidance, and counseling.

Program and Performance

Before a state can participate in the provisions of Title 5, it must prepare and have approved by the United States Commissioner of Education a state plan which becomes the state
contract with the Federal Government. Federal funds are th
released to the state in accordance with the approved state pl
and on the basis of state allocations determined by the Unit
States Commissioner under a formula prescribed in the act.

School districts file applications with the Department of Ed
cation for these federal funds to support improved programs
testing, counseling, and guidance. The Department of Educatio

Department of Education

NATIONAL DEFENSE EDUCATION—Continued

TITLE 5—IMPROVEMENT OF GUIDANCE—Continued

Program and Performance—Continued

after reviewing the applications in terms of the act and the state plan, approve the application and authorizes the local district to proceed with its program as outlined in its project proposal. Following the expenditure of funds by the local district, the district files a claim with the Department of Education for reimbursement of expenditures. These reimbursements are shown in Local Assistance, Subventions for Education.

Existing state and local expenditures meet the matching requirement of this act and no General Fund appropriation is required. State level expenditures are made for the following purposes:

1. Consultation with administrators and guidance personnel in local educational agencies for the improvement and long-range development of guidance programs.
2. Evaluation and co-ordination of Title 5 projects in local educational agencies by personal visitation.
3. Encouragement of and provision for research and experimentation in guidance supervised and co-ordinated by the State Department of Education.
4. Establishment and supervision of a pilot data processing center for pupil personnel data.
5. Provision of co-ordination and financial support to the college coordinators of pupil personnel training programs for statewide meetings to improve training programs.
6. Provision for and direction of an annual statewide conference of directors of local Title 5 projects.
7. Encouragement of and participation in the in-service-training meetings at the local and regional level.
8. Publication and distribution to secondary guidance personnel of materials such as; a scholarship catalogue, occupational information materials, a catalogue of audio-visual aids in guidance, a catalogue of junior and 4-year college offerings, and report on Title 5 activities.
9. Participation in leadership activities of professional associations.

Certain major trends in guidance programs have recently occurred which can be attributed in part to the Title 5 program.

1. Higher standards of training are being required for guidance personnel, and more efficient use is being made of trained personnel by assigning larger blocks of counseling time in the school day to such personnel. Clerical help is increasingly being provided to guidance personnel, thus freeing them from routine tasks and providing more time for counseling.
2. The parents of secondary school students are being increasingly involved in the educational and career planning of their children by means of counselor-student-parent conferences.
3. Testing programs for the identification of talent are being improved, and more effective use is being made of test scores and other data about individual students.
4. Local educational agencies are providing additional local funds for the support of improved guidance services.

TITLE 10—IMPROVEMENT OF STATISTICAL SERVICES

Objectives

Title 10 provides for the improvement of statistical services of both state and local educational agencies so that more valid information is available about the condition and progress of education in the state.

Program and Performance

This title provides $50,000 a year to be matched by state funds for the purpose of carrying on research to improve and strengthen the adequacy and reliability of educational statistics provided by state and local reports and records, and to improve the methods and techniques for collecting and processing educational data and diseminating information about the condition and progress of education in the state.

Before a state can participate in the provisions of Title 10, it must prepare and have approved by the United States Commissioner of Education a state plan which becomes the state's contract with the federal government for participation in this program. The responsibility for this program in California has been assigned to the Bureau of Education Research. The programs to be undertaken as outlined in the state plan are:

1. *Development of Accounting and Reporting Manuals.* The revision of the "Classification of Income" and "Classification of Expenditures" portions of the accounting manual are completed. Revisions of the "General Ledger and Stores Accounting," "Supplies and Equipment," "Abatements,"

---

[a] Neither receipts nor expenditures of federal funds are included in the overall budget totals.

Department of Education

NATIONAL DEFENSE EDUCATION—Continued

TITLE 10—IMPROVEMENT OF STATISTICAL SERVICES—Continued

Program and Performance—Continued

"A.D.A. Cost Accounting," and "Terminology" portions are in progress. This development of the accounting manual is a co-operative effort between the State and the officers and 5 regional organizations of the California Association of Public School Business Officials.

2. A comprehensive survey of junior college facilities, including site information, building construction and facilities, and noninstructional areas has been undertaken. Data has been received but not analyzed. A survey of high schools will be undertaken during the budget year.
3. *Survey of Pupil Age-in-Grade and School Progress Information.* All school districts were surveyed to ascertain the number of school districts organized to accommodate entering classes at midyear. The birth dates and present grade assignments for 3 million elementary, junior high, and high school pupils have been gathered. The purpose is to provide accurate information regarding retardation, acceleration, and school-leaving of pupils. This survey will be completed during 1961-62. A study of promotional practices will be undertaken to determine implications for state norms of tests utilized in the statewide testing program.
4. An extensive analysis of the recurring report forms originating in the Department of Education has been completed. Revision and review will continue.

GENERAL ANALYSIS

Objectives

The State Library in addition to maintaining a collection of books and other library materials has several service responsibilities. These include: providing basic reference service to the State Legislature and to the executive branch of State Government; providing supplementary library service through local libraries in the State; assisting and stimulating the development of public library facilities in the State, and representing the interest of the State in the acquisition and preservation of historical material regarding the State.

Program and Performance

The State Librarian, who is appointed by the Governor, directs the activities of the State Library which, in addition to the Administration Bureau, is composed of 4 operating bureaus. These are the Law Library, Library Consultant Services, Reader Services, and Technical Services.

The Law Library serves as a legal research and legal reference center for the Legislature, the State's law officers and agencies and the bench, bar, law students, and citizenry of the State. The law librarian also provides consultant services to law libraries in the State on request. In the 1960-61 fiscal year, the Law Library circulated 11,055 volumes outside the library and shelved 51,183 volumes.

The law classification and recataloging project started in July, 1957, added 1,044 classed items in the field of American public and private law in 1960-61 making a total 6,829 volumes classi-

GENERAL ANALYSIS—Continued

Program and Performance—Continued

fied to date and leaving a balance of 10,956 volumes remaining to be classified.

The Library Consultant Services is responsible for the stimulation and development of public library facilities and service throughout the State, for the making of studies and surveys of library needs, and for certain delegated responsibilities in relation to the supervision of county libraries.

In 1960-61, the Library Consultant Services concentrated on assistance in city-county relationships in unserved or inadequately served areas, co-operative activities, and library buildings. The Library Consultant Services participated in a conference for the representatives of state library agencies from 18 western states on problems of services to libraries in large geographical areas. The Library Consultant Services participated on the Governor's Conference for Public Library Trustee's and Officials. Special studies were made of particular libraries and the relationship of 1 library to its neighboring libraries.

The Reader Services Bureau has the responsibility of coordinating the activities of the 7 public service sections included in the bureau. The Administrative-Legislative Reference Service handled an estimated 3,111 legislative requests and 2,246 administrative requests. A reduction of one-half clerk and funds for certain duplicate books have been reduced in 1962-63 to reflect savings from the closing of the Capitol Branch-Legislative Reference Service representing those services which no longer are required because of the physical relocation of this function. Registration in the Books for the Blind Section increased by approximately 300 borrowers during the last fiscal year and the circulation of materials by about 12,000. Circulation increased throughout the State Library by 7 percent over the previous year. The California Section shows an annual rate of increase of 9 percent in the number of reference inquiries handled.

The Technical Services Bureau has as its objective the coordination of the nonpublic service functions of the State Library.

The Book Repair Section completed a total of 36,490 items in 1960-61 as compared with 26,070 in 1959-60. The increase reflects the larger book budget allocation and the age and use of the book collection. The Catalog Section cataloged 6,000 titles in 1960-61 as compared with 4,474, again as a result of the increase of the book budget. As of January 1961, the cataloging system was changed from the Dewey Decimal to the Library of Congress Classification and the catalog was changed to a divided catalog by author-title and subject.

The Periodicals Reading Room was opened in March, 1961 to the public and the Serials Record program was continued.

An increase of $13,956 is included in the book budget for 1962-63 to provide for an estimated 11 percent price increase.

RURAL LIBRARY SERVICES

Objectives

The Rural Library Services Act (Public Law 597, Eighty-fourth Congress) has as its objective the extension of public library services to rural areas now lacking in such services. Federal funds are provided for this purpose.

Program and Performance

The State Library proposes to continue six presently authorized programs which demonstrate the advantages of improved library services in rural areas. The Library Consultant Services Program continues to be accelerated by the Federal Library Services Act through which federally reimbursed projects are demonstrating improved library services in rural areas. During 1960-61 4 students were awarded scholarships established with federal funds for their education in the field of librarianship and this program will be continued in 1962-63 at the same level.

The Processing Center Program will continue to purchase, catalog, classify and prepare books for use by 16 member libraries in Northern California.

The North Bay Counties Project is a demonstration of co-operative library services in parts of 6 counties in the northern San Francisco Bay area.

The San Joaquin Valley Counties Project encompasses a project to provide complete and rapid reference and information services to 6 county and 4 city libraries.

The Mendocino County Project will provide library service to this county which does not now have library service.

The San Diego County Project provided bookmobile services to rural areas on a demonstration basis and since termination of the project at the state level has been financed by San Diego County.

---

a General books reduced $2,700 to reflect decreased costs due to the closing of the Capitol Branch of the legislative reference service.

GENERAL ANALYSIS

Objectives

The State operates 3 subsidized production centers located at Oakland, Los Angeles, and San Diego. These centers offer factory employment to blind, partially sighted, and physically handicapped persons enabling them to contribute to their own support.

Program and Performance

The manufacture of such items as brooms, mattresses, mops, pillowcases, and other textile items, surgical wrappers, rugs, brushes, plastic articles, and rubber mats constitutes the main production program together with the fabrication and assembly of products on a subcontract basis. The administrative and physical plant operating expenses are a direct charge against the General Fund and the manufacturing activities are financed from working capital supplied by the Industries for the Blind Manufacturing Fund into which the proceeds from the sale of the products are deposited.

For many years these centers were considered as separate entities with little direct central administration. The goal is now toward development of a strong central administration to co-ordinate the activities of the centers and provide adequate administrative controls over the program. The program is administered by a central office headquarters staff under the general direction of the Chief, Division of Special Schools and Services of the Department of Education.

In keeping with recommendations of the Co-ordinating Council on State Programs for the Blind, management is attempting to make these centers more competitive by transferring the less efficient workers to the Opportunity Work Center Program.

During the 1960-61 fiscal year, 225, or a full-time equivalent of 159 blind or otherwise physically handicapped workers were employed in the 3 centers, and the payroll for these workers was $397,376.

Sales of the 3 centers amounted to $2,226,195 and the cost of goods sold, including salaries and wages, and other adjustments totaled $2,276,212. This reflects a loss in the manufacturing operations of $50,017 in the 1960-61 fiscal year.

In an effort to improve operations of the Industries for the Blind, management requested a marketing study by a private consulting firm. This study was completed in the 1959-60 fiscal year and it strongly recommended that the industries direct their products and sales activities more in the direction of the commercial market in order to avoid overdependency of the program on federal orders.

Management is now implementing many of the recommendations of this study. Sales and marketing specialists have been employed to increase the emphasis on commercial outlets and subcontract work. Quality control personnel have been employed to improve the quality of products and to more closely control the pricing structure of products in order to compete in the commercial market.

Management feels that these steps will lead to a more economical program in terms of state support and a better opportunity for the blind workers to have steady productive employment at a reasonable rate of compensation.

The program which has been developed for 1962-63 will provide employment for 295 individuals or the equivalent of 215 full-time workers.

---

GENERAL ANALYSIS

Objectives

This center provides sheltered employment to blind, visually handicapped, and physically handicapped persons in the Los Angeles area to enable them to contribute to their own support.

Program and Performance

This center is the largest of the 3 blind manufacturing centers and has the most diversified manufacturing program. The program includes the manufacture of mattresses, box springs, pillowcases, ironing board pads and covers, sterile wrappers, aprons, surgical drapes, mattress ticks, dry mops, rugs, mats, floor brushes, and commissary specialties. A contract department is operated in which subassembly work is done for local private industries.

The General Fund is charged with administrative costs not directly related to the manufacturing process and the Industries for the Blind Manufacturing Fund is charged with all manufacturing costs.

The financial transactions of the Industries for the Blind Manufacturing Fund for this center, excluding administrative costs borne by the General Fund, are summarized in the table below:

Year	Sales	Total wages paid to blind and handicapped workers	Total other operative costs	Net profit
1956-57	$944,019	$239,509	$659,051	$45,459

GENERAL ANALYSIS

Objectives

This center provides sheltered employment to blind, visually handicapped, and physically handicapped persons in the Oakland area to enable them to contribute to their own support.

Program and Performance

This center specializes in the manufacture of domestic and industrial types of corn brooms. Other products manufactured at this center are staple-set street brooms, pillowcases, mailing bags, sewn domestic cotton items, sanitary brushes, and rubber mats, and distribution of commissary items for the Federal Government.

The Industries for the Blind Manufacturing Fund is charged with all manufacturing costs and the General Fund is charged with administrative costs not directly related to the manufacturing process.

This center will move to a leased facility from its present State-owned facilities on August 1, 1962, because of dislocation by freeway construction. The cost of leasing comparable facilities and moving expenses are reflected in the 1962-63 fiscal year.

The financial transactions of the Industries for the Blind Manufacturing Fund for this center, excluding administrative costs which are borne by the General Fund, are summarized in the table below:

Year	Sales	Total wages paid to blind and handicapped workers	Total other operative costs	Net profit
1954-55	$865,000	$209,174	$625,877	$29,949

GENERAL ANALYSIS

Objectives

The Orientation Center admits blind persons as trainees in an intensive program designed to assist them in becoming adjusted to the inconvenience of blindness, to assist them to become self-sufficient, and in cases where feasible, to provide prevocational training that will enable the blind person to engage in remunerative work in trades, professions, private enterprise, or public services. The center also has provided a home for blind persons who were in residence prior to April 1, 1951.

Program and Performance

In meeting these objectives, the center offers a program designed to deal intensively with problems arising from blindness. First of all, a blind person must learn new means of performing various tasks and functions connected with daily living, including new techniques of travel, communication, habits of daily living and the use of senses other than sight in orienting to the physical world about him. To accomplish these ends, the center offers courses in travel, Braille, typing, shop, home economics, daily living, and physical conditioning.

The program is designed to help the enrollee regain a feeling of competence and self-confidence, that he may return to the pattern of life which he would have followed in the absence of blindness. Almost without exception, all of the 104 students admitted or terminated during the fiscal year ending June 30, 1961, gained a confidence for self-help, some became entirely self-supporting, others resumed their functions as homemakers, and still others enrolled in courses of further training leading to vocational or professional goals.

The 1962-63 Budget reflects a reduction of $106,768 due to the planned move from present facilities on September 1, 1962. This move is necessitated by highway work on the MacArthur Freeway which is being erected adjacent to the existing facilities. Funds were appropriated during 1961-62 which will permit the construction of a functional new facility thereby making it possible to reduce the present staff by 28.6 positions. An additional factor causing the budget reduction is that the 29 blind permanent residents now cared for at the center will be transferred to suitable private facilities. Cost of their maintenance is reflected in the budget of the Department of Education—General Activities.

GENERAL ANALYSIS

Objectives

This school provides for the education of blind children in order that they gain a knowledge of the world around them and confidence and competence to cope with their environment.

Program and Performance

This residential school offers general education to blind, partially blind, and deaf-blind children through the elementary and high school levels. Besides special teaching methods and techniques, special equipment such as Braille writers, Braille books, embossed maps and globes, geometric models, nature study models, audio equipment, and various types of other special equipment are used. The Helen Keller deaf-blind unit provides a full educational program for doubly handicapped children.

In addition to the residential school programs, field services are available for preschool blind children, for graduates, and ex-pupils. The school also administers reader services for blind college students who cannot be served by Vocational Rehabilitation Services.

During the 1962-63 fiscal year, the school will provide general education for 170 resident children, guidance services for approximately 55 former students, field services for an estimated 95 preschool children, and reader services for aproximately 75 blind college students.

GENERAL ANALYSIS

Objectives

This is a residential school designed for the diagnosis and treatment and the determination of an educational program for children from Northern California afflicted with cerebral palsy and other similar handicaps. It also serves as a demonstration laboratory school for the education department of San Francisco State College. In addition, the school functions as a Medical-Educational Diagnostic Center for the Neurologically Handicapped Child in co-operation with the Bureau of Crippled Children Services, Department of Public Health.

Program and Performance

During the 1960-61 fiscal year, this school served a total of 133 children. Of the 133 children served, 45 were evaluated in the diagnostic center only, and 88 were enrolled in the school for intensive educational work and therapy. It is proposed that 1 teacher position be eliminated due to the reassignment of duties and to reflect improvement in the productivity of the remainder of the teaching staff.

The school, in co-operation with the Bureau of Vocational Rehabilitation, Department of Education, is providing a limited

amount of prevocational training of students in order to develop sufficient skills that they may become good candidates for further counseling and work experience provided by the Bureau of Vocational Rehabilitation.

In the 1960 summer session, approximately 30 students and graduate teachers from the Special Education Department, San Francisco State College, were enrolled.

Continued improvement in the productivity of the kitchen staff has made possible the elimination of 1 position in the 1962-63 fiscal year.

GENERAL ANALYSIS

Objectives

This is a residential school designed for the diagnosis and treatment and the determination of an educational-therapy program for children from Southern California who are crippled by cerebral palsy or other similar handicaps. It serves also in a limited capacity as a demonstration laboratory school for the training of teachers of handicapped children for the education department of Los Angeles State College of Applied Arts and Sciences.

Program and Performance

The children enrolled in the school are referred by the Crippled Children Services of the Department of Public Health and from the local school districts of the 13 counties of Southern California. The length of a child's enrollment, usually less than a year, is dependent upon the severity of the handicap, the degree of difficulty in establishing an individual educational, medical and therapy program, and the response of the parents to counseling and guidance provided by the staff. Upon completion of the residential program, the child is either returned to his local community for continued treatment and special education or is cared for by other private or public facilities. During the 1960-61 fiscal year, a total of 90 children were enrolled, and the same number is anticipated in the 1962-63 fiscal year.

In the 1960 summer session, Los Angeles State College taught 6 courses at this school in which 30 students were enrolled.

Present rented buildings continue to be used with a minimum of maintenance in anticipation of the development of a new facility adjacent to Los Angeles State College. It is planned to begin construction during the 1962-63 fiscal year and it is estimated that students may be received in September, 1963.

Continued improvement in the productivity of the kitchen staff has made possible the elimination of 1 position in the 1962-63 fiscal year.

GENERAL ANALYSIS

Objectives

This residential school educates mentally normal deaf children from elementary through high school grades with special emphasis on language concepts.

Program and Performance

The curriculum of this school is similar to that found in the public day schools, but with special speech instruction using oral techniques, as well as finger spelling and lip reading. Opportunities are provided for students to learn a trade in one of the following fields: commercial art, printing, cabinetmaking, shoe repair, baking, business education, metal shop, auto repair, and home economics. To improve the vocational training of students in the printing program, it is proposed that an offset printing press be purchased at a cost of $6,500 for the printing shop. Training with this press will greatly enhance the placement of graduates in the printing industry.

The school also offers students an opportunity to qualify for admission to Gallaudet College in Washington, D. C. Twenty-six graduates of this school were enrolled in Gallaudet Colle during 1960-61. Other graduates are regularly placed in busine firms, construction, printing, shoe repair, bakeries, and in se employed enterprises.

While academic and vocational subjects constitute the ma program at this school, the problem of teaching these han capped children to adjust to society and everyday problems met to a large extent by the use of psychologists and counselo

Two classroom teachers are proposed for the 1962-63 fisc year in accordance with the authorized staffing ratios of 1 for the elementary level and 1:10 for the intermediate and a vanced levels.

Two counselor positions are proposed in the 1962-63 fisc year to cover night supervision of the boys and girls dormitori which presently are covered only half time. Discipline problem instances of runaways, and other serious problems have occurr particularly with the teenage boys and girls because of i sufficient supervision.

GENERAL ANALYSIS

Objectives

This residential school educates mentally normal deaf children from elementary through high school grades with special emphasis on language concepts and vocational training.

Program and Performance

The curriculum of this school is similar to that found in public day schools but with special instruction for all students using oral techniques, speech and lip reading, as well as finger spelling. The vocational education program is an important part of the curriculum. A student may receive instruction in any one of the following fields: home economics, commercial art, printing, cabinet making, body and fender repair, spotting and pressing, business education, baking, electric motor rewinding, electric appliance repair, and electronic assembly. In addition to the aforementioned vocational programs, it is proposed that 1 teacher position be established in the 1962-63 fiscal year in orc to offer a vocational training program in horticulture. Duri March and April, 1960, a survey was made of nurseries locat in Southern California. The survey showed that over 17 of t major nurseries in the southern area would hire deaf worke if trained. A program in horticulture would be one that wou offer training in an area which is rapidly growing in Southe California and in which the prospective employers have in cated a willingness to offer trainees gainful employment.

The school also offers a college preparatory course for st dents competing for entrance to Gallaudet College in Washin ton, D.C. Nine students from this school will attend Gallaud College during 1961-62. The school also prepares students f further education at Riverside Junior College where 10 gra uates will be enrolled during 1961-62.

---

[a] Composed of savings in salaries and wages, $10,472; operating expenses, $28,914; equipment, $30; and increase in reimbursemen $3,211.

[b] Composed of savings in salaries and wages, $258; and increase in reimbursements, $2,200.

GENERAL ANALYSIS

Objectives

The purpose of vocational education is to provide training to develop skills, attitudes, and working habits, and to impart knowledge and information needed by workers to enter and progress in employment on a useful and productive basis.

Program and Performance

The vocational education program for California is based on a plan, co-operatively approved and financed by local school districts, the State Department of Education, and the United States Office of Education. The available funds are expended for supervision and teacher training at the state level.

Federal funds available for vocational education under the Smith-Hughes and George-Barden Acts must be matched on an equal basis by local or state funds. The George-Barden funds may be used for the reimbursement of salaries, traveling expense, and instructional equipment while the Smith-Hughes funds allow for reimbursement of salaries only.

In addition to an administrative unit the state agency for vocational education is divided into 4 services which offer assistance and guidance to the local districts. These services include:

1. Agricultural education, which assists persons who are planning to enter, or have already entered the occupation of farming. In 1960-61 a total of 21,208 persons enrolled in such courses, an increase of 2,632 persons from 1959-60.
2. Industrial education, which is designed to help the person who is contemplating entering a trade or public service occupation or has already done so. The 1960-61 enrollment in this activity totaled approximately 145,000, an increase of 20,000 from 1959-60.
3. Homemaking education, the largest of the 4 services, which operates a program of helping local school districts to assist persons engaged in the duties and responsibilities of the home. Enrollment in these courses for 1960-61 totaled 147,455, an increase of 3,574 from 1959-60.

---

[a] Composed of savings in salaries and wages, $9,504; operating expenses, $22,087; equipment, $569; and increased reimbursements, $4,185.

[b] Composed of savings in salaries and wages, $19,218; and increased reimbursements, $242.

[c] Neither receipts nor expenditures of federal funds are included in the overall budget totals.

[d] Balance of this program reported under Vocational Education—Reimbursements to School Districts; see Local Assistance section of the budget.

VOCATIONAL EDUCATION—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	CHANGE FROM 1961-62

GENERAL ANALYSIS—Continued

Program and Performance—Continued

4. Business education, which deals only with the distribution occupations phase of business education. This program is conducted by part time, day, and evening classes. The 1960-61 enrollment totaled 98,450, an increase of 5,336 from 1959-60.

In addition to the basic vocational education program, there are 2 state-financed programs which augment the joint federal-state-local program. These are the Fire Training Program and the Apprenticeship Instructional Materials Program which are discussed below:

Fire Training. This program provides service to local fire departments (almost exclusively volunteer departments) by conducting in-service training throughout the State, teaching the latest methods and techniques of fire fighting, fire prevention, and fire investigation. During 1960-61, 187 schools were held and 4,747 men were instructed in classes taught by the 6 itinerant instructors on the staff. A total of 3,926 class hours of instruction were given. In addition, the annual arson seminar was conducted at Berkeley with an attendance of 201, and the annual workshop was conducted in Fresno with an attendance of 197. The world's largest oil fire control school was held in Bakersfield with an attendance of 576 persons.

Instructional Materials for Apprentices. This program prepares instructional materials for use by apprentices in trades where there are a minimum of 100 apprentices. There are currently 30 such trades. The materials prepared include workbooks and testbooks and such instructional aids as examinations, progress charts, and teachers manuals. These publications are sold to the apprentice at a price sufficient to recover the direct costs of such publications. This program was formerly financed entirely by reimbursements. Two current and continuing program needs have made it necessary to augment this program with additional federal funds in the amount of $20,000. One program need is to provide instructional materials in connection with the effort being made by both the Federal and State Governments in training and retraining to allow maximum employment of the work force. The second need is to develop instructional materials for certain non-apprenticeable occupations and for occupations involving less than 100 indentured apprentices. To perform these needed services, an editorial assistant and an intermediate stenographer are proposed in 1962-63.

The Practical Nurse Training Program was instituted in 1956-57 by the Federal Government for purpose of developing curricula and programs in this field. The program is being developed through contractual arrangements with the University of California.

The Area Vocational Education Program is financed entirely by federal funds from Title VIII, National Defense Education Act which seeks to stimulate the technical education and training of technicians needed by industry. This program is responsible for the reviewing, approving, and processing of local school district applications for federal funds allotted to California for the purpose of technical education. The workload involved in the administration of this program during the 1961-62 fiscal year increased to the point where it became necessary to temporarily authorize 1.2 positions. These positions are proposed as new in the 1962-63 fiscal year.

GENERAL ANALYSIS

Objectives

The Vocational Rehabilitation Program encourages and assists physically and mentally handicapped persons to achieve a maximum degree of self-support.

Program and Performance

The section offers diagnosis and evaluation, vocational guidance, and a series of services as needed to bring the disabled individual to the point of employment, with placement on a job as the final goal. These other services may include furnishing a prosthetic device, medical or psychiatric treatment, training and training supplies, aid in establishing selected individuals in small business enterprises and, when needed, maintenance and transportation concurrently with training or medical care. Other specialized activities include the Business Enterprise Program for the Blind, which establishes vending stands, snack bars, and cafeterias for qualified blind persons, either in public buildings or in private industrial establishments. The section also conducts a fully federal reimbursed program involving the determination of disability of persons who have Social Security coverage, as well as a disabling physical or mental condition.

Demands for vocational rehabilitation services have increased at a sharply accelerated rate. The tremendous growth of special education programs for severely handicapped children has caused a rapid increase in demands for vocational rehabilitation services to prepare these young people for employment as they complete their public school work. It is estimated that the entire resources of the section could ultimately be absorbed in 1 or 2 large disability groups coming out of the public schools, notably, mentally retarded, cerebral palsied, and severe ortho-

GENERAL ANALYSIS—Continued

Program and Performance—Continued

pedically handicapped cases. In addition, nationwide publicity given to the dramatic results obtainable through modern rehabilitation methods has produced many referrals from agencies who expect their clients to be served by the State. There are further pressing demands for vocational rehabilitation services to severely disabled and older disabled persons, many of whom could be rehabilitated through the use of rehabilitation centers and rehabilitation workshops.

Administration

Program direction and operation functions are carried out by this unit.

As a part of administration there is again included the program of encouraging establishment and operation of sheltered workshops for the disabled, authorized under Chapter 2030, Statutes of 1959.

The position of workshop consultant is proving of increasing value through assisting community workshops in more efficient operation, developing a more rational means of establishing fees for services purchased by the State, and encouraging greater community participation in the rehabilitation of disabled clients of the section.

Business Enterprise Program for the Blind

This program assists blind persons to become self-supporting by providing equipment for the establishment of vending stands, snack bars, and cafeterias, in public buildings and industrial plants. Assistance is also furnished by a staff of business enterprise officers to insure that such establishments are properly operated.

The section has established a maximum allowance of $4,000 to install any one stand.

Business enterprise officers are now supervising 213 vending stands, snack bars, and cafeterias. At the beginning of the 1962-63 fiscal year there will be 230 installations to supervise, an increase of approximately 20 new installations and the usual attrition of 2 or 3 small installations.

Vocational Guidance and Placement

This unit comprises the main body of the program. It is divided into 10 districts and 17 branch offices throughout the State.

In 1952 the Vocational Rehabilitation Section took steps to implement legislative intent by establishing a system of priorities for acceptance of eligible cases. Public assistance cases were placed high on the priority list and since that time a substantial number of recipients of public relief have been rehabilitated into employment.

In 1954 the section instituted statistical recording and reporting program and records have been kept since that time on the nature and characteristics of the people served. In the 7-year period ending June 30, 1961, the section rehabilitated 4,338 individuals and families who had been on public assistance. Since the average grant for these families was more than $1,500 (it had increased to $1,867 in the 1960-61 fiscal year) the savings for 1 year would be $6,570,800 in relief payments.

The following table presents the movement of the active caseload during the fiscal years 1958-59 through 1960-61:

	1958-59	1959-60	1960-61
On hand beginning of year	7,125	8,945	9,215
Accepted during year	6,371	6,166	6,900
Total Active	13,496	15,111	16,115
Closed, rehabilitated	1,794	2,382	2,487
Closed unemployed after plan developed	613	827	1,050
Closed, other reasons	2,144	2,687	2,841
Total Closed	4,551	5,896	6,378
On hand end of year	8,945	9,215	9,737

As indicated by the above table, the backlog continues to show a slight increase. This increasing backlog has necessitated a more restrictive selection of cases.

While the number of rehabilitations accomplished by the Vocational Rehabilitation Section is numerically low compared to results in other states, evidence indicates that in many states the emphasis is placed upon serving only those disabled applicants who may be brought to employment most quickly and cheaply, often at the expense of more severely involved cases which have a greater need for service. The past experiences of the California program, when primary emphasis was placed on numbers served, created a condition where all staff efforts were directed toward bringing into the caseload persons whose needs were superficial and who might have been served through agencies such as the public employment service or community health services. California's present program gives priority to those cases whose need, broadly defined, is greatest and who without assistance from the State, would become permanent public charges. Although such a policy is incompatible with the present national trend of serving large numbers of undifferentiated cases, the ultimate returns to this State are much greater.

1962-63 Program

Five vocational rehabilitation counselors, a supervising vocational rehabilitation counselor, and 5.5 intermediate stenographer positions are proposed within the approved staffing ratios to reflect the population increases for 1962-63.

One vocational rehabilitation counselor and a one-half position of intermediate stenographer are proposed outside of the formula to provide services to Contra Costa County on a reimbursement basis. This is a similar arrangement to the previously approved service to Mt. Zion Hospital which is terminating March 1, 1963. The Mt. Zion position is shown as abolished effective on that date.

Disability Certification Program

This program is completely financed from the Federal Social Security Trust Fund. It involves the disability certification program connected with Old Age and Survivors Insurance.

1962-63 Program

To perform needed increases in this federal program caused by changes in eligibility and the resultant workload increases, the following new positions are proprosed:

2	Supervising vocational rehabilitation counselor I
2.5	Medical consultant
7	Vocational rehabilitation counselor
12	Intermediate typist-clerk
1	Senior typist-clerk

Workload increases in this program result from a greater volume of applications following the elimination of age limits affecting eligibility requirements for benefits and from a greater awareness on the part of potential applicants of their rights under the program. Liberalized definitions of disability by the Federal Government have also contributed to the increase. Increased clerical staff is necessitated by the requirement of the Federal Government for greatly increased information to be provided in the determination reports in order to reduce the number of rehearings and appeals.

Extension and Improvement Projects

In addition to the base programs previously discussed 4 extension and improvement projects are proposed in the 1962-63 fiscal year.

These projects are normally limited to the 3-year availability of the more favorable federal fund ratios of 3:1 or 4:1 to General Fund dollars. All of the projects show great promise of effecting considerable savings in various General Fund programs and/or in local welfare funds. None of the projects will be requested for continuance as permanent programs unless the results of the projects indicate that savings of State, Federal, or local funds can be effected on a long-term basis.

These projects are as follows:

Mental Hospital Patient Project

This project was approved in the 1961-62 fiscal year and is now being implemented. However, it is proposed to reclassify 1 of the authorized counselors to a supervising counselor and

GENERAL ANALYSIS—Continued

Extension and Improvement Projects—Continued

Mental Hospital Patient Project—Continued

to establish an additional supervising counselor position along with an additional clerical position. This would provide 2 supervisors for the 6 counselors in the program, 1 for the northern part of the State and 1 for the southern. This is above the supervisory counselor ratio of the base program, but the isolation of the program in the various mental hospitals and the critical need for close co-ordination with the Department of Mental Hygiene justify this closer supervision. In addition, 0.3 man-year of medical consultant is proposed to provide needed medical consultation to the program.

Rehabilitation Services to Recipients of Old Age and Survivors Insurance Project

It has not been possible to serve as many of the Old Age and Survivors Insurance recipients as hoped, particularly those who have rather severe disabilities coupled with the problem of being in the upper age bracket. It is important that as many of these be served as possible, even though they may be receiving Social Security benefits and grants, as a number must further supplement their income through public relief grants. Therefore, a demonstration project has been established in 1961-62 to determine if more intensive diagnosis and evaluation of Old Age and Survivors Insurance referrals who have been allowed disability payment grants may be rehabilitated. All who are served through this demonstration project would be high priority cases in the base program because of severity of disability, advanced age, and receipt of public assistance. Due to the high priority of these cases, the program is proposed for continuance in the 1962-63 fiscal year. The following positions are proposed to staff this project:

1	Supervising vocational rehabilitation counselor I
2	Vocational rehabilitation counselor
0.2	Medical consultant
1.5	Intermediate stenographer

The supervisor will organize and maintain the project reporting system, establish relationships with the 3 large rehabilitation centers co-operating with the project staff, including co-ordination of services within the center and, through supervision, maintain standards of service for project cases and when possible carry some project workload. The 2 counselors and related positions will be assigned project workload at the 3 rehabilitation centers.

Rehabilitation Services to Recipients of Public Assistance Project

In recent years a considerable percentage of the normal caseload has been devoted to welfare recipients with the resultant welfare savings previously discussed. In examining the welfare cases now being referred, it was found that only 44 percent of the 707 public assistance cases rehabilitated and removed from the relief rolls in 1960-61 were referred by public assistance agencies. The majority of cases found their way to the vocational rehabilitation program from other sources.

Based on studies of county cases it appears that there are many more cases of relief recipients who are potentially employable if it were possible for vocational rehabilitation counselors to spend sufficient time within the welfare department with the opportunity of reading cases and screening all new applicants. Working with the State Department of Social Welfare the Vocational Rehabilitation Section has developed an intensified program which it is believed will increase the numbers of relief recipients identified, evaluated, and placed in employment. The program will also be of great assistance to county welfare departments in assisting them in improving methods of identifying and evaluating disability problems among relief recipients with the resultant savings through proper treatment and services. The results will be presented to the Legislature in progress reports and at the conclusion of the 3-year study.

A budget of $314,520 is proposed for 1962-63 to perform this project of which $77,730 will be financed from the General Fund. The following positions are proposed to staff this project:

2	Supervising vocational rehabilitation counselor I
9	Vocational rehabilitation counselor
0.2	Medical consultant
7	Intermediate stenographer

It is estimated that these 9 counselors can ultimately serve a caseload of 700 active cases undergoing rehabilitation. The percentage of success with cases thus selected should be much higher than those selected by present methods, and it is hoped that when the program achieves maximum effectiveness at least 400 additional cases per year may be removed from the relief rolls, resulting in a savings of between six and seven hundred thousand dollars per year which will be considerably more than the cost of providing the services. It must be remembered that these estimated savings in relief funds are for a 1-year period and that if the program is successful, there will be an accumulative savings over the years many times the $600,000-$700,000 estimated.

Placement of Mentally Retarded in Rehabilitation Workshops Project

This proposed project would partially finance the placement of mentally retarded people in the various excellent rehabilitation workshops of California. These workshops are privately and locally financed and it is felt that there is a great potential of obtaining training for the mentally retarded in these private shops to allow more retarded individuals to eventually achieve a potential for self-support.

To obtain this training, it will be necessary to reimburse the workshops for the excess costs of the less productive phases of the rehabilitation process.

Only limited training of the mentally retarded has been achieved in the past due to a lack of financing of these centers for training purposes. This project will allow a complete evaluation of the potential of this type of training to place the mentally retarded in self-supporting status.

STATE TEACHERS' RETIREMENT SYSTEM—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS

Objectives

The function of this system is to provide monthly allowances to public educational personnel who are qualified to retire for services or disability in accordance with the provisions of the Teachers' Retirement Act and policies established by the State Teachers' Retirement Board. The board consists of the State Board of Education plus 2 additional members who represent teachers in the system.

Program and Performance

The present Teachers' Retirement System was established by Chapter 13, Statutes of 1944, 4th Extra Session, and is provided for in Section 13801 through Section 14415 of the Education Code. It is intended to provide retirement allowances for service or disability, and other related benefits for the California public school teachers.

The law provides for the collection of contributions from members by payroll deduction, from the counties, school districts, and other employing agencies. These funds consist of members' contributions which are based on an individual rate applied to the earned salary, and also employer contributions of $12 per year for each member employed, and an amount equal to 3 percent of the certificated payroll of each district or a lesser amount determined by applying an appropriate rate to the assessed valuation of the district's property. Additional members' contributions are received directly by the system for payments of redeposits and arrears, and for the purchase of additional annuities above those provided by the application of the normal retirement benefit formula to the individual case. The member's contributions are credited to his account to be used to provide a retirement allowance or to be refunded upon withdrawal from membership or death; they are invested in qualified securities in accordance with the system's investment program. The employer contributions, plus the appropriation from the General Fund, are used to pay current benefits to eligible persons.

Two clerical positions are provided in the Valuation Section to compute and give proper credit for part-time service prior to 1956 and meet the workload needs of this unit.

GENERAL ANALYSIS

Objectives

The Donahoe Higher Education Act of 1960 requires the Co-ordinating Council for Higher Education to perform the following functions advisory to the governing boards of the institutions of higher education in California and to the appropriate state officials:

1. Review the annual support budgets and capital outlay requests of the University of California and the state colleges, and present comments on the general level of support sought;
2. Delineate the different functions of public higher education and counsel as to the programs appropriate to each segment;
3. Develop plans for the orderly growth of public higher education and make recommendations on the need for, and location of, new facilities and programs.

Program and Performance

The Co-ordinating Council for Higher Education was established by the Legislature in 1960, as a part of the Master Plan for Higher Education. The council consists of 15 members, 3 each from the University of California, the state colleges, the junior colleges, the private colleges and universities, and representatives of the general public.

In addition to its basic responsibilities, certain other specific tasks have been assigned to the council, many requiring completion during the 1962-63 budget year. Among these are:

1. Report to the Legislature on extension programs and adult education;
2. Report to the Legislature on ways of increasing salaries, working conditions, and fringe benefits of University and state college professors;
3. Report, in co-operation with Trustees of the State Colleges, on need for establishing a state college in San Mateo;
4. Report on a study of student fee problems at the University and state colleges, defining noninstructional activities, and recommending the appropriate fee and annual revisions to provide complete self-financing;
5. Report on a study of the feasibility of increasing nonresident tuition at the University and state colleges, and of instituting an appropriately representative tuition charge for California residents;
6. Report on a study leading to establishment of comprehensive methods of measuring and establishing standards for instructional space utilization, including scheduling procedures;
7. Report on development of a plan for the expansion of medical education in California.

The council appointed its first director in September, 1961, and it is anticipated that authorized staff positions will be filled by the end of the 1961-62 fiscal year. It will be necessary for the council to employ, from time to time, consultants in specialized areas and $24,000 is requested for these consultative services.

In addition to preparing the studies outlined above, the council and its staff plays an important role in anticipating situations requiring co-ordination of higher education in California. Such activities will result in a clarification of the respective roles of the segments, thus reducing the need for legislative action. An example, is a program now underway by the council to develop a usable and feasible uniform account classification system among the various segments of higher education.

DEVELOPMENT OF A MEDICAL EDUCATION PLAN

Chapter 1402, Statutes of 1961, appropriated $20,000 to the Co-ordinating Council for Higher Education to develop a plan for the expansion of medical education in the State of California during the next 10 years. The work is to be done in co-operation with the State Department of Public Health, the University of California, representatives of private medical centers, and representatives of the public. It is to take into account the several communities in California which afford opportunities for the establishment of new medical schools, the needs for physicians, the needs for grants-in-aid to increase enrollment in private medical schools, the need for scholarships and loans to selected financially needy students, and the possible assistance from the Federal Government. It is anticipated that the work will be accomplished during 1962-63.

WESTERN REGIONAL HIGHER EDUCATION COMPACT

Objectives

Chapter 1694, Statutes of 1955, provided for California's participation in the compact which now includes 13 other western states, including Alaska and Hawaii, to promote better co-operation in higher education in medicine, dentistry, veterinary medicine, and public health.

Program and Performance

Three commissioners are appointed by the Governor for 4-year terms to the Western Interstate Commission for Higher Education. One commissioner must be engaged in the field of higher education in California. A report of activities is required to be submitted by the commission before January 15 each year to the Governor and Legislature. The expenditure amount represents California's share of the expenses of the Western Interstate Commission for Higher Education.

[a] Current funds available for general and specific purposes, including endowments and gifts and private grants for support of continuing activities; does not include funds for services under contracts. Neither the revenues nor the expenditures of University funds are included in overall budget totals.

[b] Total current expenditures including contributions to the State Employees' Retirement Fund. Excludes expenditures, income, and enrollment, if any, for the following activities and functions:

(1) Summer sessions, extension and public service, organized research, student aid, auxiliary enterprises.

(2) Organized activities of educational departments such as the University Creamery at Davis, and the Optometry Clinic at Berkeley which are supported out of their own income. However, teaching hospital expenditures in excess of their income are included as well as expenditures in the University elementary schools both of which activities represent instruction.

[c] Unit Cost by Level of Student Budget 1962-63:

Unit costs developed for use in the Master Plan were based on information obtained from the Restudy conducted in 1953-54. This previous study provided the cost per student credit hour (SCH) for each level of instruction. By obtaining the total SCH's produced in 1960-61 and projecting those to be produced in 1961-62 and 1962-63 based on enrollment estimates, it was possible to prorate expenditures for each of the years in question by weighting the SCH's produced at each level of instruction by the same cost ratios that existed between them in the two previously mentioned studies.

Students who are *classed* as lower, upper, or graduate division students, do not take all their course work at the corresponding level of *instruction*. Therefore, in order to compute the cost per full-time student, a study was made at each campus of the University to determine the average annual number of course units taken at each level of *instruction* by each *class* of student. The cost per SCH was then extended by the course units undertaken at each level of instruction.

GENERAL ANALYSIS

Objectives

The University of California is a statewide institution of higher learning which has 4 major functions.

These are:

1. Research directed toward advancing the understanding of the natural world and the interpretation of human history and of the great creations of human insight and imagination.
2. Instruction of able young people, by transmitting to them established knowledge and skills and by helping them to experience with their teachers the actual processes of developing and testing new hypotheses and fresh interpretations in many fields.
3. Training for professional careers—a training grounded in the understanding of relevant sciences and literature, and enlightened by some experience in the methods by which the boundaries of knowledge are pushed back.
4. Various sorts of expert public service.

Program and Performance

In keeping with these general purposes admission requirements at the University of California are more selective than those of the junior colleges and state colleges, even though the content of introductory courses at the freshman and sophomore levels may be closely comparable for students planning to go on to a bachelor's degree, by transfer or otherwise. The program of the University of California develops greater differences in the upper division, and goes on to levels of professional or general scholarly training not duplicated in other public institutions.

The University operates on 7 major campuses and a number of experiment stations. Major campuses are situated at Berkeley, San Francisco, and Davis in Northern California, and at Los Angeles, San Diego, Riverside and Santa Barbara in Southern California. Its full-time resident enrollment has been the largest in the country for a number of years. It reaches the people directly in all parts of the State through its agricultural extension service, including 4-H clubs, and through university extension classes, correspondence courses and conferences. It maintains off-campus services through which practicing doctors, lawyers, dentists, engineers, etc., may renew and deepen the value of their services to the public throughout life; a university press for the publishing and distribution of scholarly books; and diagnostic and treatment centers to which doctors may refer citizens of the State suffering from particularly dangerous or obscure ailments.

In carrying out these programs the University has attained a ranking that places it among the greatest institutions of learning in the world. As a natural part of this development the University has tended to devote its energies to advanced studies and large amounts of fundamental research. As a consequence the student body is heavily weighted in the upper division and graduate schools.

UNIVERSITY OF CALIFORNIA—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS—Continued

Program and Performance—Continued

One measure of this is the number and type of degrees granted. The table below shows the distribution of degrees granted in 1950-51 and 1960-61. This table also illustrates the growing trend toward the more advanced types of work.

YEAR	UNDERGRADUATE DEGREES	GRADUATE DEGREES
1950-51	84.0%	16.0%
1960-61	69.1%	30.9%

Another measure of this shift to advanced standing and graduate work can be shown by considering the composition of the enrollment. The table below shows the trend for the years 1958-59 through 1962-63.

	1958-59	1959-60	1960-61	1961-62	1962-63
Lower division (%)	31.8	32.5	32.4	33.6	32.8
Upper division (%)	41.4	39.7	39.1	36.0	35.1
Postgraduate (%)	26.8	27.8	28.5	30.4	32.1

The budget for 1962-63 contains provision in recognition of these trends in enrollment both as to size and shifts between lower and upper division. The allowances for academic positions have been made on the basis of a weighted teacher-student ratio which recognizes the differences in requirements for instructing at the lower division, upper division, and postgraduate level.

The 1962-63 Budget provides for a $10,239,328 increase over the amount of state funds appropriated in 1961-62. This 7.7 percent increase is comparable to the 9.8 percent gain in enrollment estimated for 1962-63.

University funds have increased $4,393,636 (8.1 percent) over their 1961-62 level. Major elements of this rise include: Auxiliary Enterprises (residence halls, bookstores, parking operation, etc.) for which a $1,168,073 increase is estimated; student fees, including incidental fees, nonresident fees, special tuition fees, $1,081,167; University Extension fees increase by $550,800; endowment income, $49,467; and federal contract overhead, $431,101.

STATEWIDE ADMINISTRATION

This function is concerned with the co-ordination of separate campus activities into a university program, for management of endowments and University funds, and for co-ordination with nonuniversity groups. The Regents set the policies for operation of the University, the president and statewide staff officers carry out these policies on a statewide basis, with each local campus being administratively self-sufficient in carrying out the policies on their campus. Statewide administration includes the president, who is the administrative head of the University, the vice president of the University, who is the chief academic officer. Other vice presidents are provided for legal advice, for business operations and construction, for budgetary and accounting control, for governmental relations and projects, and for university relations. The 1961-62 level of expenditures is continued in 1962-63.

BERKELEY

The Berkeley campus is the oldest and most populous of the university campuses. In 1873 the first classes met on the Berkeley campus, which now covers more than 900 acres on the eastern side of San Francisco Bay.

For 1962-63, budget increases are supported by an enrollment increase of 1,624 students, 7.1 percent over the 1961-62 budget estimate:

General Administration: $16,000 is provided for accounting.

Student Services: The $138,322 increase relates to the increment of added students and maintains the present level of service.

Maintenance and Operation of Plant: An increase of $205,000 provides service for an additional estimated 275,633 outside gross square feet in the maintained areas of the campus. This continues the current level of unit costs, $0.75 per square foot.

Departments of Instruction and Research: $2,004,470 provides for increased enrollment at the presently budgeted student-teaching staff ratios, for teaching staff and support expense.

Libraries: $122,596 increase provides for operational costs, including $88,700 for books, and $12,800 for binding.

Organized Research: The increase provides for needs of new faculty members at previous levels of support and for workload increases distributed over 48 research units. $60,000 is added for core support of new organized research centers to be supported largely from extramural funds.

LOS ANGELES

The Los Angeles campus has the second highest enrollment within the University. It is located in West Los Angeles about 5 miles from the Pacific Ocean, and includes both a general campus and a medical center.

General Campus:

Workload increases are related to the maintenance of present standards for an increase of 1,240 students in 1962-63, an increase of 7.2 percent over the 1961-62 Budget estimate.

General Administration: $34,000 is provided for accounting and purchasing.

Departments of Instruction and Research: An additional $1,093,722 is provided to maintain the present ratio of students to teaching staff; $75,000 is included for planning a new school of architecture.

Student Services: An increase of $199,830 is related directly to number of students.

Libraries: $192,339 of which $129,019 is for books and $21.000 for binding.

Maintenance and Operation of Plant: $77,000 for 111,490 square feet of additional space coming into service at a cost of $0.67 per square foot.

Organized Research: Funds are provided for faculty research grants and travel for additional members of faculty at previous levels of support and for workload increases distributed over 28 organized research units.

Medical Center:

The Los Angeles Medical Center includes Schools of Dentistry, Medicine, Nursing, and Public Health; and the University of California Hospital which provides facilities for teaching, research, and health services.

An increase of $263,126 is proposed for the Schools of Medicine, Nursing, and Public Health, which will have an estimated 8 percent enrollment gain and an expansion from 55 to 72 students in each of the first three years of the medical curriculum.

UNIVERSITY OF CALIFORNIA—Continued

SAN FRANCISCO

The San Francisco Medical Center offers instruction in the Schools of Dentistry, Medicine, Nursing, and Pharmacy. In addition the Hooper Foundation of Medical Research is a center of investigation in epidemiology. The Medical Sciences Building, University Hospital, Medical and Dental Clinics offer facilities for teaching, research, and public service.

The budget will provide $234,063 to meet workload requirements for the Schools of Medicine, Dentistry, Pharmacy and Nursing. The only other significant augmentation is in Organized Activities — which includes $190,970 to assure additional teaching patient beds needed by the larger fourth year medical class. Under Libraries, the $49,000 includes $19,187 for books and $17,872 for additional staff.

DAVIS

The Davis Campus, 13 miles west of Sacramento, is the northernmost of the University's campuses and occupies more than 3,000 acres. Instruction and research in agriculture is a major emphasis of the campus. Other major units are the College of Letters and Science and the School of Veterinary Medicine.

The University of California at Davis is a general campus of the University, with the accepted university functions of teaching, research, and public service in a number of academic and professional disciplines.

Administration: $12,000 is provided for accounting and business services.

Departments of Instruction and Research: The increase of $687,921 includes provision for 59 additional faculty members and supporting expense.

Libraries: $124,262 additional is provided to meet student and research needs. This includes $63,083 for books and $42,486 for staffing.

Maintenance and Operation of Plant: $215,000 additional is proposed for an additional 175,327 square feet to be maintained at a unit cost of $0.92 per square foot.

Student Services: $90,839 provides for needs in the Student Health Service, Registrar's, and Dean of Students' offices resulting from additional numbers of students.

Organized Research: $15,000 is added for the Computer Center and $25,000 for a new Bureau of Public Administration.

RIVERSIDE

The Riverside campus is a general campus of the University. As such, the development of graduate instructional programs, research, and public service are proceeding in accordance with University objectives.

The Riverside campus will develop as the University's principal instructional and research center in agriculture for Southern California. The sustained upward trend of enrollment (20.7 percent increase in 1962-63) is the underlying factor supporting the budget.

Departments of Instruction and Research increase by $444,995 to maintain present instructional standards. The increase provides for the addition of 47.5 faculty members including 12.5 teaching assistants.

Student Services increase $25,212 and Libraries $97,709, including $47,366 for books and $35,521 for staffing.

UNIVERSITY OF CALIFORNIA—Continued

SANTA BARBARA

The Santa Barbara campus is situated on a 408-acre seashore site, adjacent to the community of Goleta, 7 miles northwest of the City of Santa Barbara.

The Regents have designated Santa Barbara as a general campus. Accordingly, the program which has included a College of Letters and Science, a School of Education, and graduate work in certain specialized fields, is being extended to include engineering and additional fields of graduate work.

An enrollment growth of 20.1 percent estimated for 1962-63, and further general campus development provide the basis for the increase in the campus budget. An increase of $783,123 is budgeted for Departments of Instruction and Research. Other increases related to students include $114,939 for student services and $101,291 for libraries, of which $30,000 is for books and $54,956 for additional staff to service the additional students. An increase of $66,346 for maintenance and operation of plant is budgeted in order to care for an additional 59,693 square feet of building space to be available in 1962-63.

SAN DIEGO

San Diego has been a center of research in oceanography since the Scripps Institution of Oceanography became a part of the University in 1912. Present activities on the San Diego campus include the Scripps Institution of Oceanography and the School of Science and Engineering established in 1957-58 to provide graduate instruction and research in mathematics, physics, chemistry, earth and biological sciences, and engineering.

The School of Science and Engineering enrolled its first class of graduate students in 1960-61. Graduate enrollment at San Diego is estimated at 250 students for 1962-63.

Departments of Instruction and Research: An increase of $202,525 includes provision for 12 additional faculty members and supporting expenses.

Maintenance and Operation of Plant: $114,853 is required for maintenance of an additional 121,572 square feet of space at a unit cost of $1.09 per square foot.

Libraries: The increase of $89,285 serves the new school's developing program of instruction and research. It includes $16,000 for books, $42,466 for additional staff, and $24,100 for binding.

UNIVERSITY EXTENSION

Since its beginning in 1891, University Extension has become a major service activity of the University. It extends the resources of the University to the adult population of the State by providing evening classes, short courses, conferences, correspondence courses, and special programs. State support is continued at 9 percent of the program, with fees covering the balance of costs.

UNIVERSITY PROGRAMS AND PROVISIONS

These accounts include certain activities not assigned to campus administration together with all of the central lump sum provisions which later will be allocated to campus budgets. These provisions cover such costs as retirement and health and welfare, merit salary increases, promotions, sabbatical leave replacement, removal expense, and contingencies.

Staff Benefits: The increase reflects a proposal to transfer $1,727,750 from State Employees' Retirement System to the Regents Retirement System plus $81,500 for revised enrollment and $345,846 for regular enrollment and compensation insurance. For health and welfare of university employees, $1,313,000 is provided.

Provisions for New Campuses: An increase of $247,000 is proposed to continue educational planning for the new general campuses in Orange and Santa Cruz Counties.

Provision for Third Term Operations: $600,000 is provided as a first step towards initiation of year-around operation of the Berkeley, Los Angeles, and Santa Barbara campuses.

Salary and Budgetary Savings: $5,500,000 is deducted from the budget as estimated savings accruing from operations. This amount is approximately 3 percent of the state appropriation.

GENERAL ANALYSIS

Objectives

Hastings College of Law is a fully accredited institution offering systematic and thorough instruction in those branches of law which will best prepare the student for practice of the profession of law.

Program and Performance

Hastings College of Law is the largest publicly supported law school in California. It has its own board of directors, it is designated by statute as the law department of the University of California, and degrees are issued in the name of the Regents of the University of California.

The college was founded in 1878 by S. C. Hastings with a grant of $100,000 to the State. By stipulation in the original agreement, the State must pay to the school the sum of 7 percent per annum on the grant or repay the $100,000 in full to the Hastings' heirs.

One of the noteworthy parts of the program at Hastings is the "Sixty-Five Club." Many faculty members are former deans of other law schools or are renowned teachers who have been obliged to retire upon reaching retirement age. A very distinguished faculty has been assembled at Hastings by employing these men.

Since 1951 and until 1961 the college has offered 2 programs leading to the LL.B. degree; a 3-year program to which holders of the bachelor's degree are admissible, and a 4-year program to which students who have completed 2 years of college work may be admitted. The fourth year subjects have been offered in alternate years, to a combined class consisting of students taking their fourth year of work in chronological order and students in their third year of study taking fourth year subjects out of order. However, due to the large number of applications for the 3-year program, admission to the 4-year program was discontinued in 1961, and only holders of the bachelor's degree are now eligible for admission.

A position of assistant librarian is included in order to meet the demands from several years' enrollment increases placed upon the library for professional guidance in the use of the library facilities during the 87 hours per week the library is open.

Nine-tenths additional teacher provide for a net increase in instruction, consisting of an additional first-year section for enrollment increases less fourth-year subjects no longer offered.

One additional secretary-stenographer will provide clerical assistance related to enrollment increases and applications for admission. Application fees are to be increased from $5 to $10 in recognition of increased workload and will result in $4,000 additional estimated reimbursements.

GENERAL ANALYSIS

Objectives

As defined in Education Code, Section 22606, the primary function of the state colleges is the provision of instruction for undergraduate students and graduate students, through the master's degree, in the liberal arts and sciences, in applied fields and in professions, including the teaching profession. The doctoral degree may be awarded jointly with the University of California. Faculty research is authorized to the extent that it is consistent with the primary function of the state colleges and the facilities provided for that function.

Program and Performance

On July 1, 1961, the Trustees of the California State Colleges succeeded to the powers, duties, and functions with respect to the management, administration, and control of the state colleges previously vested in the State Board of Education and the Director of Education. During the 1962-63 fiscal year, instruction for an estimated 86,440 full-time equivalent students will be given at 15 colleges. This enrollment is comprised of approximately 116,000 individual students taking an average load of 11.2 semester credit hours.

In addition, planning will continue for 2 recently established schools, San Bernardino-Riverside State College and South Bay State College.

Enrollment Trends

The following table reflects the growth in full-time-equivalent (FTE) enrollments in the state colleges during the period 1951-52 through 1961-62. (Full-time-equivalent enrollments are computed on the basis of 15 semester units of instruction representing 1 unit of full-time-equivalent enrollment.)

Annual Full-Time-Equivalent Enrollment of Regular and Limited Students in California State Colleges, Regular Sessions 1951-52 Through 1961-62
(Does Not Include Summer Quarter at State Polytechnic College)

Academic Year	Regular FTE	Limited FTE	Total FTE	Percent of Total FTE Represented by Limited Students
1951-52	22,584	1,666	24,250	6.9
1952-53	23,638	2,147	25,785	8.3
1953-54	26,777	2,804	29,581	9.5
1954-55	31,269	3,236	34,505	9.4
1955-56	36,326	3,808	40,134	9.5
1956-57	41,374	5,086	46,460	10.9
1957-58	45,755	6,228	51,983	12.0
1958-59	49,061	7,284	56,345	12.9
1959-60	53,162	8,168	61,330	13.3
1960-61	61,198	7,891	69,089	11.4
1961-62(Est.)	69,230	8,450	77,680	10.9

The decrease in the proportion of limited students in 1960-61 and 1961-62 is due in part to the requirement that limited students must meet admission standards for regular students.

Degrees Granted and Graduate Programs

There has been an increase in the number of degrees granted, roughly corresponding to the increase in enrollments. There has also been a marked growth in number and types of graduate programs in the state colleges since 1951-52.

---

[a] After deduction of expenditures for summer session, extension, and special projects—reimbursed.

[b] Includes summer quarter FTE.

[c] After deduction of reimbursements of student fees, charges to employees, federal payments, and payments from other agencies for services rendered by the colleges.

Teacher Education Programs

The state colleges are the most important source of trained public school teachers in the State of California. The following table, based on data from the Credentials Office, Department of Education, illustrates the importance of the state colleges in the field of teacher education:

Number and Percent of Credentials Issued on Formal Institutional Recommendation by Types of Accredited Institutions in California, 1951 Through 1960-61

Academic year	State Colleges Number	State Colleges Percent	University of Calif. Number	University of Calif. Percent	Independent Institutions Number	Independent Institutions Percent	All Institutions Number	All Institutions Percent
1951-52	2,776	46.4	1,048	17.5	2,163	36.1	5,987	100.0
1952-53	2,800	52.4	815	15.2	1,734	32.4	5,349	100.0
1953-54	2,869	49.7	1,068	18.5	1,834	31.8	5,771	100.0
1954-55	3,381	53.6	939	14.9	1,988	31.5	6,308	100.0
1955-56	4,209	59.8	947	13.4	1,884	26.8	7,040	100.0
1956-57	4,227	57.5	1,060	14.4	2,066	28.1	7,353	100.0
1957-58	4,392	59.8	951	13.0	2,000	27.2	7,343	100.0

TRUSTEES OF THE CALIFORNIA STATE COLLEGES—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

MAJOR PROGRAM AUGMENTATION AND COSTS

The total increase in 1962-63 over the revised amounts budgeted in 1961-62 for the State College System is $9,657,704 or 12.5 percent. The Board of Trustees increase is $817,492, representing an increase in the support expenditure program of $205,994, an increase of $645,000 to be allocated by the trustees to the various colleges to perform faculty research, and a decrease in the student loan program of $33,502. The majo portion of the state college increase of $8,840,212 results fro increased workload arising from an estimated enrollment growt of 8,430 full-time equivalent students and the addition of approximately 1,235,000 square feet of new facilities. This increas can be outlined as follows:

Salaries and Wages:	
Additional teachers per faculty staffing formula	$3,396,464
Professional, technical, and clerical personnel for enrollment growth in accordance with staffing standards	2,176,559
Maintenance personnel for new facilities in accordance with accepted staffing standards	579,895
Net increased cost in authorized positions due to full-year costs of positions authorized during the current year, improved employment conditions, changes in salary savings, salary changes and academic promotions	1,346,855
Operating Expenses:	
Special allowances for library books in order to provide minimum libraries for new colleges and new curricular offerings at existing schools	640,212
Price increases, growth of enrollment, and occupying new facilities	517,722
Campus master planning service	127,200
Equipment	—59,911
Faculty research	645,000
Increase in contributions to state employees' retirement	490,805
Increase in contributions for state employees' health and welfare	336,026
Increased reimbursements	—539,123
Increased Program Cost 1962-63 Over 1961-62	$9,657,704

Included above is $177,562 for each of the 2 new schools, San Bernardino-Riverside and South Bay State College. These funds continue the existing planning staffs and provide for 8 new positions to complete development of new curricula and plans for initial facilities.

Eight hundred seventy thousand fifty-seven dollars is budgeted for Stanislaus State College which will be commencing its third year of instruction and $666,083 is budgeted for Sonoma State College which accepted its first students in the fall of 1961. Current plans are that Sonoma State College will accept lower division students in the fall of 1962.

Each state college, except for the 5 newest schools, charges employees and students a parking fee which has been established by the Trustees of the California State Colleges. Alameda, Sonoma, and Stanislaus are operating on rental property; South Bay and San Bernardino-Riverside are not yet activated. An estimated amount of $1,061,608 will be collected in the 1962-63 fiscal year. Expenditures of $433,878 are budgeted for the complete operation of these facilities and includes security personnel, garage attendants, rental and/or purchase of automatic control devices, maintenance and repair of parking areas, the collection and accounting of fees and other miscellaneous expenditures. The Capital Outlay program for 1962-63 contains provisions in the state colleges for a program of constructing parking facilities in an amount of $589,100.

An amount of $16,000 is budgeted to the trustees for special lecture service. The staff of the trustees will administer these funds and will co-ordinate appearance of special lecturers at the various campuses. This amount is in addition to that which is currently provided the colleges for this purpose.

Student fees for materials and services provide $7,633,337 in reimbursements, in 1962-63. This is computed on the basis of $76 for regular individuals and $39 for limited individuals.

These fees are designed to cover the non-instructional expenses of state college students such as general expenses in the instruction function, health services, counseling and testing services, placement services and student activities including administration of the housing program. Budgeted expenditures for this purpose in 1962-63 are $6,994,318. This is composed of $4,176,725 in salaries and wages, an allowance of $2,570,299 for general expense under the instruction function and the $247,294 for general expense under health service.

The existing library book formula has again been augmented to permit acquisition of books at an accelerated rate.

Special book allowances have been provided at Alameda, Long Beach, Los Angeles, Orange, Sacramento, San Diego, San Fernando Valley, San Francisco, San Jose, Sonoma, Stanislaus, and State Polytechnic College in the amount of $640,212. An additional $450,000 is being provided to purchase an initial complement of library books for Alameda, Orange, Sonoma, and Stanislaus under the capital outlay budgets of these schools.

The trustees will contract with the Division of Architecture and various private architects for master planning service. This function, which was formerly funded through Capital Outlay preliminary plan allocations, will permit each campus to have an architect continually available for campus planning and development on a long-range basis. Seven thousand five hundred dollars has been budgeted at each campus except South Bay and San Bernardino-Riverside which have an allowance of $3,600.

Other increases were budgeted under operating expenses to provide for price increases in printing, travel, utilities, communications, and to allow for additional expenses for operation of new facilities.

Proposed New Positions:

The 1962-63 Budget includes a total of 1134.6 proposed new positions in the colleges and 1 proposed new position for the Board of Trustees. The following table shows the distribution by college and principal function:

TRUSTEES OF THE CALIFORNIA STATE COLLEGES—Continued

PROPOSED NEW POSITIONS FOR STATE COLLEGES

Totals	552	1	24.9	125.9	79.2	43.5	97.9	22	151.9	2.2	34.1	1,134.6

Positions are budgeted on the basis of staffing formulas and standards. Workload units are applied to the formulas and standards and resulting increases are presented as proposed new positions.

INSTRUCTION FUNCTION

Teachers:

The need for teachers is determined by application of a faculty staffing formula which was first adopted as a budgetary tool in 1953-54. The formula determines the number of full-time teaching positions based upon a 45-hour workweek for instructors. The formula allows 9 hours a week for nonteaching assignments (such as student advising, committee work, administrative duties, etc.) and 36 hours per week for teaching assignments including class preparation as well as actual instruction. The number of hours of actual instruction in relation to class preparation varies between 12 and 24 hours per week depending upon the type of instruction; e.g., lecture, activity, and laboratory.

In order to compute the need for teachers, the number of sections is determined based upon distribution of the total estimated campus enrollment among the various subject offerings. This distribution is determined on the basis of past experience, anticipated shifts in program emphasis, and expansion of curricular offerings. According to the formula, a total of 553 additional teachers are required to meet the instruction demands in the budget year for the state colleges. This includes 1 teacher in agriculture at Chico State College.

The faculty staffing worksheets are prepared by the colleges and were reviewed this year by the staff of the Trustees of the California State Colleges.

Supervision:

Division chairman, curriculum supervisors, evaluators, and coordinators are added in the budget and have the responsibility of supervising various aspects of the instructional program. The need for each division chairman is measured by the number of teaching positions within a homogenous grouping of curricula. Curriculum evaluators and supervisors are fractional teaching positions released from instructional responsibilities in order to develop a new curricula or supervise the offerings in a large existing curriculum. Curriculum coordinators, also fractional teaching positions released from instructional responsibility, supervise students doing internship work away from the college. These are used primarily for the supervision of practice teachers. Twenty four and nine-tenths such positions are added in the budget year.

Technical and Clerical:

Technical and clerical positions are budgeted on a ratio to teachers and the need for clerical positions by supervisory positions. One hundred twenty-five and nine-tenths new positions are required for these responsibilities. These positions provide the auxiliary support operations for the direct teaching activities and include such activities as:

1. Staffing the stock and issue rooms.
2. Operation and maintenance of technical equipment.
3. Clerical operations including typing, filing, and other office duties.
4. Auxiliary services including reproduction of testing and other materials and more direct instructional activities such as limited student reader services.

LIBRARY

Seventy-nine and two-tenths professional and clerical positions are added, based upon the library staffing formula. This formula allocates staff on the basis of accepted workload standards for technical processing of new volumes; mending, inventorying and discarding existing volumes; sorting and shelving volumes; and manning public service desks and checkout points. The majority of the new positions in this budget are for the processing of additional books which have been allowed on an augmented basis.

ADMINISTRATION AND BUSINESS MANAGEMENT

Forty-three and five-tenths new positions are added in the executive and business management function in order to provide professional, technical, and clerical assistance. These positions are justified for a large variety of functions ranging from top administrative responsibilities to the processing of necessary personnel documents, operations of switchboard, and reproduction equipment.

STUDENT SERVICES

One hundred ninteen and nine-tenths new positions are justified in the student services function. Staffing in this function is closely allied to increases in enrollments. The total proposal consists of the following increases by function:

Student personnel	61
Admissions and records	22
Health	36.9

MAINTENANCE

One hundred fifty-one and nine-tenths new positions are budgeted to provide adequate maintenance and security of the approximately 1,235,000 square feet of new facilities which will be added to the state colleges' physical plant in 1962-63.

SUMMER SESSION AND EXTENSION

These programs are fully financed by students' fees. The 2.2 new positions included in the budget are offset by increased reimbursements.

SPECIAL PROJECTS—REIMBURSED

Thirty-four and one-tenth positions are included in proposed new positions for fully reimbursed activities. These positions actually are currently existing positions which have not heretofore been reviewed by the Legislature.

GENERAL ANALYSIS

Objectives

The Trustees of the California State Colleges provide the policy determination and central administration for the California State Colleges. The State Colleges have as their primary functions the provision of instruction for undergraduate and graduate students through the Masters Degree. Doctorate degrees may be awarded jointly with the University of California in fields mutually agreed upon. The colleges provide instruction in the liberal arts and sciences, in applied fields and in certain professions, including the teaching profession. Most programs are of 4-year duration although presently authorized and established 2-year programs in agriculture are conducted. Faculty research is authorized to the extent that it is consistent with the primary functions of the state colleges and it may be undertaken within the facilities currently available to the colleges.

Program and Performance

The Board of Trustees was established by Chapter 49, Statutes of 1960, First Extraordinary Session, and took over the administration of the state colleges on July 1, 1961. The board is composed of 20 members, 4 of which are ex officio, and it is charged with the responsibility of setting policies for the governance of the 17 state colleges. The Office of the Chancellor provides research and studies for the systematic development of the policies affecting the state colleges and provides administrative support for them. Legislation enacted in 1960 (Chapter 49, Statutes of 1960) assigned to the Office of the Chancellor the classification and pay responsibilities for college employees previously exercised by the State Personnel Board. In addition, it is charged with the plans and programs for the physica development of the state colleges, including contracting wit private architects for the preparation of plans and the construction of the authorized facilities.

1961-62 is the first year of operation under the legislativ requirements of Chapter 49. It has been a year of building an preparation for the future, and it is expected that 1962-63 wil be the first year of full scale operations of the trustees. Th budget for 1961-62 provided a staff for a full year of operatio in 1961-62. However, difficulties of recruitment and the fact tha the Chancellor's Office has been moved to Los Angeles mean tha full scale operations will not be a reality until the latter par of 1961-62. The cost of moving to Los Angeles has been absorbe within savings made in 1961-62 due to a policy of staffing on conservative basis until headquarters of the Chancellor's Offic has been established. The 1962-63 budget request reflects operations from the Los Angeles area, a greater degree of full employment, and but 1 addition to the staff.

One assistant personnel analyst is proposed to assist in th work of the personnel office in carrying out the classification an pay responsibilities for nonacademic employees which was adde to the Board of Trustees by Chapter 1828, Statutes of 1961

An item of special lectures for colleges is included in th amount of $16,000 which will be used to provide these service for the colleges. Arrangements for presentations will be made by the central office for individuals with particular talents. The $16,000 supplements an equal amount which is budgeted in the various state colleges.

FACULTY RESEARCH

Faculty research within the primary functions of the colleges and physical facilities available was recognized as appropriate for the state colleges by the Master Plan for Higher Education.

A minimum amount for such research is included in the 1962-63 budget in recognition of this approval and the expressed need of the colleges for such activity. The amount is compute at 1½ percent of instructional salaries and is appropriated to th Trustees of the California State Colleges to be allocated wher the need is greatest and research most appropriate.

EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	CHANGE FROM 1961-62
Support of faculty research	–	–	$645,000	

NATIONAL DEFENSE EDUCATION ACT TITLE 2, STUDENT LOAN PROGRAM

Objectives

Title 2 of the National Defense Education Act provides loans to worthy and needy students in institutions of higher learning within the State. By means of forgiveness of a portion of the loans to those who engage in the profession of teaching, there is a special emphasis to encourage students to enter the field of teaching.

Program and Performance

In order to continue the Student Loan Program, authorized by Chapter 952, Statutes of 1959, $200,000 is required in the 1962-63 budget. This amount represents one-ninth of the amount of federal funds which it is estimated will be made available t California State Colleges for student loans in accordance wit the National Defense Education Act.

The appropriation of $200,000 for 1962-63 as proposed is the same amount appropriated in 1961-62 but a reduction of $33,512 from the funds available for 1961-62 when this latter amount was made available from a 1960-61 appropriation. The application for allocation of federal funds is made directly by the college to the Federal Government. After receipt of federal funds actual disbursement of federal and state funds will then be made by the Trustees of the State College System to the various colleges.

GENERAL ANALYSIS

Objectives

The State College for Alameda County offers programs in teacher education, occupational and preprofessional curricula, and the liberal arts designed to meet the needs of Alameda County and portions of San Mateo and Contra Costa Counties.

Program and Performance

The State College for Alameda County, established by Chapter 1681, Statutes of 1957, offered classes for the first time in the fall of 1959 in rented facilities of the Hayward Union High School and will continue to use these facilities until the completion of their permanent buildings on their new campus in the fall of 1963.

The 1961-62 Budget estimated an enrollment of 815 students (FTE) for 1961-62. Recent re-estimates indicate the 1961-62 enrollment will be 740, a decrease of 75 students (FTE). Reductions are reflected, where possible, in the current year of the 1962-63 Budget for all areas that are directly related to enrollment.

The 34.1 proposed new positions included in the budget for the 1962-63 fiscal year are based on an estimated enrollment of 1,030 students (FTE).

A total of 16.3 new teachers are included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. Other additions within the instructional function include 2.5 technical and clerical positions which are allowed on the basis of accepted workload standards. Funds are provided to reclassify 1 division chairman from academic year to 12-months employment.

Two and five-tenths new positions in business management are based upon increased workload.

A total of 7 new positions is required for the student services area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. Of these positions, 1 is in health service, 1 in admission and records, and 5 in student personnel.

Increases in staff in other areas are based upon accepted workload standards, including 0.5 position for the library, and 4 positions for plant operation.

The general expense in the instructional function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance for travel related to recruitment of faculty. A special allowance of $75,800 is allowed for library books. A campus planning item of $7,500 is included to provide continuous master planning. All other operating expenses and equipment are based upon enrollment increases, price levels and the maintenance demands of the physical plant.

GENERAL ANALYSIS

Objectives

Chico State College is a 5-year fully accredited college with programs in teacher education, occupational and preprofessional curricula designed to meet the needs of 8 counties in the upper Sacramento Valley and in the contiguous mountain regions.

Program and Performance

Chico State College was founded as a normal school in 1889, and is the second oldest of California's state colleges. Its primary responsibility is for the training of teachers for the public school system of the State. Its effectiveness in this respect is demonstrated by the fact that 50 percent of its students are enrolled in courses with teacher training objectives.

In recent years, the college has expanded and continued to develop its program into liberal arts, occupational, and preprofessional areas. Occupying an important place in the offerings are such curricula as agriculture, nursing, business, engineering, and social work.

The Agriculture program which was supported from the State College Fund prior to 1959-60, but is now supported from the General Fund, has expanded from an original terminal 2-year program to a 4-year degree program. The Agriculture program is operating on the new farm site consisting of 644 acres.

The 1961-62 Budget estimated an enrollment of 2,970 students (FTE) in 1961-62. Recent re-estimates indicate that the 1961-62 enrollment will approximate 3,040, an increase of 70 students (FTE).

The 21.2 proposed new positions included in the budget for the 1962-63 fiscal year are based upon an enrollment of 3,100 students (FTE).

One and one-half positions are added in the business management function based upon increased workload.

A total of 9.8 new teachers is included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. Other additions within the instructional function include 2.4 technical and clerical positions which are allowed on the basis of accepted workload standards.

A total of 1.5 new positions is required for the student services area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment.

Increases in staff in other areas are based upon accepted workload standards, including 4 positions for plant operation. One new teacher is justified for the agricultural program. One new position is added to special projects—reimbursed.

The general expense in the instructional function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance for travel related to recruitment of faculty. A sum of $7,500 is budgeted to provide continual campus master planning service. All other operating expenses and equipment are based upon enrollment increases, price levels, and the maintenance demands of the physical plant.

GENERAL ANALYSIS

Objectives

Fresno State College is a 5-year, fully accredited college, with programs in the liberal arts and sciences, in applied fields and in the professions, including the teaching profession, designed to meet the needs of the 7 counties in the Southern San Joaquin Valley.

Program and Performance

Established in 1911, Fresno State College is located on sites totaling 1,428 acres northeast of the City of Fresno. At this new site the college continues to carry out its traditional functions, but in recent years has expanded its program to include several important new curricula and community services.

The 3 most important programs at Fresno State College, from the standpoint of number of students, are teacher education, business, and engineering. Approximately one-third of the total enrollment of the college can be credited to the various teacher education programs. Agriculture is fourth in order of enrollment. Other programs of significance in the total offerings of the college include biology, criminology, fine arts, home economics, humanities, industrial arts, nursing, physical education, and social science.

Fresno State College is one of two state colleges which has been authorized to conduct an off-campus resident center. It is located in Bakersfield and offers programs for resident credit in elementary teacher education only. The enrollment anticipated at the center for the 1962-63 fiscal year is estimated at 460 individual students or a total full-time equivalent of 210.

Commencing in 1961-62 the college is co-operating with the International Co-operation Agency in a special project in the Sudan to improve teacher education for elementary schools in that country. This program is fully reimbursed from federal funds.

The 1961-62 budget estimated an enrollment of 4,850 students (FTE) in 1961-62. Recent re-estimates indicate that the 1961-62 enrollment will approximate 4,940, an increase of 90 students (FTE). Where possible, increases are reflected in the current year in the 1962-63 budget for all areas that are directly related to enrollment.

The 37.6 proposed new positions included in the budget for the 1962-63 fiscal year are based upon an enrollment of 5,130 students (FTE).

A total of 7.9 new teachers is included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. Other additions within the instructional function include 1.5 new supervisory positions and 1.7 technical and clerical positions which are allowed on the basis of accepted workload standards.

One new position is added to the business management function based upon increased workload.

One new position is required for the student services area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment.

Increases in staff in other areas are based upon accepted workload standards, including 1.5 positions for the library, 4

---

[a] After deduction of expenditures for summer session, extension, and special projects—reimbursed.

[b] After deduction of reimbursements of students' fees, charges to employees, federal payments, and payments from other agencies for services rendered by the college.

GENERAL ANALYSIS—Continued

Program and Performance—Continued

positions for plant operation, and 19 positions for special projects which are fully reimbursed.

The general expense in the instructional function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance for travel related to recruitment of faculty. A sum of $7,500 is provided for continuous campus master planning. In the equipment category "farm operation," provision is made to replace tractors and other farm equipment. All other operating expenses and equipment are based upon enrollment increases, price levels, and the maintenance demands of the physical plant.

GENERAL ANALYSIS

Objectives

Humboldt State College is a 5-year full accredited college with programs in teacher education, occupational, and preprofessional curricula designed to meet the needs of the northwestern counties of the State.

Program and Performance

Humboldt State College was established in 1913 as a 2-year normal school and has experienced changes parallel to other such institutions until it was established as a state college with the duty to educate teachers and offer curriculums in liberal arts; science, engineering and mathematics.

Due to its unique geographical location, Humboldt State College offers vocational training in fisheries, game and forestry management. One-fourth of the total enrollment (FTE) of the college is enrolled in science laboratory classes. The college also has strong curriculums in fine and applied arts, business, language arts, social sciences, and physical education.

The 1961-62 Budget estimated an enrollment of 1,790 students (FTE) in 1961-62. Recent re-estimates indicate that the 1961-62 enrollment will approximate 1,750, a decrease of 40 students (FTE). Where possible, decreases are reflected in the current year in the 1962-63 Budget for all areas that are directly related to enrollment.

The 30.7 proposed new positions included in the budget for the 1962-63 fiscal year are based upon an enrollment of 1,900 students (FTE).

A total of 7.6 new teachers is included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. Other additions within the instructional function include 0.5 new supervisory position and 2.5 technical and clerical positions which are allowed on the basis of accepted workload standards. Funds are budgeted to reclassify 1 division chairman from academic year to 12 month employment.

One new position in the business management function is based upon increased workload.

A total of 3 new positions is required for the student services area which, like the instructional area, has a workload that is closely allied in fluctuations in student enrollment. All of these positions will be added to the student personnel function.

Increases in staff in other areas are based upon accepted workload standards, including 5 positions for the library, and 8.5 positions for plant operation.

A total of 2.6 positions will be added to special projects which are fully reimbursed.

The general expense in the instructional function is allowed on the basis of $29 per student (FTE). In addition, $4,800 is budgeted within this item to provide for special expenses in the fisheries and game management programs. The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance for travel related to recruitment of faculty. Seven thousand five hundred dollars is provided for continuous campus master planning. All other operating expenses and equipment are based upon enrollment increases, price levels, and the maintenance demands of the physical plant.

GENERAL ANALYSIS

Objectives

Long Beach State College is a 5-year college with programs in teacher education, occupational and preprofessional curricula designed to meet the needs of southeast Los Angeles County.

Program and Performance

Long Beach State College was established in 1949 to meet the demand for a teacher training institution in the Long Beach area. Since its establishment, Long Beach State College has grown to one of the largest of the state colleges and now offers a variety of courses, not only in teacher training, but also in occupational and preprofessional fields.

Long Beach State College has developed occupational programs in the areas of engineering, biological science, business, industrial arts, physical education, social science, and sociology.

The 1961-62 Governor's Budget estimated an enrollment of 7,570 students (FTE) in 1961-62. Recent re-estimates indicate that the 1961-62 enrollment will approximate 7,680, an increase of 110 students (FTE). Where possible, increases are reflected in the current year in the 1962-63 Budget for all areas that are directly related to enrollment.

The 75.5 proposed new positions included in the budget for the fiscal year 1962-63 are based upon an enrollment of 8,400 students (FTE).

A total of 34.4 new teachers is included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. One division chairman is proposed for instructional supervision. Also, funds are provided to reclass 2 division chairmen from academic year to 12-months employment. Other additions within the instructional function include 0.5 new super-

---

[a] Composed of savings in salaries and wages, $95,805; operating expenses, $13,130; equipment, $3,052; and a decrease in reimbursements, $29,048.

[b] Composed of savings in salaries and wages.

[c] After deduction of expenditures for summer session, extension, and reimbursed projects.

[d] After deduction of reimbursements of student fees, charges to employees, federal payments, and payments from other agencies for services rendered by the college.

Program and Performance—Continued

visory position and 7.5 technical and clerical positions which are allowed on the basis of accepted workload standards.

Three new positions in business management are based upon increased workload.

A total of 11.9 new positions is required for the student services area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. The total includes 4.3 new positions in student personnel and 5.6 new positions in health service.

Increases in staff in other areas are based upon accepted workload standards, including 7.2 positions for the library, and 7 positions for plant operation and 2 in admissions and records office.

The general expense in the instructional function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance for travel related to recruitment of faculty. Seven thousand five hundred dollars is budgeted to provide continued campus master planning. A special allowance of $12,192 is budgeted for library books. All other operating expenses and equipment are based upon enrollment increases, price levels and the maintenance demands of the physical plant.

GENERAL ANALYSIS

Objectives

The Los Angeles State College of Applied Arts and Sciences is a 5-year fully accredited multipurpose institution offering a wide variety of curriculums in liberal arts education, occupational education, and teacher education designed to meet the needs of the metropolitan Los Angeles area.

Program and Performance

Los Angeles State College has one of the largest teacher-training programs in the country and a graduate program involving almost half of its students. In addition, one of the primary functions of the college is the training of students for gainful occupations in the arts and sciences as related to business and industry. The enrollment in these areas is high, as it is in teacher and liberal arts, education.

Some of the aspects of the program of this college include its labor and industrial institutes for the training of workers in the field and a work-study program which relates practical work experience with classroom instruction.

The college offers 59 fields of concentration or major programs for the various baccalaureate degrees and 38 fields of concentration or programs for the Master of Arts or Master of Science degrees.

The 1961-62 Budget estimated an enrollment of 9,590 students (FTE) in 1961-62. Recent re-estimates indicate that the 1961-62 enrollment will approximate 9,980, an increase of 390 students (FTE). Where possible, increases are reflected in the current year in the 1962-63 Budget for all areas that are directly related to enrollment.

The 182.9 proposed new positions included in the budget for the 1962-63 fiscal year are based upon an enrollment of 11,280 students (FTE).

A total of 93.8 new teachers is included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. Other additions within the instructional function include 2.5 new supervisory positions and 20.7 technical and clerical positions which are allowed on the basis of accepted workload standards. Two and two-tenths positions are included for the instructional television program. These positions were established in the current fiscal year.

Six new positions in the business management function are based upon increased workload.

A total of 14.9 new positions is required for the student services area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. The total includes 8.9 new positions in student services of which 4 positions are in the admissions and records area and 6 new positions in health service.

Increases in staff in other areas are based upon accepted workload standards, including 9 positions for the library, and 33.8 positions for plant operation.

The general expense in the instructional function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance for travel related to recruitment of faculty. A special allowance of $92,710 is allowed for library books. Seven thousand five hundred dollars is included for continuous master planning. All other operating expenses and equipment are based upon enrollment increases, price levels, and the maintenance demands of the physical plant.

GENERAL ANALYSIS

Objectives

Orange County State College is an upper division institution offering programs in business administration, education, social sciences, fine arts, speech and drama, science, and the humanities. The college serves a primary enrollment area consisting of portions of Orange, Riverside, and Los Angeles Counties.

Program and Performance

Established by Chapter 1681, Statutes of 1957, Orange County State College offered classes for the first time in temporary facilities on their permanent campus site in the fall of 1959. The initial instruction program was confined to elementary teacher education. In the 1960 and 1961 academic years the

---

[a] Composed of savings in salaries and wages, $166,589; operating expenses, $73,866; equipment, $13,208; and an increase in reimbursements, $52,542.

[b] After deduction of expenditures for summer session, extension and special projects—reimbursed.

[c] After deduction of reimbursements of student fees, charges to employees, federal payments, and payments from other agencies for services rendered by the college.

GENERAL ANALYSIS—Continued

Program and Performance—Continued

offerings were expanded to include secondary education, business administration, business education, music, biological science, mathematics, social science, and language arts. This budget provides for increased student enrollment in these instructional areas.

The 1961-62 Budget estimated an enrollment of 1,120 students (FTE) in 1961-62. Recent re-estimates indicate that the 1961-62 enrollment will approximate 960, a decrease of 160 students (FTE).

The 31 proposed new positions included in the budget for the 1962-63 fiscal year are based upon an enrollment of 1,340 students (FTE).

A total of 14.5 new teachers is included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings.

Other additions within the instructional function include 1 new supervisory position and 3.1 technical and clerical positions which are allowed on the basis of accepted workload standards. Funds are provided to reclassify 1 division chairman from academic year to 12-month employment.

Three and five-tenths new positions in business managemer are based upon increased workload.

A total of 3.2 new positions is required for the studer personnel area which, like the instructional area, has a workloa that is closely allied to fluctuations in student enrollment. Or of these positions is in the admissions and records office.

Increases in staff in other areas are based upon accepte workload standards, including 1.5 positions for the librar 3 positions for plant operation, and 1.2 positions for reimburse programs.

The general expense in the instructional function is allowe on the basis of $29 per student (FTE). The allowance fc out-of-state traveling is budgeted on the basis of $10 per facult and professional position plus an allowance for travel relate to recruitment of faculty. A special allowance of $73,200 allowed for library books. Seven thousand five hundred dollar is budgeted to provide continual campus master planning. A other operating expenses and equipment are based upon enrol ment increases, price levels, and the maintenance demands the physical plant.

GENERAL ANALYSIS

Objectives

Sacramento State College is a 5-year college with programs in teacher education, liberal arts, occupational, and preprofessional curricula designed to meet the needs of the 13 counties in the South Sacramento Valley and central mountain regions of California.

Program and Performance

Sacramento State College was established in 1947 and has as one of its primary responsibilities the providing of teacher training. The college also offers a considerable variety of liberal arts, preprofessional and occupational curriculums. Sacramento State College also offers the master of arts degree in a variety of liberal arts and professional education fields as well as the master of science degree in business and public administration.

The 1961-62 Budget estimated an enrollment of 4,350 students (FTE) in 1961-62. Recent re-estimates indicate that the 1961-62 enrollment will approximate 4,220, a decrease of 130 students (FTE). Where possible, decreases are reflected in the current year in the 1962-63 Budget for all areas that are directly related to enrollment.

The 32.6 proposed new positions included in the budget for the 1962-63 fiscal year are based upon an enrollment of 4,420 students (FTE).

A total of 19.1 new teachers is included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. Special factors which affect the need for staff at Sacramento State College are:

1. Growth and development in the teaching of foreign languages.
2. Implementation of the fourth year of the programs in electrical and mechanical engineering.
3. Increase in the number of graduate students taking special study and theses at the end of their graduate programs.

Other additions within the instructional function include 4.1 technical and clerical positions which are allowed on the basis of accepted workload standards.

A total of 2.1 new positions is required for the student services area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. The total includes 1.6 new positions in student personnel and 0.5 new position in health service.

Increases in staff in other areas are based upon accepted workload standards, including 1 position in business management, 2.5 positions in library and 3.8 positions for plant operation.

The general expense in the instructional function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance for travel related to recruitment of faculty. A special allowance of $31,750 is allowed for library books. Seven thousand five hundred dollars is budgeted to provide continual campus master planning service. All other operating expenses and equipment are based upon enrollment increases, price levels, and the maintenance demands of the physical plant.

GENERAL ANALYSIS

Objectives

San Bernardino-Riverside State College is scheduled to become a fully accredited 5-year state college with programs designed to meet the needs of the area which it will serve.

Program and Performance

San Bernardino-Riverside State College was established by Chapter 64, Statutes of 1960, First Extraordinary Session. This budget provides for the appointment of staff early in 1962.

A total of 8 proposed new positions is included in the 1962-63 budget to continue the planning necessary to organize the instruction program and prepare for the opening of the college. These positions include 3 twelve-month division chairman, 1 college librarian, and 4 clerical positions.

Three thousand six hundred dollars is budgeted to provide continual campus master planning service effective January 1, 1963. A permanent site will be selected somewhere in San Bernardino County.

GENERAL ANALYSIS

Objectives

San Diego State College is a 5-year fully accredited college with programs in teacher education, occupational, and preprofessional curricula designed to meet the needs of the southern counties of the State.

Program and Performance

San Diego State College, first established in 1897, has a long history of providing teachers for the public schools of the State of California. More recently it has met the needs of the southern counties for people trained in various occupational programs.

Other than teacher training, the important offerings at San Diego State College include accounting, business administration, engineering, liberal arts, physics, psychology, and social science.

The 1961-62 Budget estimated an enrollment of 8,880 students (FTE) in 1961-62. Recent re-estimates indicate that the 1961-62 enrollment will approximate 9,200, an increase of 320 students (FTE). Where possible, increases are reflected in the current year in the 1962-63 Budget for all areas that are directly related to enrollment.

The 154.3 proposed new positions included in the budget for the 1962-63 fiscal year are based upon an enrollment of 10,180 students (FTE).

A total of 87 new teachers is included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. Special factors which affect staff needs at San Diego State College are:

1. The need to adjust for an unexpected enrollment increase in the 1961-62 school year.
2. The growth and development of graduate work, particularly in the science areas.
3. Facility limitations on large lecture rooms and certain types of laboratories.

Other additions within the instructional function include 4 new supervisory positions and 19.1 technical and clerical positions which are allowed on the basis of accepted workload standards. To reflect the full year workload 2 division chairmen are reclassified to 12 month positions.

Six and one-half new positions are added in the business management function based upon increased workload.

A total of 12.8 new positions is required for the student services area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. The total includes 9.5 new positions in student personnel of which 3 positions are in the admissions and records area and 3.3 new positions in health service.

Increases in staff in other areas are based upon accepted workload standards, including 6 positions for the library, 15.9 positions for plant operation, and 3 positions for special projects which are fully reimbursed.

The general expense in the instructional function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional positions plus an allowance for travel related to recruitment of faculty. A special allowance of $31,750 is made for library books; $7,500 is budgeted to provide continuous campus master planning. All other operating expenses and equipment are based upon enrollment increases, price levels, and the maintenance demands of the physical plant.

GENERAL ANALYSIS

Objectives

San Fernando Valley State College is a 5-year institution offering programs in teacher training, the liberal arts, science, and engineering as well as occupational and preprofessional curricula designed to meet the needs of the San Fernando Valley portion of Los Angeles County and southern portions of Ventura and Kern Counties.

Program and Performance

San Fernando Valley State College began operation as a separate state college July 1, 1958. Prior to this date the institution conducted classes on its present site as the San Fernando Valley Campus of Los Angeles State College.

San Fernando Valley State College is continuing to experience extremely rapid growth. Full-time equivalent enrollment in 1962-63 will rise from 4,990 to 6,130 students (FTE).

The 1961-62 budget estimated an enrollment of 4,950 students (FTE) in 1961-62. Recent re-estimates indicate that the 1961-62 enrollment will approximate 4,990, an increase of 40 students (FTE).

The 110.5 proposed new positions included in the budget for the 1962-63 fiscal year are based upon an enrollment of 6,130 students (FTE).

A vice president and clerical position are included based on accepted management principles for the magnitude of responsibilities of this rapidly growing college.

A total of 65.5 new teachers is included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. Other additions within the instructional function include 1 new supervisory position and 13.4 technical and clerical positions which are allowed on the basis of accepted workload standards.

Three new positions in the administration and business management functions are based upon increased workload.

A total of 15.6 new positions is required for the student services area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. The total includes 10.3 new positions in student personnel including 3 positions in admissions and records and 5.3 new positions in health service.

Increases in staff in other areas are based upon accepted workload standards, including 3 positions for the library, and 6 positions for plant operations. One new position is added to summer sessions based on increased workload.

The general expense in the instructional function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance for travel related to recruitment of faculty. A special allowance of $85,090 is made for library books. Seven thousand five hundred dollars is included to provide continuous campus master planning. All other operating expenses and equipment are based upon enrollment increases, price levels, and the maintenance demands of the physical plant.

---

[a] Composed of savings in salaries and wages, $75,954; operating expense, $56,216; equipment, $16,054; and a decrease in reimbursements, $4,463.

[b] Composed of savings in salaries and wages.

[c] After deduction of expenditures for summer session, extension, and special projects—reimbursed.

[d] After deduction of reimbursements of student fees, charges to employees, federal payments, and payments from other agencies for services rendered by the college.

GENERAL ANALYSIS

Objectives

San Francisco State College is a 5-year fully accredited college with programs in teacher education, in occupational and preprofessional curricula, and in the liberal arts fields designed to meet the needs of the counties in the San Francisco Bay and Peninsula area.

Program and Performance

San Francisco State College, originally established in 1899 as the San Francisco Normal School, has been operating on its present Lake Merced Campus since 1954. This college, like the

---

[a] Composed of savings in salaries and wages, $57,685; operating expenses, $681; equipment, $813; and a decrease in reimbursements, $12,715.

[b] After deducting expenditures for summer session, extension, and special projects—reimbursed.

[c] After deduction of reimbursements of students' fees, charges to employees, federal payments, and payments from other agencies for services rendered by the college.

State Colleges

SAN FRANCISCO STATE COLLEGE—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS—Continued

Program and Performance—Continued

majority of the state colleges, has 3 principal responsibilities. The first is the providing of teacher training; the second is the offering of preprofessional and occupational programs; and the third is the offering of general liberal arts program.

The college has developed outstanding programs in the creative arts (art, drama, music, and radio-television); in business (including world business and international development); in English and Humanities (including a nationally known program in creative writing); in psychology; in science (biological science, chemistry, engineering, mathematics, and physical science); in social science (with a nationally known program in international relations); and in teacher education (with programs leading to the kindergarten primary, general elementary, general and special secondary, and junior college teaching credentials; to the pupil personnel services credentials; and to the school supervision and administration credentials).

The 1961-62 Budget estimated an enrollment of 9,000 students (FTE) in 1961-62. Recent re-estimates indicate that the 1961-62 enrollment will approximate 9,440, an increase of 440 students (FTE). Where possible, increases are reflected in the current year in the 1962-63 Budget for all areas that are directly related to enrollment.

The 118.4 proposed new positions included in the budget for the 1962-63 fiscal year are based upon an enrollment of 10,200 students (FTE).

A total of 77.1 new teachers is included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricul offerings. Other additions within the instructional function i clude 2.5 new supervisory positions and 18.4 technical a clerical positions which are allowed on the basis of accept workload standards.

Two new positions in the business management function based upon increased workload.

A total of 8.2 new positions is required for the student ser ices area which, like the instructional area, has a workload th is closely allied to fluctuations in student enrollment. The tot includes 4.8 new positions in student personnel of which 3 pos tions are in the admissions and records area, and 3.4 ne positions in health service.

Increases in staff in other areas are based upon accept workload standards, including 6.2 positions for the library a 4 positions for plant operation.

The general expense in the instructional function is allow on the basis of $29 per student (FTE). The allowance for ou of-state traveling is budgeted on the basis of $10 per faculty a professional position plus an allowance for travel related recruitment of faculty. Seven thousand five hundred dollars allowed for instructional television expense and $7,500 f campus master planning. A special allowance of $54,610 is ma for library books; all other operating expenses and equipme are based upon enrollment increases, price levels, and the mai tenance demands of the physical plant.

GENERAL ANALYSIS

Objectives

San Jose State College is a 5-year fully accredited college with programs in teacher education, occupational, and preprofessional curricula designed to meet the needs of Monterey, San Benito, Santa Cruz, Santa Clara, and San Mateo Counties.

Program and Performance

San Jose State College, the largest of the state colleges, is also the oldest. Established in 1857, it was the first institution for higher education established by the State.

The 1961-62 budget estimated an enrollment of 12,150 students (FTE) in 1961-62. Recent re-estimates indicate that the 1961-62 enrollment will approximate 12,780, an increase of 630 students (FTE). Where possible, increases are reflected in the current year in the 1962-63 budget for all areas that are directly related to enrollment.

The 154 proposed new positions included in the budget for the 1962-63 fiscal year are based upon an enrollment of 14,000 students (FTE).

A total of 69.4 new teachers is included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. One new division chairman is included for instructional administration. Also, funds are budgeted to reclassify 3 division chairmen from academic year to 12-months employment in recognition of workload requirements. Other additions within the instructional function include 15 technica and clerical positions which are allowed on the basis of accepted workload standards. Six and two-tenths positions are included as proposed new positions which are currently employe under a special reimbursed project.

Three and five-tenths new positions in the business management function are based upon increased workload.

A total of 18.4 new positions is required for the studen services area which, like the instructional area, has a workloa that is closely allied to fluctuations in student enrollment. Th total includes 12.6 new positions in student personnel of whic 3.0 are in the admissions and records office and 5.8 new positions in health service.

Increases in staff in other areas are based upon accepte workload standards, including 13 positions for the library, an 27.5 positions for plant operation.

The general expense in the instructional function is allowe on the basis of $29 per student (FTE). The allowance for out of-state traveling is budgeted on the basis of $10 per facult and professional position plus an allowance for travel relate to recruitment of faculty. A special allowance of $54,610 i allowed for library books. Provision is made for continuous campus master planning. All other operating expenses and equipment are based upon enrollment increases, price levels, and th maintenance demands of the physical plant.

GENERAL ANALYSIS

Objectives

Sonoma State College, established by Chapter 66, Statutes of 1960, First Extraordinary Session, offers educational programs to serve Marin, Napa, and Sonoma Counties, with some services to Lake, Mendocino, and Solano Counties.

Program and Performance

Sonoma State College opened in the fall of 1961 in rented quarters in Cotati, about 2 miles from the site for the permanent campus. When the first phase of permanent construction has been completed, operations will be transferred to the permanent campus.

---

[a] A program fully reimbursed from student fees.

[b] Composed of savings in salaries and wages, $226,318; operating expense, $54,748; equipment, $8,142; and increase in reimbursements of $7,620.

[c] After deduction of expenditures for Summer Session and Extension.

[d] After deductions of reimbursements of student fees.

SONOMA STATE COLLEGE—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS—Continued

Program and Performance—Continued

In accordance with the decision of the Trustees of the California State Colleges on March 3, 1961, the program of Sonoma State College for 1961-62, its first year of operation, was essentially that previously offered by San Francisco State College at its Santa Rosa off-campus center. This involved upper division courses in education and related fields necessary for the preparation of elementary school teachers. The trustees further directed that freshmen be admitted in 1962-63. The college is planning on 150 FTE freshman students. Programs available to these entering freshmen will need to include both general education courses and introductory courses for the initial complement of liberal arts majors.

The 30.9 new positions for 1962-63 are proposed on the basis of an estimated enrollment of 300 full-time equivalent students, divided between the continuing teacher education program and the new program for freshman students.

Ten and one-tenth new teachers are proposed, based on the application of the faculty staffing formulas. Related staffing includes a 0.5 professional position for the building program and 2.2 clerical-technical positions in the instruction function.

In order to attain a basic inventory of library books, a special allowance of $60,120 has been budgeted, continuing the policy begun in the 1961-62 Budget. The staffing necessary to meet this workload and to staff the public service points amoun to an additional 3 professional and 6.5 clerical-student assista positions.

Initial staffing of the counseling and testing program is pr vided by 1 professional and 1 clerical position. The stude health program is similarly recognized by 0.6 part-time physicia and nursing help and a 0.5 clerk.

Workload increases in business management necessitate th addition of 2.5 technical and clerical positions and 3 positio in plant operation. The latter need arises primarily from change in the lease of space and to transfer the custodial r sponsibility to the college. The area leased also increases fro 16,800 to 28,000 square feet in order to accommodate the large enrollment. Additional staffing is provided for the summer se sion and extension programs based on increased enrollment.

New or significant operating expense increases include $1,00 for special lecture service and $3,000 for leasing IBM equi ment and tabulating machine services for the student record program. Both items are in line with the pattern at all othe state colleges. Seven thousand five hundred dollars is budgete to provide continual campus master planning service. New plan operation expenses are provided for utility and custodial re quirements.

GENERAL ANALYSIS

Objectives

South Bay State College is scheduled to become a fully accredited 5-year state college with programs designed to meet the needs of the area which it will serve.

Program and Performance

South Bay State College was established by Chapter 64, Statutes of 1960, First Extraordinary Session. This budget provides for the appointment of staff early in 1962.

A total of 8 proposed new positions is included in the 1962-63 budget to continue the planning necessary to organize the instruction program and prepare for the opening of the college. These positions include 3 twelve-month division chairman, 1 college librarian, and 4 clerical positions.

Three thousand six hundred dollars is budgeted to provide campus master planning service effective January 1, 1963. A permanent site will be selected somewhere in the South Bay area of Los Angeles County.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS

Objectives

Stanislaus State College, established by Chapter 2172, Statutes of 1959, offers general upper division education programs designed to meet the needs of a primary enrollment area composed of the counties of Stanislaus, San Joaquin, Merced, Calaveras, Tuolumne, and Mariposa.

Program and Performance

The 1961-62 budget estimated an enrollment of 500 students (FTE) in 1961-62. Recent re-estimates indicate that the 1961-62 enrollment will approximate 310 students (FTE), a decrease of 190 students (FTE) from the 500 students (FTE) originally budgeted. Where possible, reduced costs are reflected in the current year in the 1962-63 budget for all areas that are directly related to enrollment.

The 12.5 proposed new positions included in the budget for the 1962-63 fiscal year are based on an enrollment of 400 students (FTE).

One new position is added to the business management function based on workload.

A total of 5.7 new teachers is included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. The college is now offering degrees in the following areas: Elementary Education—BA, Business Education—BA, Business Administration—BA, Art—BA, Music—BA, Humanities—BA, Mathematics—BA, Science—BA, and Social Science—BA.

Four new positions are required for the student services area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. New positions are added in the following functions: 3 positions in student personnel and 1 position in health services.

One and eight-tenths positions are added to the library staff based upon accepted workload standards.

The general expense in the instruction function is allowed on the basis of $29 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance for travel related to recruitment of faculty. A special allowance of $60,000 is made for library books. A sum of $7,500 is provided for continuous campus master planning. All other operating expenses and equipment are based upon enrollment, price levels, and the maintenance demands of the physical plant.

GENERAL ANALYSIS

Objectives

California State Polytechnic College is a 4-year college with programs in agriculture, engineering, arts and sciences, and business. Because of the unique programs offered by the college, the objectives are different from the other state colleges. It fulfills a statewide responsibility and draws students to its 2 campuses from all counties of the State.

Program and Performance

The combined undergraduate enrollment in agriculture at the 2 campuses of California State Polytechnic College is the second largest in the United States. The college ranks second in the 11 western states in undergraduate engineering enrollment. Agriculture, engineering, arts and sciences, and business programs are designed to meet the needs of the entire State and emphasize the learn-by-doing approach. The Kellogg-Voorhis campus has similar programs. Throughout its occupational curriculum, the college uses the "upside-down" approach by which the st dent begins work in his major department in his freshman ye and is given instruction in the practical phase of his field specialization during the first 2 years of his program. Sta Polytechnic also provides nondegree technical programs at i San Luis Obispo campus in all agricultural fields. Women st dents were admitted for the first time at the Kellogg-Voorh campus in the fall semester of 1961.

The performance of the college with regard to the producti of degrees and credentials in the various areas of specializati is shown below:

Degrees Granted:	1958-59	1959-60	1960-
Agriculture	256	233	22
Engineering	405	347	40
Arts and Sciences	234	256	31

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS—Continued

Program and Performance—Continued

The 1961-62 Budget estimated an enrollment of 8,240 students (FTE) in 1961-62 including San Luis Obispo and Kellogg-Voorhis campuses. Recent re-estimates indicate that the 1961-62 enrollment will approximate 7,770, a decrease of 470 students (FTE). Where possible, decreases are reflected in the current year in the 1962-63 Budget for all areas that are directly related to enrollment.

The 59 proposed new positions included in the budget for the 1962-63 fiscal year at the San Luis Obispo campus are based upon an enrollment of 5,460 students (FTE) including 260 FTE in the State-supported summer quarter.

A total of 15.2 new teachers is included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. Other additions within the instructional function include 3.3 technical and clerical positions which are allowed on the basis of accepted workload standards.

One new position in business management is based upon increased workload.

A total of 9.9 new positions is required for the student personnel area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. The total includes 6 new positions in counseling and testing, 1 position for admissions and records, and 3.9 new positions in health service.

Increases in staff in other areas are based upon accepted workload standards, including 8.5 positions for the library, and 21.1 positions for plant operation.

The 34.4 proposed new positions included in the budget for the 1962-63 fiscal year at the Kellogg-Voorhis campus are based upon an enrollment of 3,170 students (FTE).

A total of 12.6 new teachers is included in the budget based upon the faculty staffing formula which takes into account changes in program emphasis as well as expansion of curricular offerings. Five teaching positions are included for a new summer quarter on the Kellogg Campus. It will be a full 11 weeks quarter. An enrollment of 70 FTE (3,150 student credit hours) is anticipated. Other additions within the instructional function include 1 new supervisory position and 3.2 technical and clerical positions which are allowed on the basis of accepted workload standards.

Two new positions in business management are based upon increased workload.

A total of 2.3 new positions is required for the student personnel area which, like the instructional area, has a workload that is closely allied to fluctuations in student enrollment. The total includes 0.5 new position in counseling and testing, 1 in admissions and records, and 0.8 new position in health service.

Increases in staff in other areas are based upon accepted workload standards, including 2 positions for the library and 6.3 positions for plant operation.

The general expense in the instructional function at San Luis Obispo and Kellogg-Voorhis is allowed on the basis of $34 per student (FTE). The allowance for out-of-state traveling is budgeted on the basis of $10 per faculty and professional position plus an allowance for travel related to recruitment of faculty. A special allowance of $15,700 is allowed for library books at Kellogg-Voorhis campus. Fifteen thousand dollars is budgeted to provide for continuous master planning at both the San Luis Obispo and Kellogg-Voorhis campuses. All other operating expenses and equipment are based upon enrollment increases, price levels, and the maintenance demands of the physical plant.

GENERAL ANALYSIS

Objectives

The Maritime Academy trains qualified young men to become licensed officers in the Merchant Marine. The course is 3 years in duration and leads to the Bachelor of Science degree with a specialization in the skills related to either the deck or engineering fields.

Program and Performance

The 3-year training program during which the student attends school 11 months of each year, is culminated by the United States Coast Guard examination for a license as either third mate or third assistant engineer. The student must pass the license examination before he can receive a degree.

The program at the academy is supplemented by a training cruise each year of 3 months' duration aboard the Golden Bear, a merchant-type ship loaned to California by the Federal Maritime Administration. An accepted schedule of cruises has been developed on a 3-year cycle. This cycle includes a cruise to the west coast of South America, one to the mid-Pacific Ocean area, and one through the Panama Canal into the Caribbean area.

These cruises provide training in celestial navigation, in both the northern and southern hemispheres, piloting, and midocean ship operation. The 1962-63 budget provides funds for a cruise through the Panama Canal and along the east coast of South America below the Equator.

The Maritime Academy Act of 1958 revised the method by which federal grants and subsidies are made to the various state-supported maritime academies. The new law permits an outright grant of $25,000 to academies operating in accordance with prescribed standards and an additional payment of $50,000 for academies that accept out-of-state students. The aid also provides for payments of $600 per student per academic year to assist in defraying the cost of uniforms, books, and subsistence for each student. Of the total of $600 the state receives $400 and the remaining $200 goes to each midshipman.

In addition to providing the ship for the training cruise, the Federal Government also provides for the annual drydocking, overhaul, and major repair of the California Maritime Academy ship at an estimated cost of $50,000. This amount, however, is not reflected in the budget.

GENERAL ANALYSIS

Objectives

The State Scholarship Commission, consisting of 9 members appointed by the Governor, administers a statewide program of competitive scholarships enabling a group of academically able students to attend the college of their choice. These students, because of financial considerations, would not have the freedom of college choice without the scholarship program. The program has encouraged independent institutions to expand enrollment facilities and absorb a large proportion of the student's educational cost without a burden on the taxpayers for capital investment in instructional facilities and operating costs.

Program and Performance

Under provisions enacted by the Legislature in 1960, the number of authorized scholarships for 1962-63 academic year is increased from 3,200 to 3,840. Six hundred forty additional scholarships will be added in the 2 subsequent years until a maximum of 5,120 is reached. Scholarship grants vary from $300 to $900 in $100 amounts but in no case in excess of tuition and fees. Students who win state scholarships but elect to attend a junior college will have their scholarships held in trust for them by the commission as Junior College Reserve Scholarships.

The awards are made on the basis of scholastic ability, academic potential, and the need for financial assistance to enable a student to attend the college of his choice. Academic aptitude is measured by means of the Scholastic Aptitude Test of the College Entrance Examination Board. Academic achievement is measured by a minimum performance in high school, and need for financial assistance is determined by a widely used need-evaluation system and by the judgment of college admissions and scholarship directors employed by the commission on a temporary basis.

It is estimated that there will be 19,000 applications received in the spring of 1963. This would be compared with the 17,000 received in the spring of 1962. Because of the increased number of applications and scholarships, 1 clerical position and related operating expenses are necessary on a workload basis.

Because of increasing college costs, it is estimated that the average award will approximate $600 per scholarship for a total of $2,304,000.

The State Agricultural Scholarship Program now in its third year has 300 scholarships authorized by law. It is anticipated that no more than 100 of these awards will be utilized in the 1962-63 academic year. Funds for 100 at an average of $125 are included in the budget.

GENERAL ANALYSIS

Objectives

The board, consisting of the Director of Finance, the State Controller, and 1 other member appointed by the Governor, makes rules and regulations governing the presentation and auditing of claims, allowances for traveling on official business, and the issuance of merit awards. Other functions include considering, auditing, and recommending to the Legislature claims against the State for which no appropriation has been made, and hearing appeals in accordance with the purchasing procedure under the provisions of Section 13391 of the Government Code.

Program and Performance

Each year the board considers approximately 800 claims arising because no appropriation is available or because the settlement of the claims was not otherwise provided for by law. Claims approved by the board are, with the sanction of the Governor, referred to the next session of the Legislature with a recommendation that an appropriation be made in payment thereof. The board subsequently pays all claims for which funds have been provided and the Governor has approved. The board meets semimonthly to conduct business, consider appeals, establish rules and regulations concerning state travel and per diem expenses, and hear claims.

GENERAL ANALYSIS

Objectives

The State Controller is the accounting and disbursing officer of the State. As the State's fiscal officer he maintains the accounts of all funds and appropriations, which involves determination of the legality of all receipts of moneys by the State and all payments withdrawing moneys from the Treasury; makes various apportionments of state revenues; administers the state payroll system, including the United States Savings Bond program; accounts agency trust moneys in the custody of the Treasurer; supervises the administration of state inheritance and gift taxes; collects motor vehicle fuel license tax, motor vehicle transportation license taxes, petroleum and gas assessments, and insurance premiums tax; administers the tax refunds to nonhighway users of motor vehicle fuel; collects state and county sales and use taxes on fuel not used on a public highway; administers laws concerning county budget procedures; reports state, county, city, district, and street and highway financial transactions; prescribes the scope and content of the annual audit made of all California special districts; supervises the general procedures concerning delinquent property taxes and administers property tax-deeded to the State; and, field audits expenditures by local governments for programs involving state subventions.

Program and Performance

The State Controller serves on 18 boards and commissions. Staff service is supplied by his Administration Division in respect to these duties.

In addition to the Administration Division, there are 7 other major divisions which assist the State Controller in carrying out his duties and responsibilities. Activities currently of special interest are as follows:

1. The Division of Accounting, among its various duties, administers the unclaimed property program which was revised by the Legislature in 1959 from an escheat law encompassing a small group of organizations to a custodial law affecting many types of organizations. As a result, procedures have been made operative which are economical and yet satisfy the especially high degree of custodial care and accountability which is essential in this program. During 1960-61, procedures for the reporting of unclaimed contents of safe deposit boxes were developed. During 1961-62, the contents of approximately 40,000 safety deposit boxes will be inventoried, investigated, and either destroyed or deposited in the State Treasury. Contents of 10,000 more safe deposit boxes will be processed in 1962-63 if revenues received in 1961-62 warrant continuing the program.
   A total of $1,526,845 was received during the 1959-60 fiscal year from various sources. In 1960-61, a total of $1,152,832 was paid to the State as abandoned property under the Uniform Disposition of Unclaimed Property Act. An additional $640,817 was deposited in the Special Deposit Fund, Abandoned Property Suspense Account, in 1959-60 pending litigation, and in 1960-61 another $324,948 was placed in that account for the same reason. In addition, approximately $1,300,000 has been withheld from payment to the State Controller pending litigation. It is estimated that $1,300,000 will be received by the State Controller under the Uniform Act in 1961-62 and $675,000 will be received in 1962-63. All cash and proceeds received under the Uniform Act are deposited in the Unclaimed Property Fund and all money in excess of $50,000, retained to cover claims, is transferred to the General Fund.
2. The Disbursements Division employs electronic computers to make all disbursements and issue the State's pay roll warrants. The division also performs electronic data processing services for the State Controller's other divisions and certain other State agencies such as the State Employees' Retirement System and Franchise Tax Board. The electronic data processing system was installed in 1960-61, and was expanded in 1961-62 due to extensive new program workloads (Medical Care Act and integration of coverage of State employees under the Old Age and Survivors Disability Insurance Act and the State Employees' Retirement System). While some unforeseeable problems beyond the control of the division have been encountered in installing the new system, the problems have not altered the probability of accomplishing the anticipated savings of approximately $350,000 annually. The new system will provide improved performance and ability to bear increased workloads at lower unit costs.
3. The Inheritance and Gift Tax Division in 1961-62 instituted a test of an audit program to enforce the reporting of taxable gifts and the collection of gift tax revenues. The existing gift tax auditors and other staff process and audit gift tax returns filed as a result of this program. If this test program produces sufficient revenues to warrant its continuation, the program will be continued.
   A research project was initiated in the 1961-62 fiscal year to analyze the incidence of the inheritance and gift taxes, develop information about tax avoidance features of the present law and provide statistics for evaluation of legislative proposals concerning inheritance and gift tax law modifications. The cost of the project has been modest in view of the potential advantages to be derived from it.

The total support for the Office of State Controller is financed from 4 funds, namely: (1) General Fund, (2) Motor Vehicle Fuel Fund, (3) Motor Vehicle Transportation Tax Fund, and (4) State School Building Aid Fund.

---

[a] Fund abolished effective June 30, 1961, in accordance with the provisions of Chapter 881, Statutes of 1961.

[b] Bond fund, not included in budget totals.

STATE CONTROLLER—Continued

ADMINISTRATION DIVISION

Objectives

This division provides general administration of the State Controller's office and staff assistance to the State Controller pertaining to his responsibilities as a member on boards and commissions. It also performs the auxiliary services for the entire State Controller's office.

Program and Performance

The State Controller's general administrative staff is responsible for the general administration of 7 divisions; for legal, research, personnel, accounting, and miscellaneous auxiliary services. The workload of this division is expected to continue at the present level through the budget year.

ACCOUNTING DIVISION

Objectives

The principal functions of the Accounting Division are to maintain the control accounts covering the receipts, disbursements, and balances of all state funds; to audit and to designate the fund for all deposits into the State Treasury; to prepare the various financial statements and reports covering the State's financial condition and operations; to administer the Judges' Retirement System; to make various apportionments of revenues to local government; to administer the Uniform Disposition of Unclaimed Property Act and various laws relating to unclaimed money or other property in estates of deceased persons.

Program and Performance

In addition to the administrative staff, the Accounting Division comprises the following organization units: Bureau of Control Accounts, Bureau of Financial Analysis, and Bureau of Unclaimed Property.

The Bureau of Control Accounts maintains the control accounts covering all funds in the State Treasury. In these accounts are recorded all transactions covering approximately 150 funds. It is also the responsibility of this bureau to audit all remittance advices covering deposits into the State Treasury to determine the legality of the receipt of the money and its proper disposition. The bureau maintains accounts for all funds of state agencies which are deposited in trust with the State Treasurer. It superintends the collection of the State's share of fines and forfeitures levied by judges under various state laws and maintains both control and detailed subsidiary investment accounts covering the bond investments made from various state funds and from Treasury Pooled Money, as well as accounts covering the various interest-bearing bank deposits. An additional accounting position is proposed in the budget year to meet increased workload related to the preparation of accounting instruments in fund accounting and accountability control.

The Bureau of Financial Analysis has a major responsibility to prepare the annual report of the State Controller. It also prepares the preliminary annual report; the month-end statement setting forth the revenues derived from all major taxes; the receipts and expenditures of the General Fund, reserve funds, and school construction funds; and several other periodic reports on special topics. The bureau compiles data and makes computations for the apportionment to local agencies of various revenues, such as highway users taxes, motor vehicle

STATE CONTROLLER—Continued

ACCOUNTING DIVISION—Continued

Program and Performance—Continued

license fees ("in-lieu" tax), and moneys received from the Federal Government. It compiles estimates of future cash receipts and expenditures for use of the Pooled Money Investment Board in planning amounts available for investment under the Pooled Money Investment Program. In addition to the above functions, the bureau administers the Judges' Retirement System.

The Bureau of Unclaimed Property administers the State Controller's responsibilities relating to unclaimed money on property received from abandoned property and unclaimed estates of deceased persons under the provisions of the Uniform Disposition of Unclaimed Property Act, and related statutes. Recent changes in the law will involve the screening of unclaimed safe deposit boxes and safekeeping items reported to the State Controller by various banks in the State. It is estimated that in 1961-62, 23 additional man-years of temporary help will be needed and in 1962-63, 7 man-years will be needed. However, rather than provide funds for the entire program, 11.5 positions in temporary help are included in 1961-62 to determine if the revenues realized are sufficient to warrant the continued screening of all safe deposit boxes.

AUDITS DIVISION

Objectives

The Audits Division administers the State Controller's responsibility of assuring that public money is expended for the purposes for which appropriated. The Constitution and statutes require the State Controller to determine the legality and validity of all payments from the State Treasury.

The division passes upon the legality and propriety of state expenditures before disbursement from the treasury. Under various statutes which establish subvention programs for assistance to local jurisdictions by the State and by the Federal Government through the State, funds are advanced to such local agencies by the State Controller. Claims presented often contain only information necessary to authorize an advance. The division makes post audits of the accounts of local agencies in order to determine that accountability has been established for the funds advanced and that expenditures were legal and proper.

Program and Performance

Bureau of Claim Audits:

During the 1962-63 fiscal year this bureau will audit 2,261,000 claims and will audit 32,680 contracts and contract changes and will verify 201,000 contract claims. During the 6-year period from 1957-58 through 1962-63 the bureau will have raised the average number of claims audited annually per auditor position from 96,283 to 141,308. This is an increase of 45,025 claims per auditor per year or 47 percent.

For the 1961-62 fiscal year and the budget year 1962-63, considering the newly established colleges, the expanding water program, and additional activities as the result of 1961 legislation, a 5 percent increase in claims audited for each year is anticipated.

Bureau of Field Audits:

During the 1962-63 fiscal year, there will be only minor offsetting changes in the programs subject to field audit by the bureau. Accordingly, the staff of the bureau will remain constant. Two governmental auditor positions which were temporarily authorized on a reimbursed basis from the California Disaster Office to audit the federal civil defense program of administrative and personnel assistance to local government, are proposed in the 1962-63 fiscal year.

---

[a] Includes 11.5 man-years in 1961-62 to process abandoned safe deposit box contents under the Unclaimed Property Act.

DISBURSEMENTS DIVISION

Objectives

This division issues the Controller's warrants drawn on the State Treasury and maintains the records of outstanding warrants; administers the Uniform State Payroll System including the United States Savings Bond deduction program; and provides electronic data processing service for the gas tax refund program, the unclaimed property program, and maintenance of the State's central control accounts and the treasury trust accounts.

Program and Performance

The total workload of the division for the 1962-63 fiscal year will exceed that of previous years by substantial volumes. The number of payroll transactions originally estimated for the 1961-62 fiscal year has been revised upward approximately 150,000 as a result of legislation providing for state payment of part of the cost of health insurance premiums for state employees under the Medical Care Act. As this will be a one-time workload in the 1961-62 fiscal year, we anticipate a slight reduction in total transactions to be processed during the 1962-63 fiscal year. Also, the division has experienced a significant increase in planning and operational workload as a result of the enactment of Chapter 1834, Statutes of 1961, allowing state employees to elect retirement coverage under an integrated plan involving participation in the Federal Old Age and Survivors Disability Insurance and the State Employees' Retirement System. It must be noted that the impact of changes in payroll and position transaction workloads is no longer shared by district disbursing offices in proportion to the number of employees reported through each office. Subsequent to the conversion to electronic data processing methods in July 1961, all position transactions and all payroll deductions not reported directly by state agencies (insurance, dues, and charitable contributions) will be processed by the Sacramento Disbursing Office.

In addition to the above workload increases, the division will continue to provide machine accounting services to other divisions of the State Controller's Office for programs which are also expanding in volume, including: (1) The Tax Collection and Refund Division under a plan for automated auditing and refund processes in connection with claims for refunds of Motor Vehicle Fuel Tax; (2) the Accounting Division for the performance of duties related to the administration of the Unclaimed Property Laws; and (3) the Accounting Division for the investment accounting operations including the scientific amortization of premium, discount, and interest.

The following table relates each of the proposed new positions to the program and workload areas discussed above:

	OASDI Co-ordination	Medical Care	Increased Workload

INHERITANCE AND GIFT TAX DIVISION

Objectives

This division administers the State Inheritance and Gift Tax Laws.

Program and Performance

The division represents the State's interest at the local level and, through centralized supervision, controls the receipt and deposit of inheritance and gift tax monies into the State Treasury. It also affords the taxpayer an opportunity to have his case heard at home in the local courts.

There is a continuous increase in the workload of this division. In 1960-61, the inheritance tax revenues for the State were $67,876,731 and gift tax revenues for the State were $3,748,992 with the combined total being $71,625,723. From 1951-52 through 1962-63, the volume of inheritance tax reports has risen 104.1 percent and the volume of gift tax returns 118.4 percent.

Related to this increase in workload 1 legal position, 1 tax examiner, and 2 clerks are proposed. One assistant research technician is also proposed to collect statistics necessary in administering the inheritance tax law and determining recommendations for changes.

Provision is made in 1961-62 in temporary help to test a compliance audit program of the gift tax program. If the test produces sufficient revenues to warrant continuation, a request to do so will be made in the next budget.

---

[a] In 1961-62 includes $121,781 in additional help for E.D.P. conversion; $126,173 for OASDI programming; $64,445 for medical care programming; and $623 for programming credit union payroll deductions to comply with the provisions of Chapter 1028, Statutes of 1961.

LOCAL GOVERNMENT FISCAL AFFAIRS DIVISION

Objectives

This division administers the laws relating to county budgets; the reporting of city, county, and district financial transactions; provisions of the Collier-Burns Highway Act requiring local jurisdictions to report city and county street and road financial transactions; and prescribes uniform accounting procedures for counties.

Program and Performance

The staff of this division:

Collects, reviews, compiles, and publishes information concerning financial transactions relating to streets and roads of cities and counties in California.

Collects, compiles, and publishes information concerning the following:

All financial transactions of cities and counties of California.

All financial transactions of special and irrigation districts of California.

All financial transactions of school districts of California.

Assessed valuations of local jurisdictions.

Certifies irrigation and water district bonds for the State Controller in accordance with statutory requirements.

Prescribes forms for the use of county auditors in compiling their budgets.

Makes semiannual settlement of financial accounts between the State and the counties.

Under the Collier-Burns Highway Act of 1947, the Controller is responsible for reviewing and reporting on the use of state gas tax funds apportioned to local government to insure an adequate accounting from the cities and counties.

Under Section 30200 of the Government Code, the Controller must devise and supervise the installation of uniform accounting procedures for all counties.

Assisting the division is a 7-man "Advisory Committee to the State Controller on Financial Reports" and a 10-man "Controller's Committee on County Accounting Procedures." The members of these committees are all representatives of local government and serve without pay.

Although the normal growth in existing programs has continued and is expected to continue during the budget year no increase in staffing needs will be required. This is attributable to more efficient operations as a result of the reorganization of the division in March 1960. The transfer of 1 unit of personnel to the Los Angeles office on special district work has contributed to efficiency by expediting this work and reducing travel time.

---

[a] Includes 1 position temporarily authorized in the 1961-62 fiscal year to collect statistics used in an analysis of the inheritance tax laws.

[b] Includes in 1961-62, 3 positions for 9 months to determine the degree of compliance with the Gift Tax Law, and 1 position to meet increased workload in the stockroom of the Los Angeles Office.

TAX COLLECTION AND REFUND DIVISION

Objectives

This division administers the refund of motor vehicle fuel license taxes to non-highway users, collecting, in the process, state and county sales and use taxes on the purchase subject to such taxes; and enforces the collection provisions of the Motor Vehicle Transportation License Tax Act, the Motor Vehicle Fuel License Tax Act, the Insurance Tax Act, the petroleum and gas production assessments, and the assessments under the Subsidence Abatement Act.

Program and Performance

Through this division with offices in Sacramento, Los Angeles, Fresno, and San Francisco the State Controller carries out 2 major functions:

1. Refunding fuel taxes paid for off-highway use of fuel. This division audits claims and carries on a program of education and enforcement. In processing such refunds the amount of state and county sales taxes on the net cost of the gasoline involved is computed and deducted therefrom on behalf of the Board of Equalization.
   All claims receive an office audit for legality and required documentation. The claimant's computations are checked by electronic computer. Selected claims are referred to the field for audit of claimant's records and operations to verify the legality and correct amount of refund to be paid.
2. Collecting 5 major classes of revenue to the State which are assessed by other agencies—the motor vehicle fuel license tax and the motor vehicle transportation license tax, assessed by the State Board of Equalization; the insurance premium tax, self-assessed by insurance companies; petroleum and gas assessments, levied by the Department of Conservation; and the subsidence abatement assessments levied by the Department of Conservation. Under these tax laws, the Division of Tax Collection and Refund enforces the collection provision, keeping an account with each individual taxpayer. The motor vehicle fuel license tax is the 6 cents per gallon gasoline tax imposed on distributors. This revenue is earmarked for construction of state highways and roads.

In addition to a temporary help reduction of 1.6 positions in 1961-62 and 1962-63, a permanent staff reduction of 3 clerical positions is proposed for the budget year. The reduction of 2 positions in fuel tax refund office auditing has been possible from the efficiencies realized through the use of electronic equipment with a one-time cost of $8,268 incurred in 1959-60; plus a reduction of 11 percent in the claims received which totaled 87,117 in 1958 and 77,000 in 1962-63. The reduction in the claims received occurred primarily because effective October 1, 1959 liquid petroleum gas formerly taxed as motor vehicle fuel became taxable under the Use Fuel Tax law. Through improved procedures less time is now required for the determination of the local sales tax than was required in 1958-59.

The added reduction of 1 position in the tax collection group in headquarters is possible because of a reduction of the delinquent accounts through better billing procedures and field effort, while there has been no reduction in the number of licensed operators or amount of tax assessed.

TAX-DEEDED LANDS DIVISION

Objectives

This division administers the general procedure for tax sales, tax deeds, and redemptions of lands sold or deeded to the State for nonpayment of taxes; administers property tax deeded to the State; and advises county officials regarding the levying and collection of taxes on property.

Program and Performance

This division has offices in Sacramento, Los Angeles, Riverside, Fresno, Oakland, Eureka, and Santa Barbara. The program for 1961-62 includes the compilation of a manual for the County Tax Collectors and County Redemption Officers which should be completed in the early part of the 1962-63 fiscal year. The program also includes a survey of the district office procedure in the management of tax-deeded property; revision of the field office manual; and preparation of a procedure manual for the Sacramento office. A study will be made as to how this division, through the district managers, can be of further assistance to the local officials and general public. It is anticipated there will be increased activity in the district offices as a result of this program.

A discontinuation of a reimbursable program for compiling abstracts of tax delinquent properties accounts for the abolishment of 1 district manager position in the 1961-62 fiscal year.

Personnel man-years	2,289.1	2,295.8	2,322.8	27

GENERAL ANALYSIS

Objectives

The State Board of Equalization is composed of 4 members elected from areas of the State known as equalization districts and a fifth, ex officio member, the State Controller. The board members are assisted in their responsibilities by a staff of approximately 2,300 employees.

The board administers the following General Fund tax revenue sources: the sales and use tax, the cigarette tax, the alcoholic beverage excise tax, and the private car tax. It administers 3 Highway Users Tax Fund revenues—the motor vehicle fuel (gasoline) license tax and the motor vehicle transportation license tax with assistance from the Controller, and the use fuel (diesel) tax in its entirety. It participates in the administration of the insurance company taxes.

The board hears appeals from actions of the Franchise Tax Board on personal income and bank and corporation taxes. It administers, collects, and distributes to local governments one of their major revenue sources—the sales and use tax. Its local property tax responsibilities include the assessment of utility properties, assistance to the counties in assessment of all locally taxable properties, and equalization of the average assessment levels between the counties.

Program and Performance

The Board of Equalization, acting as a board, usually meets on an average of 5 days per month. Most meetings are held in Sacramento with some being held in Los Angeles, San Francisco, San Diego, and Fresno. These meetings are devoted to hearing appeals from actions of the Franchise Tax Board, and proposed actions by its own staff on tax deficiencies, consideration of matters of general policy and at certain times of the year, the equalization of local property tax assessments, valuation of public utility properties and assessment of the taxes on insurance companies and private cars.

Each board member investigates the administration, enforcement and operation of the tax programs of the board within the equalization district from which he is elected. For purpose of business tax administration the State is divided into 11 districts which consist of a county or a group of counties within each equalization district. In addition, an out-of-state district with headquarters in Sacramento and offices in New York City and Chicago administers the tax programs with respect to out-of-state persons or businesses doing business in California.

ADMINISTRATION

Objectives

This division includes the board and provides administrative and supply support to other divisions. Its services include legal, personnel, administrative analysis, research and statistical, fiscal, electronic data processing, and general service functions. In addition, it provides overall supervision and internal audits.

Program and Performance

The legal, internal audit, personnel and training sections, and the Administrative Service Division operate under the direct supervision of the executive secretary. The Administrative Service Division includes fiscal services, electronic data processing, administrative analysis, research and statistical, and general service functions for the board.

Sales and use tax returns will be processed on electronic data processing equipment to be installed in January 1962. Additional programs, such as claim accounting and processing of other tax program returns, will be converted to electronic methods where beneficial, as time and staff availability permits.

BUSINESS TAXES

Objectives

Business Taxes administers the Sales and Use Tax Law, the Bradley-Burns Uniform Local Sales and Use Tax Law, the Cigarette Tax Law, the Use Fuel Tax Law, the licensing and assessment provisions of the Motor Vehicle Transportation License Tax Law, and the Motor Vehicle Fuel License Tax Law.

Program and Performance

This division licenses 327,509 sellers of tangible personal property operating at 351,563 outlets, 42,637 highway users and members of the petroleum products industry, and 283 licensed cigarette distributors. Tax return forms are distributed to these licensees and to 1,746 licensed manufacturers and wholesalers of alcoholic beverages.

These returns are processed and audited by members of this division. The audit program continues to be financially remunerative as well as an incentive to taxpayers to assess themselves accurately. The recruitment effort to enlist well qualified auditors will continue in 1962-63 to increase the present audit coverage.

Collections are enforced when not voluntarily tendered with assistance from the Controller in connection with the motor vehicle fuel license and motor vehicle transportation license taxes. It receives recommendations from the Insurance Commissioner for assessment of taxes on the State's 718 admitted insurance companies, makes the official assessments, and hears appeals from its actions.

For local governments, the board is now administering sales and use taxes for 57 counties and 362 cities that are expected to yield $250,000,000 in the 1961-62 fiscal year.

The processing of returns of programs other than the Sales and Use Tax will be studied to determine the suitability of further extension of the electronic data processing conversion program. Other functions are changing to reflect improved efficiency of processing and more responsive current control of each taxpayer account.

With the conversion of Sales and Use Tax to electronic data processing, it is expected that the local revenues under the Bradley-Burns program will be distributed more promptly.

No new positions are required as it is planned to maintain fewer vacancies among currently authorized positions.

---

[a] The net change in positions from the number authorized in the approved 1961-62 Budget is an increase of 17. This increase includes the transfer of 13 positions from Business Taxes Headquarters, and 4 positions funded from salary savings authorized in temporary help for the current year only. For further detail refer to salary supplement.

PROPERTY TAXES

Objectives

Property Taxes functions are spread among 3 divisions. The Division of Assessment Standards assists, advises, and directs county assessors in the development of efficient and acceptable assessment procedures, and promotes uniformity in the ratio of assessed value to market value of all locally assessable properties within a county (intracounty equalization). The Division of Intercounty Equalization makes annual estimates of the ratio of total assessed value to total market value of locally assessable property in each county for the board's use in performance of its intercounty equalization duties. The Valuation Division provides the board with the data required for the assessment of state-assessed property and administers the Private Car Tax Law.

Program and Performance

The board assesses property that produces taxes and ad valorem special assessments amounting to over $280,000,000 a year, and assists county assessors who are responsible for the distribution among property owners of an additional $2,200,000,000 of taxes and ad valorem special assessments. It also makes some 5,600 appraisals of secured and unsecured property holdings each year, involving over 5,000 parcels of real property and 3,000 personal properties, to test the assessment levels of approximately one-third of the counties and estimates the assessment levels of the remaining counties by reference to the results of prior year appraisals.

The board appraises the railroad rolling stock of 91 carlines and other nonrailroad owners of cars, assesses this property, computes the tax rate that is applied to it, and collects the tax.

Mapping and timber appraisal services are provided on a fully reimbursable basis to counties wishing to contract for them.

The County Contract Mapping function, which is wholly reimbursed from local governmental units, has been reduced from the approved level of expenditure to coincide with demonstrated needs.

DEPARTMENT OF FINANCE—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS

Objectives

The Department of Finance has general supervision over all matters concerning the financial and business policies of the State. In addition, numerous services are performed centrally for the various other departments, offices, boards, and commissions.

The director is immediately responsible to the Governor, acts as his adviser on fiscal matters, assists in the formulation of administrative policies, and is charged with responsibility for the execution of the State Budget. In addition, the department performs services for other state agencies, such as centralized purchasing, real property acquisition, automotive management, printing, and office building maintenance.

The Director of Finance is a member of several boards and commissions. By law he is Chairman of the State Board of Control, and serves as chairman of many other boards on an elective basis.

Program and Performance

Under the executive office of the director, the department is organized into 13 major divisions plus the Economic Development Agency. Four of these—Audits, Budget, Fairs and Expositions, and Local Allocations—supervise the expenditure of state funds, acting as staff agencies for the Director of Finance in the discharge of his responsibilities in the execution of the Governor's fiscal policies. Nine divisions—Administrative Service Office, Buildings and Grounds, Communications, Office of Administrative Procedure, Organization and Cost Control, Planning, Printing, Property Acquisition, and Purchasing—are essentially service units assisting other state agencies in such matters as procurement of property, equipment and supplies; building management and space utilization; organization and operating procedures; and other management matters.

The Office of Administrative Procedure was transferred from the Department of Professional and Vocational Standards in accordance with the provisions of Chapter 2048, Statutes of 1961.

The Economic Development Agency within the Department of Finance promotes and encourages the development of business industry and commerce in California.

The budget for the Service Revolving Fund appears in the Appendix.

Senate Constitutional Amendment No. 10 of the 1961 Regular Session of the Legislature and Chapter 1765, Statutes of 1961, create the Division of Housing for the Elderly in the Department of Finance subject to adoption of the amendment by the electors. The amendment would authorize the sale of $100,000,-000 of general obligation bonds. The funds will be used for loans to any housing authority, limited dividend housing corporation, land chest corporation or nonprofit corporation for the construction of projects providing low cost housing for elderly persons of low income. The Chief of Division will be appointed by the Governor. All administrative expenses will be paid out of the Elderly Persons Low Income Housing Fund. No expenditures can be made until the amendment is approved by the voters.

In 1961-62 a total of 34 positions were abolished in Buildings and Grounds Division.

A summary of the new positions and amounts proposed are shown below:

Executive Office	1	$9,384
Administrative Service Office	10	46,344
Audits Division	14	103,488
Budget Division	1	8,112
Buildings and Grounds Division	123	352,615
Fair and Exposition Division	1	8,112
Office of Administrative Procedures	8	49,756
Organization and Cost Control Division	1	8,112
Planning Office	8	53,892
Purchasing Division	2	11,256
Totals	169	$651,071

Each position and its purpose are described in the program and performance statements before each individual division. One position is abolished in Local Allocations Division as the result of improved procedures being developed.

EXECUTIVE OFFICE

Objectives

This office is responsible for providing overall administrative direction and co-ordination for the department and certain staff services to the various divisions. In addition, advisory services are made available to other state agencies and local governments.

Program and Performance

The Director of Finance is required by law to approve and execute many types of contracts, real property transactions, and other agreements with legal considerations. To assist him in this function and to provide general counsel for the department, an administrative adviser is included in the executive office.

An insurance adviser is also included to aid the director in administering the State's insurance program.

One new position is proposed to serve as a special representative for the director.

ADMINISTRATIVE SERVICE OFFICE

Objectives

This division is the departmental service division including departmental accounting, budgeting, library, personnel, procurement, and data processing.

Program and Performance

Nine positions in the Data Processing Section were established in the 1961-62 fiscal year based on the needs of this group to perform the workload adequately. Three of the 9 positions are assigned to program review and updating operating procedures in order to obtain maximum efficiency and timeliness of data from the punch card installation. In addition, review and development of other applications in lieu of clerical work will be studied to determine feasibility of conversion. These 9 positions, temporarily established, are being proposed new in the budget year in addition to 1 clerical position to meet increased workload in the central files and mail section.

Provision is made during 1961-62 and 1962-63 for this office to provide an administrative officer, clerk, and related office expenses for the Commission on California State Government and Economy created by Chapter 2038, Statutes of 1961.

AUDITS DIVISION

Objectives

This division examines and verifies the accounts of every state agency as well as all district and county fairs after transactions are completed. The purpose is to discover and report any unauthorized, illegal, or irregular expenditures; any financial practices that are unsound; and whether the agencies have faithfully discharged their responsibilities.

Program and Performance

The division supervises the examination of the records of all school districts, and makes special audits at the request of the Legislature, the Director of Finance, or other state officials. It authorizes destruction of records and occasionally renders accounting assistance to state agencies on a contractual basis.

There is continuing co-ordination between the Audits Division and the Auditor-General in order to avoid duplication.

In 1961-62, an additional 13 auditors were authorized to meet new contractual obligations on a reimbursable basis. Of these, 3 auditors for charitable trusts and 1 auditor for small craft harbor loans are proposed new in 1962-63 on a reimbursable basis. Seven auditors for Water Resources contracts are proposed new, but the cost to be recovered through general fiscal pro rata charges rather than the present contractual arrangement. The 2 auditors added for "ten percenter" investigations are not requested to be continued.

Three additional positions are proposed in 1962-63 to meet workload as the result of the creation of new governmental facilities such as colleges and correctional institutions.

BUDGET DIVISION

Objectives

This division is responsible for the preparation and administration of the annual budget.

Program and Performance

The service and control functions affecting budgetary activities in all state agencies are performed by this division. Each state agency prepares detailed estimates of proposed expenditures and anticipated revenues for the coming fiscal year which are analyzed by the division staff in terms of policies set by the Governor and the Director of Finance. After legislative action on the budget, this division continuously reviews and approves each agency's financial operations. The budgetary process and the operations of the division receive continuing management review from a policy viewpoint by a procedures unit established within the Budget Operations Section.

Another unit of the division conducts economic and population research, prepares the budget estimates of revenue from major taxes and licenses, and provides the basic data on populat and income essential for long-term financial planning. Ur the provisions of Section 194.2 of the Streets and Highw Code, local governments may request the Department of Fina to prepare estimates of population and pay the minor expe incidental to this work in lieu of conducting special censu The resulting population estimates are certified to the St Controller and used as a basis for future distribution of m vehicle fuel and vehicle license fee revenue.

One additional research position is proposed to assist in development of economic data from which revenue estimates derived. Provision is also made for contractual services to velop an electronic data processing program and to process s data for projecting student enrollments in local school distri particularly in the junior college area. It will also be necess for the first time to establish the sources and types of jun college enrollments which will have an impact on the Stat responsibility for higher education.

[a] Includes 1 position in 1961-62 to provide fiscal services to State College Board of Trustees on a reimburseable basis.

[b] Includes 1 position transferred from temporary help in Administrative Service Office.

[c] Planner transferred from Capitol Building and Planning Commission on July 1, 1961 and to be transferred to Planning Office July 1, 1962.

BUILDINGS AND GROUNDS DIVISION

Objectives

This division is responsible for maintaining and operating all state-owned buildings under the jurisdiction of the Department of Finance, in addition to other privately owned buildings in which the State has rented office space for the several agencies in connection with the various operations involved. Currently it is responsible for maintaining and operating 53 buildings with a total floor space of approximately 6,500,000 square feet, including some 60 acres of grounds in Sacramento, Fresno, Oakland, San Francisco, and Los Angeles. There are a number of other locations, both state-owned and leased, where the division is called upon from time to time to perform miscellaneous services. This division also operates maintenance shops covering all phases of building maintenance and operation in San Francisco, Los Angeles, and Sacramento.

Program and Performance

A professional staff in the Space Utilization Section of this division analyzes and determines space requirements including types, amounts, and special facilities; studies space requirements for state agencies for long-range building programs and prepares programs for design and construction of state office buildings; co-ordinates space needs, allocates and assigns space to state agencies occupying state buildings; prepares lease exhibit plans and specifications for construction of new leased facilities and also for alteration and improvement of existing leased office areas, and negotiates leases.

Through this division, the California State Police provides protective service in the various locations set forth above. Additional police service is provided upon request.

The division also has responsibility for maintenance of the Governor's Mansion and the telephone exchanges in state buildings in Sacramento, San Francisco, Oakland, Los Angeles, and Fresno.

A total of 34 positions originally budgeted for various new buildings have been abolished. Operations in these buildings have not required these positions.

An office building engineer was temporarily established in 1960-61 to service the San Francisco State Building Annex and The Compensation Insurance Fund Building and is shown as proposed new in this budget. A carpenter position is requested for the State Office Building in San Francisco and 2 telephone operator positions are requested in Sacramento to meet workload needs. Temporary help is increased 8 man-years in 1962-63 in Sacramento which reflects the difference in service required between a budget session and general session of the Legislature.

A total of 119 new positions are requested to maintain and operate the new state building in San Diego, the new Motor Vehicle Building in Sacramento, and the new annexes to the Public Works Building and the Agriculture Building in Sacramento.

COMMUNICATIONS DIVISION

Objectives

This unit provides technical assistance relative to the co-ordination and operation of communications systems used jointly by public agencies in the State, as well as those systems operated by individual state agencies. Arrangement for adequate representation of these agencies before the Federal Communications Commission in matters affecting them is a further responsibility of the division.

A Communications Advisory Board consisting of the Director of Finance and six representatives of law enforcement and fire services from the State, county, and city governments provides policy guidance to the division.

Program and Performance

An important part of the division's work is to assist solving engineering and technical problems relating to insta lation and operation of publicly owned radio, telephone, ar teletype systems. The findings and recommendations of the sta are made available both to the board and to the public agenci concerned.

The division also provides centralized maintenance service o a reimbursable basis for most state agencies utilizing radi equipment. The budget for this activity appears in the appendi under the Service Revolving Fund. The 1962-63 Budget co tinues the same level of service as in the current year.

ECONOMIC DEVELOPMENT AGENCY

Objectives

To provide industrial and commercial expansion and fuller employment for California's growing population through vigorous promotion of business within the State.

Program and Performance

This agency investigates, studies, and undertakes ways and means of promoting and encouraging the prosperous development of business, industry, and commerce within and without the State. The agency, headed by a commissioner appointed by the Governor, promotes and encourages the expansion of markets for California products, and the development of new business in the State. It studies conditions affecting Californi business, industry and commerce, plans and develops an effec tive business information service, encourages and develops com merce with other states and foreign countries, and makes peri odic reports and recommendations to the Governor and th Legislature for improvement of conditions affecting the develop ment of business, industry, and commerce.

In 1962-63, $40,000 is included in contract services. Amon the services to be provided are those planned for a state celebra tion commemorating California becoming the nation's leadin state in population.

FAIRS AND EXPOSITIONS DIVISION

Objectives

This division provides general fiscal supervision of 50 district, 24 county and 2 citrus fairs throughout the State.

Program and Performance

The division prepares a master premium list and approves the operating budgets and premium lists of the individual fairs; prepares claims for distribution of appropriated funds; and advises the Director of Finance and the State Public Works Board as to allocations of money from the Fair and Exposition Fund to fairs for Capital Outlay purposes. The division also assists local fairs with construction problems. An electrical inspector is proposed in 1962-63 to review electrical needs of Capital Outlay projects and is to be reimbursed from funds allocated for Capital Outlay purposes.

LOCAL ALLOCATIONS DIVISION

Objectives

This division serves as the technical staff to the Director of Finance and the State Allocation Board in the administration of several programs of state aid to local government agencies.

Program and Performance

The major programs are: to review and analyze applications for state aid and related documents to determine that eligibility requirements have been met; prepare reports and make recommendations to the Director of Finance and to the State Allocation Board in respect to these programs; maintain records of official actions of the Director of Finance and the State Allocation Board; administratively approve construction contracts and release of funds in accordance with the rules of the State Allocation Board; and perform other functions authorized by the Director of Finance. One position is being abolished as a result of work improvement methods installed by the division.

ORGANIZATION AND COST CONTROL DIVISION

Objectives

This division provides consultation services on management problems and makes studies of organization, procedures, administrative policy, records management, and accounting systems as requested by any state agency or as determined by the director.

Program and Performance

Results of its surveys are usually submitted to the requesting agency as a written report with recommendations for improvements. Over 100 surveys are made annually to find better ways to do the government's work.

In the field of accounting, the division prescribes the State's uniform accounting system based on studies of methods and procedures ranging from relatively simple accounting systems applications to large and complex automated data processing systems.

The division prepares and maintains the State Administrativ Manual which serves as a reference source for policies, procedures, regulations, and information on management responsibilities.

It exercises the approval powers of the Department of Financ to fix and adjust salaries and establish class titles for certai positions exempt from the Civil Service System.

Some staff are assigned full-time under contract to othe state agencies to provide management research and advisor services.

Employees' suggestions are received and processed for evaluation by staff as a part of a merit awards system. Awards ar given to employees for suggestions that are adopted.

One additional analyst is proposed to handle increased work load in the Data Processing Systems Section.

PLANNING OFFICE

Objectives

This office is responsible for the administration of Chapter 1.5, Title 7 of the Government Code which provides that the office will prepare, maintain, and periodically revise a comprehensive state development plan; co-ordinate the public works programs undertaken by the State, federal, and local agencies; give planning assistance to local, district, and regional planning agencies and to other public agencies upon request; and undertake such other physical planning and co-ordination studies and activities as will implement the policies and intent of the Legislature.

The State Planning Advisory Committee provides advice and guidance to the office in the planning function. This committee is appointed by and serves at the pleasure of the Governor; however, appointments must be made from the ranks of local legislative, planning, and school officials.

Program and Performance

The State Development Plan is to be based on studies of physical, social, economic and governmental factors, conditions and trends, and aimed at the co-ordinated physical development of the State. It will embody state policy regarding the State's physical growth and development and will include by discussion and agreement between the agencies involved, the projects and other improvement proposals of the departments and divisions of the State Government, the projects and improvements proposed by the Federal Government, and the major aspects of master or general plans of regional and local agencies of government. Upon approval by the Director of Finance and the Governor, the plan is to be transmitted to the Legislature for adoption in principle. A biennial report to the Legislature on the status of the plan is required.

The office is to ascertain from each state department, board or agency, from each local jurisdiction, and where possible, from federal agencies all proposed public improvements or projects which are, in its opinion, of statewide concern. The office is to encourage conferences between state and federal agencies contemplating projects within the State and the local planning agencies having jurisdiction over the territory in which such projects will be located. Whenever conflicts in proposed public works projects are determined to exist, the office is to notify the agencies concerned and recommend appropriate action to eliminate such conflicts.

The provision of local planning assistance is quite broad but in practice is largely confined to the administration of urban planning assistance grants made possible by Section 701 of the Federal Housing Act. Other assistance in terms of planning information from the library and procedural advice is provided local planning agencies.

The office encourages regional planning and, in accordance with the recommendations of the State Planning Advisory Committee, divides the States into regional planning districts.

The office also maintains a file of all plans and reports pertaining to the physical growth and development of the State and prepares an annual report on planning for distribution to state and local agencies.

The Planning Office has been assigned responsibility for the administration of an area redevelopment program. This new program is made necessary by the provisions of the Federal Area Redevelopment Act of 1961, under which counties suffering substantial and persistent unemployment are designated as redevelopment areas. This designation makes available to these counties certain benefits under the Federal Law, but in order to obtain these benefits, the county must prepare an overall economic development program, first in preliminary and then in a complete form. These programs must be approved and submitted to the Federal Area Redevelopment Administration by and through a designated State agency. It will be the responsibility of the area development section in the Planning Office to assist those California counties that are so designated to prepare for approval and submission to the Area Redevelopment Administration preliminary overall economic development programs. Local funds and Federal planning grants administered by the Planning Office will then be utilized to develop the preliminary programs into action programs.

In order to accomplish this assignment, 4 additional positions are requested. A senior economist to be in charge of the section and to be responsible for the preparation of the preliminary overall economic development program; an associate planner to work in the field with the various local agencies concerned in each of the designated counties; an assistant planner responsible to gather data both in the field and from appropriate State and Federal agencies; and, an intermediate stenographer to handle the clerical workload created by these 3 positions.

Two planner positions are requested to pursue the State Development Plan and to co-ordinate public works projects throughout the State and 1 planner is included to work with local jurisdictions in connection with federal programs in urban planning assistance grants. A clerk is requested to handle the existing workload and that generated by the 3 additional planners.

PROPERTY ACQUSITION DIVISION

Objectives

This division is responsible for various real estate procurement, management, and disposal activities of the Department of Finance. It also functions as the overall secretariat of the Public Works Board of which the Director of Finance is chairman.

Program and Performance

Properties acquired by the State in anticipation of later building activity are managed by the division. When such property is needed for a construction project, the unit arranges for termination of tenancies and for the sale by bid or auction of improvements on the site.

The division also is responsible for implementing the surplus real property disposal program. State-owned properties no longer needed are reported to the Legislature, and when authority to sell them has been obtained, the division supervises their sale and return to local tax rolls.

DEPARTMENT OF FINANCE—Continued

PURCHASING DIVISION

Objectives

The State Purchasing Agent has sole authority to contract for the purchase of supplies for every state department, commission, board, institution, and official, with the exception of the State University.

Program and Performance

Bids are requested from dealers, jobbers, and manufacturers who are engaged in the various lines of business, and award is made to the lowest responsible bidder meeting minimum specifications, taking into consideration price, quality, and fitness.

A program of quality control and standardization has been developed for materials purchased by the State which has permitted negotiation of contracts for many commodities purchased in quantity. Service to the many departments and institutions has been further improved by delegating authority to place direct orders for limited amounts, noncompetitive items, and emergency supplies, in addition to contract items.

Specifications are prepared and deliveries are carefully checked on all foodstuffs purchased for the patients at the state hospitals. Items purchased for the state agencies under standard specifications are checked at the Testing and Research Laboratory of the Division of Highways at Sacramento.

A traffic management office is established in this division to develop and conduct a central traffic management program to effect economies and efficiencies in the movement of state freight.

Central store warehouses are maintained in Sacramento, San Francisco, and Los Angeles, from which supplies are shipped to the various agencies of the State. These supplies are purchased in large quantities at advantageous times, thus assuring prompt deliveries of stocks when needed, and also giving the agency the benefit of large wholesale purchases.

The division manages state-owned automobiles in a pool from which state agencies can obtain a state car for state use. Cars are maintained in San Francisco, Sacramento, Oakland, Berkeley, Fresno, San Diego, Los Angeles, Eureka, San Luis Obispo, and Redding. Control is exercised over type and number of automobiles purchased, and the use of state garage and parking facilities. Reports are received to assure state automobiles are used only for official business purposes.

The budget for the central stores, automotive pool and garage, central reproduction, and the office machine repair operation of the Service Revolving Fund is shown in the appendix. These activities are managed by the Purchasing Division.

A business service officer II position is requested to supervise the office machine repair unit and the central reproduction unit. The latter unit was transferred from the Printing Plant to Purchases Division on August 1, 1961. A clerical position was established temporarily in 1961-62 and is included as proposed new for 1962-63 for messenger services to dispersed offices in Sacramento.

OFFICE OF ADMINISTRATIVE PROCEDURE

Objectives

This office is responsible for co-ordinating and improving the quasi-judicial functions of various state agencies. It furnishes trained hearing officers to any agency conducting disciplinary proceedings, and it complies and publishes the California Administrative Code, consisting of agency rules and regulations.

Program and Performance

This office was transferred from the Department of Professional and Vocational Standards on September 15, 1961. In addition, 18 positions were transferred to the office from the Department of Alcoholic Beverage Control and 3 from the Division of Corporations. The hearing function is supported completely by reimbursements from agencies using the service.

	Actual 1958-59	1959-60	1960-61	Estimated 1961-62	1962-63
Cases heard	1,095	1,230	1,417	3,600	3,965
Pages of rules and regulations printed	2,326	3,719	2,860	4,000	3,500

Five positions have been established temporarily in 1961-62 and are included as proposed new in 1962-63 to handle the increased caseload. One team or 3 positions are proposed in 1962-63 for the San Francisco office to meet increased workload reflected by a steadily increasing delay in hearing of cases.

GENERAL ANALYSIS

Objectives

This agency conducts the annual State Fair and Exposition and during interim periods makes full utilization of the grounds for other activities.

Program and Performance

The Agricultural Code directs that the State Fair Board, subject to the approval of the Department of Finance shall "provide for and manage an annual fair or exposition at Sacramento of the industry and industrial products of this State and of the commercial products exported and imported through the ports of this State." There is a 12-day fair held for this purpose in the latter part of August and the first part of September each year. In addition, provision is made for a California Spring Fair which consists of a division of the annual State Fair and the annual fair of the 52d District Agricultural Association. This latter program is conducted on the State Fairgrounds as a co-operative effort. The event was first staged during the spring of 1961. The California Spring Fair provides some exhibitors a much better opportunity to present their products for public inspection and provides more entries for the horse show due to its less competitive timing in the spring.

Since inception of the State Fair in 1854 there has been continuous growth. Economic interests represented include livestock, poultry, rabbits, dairy, and other agricultural products, the arts, home economics, junior division, horse show, rodeo, fashions and fabrics, wines, horseracing, and many others. This fair portrays California as a whole, and shows its economic, governmental, and social life and its relationship to the world. In this respect 8 foreign countries have exhibits at the fair.

The use of the fairgrounds for nonfair activities is growing and conventions, dances, roller rink, auto racings, cattle sales, winter quartering of racehorses, rental of equipment, and storage use contribute to the fair's revenues and help affect the maintenance and upkeep cost of the fairgrounds.

At the close of the 1961-62 fiscal year, it is estimated that there will be a deficiency in the State Fair Fund of $226,874. There are several factors which have contributed to this deficit. In the 1960-61 fiscal year the State Fair was programmed for a 1961 Spring Festival at an anticipated paid attendance level of 108,000 persons. Because of extremely poor weather actual paid attendance was 26,537 persons. In addition a decision was made after the 1960 Fall Fair to move the horse show and dairy products exhibit from the Fall Fair to the Spring Fair. The first event staged under the new program occurred in the Spring of 1961. The effect of this change was a duplication of program effort during the 1960-61 fiscal year; however, with the establishment of the new pattern these two basically public service activities will become annual events for the Spring Fair division. A further problem contributing to the deficit arises because of salary increases for prevailing wage rate employees not anticipated in the initial budget estimates. These increases are related to union contracts and affect certain craft classifications and parimutuel employees.

Because of the condition outlined above, the Budget Act makes provision for a General Fund transfer to the State Fair Fund of $416,427 to cover this deficiency as well as to provide the additional operational resources required to support the continuing program of the State Fair. In addition, revenue estimates are increased slightly in the 1962-63 fiscal year based on anticipated increased attendance for both the spring and fall divisions.

The program provided for in the budget year will include both the principal State Fair fall division and the spring division show. In addition to the normal fall fair attractions, which are provided for in this budget presentation, planning consideration is being given to the development of a major evening attraction to be presented before the grandstand during the 3-day period following the Labor Day holiday. These days are normally low attendance days at the general admission gate. It is felt that the major attraction, which will be programmed as a completely self-supporting venture, will enhance all phases of the fair operations. In order to strengthen the fiscal and management activities of the fair, the position of state fair comptroller was added to the program effective January 1, 1962, and is proposed for continuation in the budget year. This position will head up a reorganized fiscal office and is responsible for furnishing timely fiscal information, controls, and advice to the fair manager. In addition, the position is to be responsible to the State Fair Board for establishment and maintenance of budgetary controls sufficient to insure a high degree of fiscal responsibility.

GENERAL ANALYSIS

Objectives

The California Museum of Science and Industry is a state educational institution administered by a 9-member board of directors appointed by the Governor. The museum was established under the provisions of Chapter 69, Statutes of 1880 to administer, manage, operate, and maintain permanent facilities located in Exposition Park, upon land held in trust by the museum. Such facilities include: the California Museum of Science and Industry; the new Space Age Museum; the Park grounds and roads adjacent thereto; and parking lots for the Los Angeles Memorial Coliseum, Los Angeles Memorial Sports Arena, and the City of Los Angeles Olympic Swim Stadium. The museum shares in the management of the 2 sports stadiums under a joint exercise of powers agreement.

Program and Performance

The California Museum of Science and Industry contains permanent and changing special audio-visual and public-participation educational exhibits demonstrating the industrial and scientific progress of the State of California. Such exhibits, through their "story-telling approach" illustrate the importance of science, industries, industrial enterprises, resources, and products as a vital factor in the economy of the community and the State of California. The museum maintains a schedule of approximately 24 changing special exhibits a year. These exhibits have ranged in tenure from 5 days to 8 weeks and have varied from semiartistic exhibits to educational contemporary playground equipment. The special exhibit program is sponsored jointly by state and private sources. The purpose of this type of activity is to atract and maintain diversified audience and industry participation commensurate with the rapidly-changing scientific, industrial, and nontechnical fields.

Growth in exhibits and attendance at the California Museum of Science and Industry has made it the second largest institution of its kind in the United States. The 1,014,947 visitors recorded during the 1960-61 fiscal year represents an increase of 22 percent over the previous year. Visitors to the museum are divided with the ratio being 30.5 percent from the City of Los Angeles and 69.5 percent from outside the city. Of the latter amount, 47 percent are Californians, 35 percent are from other states, and 18 percent are foreign visitors. During 1960-61 the museum was selected by the United States State Department to receive visiting scientists, educators, and industrial leaders from many foreign countries.

Opening of the new science wing at the museum in March 1961 with unveiling of the private industry sponsored mathematics display was a major step in the continued development of the museum complex. This new wing contains 26,000 square feet of exhibit space and is designed to house exhibits dealing with the fundamentals of science. Conceived as a "walk-through encyclopedia," the wing will feature such additional subjects as physics, chemistry, electronic communications, the mechanical sciences, and the physical nature of man. The funds for these permanent exhibits come primarily from private benefactors, foundation grants, and industry. Scheduled to open to the public during 1962 is the exhibit on electronic communications and the transparent woman theater which will be phase I of the Hall of Health.

In September 1961, the museum with matching funds from private industry, installed the first phase of a closed circuit television surveillance exhibit designed to provide maximum security for the science wing and also to demonstrate certain electronic principles through exhibit techniques. This is the first installation of its kind in a museum in the Western United States. In this manner, the museum offers private exhibitors top security at minimum cost to the State.

Financial support from the aviation industry will enable the museum to complete a major portion of the 3,300 square foot permanent exhibit on the science of aviation in 1962. This exhibit is being financed jointly by the State and private industry

---

[a] Fund balance and 1960-61 expenditure program amount differs from Annual Report of the State Controller to reflect a revision in an accrued reimbursement item to be received from the 52d District Agricultural Association. This amount was originally estimated to be $60,823; however, the amount was subsequently revised to $36,000.

Department of Finance

Program and Performance—Continued

on a matching fund basis. Indications are that the entire exhibit will be completed in early 1963.

Negotiations are underway with the Federal Government and certain major foundations to secure financial participation to match state funds for the construction of an Atomic Energy Wing authorized by the Legislature in 1960. This wing will display permanent and changing exhibits demonstrating the peaceful uses of atomic energy. Remodeling of the museum-owned National Guard Armory, which will house the new Space Age Museum, will be completed in early 1962. This new unit will be open for visitors later in the spring. This museum was authorized by the Legislature in 1959 and is being developed with major participation from leaders in the aero-space industries.

The California Museum Foundation, through private funds, sponsors the entire museum educational program. In 1961, a supervisor of education was provided with foundation funds to plan, develop, implement, and direct the educational activities for the museum and thereby increase its value to the community. Generally, the new program, already well underway, includes: training of museum teachers, study guides, lectures, teacher institutes, film series, field trips, mathematic seminars, science symposiums, summer workshop, and publication of educational materials for use in classrooms.

Exposition Park consists of 104 acres owned by the museum, partly under lease to the Coliseum Commission (Coliseum and Sports Arena), the County of Los Angeles (Museum of Art, History, and Science), and the City of Los Angeles (Swimming Stadium and Rose Garden). The remainder of the area is under the immediate control and jurisdiction of the museum. Each tenant shares jointly in the cost of maintaining the park grounds. The museum owns approximately 26 acres surrounding the park. This acreage is operated as public parking lots for patrons of the above mentioned activities. The land was acquired and facilities developed from funds advanced by the General Fund and the State Beach and Park Fund. These loans with interest are being repaid from receipts from the use of the parking lots. With the added facilities and the increased use of the parking lots by patrons of the Sports Arena, there was substantial increase in revenue during the 1960-61 fiscal year. A slight decrease in revenue is expected during the 1961-62 and 1962-63 fiscal years when the Los Angeles Dodgers move to their new baseball stadium. This decrease will be partially offset by increased use of the Sports Arena with the advent of professional ice hockey, a new professional basketball team, and other events earmarked for this stadium.

One building maintenance man and a part-time janitor are proposed to keep up with the increased workload resulting from the expansion of the museum and public demand for increased use of the museum facilities. An expanding complex of buildings and facilities and more widely disposed personnel and functions have created the need for a museum helper to provide mail service and other general services for administration and is proposed in 1962-63. One position temporarily established in 1961-62 is requested to handle the workload generated by the expansion of the museum's business services function. A portion of the cost of this position is being reimbursed by the California Museum Foundation. Police service obtained by contract with Buildings and Grounds Division, Department of Finance, is expanded from 16-hour to 24-hour service during 1962-63. The 1962-63 Budget provides funds for one-time repairs to the asphalt surface of State Drive and seal coating the Menlo Avenue parking lots. The drive was constructed in 1924 and has deteriorated due to increased vehicular traffic and improper drainage. The parking lots were constructed in 1950 and have deteriorated to the point where a proper seal coat is required to preserve the asphalt from continued disintegration. The budget also provides for the purchase of a mobile street sweeper to replace the used sweeper, 1953 model, purchased for parking lot maintenance only. The museum maintenance program includes daily sweeping of parking lots and exposition park roads; the cost of which is partially offset by reimbursement from tenants, but the increased usage of the equipment has exhausted its usefulness and new equipment is required to maintain pace with the continued use of the museum park and parking lot facilities.

GENERAL ANALYSIS

Regional agricultural societies first received financial assistance from the State in 1861. After the adoption of the new Constitution of 1879, the regional agricultural societies were succeeded by district agricultural associations authorized by the Legislature of 1880 as state agencies. Section 80 of the Agricultural Code fixes the boundaries of 51 agricultural districts. There are 50 districts organized and holding fairs in addition to the Sixth District which maintains a permanent exhibit in Los Angeles.

Each of the district agricultural associations is a state institution administered by a board of 9 directors appointed by the Governor. The organization and operation of district agricultural associations are governed by Sections 80 to 97 of the Agricultural Code. District agricultural associations are subject to the laws and administrative regulations which apply to state agencies generally and to specific rules and regulations which apply only to district agricultural associations or to district and county fairs. District fairs are conducted under budgets approved by the Department of Finance and the Audits Division of the Department of Finance audits the premium awards made at the fairs and makes post-audits as well.

Revenues received by the Sixth District Agricultural Association, Los Angeles, are deposited in a special fund in the State Treasury and this association operates out of this special fund under appropriations by the Legislature. This district does not receive an allocation under the provisions of Section 19627 of the Business and Professions Code.

The 1-A District Agricultural Association, San Francisco, receives an annual appropriation of $250,000 and the 48th District Agricultural Association, Los Angeles, receives an annual appropriation of $125,000 under the provisions of Section 19622 of the Business and Professions Code. Neither of these associations receives an allocation under the provisions of Section 19627 of the Business and Professions Code.

The remaining 48 district agricultural associations receive annual allocations on the basis of premiums paid at their respective fairs.

GENERAL ANALYSIS

Objectives

Administers policies established by the State Lands Commission in managing the public lands belonging to the State, consisting of school land, swamp and overflowed land, salt marsh, tide and submerged lands, and other sovereign lands comprising approximately 3,500,000 acres. Principal revenue-producing function is the leasing of the public lands for the extraction of oil, gas, and other minerals.

The commission is composed of the Director of Finance, the Lieutenant Governor, and the State Controller.

Program and Performance

Activities in the administration of state lands have increased in scope and value from the original activity of selling and leasing proprietary lands to the present expanded duties, which include oil, gas, mineral, grazing, agricultural, commercial, and recreational leasing and leases for use and occupancy of swamp, overflowed, and tide and submerged lands.

Division 6 of the Public Resources Code authorizes the leasing of the state's tide and submerged lands for oil and gas production. Leases may be let on either a cash bonus or a royalty bid basis, whichever is anticipated to return the greater revenue to the State. Five leases were let during 1958 in Santa Barbara County. Two of these are now on production, while there is potential production from 2 others. Three parcels in this area were offered for lease during the past fiscal year, with 2 leases being awarded for cash bonuses in excess of $10,900,000. The commission has adopted a policy of offering parcels of tide and submerged lands for lease on a continuous sequential basis. As a result, cash bonus royalties may be anticipated during each fiscal year in the future.

Active wells in production located on leased tide and submerged lands in Orange, Ventura, and Santa Barbara Counties total 826, an increase of 66 during the past year, with an additional 10 rigs presently drilling in the Santa Barbara area. The development and administration of new leases has created unique problems, such as the control of production from offshore structures and ocean-floor wellhead completions. Lack of storage capacity has necessitated shipments by tank truck. The combination of factors involved has substantially increased the division's workload in the Santa Barbara area. Royalties from oil and gas during 1960-61 totaled $9,755,000. An increase is anticipated for the current and budget years as the result of increased production from the Santa Barbara area.

Under the provisions of Chapter 29, Statutes of 1956, First Extraordinary Session, the commission accounts for the State's share of oil and gas revenues derived from tide and submerged lands granted to the City of Long Beach. This is a major program involving complex engineering, auditing, and legal problems. Revenues from this source for the past year totaled $6,380,000, an increase of $1,287,000 over the previous year. The city has been engaged in an intensive program of water repressurization, designed to improve petroleum production and to alleviate subsidence. Capital expenditures for this program, approximately $14 million, are virtually completed. Secondary oil recovery and the elimination of further capital costs should result in an increase in revenues from this source during the current and budget year.

Pursuant to Chapter 2000, Statutes of 1957, the commission directed the initiation of litigation against the City of Long Beach to fix the location of the boundaries of tide and submerged lands granted previously by the Legislature. During the past year, the city filed a demurrer to the State's complaint, and the State replied with points and authorities in opposition. The case is expected to continue actively into 1962-63.

Sales of public lands dropped to $183,000 during the past year as the result of a commission moratorium placed on the sales of these lands. An exhaustive report was rendered the commission during 1960-61 on all active land sales applications, and the commission adopted a policy of soliciting all state agencies having land acquisition programs as to possible state use of the lands prior to sale to applicants of record. The moratorium on applications will remain in effect pending a further study as to the use and disposition of these lands.

Fourteen statutes were passed at the 1961 Session of the Legislature providing for grants of tide and submerged lands to political subdivisions of the State. Section 6359, Public Resources Code, requires that such grants be surveyed, monumented, and a plat of the granted lands recorded in the county where the lands are located prior to the grant becoming effective. Twelve of the granting statutes also require that substantial improvement be made of the area by the grantee within a 10-year period. These statutes assigned the commission responsibility for seeing that such improvements are made; alternatively the granted areas revert to the State. The foregoing represents a substantial increase in workload.

Applications for the leasing of lands for use and occupancy continue to grow in volume. Revenues from this source totaled $184,000 during the past fiscal year, and show a continual increment annually.

One major litigatory action, Orange County vs. State, which involved millions of dollars and title to the county's tide and submerged lands was closed as the result of a request for dismissal by the county. A federal action, U.S. vs. Anchor Oil, in which the United States is suing the City of Long Beach, the State, and numerous oil producers for claimed irreparable damages in the amount of $70 million to the Long Beach Naval Shipyard, is active and discovery proceedings have commenced. In conference with members of the Attorney General's staff, U.S. attorneys have indicated that the Federal Government proposes to prosecute this case.

Additional work in the fields of oil and gas lease development and administration, land rentals, and the surveying of grants of tide and submerged lands results in a proposal for 4 new positions; 2 in Oil and Gas Lease Administration, 1 in Land Leasing, and 1 in Civil Engineering. An additional clerical position is also proposed for the Sacramento office to assist in installing and operating an electronic statistical data processing system relating to the State's public lands and other land records.

GENERAL ANALYSIS

Objectives

The Franchise Tax Board is composed of the State Controller, the Director of Finance, and the Chairman of the State Board of Equalization. The board guides and reviews the overall operations of the department through an executive officer. The board receives all personal income taxes, bank and corporation franchise taxes, and corporation income taxes. In addition, the board audits and assesses additional taxes where deficiencies occur, and collects delinquent taxes in accordance with the Bank and Corporation Tax Law and the Personal Income Tax Law.

Program and Performance

This budget anticipates a continuing upward trend in the number of returns filed and the overall workload of the department as indicated above. For the year 1960 a revised tab card short form return was designed which enables individuals to itemize their deductions on such form. This revision has resulted in increased use of the form and consequently lower handling costs and increased efficiency.

In addition to increases arising from the normal growth of the population and economy, the above estimates account for an estimated increase in delinquent filings due to the effect of a yearly federal comparison project. The impact of increased filings is experienced in the Accounting Section of the Administration Division in the fiscal year of receipt, while such effect is not experienced in the Operations Division until the following fiscal year.

The federal comparison project produces the media for comparison of federal tax returns with state returns and provides a listing source for the mechanical addressing of state return blanks. The Federal Government is converting from punched cards to electronic tape. The State must also convert in order to continue this very profitable comparison program and listing resource.

ADMINISTRATION DIVISION

Objectives

This division provides cashiering and accounting services, statistical analysis, and bank tax computation services. In addition, the division provides legal functions, hearings on appeals by taxpayers from staff decisions, and special investigations as well as overall supervision of the activities of the board.

Program and Performance

The accounting section keeps the fiscal records for the agency, performs the cashiering function, maintains the corporate and individual tax receivable ledgers, and performs the service and supply function. A total of 10.1 man-years of temporary help are proposed to handle the expected increase in workload in this section. In addition, the accounting section is responsible for the management of the tabulating machine and data processing operation of the board. In 1960-61, the use of data processing equipment was extended to the accounting of personal income taxes receivable. During the budget year 22 positions are to be transferred from temporary help to regular positions. This staffing change is being financed from funds provided for blanket positions and will improve the competitive position of the board in the recruiting and retention of employees for mechanical data processing.

The statistical section is responsible for computing annually the rate of tax applicable to banks and financial corporations. In addition, the section gathers and analyzes statistical data relating to the taxes administered by the board.

The legal section acts as the attorney for the board in the interpretation of the statutes and provides legal service in the proper framing of regulations. The section represents the board in actions which are subsequently appealed to the State Board of Equalization and assists the Attorney General in matters that are carried to the courts. An additional attorney position and 1 clerical position are required in this section because major law revisions in 1959 and 1961 increased workload in regulations. In addition, the new positions will be concerned with the increases in applications for franchise tax exemption, requests for pension trust approvals, and general level of activity which will produce increased case workload for the legal section.

The appeals and review section acts on formal taxpayer protests against notices of proposed assessments which have their origin in the audit activity. One legal position is being added to this function to cope with the increased workload.

The special investigations section investigates criminal violations of the income tax laws. In addition to investigating criminal violations of the income tax laws, the unit procures evidence of illegal gambling activities to support the assessment of additional taxes under the so-called "Illegal Activities Sections" of the Revenue and Taxation Code (Sections 17297 and 24436), which provide for a disallowance of all deductions from income received from certain illegal gambling activities.

OPERATIONS DIVISION

Objectives

This division handles the general administration of the Bank and Corporation Tax Law and the Personal Income Tax Law by performing the line functions relative to the responsibilities of the board. These responsibilities include the clerical processing of tax returns and related reports, desk and field auditing of such returns, and the computation of additional assessments and refunds where proper. The division is responsible for the administration of compliance programs to insure filing by those having a liability to do so and is also responsible for the collection of delinquent taxes.

Program and Performance

In addition to the headquarters office in Sacramento, the division maintains regional offices in Los Angeles and San Francisco and branch offices in the larger cities throughout the State. The branch offices are grouped under the regional offices. The division also maintains offices in New York and Chicago. The 2 out-of-state offices are primarily concerned with the bank and corporation tax audit program. The out-of-state auditing is presently performed by a staff of 28 auditors of which 14 are stationed in New York and 14 in Chicago. Each of these offices handles work within a radius of 1,000 miles of the offices. The program involves field auditing of larger corporate returns with primary emphasis upon proper application of the allocation formula to the corporate tax base. The budget proposes 10 additional audit positions and 2 clerical positions to be equally divided between the very highly productive New York and Chicago offices.

After initial receipt by the board the handling of returns within the division includes review by the preliminary examination unit. All corporation returns and selected portions of personal income tax returns are reviewed at this stage. Review is primarily for the purpose of correcting errors in computation. Net assessments from this activity totaled $2,482,950 during 1960-61 of which $1,799,876 was from personal income tax work and $683,074 from bank and corporation tax work. The personal income tax recovery by the preliminary examination unit was $6.43 per dollar of cost and the bank and corporation tax recovery was $10.10 per dollar of cost.

The audit program includes both desk and field audit of returns, the type of audit work depending upon the needs of the particular situation. During 1960-61 personal income tax auditing produced $3.82 in net assessments for each dollar of cost, while bank and corporation tax auditing produced $14.32 for each dollar of cost.

The board is proposing a pilot operation which will add 6 high level clerical positions for drawer audit work to release auditors for higher level work. The addition of 2 clerical positions in primary audits will provide for verification of fully paid short form personal income tax returns. Arithmetic errors in favor of the taxpayer are 23 times more prevalent than those in favor of the State. In 1960 a net of $401,000 was obtained immediately through primary audits which otherwise would have been delayed indefinitely and which would have remained to be detected by higher priced auditor positions.

Total net revenue from the audit program for 1960-61 was $24,691,001 of which $6,836,388 was from personal income tax auditing and $17,854,613 from bank and corporation tax auditing.

The personal income tax compliance program is carried out by the unit processing information-at-source returns (Form 599) and by the regional offices. The programs involve the comparison of reports of income payments with state filings. Where

---

[a] The 5 man-year decrease in the budget year represents a staff reduction programmed in the 1961-62 Budget.

[b] The increase in temporary help in 1961-62 represents approximately 18 man-years to meet staffing requirements incident to installation of electronic data processing.

FRANCHISE TAX BOARD—Continued

OPERATIONS DIVISION—Continued

Program and Performance—Continued

returns are not found, appropriate action is taken to obtain returns or issue assessments. The same procedure is followed in respect to the federal comparison project. These programs produced net assessments of $5,444,183 during 1960-61 or $2.94 in assessments per dollar of cost.

The bank and corporation tax compliance program produced $605,321 during the year, recovering $47.04 for each dollar of cost.

Three positions are added in collections for workload in the field of corporation suspensions and related collection activities, and 1 position in claims for the processing of corporation balance refunds to replace an auditor for a higher level assignment. In addition, a total of 7.6 man-years of temporary help is proposed for the headquarters office to keep pace with workload increases. The workload is based primarily on the number of returns received and number of information-at-source reports and federal comparison project information documents received.

As previously reported the State is pursuing a joint venture with the Internal Revenue Service of the U.S. Treasury Department. In the spring of 1959, it was found that the Western Service Center at Ogden, Utah, was maintaining punched card records which would permit the board to identify all persons filing federal returns in California and to ascertain the name, address, marital status, adjusted gross income, deductions, and exemptions for all taxpayers with adjusted gross income of less than $10,000 and name and address for all others. Information on returns with adjusted gross income in excess of $10,000 is obtained through other media. Permission was obtained from the Commissioner of Internal Revenue to acquire cards on all federal filings in California where a California filing requirement was indicated. At the present time, the Federal Government is changing the media used in data processing from punched cards to electronic tape. In order to continue to utilize the federal source of information, the State must also convert from cards to tape. This program need will add 4 programmer positions and some associated expenses.

Additional staffing is proposed in the budget year for the regional offices in Los Angeles and San Francisco. The inventory of collections workload in Los Angeles has increased by more than 50 percent over the past 3 years and this trend in workload will probably continue. The addition of 12 tax representatives will provide staff to cope with the increase workload trend. Auditor personnel who have been forced into compliance activity due to workload demands are to be replaced for work at a higher classification by the addition of 8 clerical positions. The increase in regular clerical workload is the basis for adding 1 clerical position. In San Francisco the workload situation is similar but of less volume than that in Los Angeles and requires 5 additional tax representatives and 4 additional clerical positions.

GENERAL ANALYSIS

Objectives

The State Treasurer is charged with the responsibility for the custody of all money and securities belonging to or held in trust by the State; investment of surplus General Fund moneys, and other designated surplus funds together with funds of the state and public agencies deposited in court under condemnation proceedings; administration of the sale of state bonds, their redemption, and interest payments; and pays warrants drawn by the State Controller and state agencies.

Program and Performance

The Pooled Money Investment Program is administered by the State Treasurer under the broad policies set out by the Pooled Money Investment Board. Members of the board are the State Treasurer as chairman, the State Controller, and the Director of Finance.

Earnings on the various resources of the Pooled Money Investment Program for the fiscal year 1960-61 were $28,139,000.

---

[a] Composed of savings in salaries and wages, $142,680; operating expenses, $14,772; equipment, $6,341; and increased reimbursements, $16.

[b] Expenditures from bond funds are not included in overall budget totals.

STATE TREASURER—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS—Continued

Program and Performance—Continued

Redemption of warrants and checks issued by the State Controller and state agencies is estimated to increase from 4,161,664 items in 1960-61 to 4,435,000 items in 1961-62 and 4,718,000 items in the 1962-63 fiscal year.

The treasury vault staff is engaged in the trust activity of safeguarding those securities owned by the State, those deposited by banks to secure bank deposits, and those deposited as other pledges. Approximately $3,841,000,000 in securities were held for safekeeping during the 1960-61 fiscal year. This amount will increase to an estimated $4,091,000,000 in 1961-62 and $4,371,000,000 in the 1962-63 fiscal year.

Bond and coupon redemption is increasing to the point where additional staff is essential. The 4,036,638 bonds and coupons redeemed in 1960-61 is expected to increase to 4,839,608 in 1961-62 and 5,817,236 in 1962-63. This increase in work volume is further complicated by the bond section assuming some of the routine workload formerly performed by the fiscal agent.

The addition of 4.2 man-years of temporary help will provide for increased general clerical workload including the accounting, and bond and coupon servicing functions. A reclassification of an existing position to Assistant Deputy State Treasurer is proposed to afford a higher degree of continuity to the management structure. This position is contemplated as an executive level civil service position. It will be financed within existing resources, and will be accomplished by a realignment of functions and responsibilities within the existing staff.

GENERAL ANALYSIS

Objectives

The California Highway Patrol is charged with the responsibility of providing adequate patrol of the highways at all times of the day and night for the prevention of accidents, control of traffic, and all laws regulating the operation of vehicles and the use of the highways.

Program and Performance

The department is headquartered in Sacramento and has 1 or more field offices in all but 3 of the State's 58 counties. Traffic in the 3 counties where no office is maintained is patrolled by resident officers. A fleet of approximately 1,650 mobile units operate in excess of 60,000,000 miles annually for patrol, enforcement of weight, height, length, brakes, lights of commercial vehicles, school bus inspection, school crossing guard supervision, removal of abandoned vehicles, supervision, service, administration, and training.

The Field Operations Division is responsible for attaining the objectives of the department and is supported by the Administration, Technical Services, and Training Divisions, all operating within policy established by the commissioner.

The Administration Division discharges the business affairs of the department; prepares the departmental budget; conducts studies to develop cost data; administers the personnel program; provides general file, messenger, and reproducing services; leases real property and co-ordinates capital outlay and maintenance projects; prepares specifications for and develops prototype mobile equipment; records data relative to mobile equipment operations; tests accessories and tires used on mobile equipment; maintains an inventory of all equipment; supplies all materials used from a central stores system; and supervises radio and wire communications.

The Technical Services Division determines the distribution of budgeted uniformed strength; co-ordinates disaster planning with the disaster office; prepares statistical data; develops and distributes radio and television programs, traffic safety information, and news releases; controls permits for emergency equipment; issues light and brake station licenses; tests accessories for compliance with state law; issues orders and bulletins, a analyzes new techniques.

A total of 140 new positions are proposed for the 1962- fiscal year as follows: In the Division of Field Operations 1 state traffic officers, 10 state traffic sergeants, and 2 state tra lieutenants are needed to maintain a constant level of serv in the face of increasing population and registrations in t State. In addition, 6 dispatcher-clerks and 2 telephone operat are provided to augment the staff of the central dispatch off in Los Angeles. An additional 7 dispatchers are included meet workload problems in other areas of the State. These po tions are predicated on a rising volume of transmissions throug out the State. Six platform scales operators are proposed f this division; 5 will be used for the new scale location Galivan and 1 at the existing facility at Livermore. The assig ment at Livermore will free a state traffic officer for ro enforcement duty.

In the Division of Technical Services, 5 key punch operat are proposed for the preparation of punched cards which cor late accident and enforcement information for the developme of statistical data which is important to the department determining enforcement policy and programs. One addition auto equipment testing aid is included to assist in the testi of automobile safety and sound devices. This position will fr a traffic officer for enforcement work. One intermediate steno rapher position is included on a workload basis.

A special item of $1,058,857 is proposed to provide a 5 perc salary increase for uniformed personnel of the Patrol eff tive July 1, 1962. This is in addition to the general sala adjustment proposed for all state employees.

The department's equipment request for the Division of Fie Operations includes $186,650 for microwave radio equipme Of this amount, $112,800 is for the replacement of control r peater facilities by means of 10 microwave links and/or mul plex VHF control channels. This is necessary since the prese control repeater facilities are proving technically impractic $42,250 is requested to expand the VHF mobile radio syste and the balance for the control of VHF base stations at ea of the 6 area commands of the Los Angeles Basin.

GENERAL ANALYSIS

Objectives

It is the objective of this department to promote and develop the welfare of the wage earners of the State, improve their working conditions, and advance their opportunities for profitable employment.

Program and Performance

The department through its 8 line divisions, negotiates with parties in disputes when a work stoppage is threatened; adjudicates claims under the Workmen's Compensation Law; establishes, enforces, and promotes standards of safety for all phases of industrial activity; enforces labor laws and issues and enforces orders relating to men, women, and minors; promotes opportunities for apprentices; enforces laws relating to housing; and promotes fair employment practices. The Divisions of Administration and Labor Statistics and Research support the line divisions.

Total employment increased 2.2 percent during 1960 over 1959. Total disabling injuries decreased from 164,243 in 1959 to 158,663 in 1960, a decrease in the work injury rate of 3.5 percent or 31.8 per 1,000 workers.

The Industrial Accident Commission estimates a 10 perce workload increase during the budget year.

The Industrial Welfare Commission has reopened 13 wa orders to increase the minimum wages for women and mino welfare and labor law complaints continue to increase, a the Division of Housing program has been expanded by Cha ters 1309 (Labor Camp Registration), 1844 (State Housi Law) and 2176 (Mobilehomes and Mobilehome Parks Act Statutes of 1961.

The 1962-63 Budget provides for the following increases personnel:

	Positio
1. Conciliation services	3.1
2. Industrial accident teams and legal staff	52
3. Industrial safety inspections	5
4. Industrial Welfare Commission wage order program	3.5
5. Welfare and labor law complaint and enforcement programs	13
6. Fair employment practices	2
7. Expanded housing program	12
Total	90.6

DIVISION OF ADMINISTRATION

Objectives

To carry out the administration's policy and provide effective economical administration of the laws affecting this department.

Program and Performance

This division performs policy making, accounting, budgeting, personnel, procurement, housing, and duplicating functions of the department.

Provision is made for increases in rent at locations whe renewal of existing leases must be negotiated at higher rates additional personnel in field offices necessitates additional spa

Provision is also made for increased charges due to the tel phone system change in the San Francisco State Building.

DIVISION OF CONCILIATION

Objectives

To promote sound union-management relationships.

Program and Performance

The Conciliation Service adjusts labor-management disputes through conciliation, mediation, and arbitration procedures; referees the conduct of representation elections; prevents critical disputes and work stoppages through investigation; aids in the solution of labor problems which threaten curtailment of production or services; and also administers arbitration, election, and grievance provisions of the Los Angeles Metropolitan Transit Authority Act and the Alameda-Contra Costa Transit District.

One administrative assistant position and 1 intermediate stenographer position are included to assist the supervisor in administrative duties, compiling statistical data, budget justification and additional clerical workload. A 0.3 hearing officer position, a 0.3 senior attorney position, and 0.5 position in temporary help are included to administer the arbitration, election and grievance provisions of the Los Angeles Metropolitan Transit Authority Act and the Alameda-Contra Costa Transit District.

DIVISION OF INDUSTRIAL ACCIDENTS

Objectives

To obtain for the injured workman and his dependents, with the least possible delay, all the benefits they are entitled to by law.

Program and Performance

The Industrial Accident Commission in its judicial function is a court of limited jurisdiction to adjust litigated cases arising under the workmen's compensation laws. A staff of 74 referees assists the commission in deciding cases brought before it. Original decisions are made by the referees, except for a few special types of cases. If a party is dissatisfied with the referee's decision, he may then petition the commission or one of its panels for a reconsideration, or the commission itself, on its own motion, may grant a reconsideration. Following are the anticipated number of cases to be filed, disposed of, and pending:

Fiscal Year	Filings	Dispositions Number of Referees	Rate of Disposition	Number Disposed	Cases Pending
Actual:					
1958-59	49,436	52	800		
		10	650		
		5	450	50,458	8,827
1959-60	53,028	62	780		
		5	650	51,610	10,393
1960-61	62,019	67	870		
		3	600	60,026	12,121

		4	600	64,800	15,541
1962-63	75,042 [a]	70	900		
		4	700		
		10	600	71,800	18,793

[a] Projected at 10 percent.

DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

DIVISION OF INDUSTRIAL ACCIDENTS—Continued

Program and Performance—Continued

The rate of production per referee unit is expected to continue to improve because of the pretrial method of handling selected cases and the decentralization of personnel and workload, resulting in reduced travel time for referees and hearing reporters.

Because of the anticipated increase in filings and substantial existing pending caseload and backlog, 10 additional referee units (4 positions each) plus ancillary help by 2 additional raters, 2 medical consultants, and 4 clerical positions are included. In addition, 2 associate counsels and 2 junior counsels have been included to assist the panels, legal bureau, and information function in performing legal work (other than referee). No additions have been made to the legal staff of the commission for several years despite substantial increases in caseload and referee units.

DIVISION OF INDUSTRIAL SAFETY

Objectives

The primary purpose of this division is to reduce work injuries in employment and places of employment.

Program and Performance

The division has jurisdiction over all employments—except for household domestics, federal employees, operating employees of interstate railroads, and seamen—and it covers some 400,000 places of employment in such industries as agriculture, construction, mineral extraction, manufacturing, trades, services, transportation, and utilities. The division promulgates, after public hearings, standards of safety for all employments and conducts educational programs, including the preparation and distribution of educational materials. Additional safety orders for the control of ionizing radiation, and new safety orders for noise control are now in process.

Legislation passed in 1961 required this division to accelerate its program in radiation safety. Ten safety engineers have since received additional specialized training, enabling the division to provide surveillance service in industry in the fields of ionizing radiation, ordnance, chemical warfare, rockets, and missiles, without additional technical personnel. This is modern safety engineering, an invaluable asset in making certain that rapidly changing industries in California will be kept safe.

After several years of gradual reductions, the work injury rate in California increased from 32 per 1,000 in 1958 to 33.7 in 1959. However, in 1960 total disabling injuries decreased from 164,243 to 158,663, a decrease in work injury rate of 3.5 percent or 31.8 per 1,000 workers.

Employment during 1960 was up 2.2 percent over the previous year. During the first 6 months of 1961, injuries were down 0.7 percent or a total of 77,859 as compared with 78,403 for the same period in 1960. Employment during the first 6 months of 1961 increased 0.7 percent over 1960.

For the 1962-63 fiscal year, 3 safety engineers and 1 clerk are included for the industrial activities which result from the initiation of the state water program, including contractors, subcontractors, supporting manufacturing, and related services activities.

The position of special representative, Industrial Safety Board, exempt, was added in April 1961 under authority of Article 24, Subsection 4(a)(5) of the State Constitution.

DIVISION OF INDUSTRIAL WELFARE

Objectives

Administration and enforcement of the minimum wage and labor standards for women and minors employed in private industry.

Program and Performance

Jurisdiction of the Division of Industrial Welfare extends to the administration and enforcement of all laws and regulations for women and minors which control their minimum wage, maximum hours, and standard conditions of labor as prescribed by the Labor Code and the administrative regulations adopted by the Industrial Welfare Commission. Two new Industrial Welfare Commission Orders for agricultural occupations became effective August 28, 1961. All employments of women and minors are now covered by wage orders with the exception of domestic service. Thirty-eight thousand commercial farm employers are now included in the division's workload plus an unknown number of other farm employers.

The division is directed by statute to supervise the payment of unpaid minimum wages and unpaid overtime pay for all women and minors in addition to the individual complainant wherever a violation is found. The hours regulations require payment of premium rates for overtime based on the regular rate of pay. In addition to enforcing the many provisions which regulate all working conditions, the division must license and regulate industrial homework; license and regulate the employment of handicapped women and minors at special wage rates; issue special exemptions from the Industrial Welfare Commission regulations and enforce the equal pay law for women.

During the 1960-61 fiscal year, the division adjusted 10,196 complaints whereas 10,683 complaints were registered. Thus, another 487 complaints were added to the growing backlog which totaled 6,534 complaints at the close of the 1960-61 fiscal year. $205,285 was collected, representing minimum wage under payments and penalty overtime pay. One hundred thirteen homework licenses were issued to employers and 868 permits to individual homeworkers. Two thousand seventy-seven special minimum wage permits and 128 exemption permits were processed and issued.

For 1962-63, the division proposes to continue these services at the current complaint workload level of service by the addition of 2 industrial welfare agents and 3 intermediate stenographers.

Review of the "Budget for a Self-Supporting Working Woman" which was adopted by the Industrial Welfare Commission on October 16, 1961 resulted in the commission reopening all of its orders except Order 14-61 during the 1961-62 fiscal year. As directed by Labor Code Section 1178, the commission has appointed wage board members for all occupations and industries to make recommendations to the commission which, after the public hearings as required by law, will fix a minimum wage which is adequate to supply the necessary costs of proper living for women and minors, as well as the hours and working conditions consistent with their health and welfare. One technical assistant and 1.6 positions for clerical assistance were added during the current year to handle the increased workload resulting from reopening these Industrial Welfare orders. The 1962-63 fiscal year costs to complete this project are estimated at $84,690 (an average of $6,508 per order) and for which 3.5 positions are included.

DIVISION OF LABOR LAW ENFORCEMENT

Objectives

To protect the rights of the general public and those employees whose interests fall within the provisions of the California Labor Code.

Program and Performance

This division has the overall responsibility for administering and enforcing all labor laws that are not specifically delegated to any other authority. The major part of the work of the division deals with the enforcement of wage payment laws, the collection of unpaid wages; laws requiring contribution by employers to health and welfare funds; the payment of prevailing wage rates and overtime on public works projects; the compulsory workmen's compensation insurance law; and the bonding of employers in certain industries and laws restricting the hours of work in certain occupations. A substantial part of the division's activity is related to the licensing and regulation of private employment agencies, labor contractors, and artists' managers; of farm labor contractors and of unloaders of farm produce in urban centers.

The recovery of workers' wages reached a new high in California during the last fiscal year amounting to $2,835,415. In this connection, the Federal Director of the Bureau of Labor Standards cited the wage collections of the Division of Labor Law Enforcement as being more in the State of California in the 1959-60 fiscal year than for all other states. Los Angeles alone accounts for more collections than the entire state of New York.

The work of the division over the past several years has grown much more complex and personnel activity more time consuming. This fact is attributable to the introduction of new legislation and the refined patterns of employer-employee relations. Attorneys, specialists in personnel management, and labor relations experts frequently attend hearings of the division which indicates a trend in government and labor-management relations that will likely expand and continue. There are more and more claims from white-collared workers, who seldom bring to the division simple problems. A large number of claims are for "fringe benefits," such as vacation pay, severance pay, and health and welfare claims. A great many claims involve payment of commissions and bonuses. Such cases are more complicated than those dealing with disputes over hourly and daily wages, and they involve more subtle issues. These changes in the composition of the work forces and in the character of industrial relations have been reflected in the workload of the deputy labor commissioners.

The workload is rising at an accelerated rate with the continuing population growth of California, aggravated by economic shifts. The area where there has been a drop in employment brings greater activity to the division because of the increased difficulties of meeting payrolls, while those areas in which the economy burgeons bring the problems inherent in change and growth. Projecting the workload conservatively, the division anticipates an average increase of 8 percent for the next 2 fiscal years.

On this basis, the caseload anticipated by the division is estimated at 50,220 for the 1961-62 fiscal year and 54,238 for 1962-63. To meet the anticipated increase in caseload, 8 new positions including 3 deputy labor commissioners and 5 clerical positions have been included for 1962-63.

DIVISION OF APPRENTICESHIP STANDARDS

Objectives

Promotion and development of apprenticeship and other on-the-job training under provisions of the Shelley-Maloney Apprentice Labor Standards Act of 1939 as amended by Chapter 1892, Statutes of 1961.

Program and Performance

The division provides consultative services to employers and employees in the development and maintenance of apprenticeship programs, advising and assisting management and labor in drawing up written apprenticeship standards, and agreements for approval under the regulations of the California Apprenticeship Council.

Under the provisions of Chapter 1892, Statutes of 1961, now Section 3093 of the Labor Code, the division upon request may provide like services to labor and management in the development of voluntary on-the-job training programs for (1) journeymen, and (2) trainees in nonapprenticeable occupations who may be entering the labor market for the first time or who may be displaced by automation or other technological changes.

Since both apprenticeship and other on-the-job training programs in California are voluntary on the part of employers and employees and their organizations, it is the division's function and responsibility to assist these groups in promoting and developing programs to meet the needs of growing industries for skilled craftsmen and to expand on-the-job training opportunities for the increasing number of youth seeking careers in the skilled trades and in industry.

DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

DIVISION OF HOUSING

Objectives

Protection of the health and safety of occupants and the public through administration and enforcement of state housing laws and related administrative regulations.

Program and Performance

In addition to its enforcement responsibilities, the division furnishes consultative assistance to local officials, architects, builders, and interested groups in the enactment and enforcement of adequate building codes in the investigation of substandard housing conditions, and organization of local housing rehabilitation and urban renewal programs.

The 1962-63 program provides for:

Continued emphasis on inspection and reinspection coverage of approximately 8,000 labor camps of record, and establishment of an effective camp registration program.

Pursuant to 1961 legislative enactments which provide for; adequate fees from operators to cover related program costs, comprehensive construction supervision and annual inspections of mobilehome parks and construction supervision and minimum maintenance inspection of auto courts, resorts, and motels.

Enforcement of state building and housing standards applicable to apartment houses, hotels, and dwellings, and construction supervision under provisions of the Earthquake Protection Law, where no local enforcement agency is established. Construction fees to cover related program costs are provided. There will also be increased efforts toward adoption and enforcement of city and county building and housing code and mobilehome park ordinances.

Additional effort will be directed toward enforcement of plumbing, electrical, and heating standards and issuance of insignia of approval, applicable to all trailer coaches sold in California manufactured after September 1, 1958, in accordance with Section 18370, Health and Safety Code. Costs of this program are reimbursed by fees charged manufacturers and sales agencies for services.

Inasmuch as there has been a decline in reimbursements received from inspection of trailer coach construction, 1 position formerly assigned to this activity has been reassigned to assist in handling the increased workload resulting from Chapters 1844 (State Housing Law) and 2176 (Mobilehomes and Mobilehome Parks Act), Statutes of 1961. In addition, 7 district representatives, 1 area supervisor, and 3 clerical positions, were added during the current year to handle the increased workload resulting from these 1961 legislative enactments. One additional intermediate stenographer position was added during the current year to handle the increased workload resulting from Chapter 1309, Statutes of 1961, which provides for the registration of all labor camps by the division prior to January 31 of each year. Registration is also required prior to the construction, establishment, or occupancy of any new or additional camp. During the 1961-62 fiscal year, 1.5 man-years of temporary help were expended under a grant of funds from the Rosenberg Foundation for a survey of agricultural labor family housing.

[c] Includes 1.5 positions temporarily approved in 1961-62 for a survey of agricultural labor family housing under a grant of funds from the Rosenberg Foundation.

DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

DIVISION OF LABOR STATISTICS AND RESEARCH

Objectives

The Division of Labor Statistics and Research has legal responsibility for compiling labor statistics for the State and administrative statistics for the department.

Program and Performance

The division compiles and publishes monthly statistics of employment, earnings, and hours, by industry, for California and 9 major metropolitan areas, and, in co-operation with the Department of Employment, prepares monthly estimates of civilian employment and unemployment in the State. Employment, earnings, and hours statistics for nonagricultural industries are collected under a co-operative program with the United States Department of Labor, Bureau of Labor Statistics. The division compiles statistics of work injuries to provide information for use in accident prevention work—to make known how, where, and why accidents occur. It makes studies and investigations in the field of industrial relations; also studies of wages and hours in industries employing women for minimum wage determination. In connection with the legal responsibility of the Department of Industrial Relations to monitor the payment of prevailing wages on public works, the division has responsibility for maintaining a file of current wage rates for all building trades occupations in all counties in the State. Administrative statistics are compiled regularly for the department.

Increases in the population and labor force of California have substantially increased the workload of the division. Furthermore, as the volume of work of the department increases, the workload of this division increases in connection with the compiling of their administrative statistics and the performing of operating services. Much of this additional load has been carried on through greater utilization of punched card and tabulating machine techniques.

DIVISION OF FAIR EMPLOYMENT PRACTICES

Objectives

To protect, safeguard, and promote the right and opportunity of all persons to seek, obtain, hold, and advance in employment without abridgment on account of race, religious creed, color, national origin, or ancestry.

Program and Performance

The Fair Employment Practices Commission, established in September 1959, consists of 5 members appointed by the Governor for 4-year terms. The commission's program includes education, conciliation, and enforcement activities. The commission formulates broad policy and program, sits as a hearing panel for cases of alleged job discrimination which are not settled through conference and conciliation, issues orders, and directs enforcement when necessary. The commission is generally charged with responsibility for studying problems of discrimination, fostering good will and co-operation among the State's various ethnic, religious, and other population groups, and seeking through educational means to minimize discrimination because of color, creed, or ancestry.

Two additional stenographers are requested in order to provide adequate service to staff now authorized. One stenographer is necessary to handle the work of the special representative to the commission, the administrative assistant to the division, and the 2 additional San Francisco consultants authorized in the 1961-62 Budget. The second stenographer is required to assist 2 additional Los Angeles consultants authorized in the 1961-62 Budget, and to aid in meeting the stenographic needs of the commission chairman.

GENERAL ANALYSIS

Objectives

The principal function of the State Fire Marshal is fire prevention and protection.

Program and Performance

The Fire Marshal's program includes fire prevention engineering, advisory, and plan-checking services to the Departments of Corrections, Public Health, Mental Hygiene, Public Works, Social Welfare, and Youth Authority. Working drawings are checked for all public and private institutional occupancies, including jails and all public schools in California. It is the general policy of the Fire Marshal to administer laws and regulations on a consultative basis rather than by direct enforcement.

The field inspection program covers all schools, public and private, fairs and other places of public assembly, all institutional occupancies, organized summer camps, all state institutions, and dry cleaning establishments.

Law enforcement activities include: fireworks, transportation and storage of explosives, treatment and use of flammable decorations, flammable wearing apparel, and a bulletin listing service of building construction materials and equipment distributed on a subscription basis. In addition, during the 1961 Session of the Legislature, 2 new programs were added: Chapter 1275, Statutes of 1961, which provides for the regulation of transportation of flammable liquids; and Chapter 1207, Statutes of 1961, which provides for the regulation of the sale and servicing of fire extinguishers. Both of these new laws contain provisions to make them self-supporting, regulatory programs. The Fire Marshal also operates a laboratory to test various materials in order to set fire safety standards.

A co-ordinated program for administering state fire safety laws, rules and regulations has been established between the office of the State Fire Marshal and local city, county, and district fire officials. This co-ordinated program was made possible by the creation of the State Fire Advisory Board in 1945. The State Fire Marshal, with the assistance of this board, develops fire safety standards and administers and enforces these standards. Through the board, it has been possible to develop uniform statewide standards of fire safety and provide for their administration and enforcement without creating overlapping authority and duplication of effort, and at the same time preserve local autonomy.

For the 1962-63 fiscal year, 1 additional accounting technician position is included based on the increased workload and complexity of accounts in the accounting section.

The dry cleaners' establishment inspection program, supported out of the Dry Cleaners' Fund, is reduced slightly in both 1961-62 and 1962-63 to reflect diminishing balances in that fund. Additional revenues must be secured in the fund if the inspection program is to continue at the present level. The Fire Marshal has determined the budgeted program to be the minimum required for the health and safety of the dry cleaners' employees and the public.

GENERAL ANALYSIS

Objectives

The Department of Justice, under the direction of the Attorney General, is the senior law office of the State to interpret laws, render opinions, and represent the State in civil and criminal proceedings. To assist in law enforcement, the department maintains a fingerprint file for identification purposes, compiles statistics pertaining to crime, assists peace officers in civil and criminal investigations, and participates in direct enforcement in use, possession, and sale of narcotics.

Program and Performance

Under the direction of the Attorney General, the Department of Justice provides legal advice and assistance to the various state departments, boards, and commissions. The department passes on the constitutionality of each law passed by the Legislature for the final consideration of the Governor, and represents the State on all criminal matters before the Appellate and Supreme Courts. Another important function is the identification of criminals through current fingerprint and criminal record files and by related technical aid and assistance to local agencies. Closely allied with this service is the coordination of requests from local enforcement agencies, and assistance in the locating of deserting parents.

The State Narcotics Act is enforced through offices located in Fresno, Los Angeles, Sacramento, San Diego, and San Francisco. Agents operating from these offices investigate known and suspected persons for illegal possession, use, and sale of narcotics. Prosecution of violators is accomplished through the district attorney in each county.

The 1962-63 Budget provides for the following increases in personnel:

	Positions
1. Division of Administration	7
2. Division of Civil Law	5
3. Division of Criminal Law and Enforcement:	
Bureau of Criminal Statistics	5
Bureau of Criminal Identification and Investigation	56
Bureau of Narcotic Enforcement	1
Total	74

DIVISION OF GENERAL ADMINISTRATION

Objectives

This division carries out the administrative responsibilities of the Attorney General, maintains the general services necessary to the operating divisions of the department and operates the State Teletype System.

Program and Performance

Through the Accounting Office, the Division of General Administration maintains fiscal control and internal management, budget preparation, purchasing, and mail messenger and duplicating services. The State Teletype System is a communication service primarily for police offices with secondary use by government agencies. Departmental control centers are located in Sacramento, Los Angeles, and San Francisco.

A total of 7 additional positions is included for 1962-63. Two stenographers are included to provide clerical assistance for the 3 additional attorneys included elsewhere in the budget. A bookkeeping machine operator is included to post expenditures and adjustments in the budget office. An intermediate typist-clerk is included in Los Angeles to handle the main reception area to the attorney general's office. One clerical position is included in the Los Angeles, San Francisco, and Sacramento offices to provide necessary clerical assistance in filing, mail pickup and delivery, and messenger service.

DIVISION OF CIVIL LAW

Objectives

This division is responsible for handling the civil and administrative legal problems of state departments, boards, and commissions.

Program and Performance

Attorneys operating out of San Francisco, Los Angeles, and Sacramento represent the State of California in federal and state courts at all levels and represent officers, boards, and commissions before administrative tribunals. Legal opinions, either formal, informal, or oral are rendered as required by law, not only to state officers, boards, and agencies, but also to Members of the Legislature, district attorneys, and county counsels. In addition, other legal services normally performed by a firm of private attorneys for its clients are furnished, including the

---

[a] Includes 1 position temporarily approved during 1961-62 to handle increased workload required by contract with the Contractors License Board and 2 positions transferred from Investment Frauds and Business Crimes Unit to more properly reflect function.

DEPARTMENT OF JUSTICE—Continued

DIVISION OF CIVIL LAW—Continued

Program and Performance—Continued

drawing of legal documents, consultation, and the rendering of advice on legal matters.

A total of 5 new positions are added in 1962-63 including 3 additional deputy attorney general positions to provide legal services by contract to the Contractors' License Board, and 2 deputy attorney general positions to handle increased workload in connection with the state water program including work on the Colorado River litigation should this case be continued.

The Colorado River Litigation Section has handled legal action in the suit, *Arizona* v. *California* before the United States Supreme Court since the initial step in the long legal process was taken by the State of Arizona in August, 1952. The report of the special master appointed by the supreme court to adjudicate the dispute has been filed and its recommendations to that body are unfavorable to the State of California. Funds are included for only 9 months of the 1961-62 budget year because the final decision in this suit is expected early in 1962.

DIVISION OF CRIMINAL LAW AND ENFORCEMENT

Objectives

This division insures criminal justice in California through periodic meetings with local law enforcement agencies. Prosecution is assumed when local enforcement is negated.

Program and Performance

The legal staff of this division represents the State on all criminal proceedings when appealed from trial courts, prepares documents for extradition of fugitives, and processes forfeiture of vehicles for violation of State Narcotics Act. The compilation of crime statistics is a responsibility of this division. This is accomplished by the Bureau of Criminal Statistics located in Sacramento which maintains detailed statistics of all crimes committed in California, records of turnover rate of prisoners, juvenile delinquency figures, and a reporting system for narcotic violations.

This division functions as a clearing house for information concerning criminals and as a source of technical aid and assistance in the investigation of crime and the apprehension of criminals. Fingerprint files are maintained on a 24-hour basis to provide maximum service to local police jurisdictions. A laboratory and a staff of qualified technicians including specialists in the operation of the polygraph provide assistance to local agencies and other state agencies when requested.

Special training is given local law enforcement personnel in the aspects of narcotic enforcement. Specially trained inspectors, operating under cover, contact known informers and purchase evidence or information leading to the arrest of narcotic users and suppliers. Pharmacist inspectors insure the legitimate use of drugs by professional people.

A total of 62 additional positions are included for 1962-63 as follows:

In the Bureau of Criminal Statistics, 2 clerical positions formerly financed under the provisions of Chapter 2129, Statutes of 1959, are included on a permanent basis for the narcotic addict registration program, 2 clerical positions are included in the Juvenile Probation Unit to handle increased workload, and 1 tabulating machine operator is provided to handle increased data processing workload.

In the Bureau of Criminal Identification and Investigation, 5 fingerprint examiners and 1 clerical position are included for increased workload in the Fingerprint Section, 27 clerical positions are included for increased processing workload in the Record Section; and 5 modus operandi analysts, 1 tabulating machine operator, and 16 clerical positions are included for increased crime report and registration workload in the Special Services Section. One stenographer is included for the increased clerical workload in the Los Angeles office of the Investigation Section.

In the Bureau of Narcotic Enforcement, 1 clerical position is included in the Los Angeles office to monitor the new radio communication system base station. Funds have also been provided to set up a training program for narcotic agents.

GENERAL ANALYSIS

Objectives

The Commission on Peace Officers' Standards and Training is charged with the responsibility of raising and maintaining the level of competence of local law enforcement officers.

Program and Performance

This commission was established in the 1959-60 fiscal year in accordance with the provisions of Chapter 1823, Statutes of 1959. The commission is composed of 9 members appointed by the Governor for 3-year terms. Five are either sheriffs or chiefs of police or peace officers nominated by their respective sheriffs or chiefs of police, 2 are elected officers or chief administrative officers of cities in this State, 2 are elected officers or chief administrative officers of counties of this State, and the Attorney General, who serves as an ex officio member of the commission.

This commission adopts rules establishing minimum standards relating to physical, mental, and moral fitness, which govern the recruitment of any city or county police officers for any city or county which receives state aid for training of peace officers through the provisions of Chapter 1823, Statutes of 1959. It also establishes rules governing the training of police officers with the same conditions prevailing. There are 429 jurisdictions in California eligible to participate in this program. In 1958 before the inception of this program, 72 jurisdictions were up to the standards presently established by the commission. During the 1961-62 fiscal year 204 jurisdictions serving 12,968,167 people will qualify for assistance. Continued effort will be made to bring the remaining 225 jurisdictions, serving 2,764,561 people, into the program during the 1962-63 fiscal year.

DEPARTMENT OF MENTAL HYGIENE

SUMMARY OF EXPENDITURES

The 1962-63 fiscal year budget is presented in 2 parts, 1 of which provides for on-going operations at the existing level of servic and the other which provides for expanded, improved, or new programs. Part II programs are not included within the various budgets

FACILITY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	CHANGE FROM 1961-62	
EXPENDITURES FOR SUPPORT					
PART I—CONTINUING OPERATIONS					
Departmental Administration:					
State funds	$4,755,433	$5,330,244	$5,648,307	$318,063	6.0%
Federal funds [a]	302,623	334,755	338,560	3,805	1.1%
Outpatient Clinics:					
State funds	716,929	806,524	824,153	17,629	2.2%
Federal funds [a]	124,872	138,745	141,452	2,707	2.0%
Day care treatment centers	118,414	317,769	518,079	200,310	63.0%
Langley Porter Neuropsychiatric Institute	2,016,851	2,121,102	2,178,382	57,280	2.7%
Neuropsychiatric Institute at University of California, Los Angeles	1,168,045	3,362,232	4,102,359	740,127	22.0%
Subtotal	$9,203,167	$12,411,371	$13,751,292	$1,339,921	10.8%
Agnews State Hospital	$10,055,638	$10,619,528	$10,886,048	$266,520	2.5%

PART I—CONTINUING OPERATIONS

Objectives

The objectives of the Department of Mental Hygiene are to care for, treat and rehabilitate mentally ill, mentally retarded, and emotionally maladjusted patients so that they may return to society as productive citizens, and to prevent mental illness through an active program to foster mental health.

Program and Performance

The present Department of Mental Hygiene was established as a separate entity in 1945, and since then has developed a diversified program of care and treatment, research and training, and mental health education. The program that today provides treatment specifically designed for the clinic patient, the mentally retarded patient, and the mentally ill patient is one that has been a gradual development in which the old custodial concept has been abandoned.

Two institutes are operated by the department in conjunction with the University of California as teaching and research centers for both the university and the department and provide care and treatment for patients with early curable types of mental disorders. To carry out such a program, they care for and treat a limited number of inpatients and operate a large outpatient program as part of the teaching and research programs.

In the hospitals for the mentally retarded, the program is based on the knowledge that mental retardation alone does not produce a socially unacceptable person, and that many of the mentally handicapped can be integrated into society. With treatment and habit and character training in this controlled environment, the patient develops to the fullest his intellectual capacities, and many are capable of returning to their homes and communities as self-supporting, or partially self-supporting citizens.

The treatment programs in the hospitals for the mentally ill show a marked emphasis on active therapy, bringing more treatment to more patients. In modern treatment units, newly admitted acutely ill patients are provided the intensive treatment most effective during the onset of mental illness. Increasingly, active therapy has reached all wards.

Juvenile units at Camarillo and Napa State Hospitals provide the special type of care needed by children suffering from mental disease or severe behavior disorders. They also operate as facilities for observation and treatment requested by the State's juvenile courts or Youth Authority.

Special treatment and facilities for tuberculous patients are provided at Patton State Hospital for Southern California, and Napa State Hospital for Northern California.

Alcoholics and drug addicts are provided special treatment throughout the hospitals for the mentally ill. Great care is taken to correctly diagnose both these types of patients since their difficulty is frequently symptomatic of some more deep-seated disorder.

Special treatment for the rehabilitation of sexual psychopaths is provided at Atascadero State Hospital. Persons diagnosed as criminally insane are committed to this maximum security hospital. Some of the patients at Atascadero State Hospital are committed for observation by the courts.

The department's new continuous research program has developed rapidly. Thus far, state appropriations have amounted to $3,411,000 and these have been supplemented by more than $2,800,000 in federal funds granted by the National Institute of Mental Health. The state allocation for research, recognized as part of the "efficient start" originally recommended to the Legislature, is being divided equally between hospital level and project support phases to insure a comprehensive program that includes both applied and basic research. A research team at each of the hospitals is the ultimate goal with 8 teams having been formed thus far. All hospital research teams carry out their own research projects in the hospital and assist other staff members with their investigations. The balance of the funds are used to support research investigations undertaken by departmental, hospital, and clinic staff personnel.

The beneficial results of the department's public information program continued to be apparent in growing public interest in the field of mental health. The educational program uses almost every communication medium: newspapers, television, speakers, films, public meetings and forums, exhibits, pamphlets, magazine articles, publications, and reports. The section also acts in an advisory capacity to community groups when requested.

One of the most important recent developments to the mental health program is the establishing of 21 programs of community mental health services under the provisions of the Short-Doyle Act. Under the act, cities and counties can set up local programs with practical assistance from the State that includes reimbursement on a matching basis for local money expended. Ultimately, these local mental health services are expected to prevent large numbers of citizens from ever having to leave their home communities because of mental illness or handicap.

The financial soundness of these philosophies and programs was illustrated when the number of mentally ill patients treated and released increased to a point of balance with admissions. The end of fiscal 1957 saw the first small but significant drop in patient population in the hospitals for the mentally ill. This occurred despite the increasing rate of general population in the State, and increasing admissions to the hospitals. This same balance between admissions and releases has been estimated to continue in the 1961-62 and 1962-63 fiscal years. The admissions and release factors are a measure of the total performance of the department and are set forth in tabular form as follows:

The all-out modern attack on mental illness is made on 4 basic fronts—treatment, training, research, and prevention. By far the greater part of past increases in the department budget, that is, increases other than those necessary just to keep up with state population growth, have of necessity gone into improving the treatment program, essentially by providing additional numbers of physicians, therapists, social workers, nurses, technicians and psychologists, food personnel, and others. In the 1958-59 fiscal year, the financial position of the State indicated that available moneys could be more wisely expended on the other 3 methods of attacking the problem—research, training, and community development of mental hygiene resources. These 3 areas were again emphasized in the 1959-60, 1960-61, and 1961-62 Budgets. The 1962-63 Budget proposes to continue the emphasis in these areas and provides for the expansion in post hospital and hospital services. The main emphasis is in the expansion of post hospital services by expanding the family care home program and providing 2 additional after-care facilities. Increased hospital services are proposed through increases in medical supplies and special drugs. These proposals are discussed in detail in the following section of the budget.

PART II—PROGRAM AUGMENTATIONS AND COSTS

The supplemental program of the Department of Mental Hygiene for 1962-63 continue the emphasis which has been placed on post-hospital services and residency training programs. In addition, it is proposed to increase services to hospitalized patients through increased medical supplies and tranquilizing drugs.

To expand post-hospital services, the department is programming 2 additional after-care facilities to provide relatively intensive psychiatric care and treatment to convalescent leave patients who live within commuting distance to such facilities. An increase in the family home care program will provide for the placement of additional numbers of patients in this program. These programs will allow for the release of patients who would otherwise have to remain in hospitals, and will prevent the readmission of many patients who otherwise have to return to the hospital because of the severity of their illness.

The training program will continue the development of both the psychiatric residency training program and the career residency program which was initiated last year. The latter program provides a residency program for certain selected staff physicians who have indicated a desire to make a career of state medicine and who demonstrate the ability and potential for psychiatric specialization. This year sees the introduction of a scholarship and internship program which provides an important addition designed to aid recruitment and training in the areas of social work, clinical psychology, and physical therapy. Under this program, selected advanced students in the above professional areas will be given an opportunity to increase their skills in the field of mental health through scholarship and internship support.

A more effective program of maintaining the health of hospital patients can be provided through an increase in drugs and hospital supplies. This increase is required by the demands on hospitals for more numerous and often more expensive procedures due to increasing admissions and a resident population that is continually growing older. An increase in the use of tranquilizing drugs is indicated as new developments have made the drugs serve a wider variety of uses than before. With these new uses, patients may be treated now who previously would not have been considered for such medication.

In addition to the above, administrative strengthening in the area of juvenile treatment is proposed by the addition of staff to the central office.

Special Services for Mentally Retarded

There are at present approximately 2,000 patients on the waiting list for admission to a state hospital for the retarded. This list represents a need for assistance by retarded individuals and their families with a critical problem. Expanded efforts must be made for these retarded individuals and their families to prevent increased stress and disorganizing effects on families unable to cope with additional problems. As a result of the waiting problem, continuing pressure is directed toward the addition of more and more hospital beds.

Several promising, less expensive and more therapeutic alternatives to increasing bed capacity in order to reduce the waiting list have been developed and tried in the past few years. These include the use of private medical facilities, family care home placements, enriched educational programs, increased use of community services, and extension of the Short-Doyle program to the retarded.

It is proposed to expand the family care program in 1962-63, and also to improve hospital services by increasing hospitals' allotments for drugs and hospital supplies, tranquilizing drugs, feeding supplies, rehabilitation therapy supplies, and by the addition of psychiatric technicians.

The supplemental program for the department is consolidated in the following 5 categories:

I Administrative Strengthening	$22,608
II Training	194,186
III Post-hospital Services	380,338
IV Hospital Services	325,000
V Special Services for Mentally Retarded	394,360
Total	$1,316,492
Estimated salary savings	*—25,500*
State Employees' Retirement	30,716
State Employees' Health and Welfare	4,740
Total Expenditures	$1,326,448

I. ADMINISTRATIVE STRENGTHENING

	Number Positions	*Total*
Chief of children's services	1	$16,056
Senior stenographer	1	4,512
Intermediate clerk [b]	(1)	(4,194)
Operating expense	–	1,200
Equipment	–	840
Totals	2	$22,608

DETAIL OF PROPOSED PROGRAM

1	Chief of children's services	$16,056
1	Senior stenographer	4,512

A chief of children's services and clerical assistant are proposed for the Sacramento office to provide necessary services in the specialized field of children and youth. This position will serve to integrate and co-ordinate all services for children and adolescents including inpatient, outpatient, day hospital, after care, and research activities. The position will also be responsible for a continual analysis of these services, including those for the mentally retarded, and will insure collaboration of the department's activities relating to this age group with the programs of other state and local agencies concerned with children and youth problems.

1	Intermediate typist-clerk	$4,194

Federal funds are granted each year to support a part of the information program of the Department of Mental Hygiene. This program includes the maintenance of a film library, compilation and distribution of informational literature, and to provide staff services. To carry on this program, a staff of 1 information officer and 2 clerks are required. This proposal is to increase the clerical staff from 1 to 2 positions.

II. TRAINING

	Number Positions	*Total*
Psychiatric residents	12	$8,520
Career residents	9	108,000
Scholarships and internships	2	74,516
Training center for community psychiatry [b]	(3)	(67,500)
Equipment	–	3,150
Totals	23	$194,186

DETAIL OF PROPOSED PROGRAM

17	Psychiatric resident II (effective June 1, 1963)	$12,070	
—5	Psychiatric resident II (effective June 1, 1963)	—3,550	
12	Totals		$8,520

These 12 positions are proposed to provide required staff expansions which are consistent with the normal development of the psychiatric resident programs as presently authorized at the hospitals. The establishment of the positions is proposed effective June 1, 1963, since it is necessary to make resident appointment commitments nearly a year in advance. Included are 5 positions for Agnews, 3 each for Camarillo and Mendocino, and 6 for Patton. Five existing positions, 3 at Atascadero and 2 at Porterville, are to be discontinued in 1963-64 pending accreditation of these hospitals.

9	Career psychiatric resident	$108,000

Nine career psychiatric resident positions were authorized in 1961-62 to initiate a program of training physicians who are now working in state hospitals but have had no previous training in psychiatry. The program is required because of the acute shortage of trained psychiatrists. Since the residency training program requires 3 years, an additional 9 positions will be needed in both 1962-63 and 1963-64 for the normal development of the program. It is proposed to place 1 position

---

[a] Gross salaries and wages = $452,120 (79 pos.); salary savings —$25,500 (—4.1 pos.).

[b] Federal grants and expenditures therefrom are not included in overall budget totals.

DEPARTMENT OF MENTAL HYGIENE—Continued

II. TRAINING—Continued

DETAIL OF PROPOSED PROGRAM—Continued

			Total
	each at Agnews, Camarillo, Mendocino, Metropolitan, Napa, Patton, Stockton, Pacific, and Sonoma State Hospitals		
	Scholarships and Internships:		
2	Supervising psychiatric social worker I (social work internship program)	$14,016	
(10)	Social work scholarships	35,000	
(6)	Psychology scholarships	21,000	
(3)	Physical therapy scholarships	4,500	
2	Totals		$74,516

These positions and funds are proposed to provide an important addition to the program for the recruitment of social work, clinical psychology, and physical therapy staff. Due to the difficulty in recruiting full staffs in each of these professions, high vacancies have persisted for a number of years reducing the effectiveness of planned and authorized treatment programs. By establishing the recruitment technique of scholarship and intern programs, it is anticipated that recruitment will be improved thereby contributing to a more effective treatment program.

	Training Center for Community Psychiatry:		
1	Director of center	$20,488	
1	Assistant director	13,860	
1	Senior stenographer	5,229	
3	Totals, Salaries and Wages	$39,577	
	Training consultant (30)	13,200	
	Operating expenses	9,500	
	Equipment	500	
	Retirement	4,723	
	Total		$67,500

This program, which is fully financed from federal funds, was temporarily authorized in 1960-61 and 1961-62 to provide clinicians with knowledge of community psychiatry. This need has arisen as a result of the rapid expansion of community mental health programs in this State. The expansion places demands not only on specialists in the field of psychiatry but on other physicians and practitioners which would be helped by their having knowledge of community resources and techniques in community psychiatry. The program has been designed to meet these needs and is now proceeding to do so at a very satisfactory rate.

III. POST-HOSPITAL SERVICES

	Number Positions	*Total*
Mental hygiene clinic	4	$38,014
After-care facilities (2 units)	16	143,646
Additional family care home placement	–	138,000
Additional family care leave allowances	–	5,400
Psychiatric social workers and related expenses for additional family care placements	4	24,034
Increased special drugs for leave patients	–	31,244
Totals	24	$380,338

DETAIL OF PROPOSED PROGRAM

	Mental Hygiene Clinics:		
1	Staff psychiatrist	$13,200	
2	Senior psychiatric social worker	12,720	
1	Intermediate stenographer	4,194	
4	Total, Salaries and Wages	$30,114	
	Operating expenses	5,900	
	Equipment	2,000	
	Total		$38,014

This team is proposed for addition to the staff of the Chico State Mental Hygiene Clinic to provide an emergency psychiatric intervention service available on a 24-hour basis. The area served by the Chico clinic includes 435,000 people and has no other public psychiatric services. The clinic has been turned to for this service but because of staff limitations has not been able to respond to emergency situations.

	After-care Facilities:		
2	Senior psychiatrist	$28,800	
4	Staff psychiatrist	52,800	
2	Clinical psychologist II	15,456	
2	Senior psychiatric social worker	12,720	
6	Intermediate typist-clerk	25,164	
16	Total, Salaries and Wages	$134,940	
	Operating expense	$2,000	
	Equipment	6,706	
	Total		$143

The above 16 positions and related expense are proposed to provide for the establishment of 2 additional after-care facilities to be located at DeWitt and Napa State Hospitals. As an adjunct to the regular hospital treatment program, a substantial number of patients can be placed in the after-care program. They would then be able to receive the necessary psychiatric, medical, and other types of treatment during the day and return home at night. Such programs permit the utilization of existing bed space and facilities by patients who are in need of more intensive care and treatment rather than by those who can benefit from treatment at an after-care facility.

This request will bring the total number of after-care facilities to 10 hospitals. Present facilities are located at Agnews, Camarillo, Mendocino, Metropolitan, Modesto, Patton, Stockton, and Pacific State Hospitals.

Additional family care home placements \$138,

Family care of patients in private homes has become a major means for rehabilitating mental patients in the state hospitals by returning them to the community. Additional facilities for such placements are available on a planned basis from year to year. Based on realistic limits of expansion, it is estimated that 200 additional mentally ill patients can be placed in this program by June 30, 1963. This represents an average increase of 100 fully financed cases over the estimated 1961-62 year-end number of 2,020. To finance this increase it is necessary to augment the funds available by $138,000 which is based on an average of 100 cases financed for the full year at a rate of $115 per month.

Additional family care leave allowances \$5,

Increased family care placements, as proposed above, will require an increase in funds to provide leave allowances. This request is based on standard allowances for the estimated increase in mentally ill family care cases.

	Additional social workers and related expenses for expanded family care services		
3	Senior psychiatric social worker (2 effective July 1, 1962, and 1 January 1, 1963)	$15,900	
1	Intermediate stenographer	4,194	
4	Total, Salaries and Wages	$20,094	
	Operating expense	2,400	
	Equipment	1,540	
	Total		$24,

Increased placements in family care homes is a necessary measure to help offset anticipated increases in admissions. These homes are developed and maintained through planned professional assistance. The above positions are proposed to provide this service and are requested in accordance with established ratios. Operating expenses and equipment are based on standard rates.

Increase in special tranquilizing drugs \$31,

This proposal is to increase from 1/16th to 1/9th the number of mentally ill convalescent leave patients under treatment with special tranquilizing drugs. With new developments, these

DEPARTMENT OF MENTAL HYGIENE—Continued

III. POST-HOSPITAL SERVICES—Continued

DETAIL OF PROPOSED PROGRAM—Continued

drugs are now serving a wider variety of uses than before. With these new uses, it is possible to treat patients with these drugs who previously would not have been considered for such medication.

IV. HOSPITAL SERVICES

Increase in medical and hospital supplies	$181,000
Increase in special (tranquilizing) drugs	109,000
Elementary teachers (5)	35,000
Total	$325,000

DETAIL OF PROPOSED PROGRAM

Increase in medical and hospital supplies $181,000

This proposal is to increase the present allotment for the mentally ill from the present $20 per patient per year to $25 per year. The supplies include pharmaceuticals, hospital and surgical supplies, blood and plasma, laboratory supplies, X-ray film and supplies, dental supplies, supplies for the chiropodist, testing materials for psychologists, and supplies for electroencephalograph and electrocardiograph functions.

Increase in special (tranquilizing) drugs $109,000

At present it is possible to provide treatment with special tranquilizing drugs for 25 percent of the mentally ill resident population. The proposed increase is to extend this treatment to an additional 5 percent of the resident population. With new developments, these drugs are now serving a wider variety of uses than before. With these new uses it is possible to treat patients with these drugs who previously would not have been considered for such medication.

5 Elementary teacher $35,000

This proposal provides for 5 elementary teaching positions to be acquired on a contract basis. On August 1, 1961, there were 75 juveniles under the age of 17 in state hospitals for the mentally ill and who were without the benefit of a formal education program. The deprivation of education of such juveniles contributes further to their emotional problems making it essential to provide as near "normal" activities for them as possible. The contract procedure allows greater flexibility in providing educational programs for these juveniles than does the employment of teachers by the department.

Two positions are proposed for Metropolitan and 3 for Patton State Hospitals.

V. SPECIAL SERVICES FOR MENTALLY RETARDED

	Number positions	*Total*
A. Inpatient services		
Increase in medical and hospital supplies		$56,325
Increase in special (tranquilizing) drugs		34,000
Increase in miscellaneous feeding supplies		23,656
Increase in rehabilitation supplies		8,275
Psychiatric technician	22	76,032
B. Outpatient services		
Increase in special (tranquilizing) drugs		5,256
Additional family care home placements		138,000
Additional family care leave allowances		5,400
Psychiatric social workers and related expenses for additional family care placements	8	47,416
Totals	30	$394,360

DETAIL OF PROPOSED PROGRAM

A. IN-PATIENT SERVICES

Increase in medical and hospital supplies $56,325

This proposal is to increase the present allotment for the mentally retarded from the present $25 per patient per year to $30 per year. The supplies include pharmaceuticals, hospital and surgical supplies, blood and plasma, laboratory supplies, X-ray film and supplies, dental supplies, supplies for the chiropodist, testing materials for psychologists, and supplies for electroencephalograph and electrocardiograph functions.

Increase in special (tranquilizing) drugs $34,000

At present it is possible to provide treatment with special tranquilizing drugs for 25 percent of the mentally retarded resident population. The proposed increase is to extend this treatment to an additional 5 percent of the resident population. With new developments, these drugs are now serving a wider variety of uses than before. With these new uses it is possible to treat patients with these drugs who previously would not have been considered for such medication.

Increase in miscellaneous feeding supplies $23,656

It is proposed to increase the allotment for miscellaneous feeding supplies for the mentally retarded from $5.40 per patient per year to $7.50 per year. This is necessary to provide for the supply and replacement of items incidental to the daily preparation and service of food.

Increase in rehabilitation supplies $8,275

A 60-cent per capita per year increase in the allotment for rehabilitation supplies is proposed to provide additional basic supplies to the present level of rehabilitation activities.

22 Psychiatric technician $76,032

These positions are proposed to meet workload changes as a result of reorganization and reclassification of wards to reflect transfers of patients who are progressing and benefit from increased treatment standards.

The 22 positions will be assigned as follows: 12 at Fairview, 3 at Pacific, and 7 at Porterville State Hospitals.

B. OUT-PATIENT SERVICES

Increase in special tranquilizing drugs $5,256

This proposal is to increase from 1/16th to 1/9th the number of mentally retarded convalescent leave patients under treatment with special tranquilizing drugs. With new developments, these drugs are now serving a wider variety of uses than before. With these new uses it is possible to treat patients with these drugs who previously would not have been considered for such medication.

Additional family care home placements $138,000

A substantial percentage of the population presently in mentally retarded hospitals could benefit from care in family care homes. Such placements would serve to free hospital beds for patients whose only treatment resource is hospitalization thereby reducing the waiting list and waiting period for families in dire need. Experience has shown that patients in family care homes show improved physical and mental development and are often able to attend school and/or work. Based on realistic limits of expansion during the year, it is estimated that 200 additional patients could be placed in this program by the end of 1962-63. This would be an average of 100 patients at $1,380 each per year for a total cost of $138,000.

Additional family care leave allowances $5,400

Increased placements created by the proposed increase in the family care home program will increase the funds required for incidental personal allowances. This request is based on standard allowances for an estimated 200 year end placements or an average of 100 patients.

Psychiatric social workers and related expenses for additional family care placements:

1	Supervising psychiatric social worker	$7,008	
5	Senior psychiatric social worker (3 effective July 1, 1962 and 2 effective January 1, 1963)	$24,440	
2	Intermediate stenographer	8,388	
8	Total, Salaries and Wages	$39,836	
	Operating expense	4,500	
	Equipment	3,080	
	Total		$47,416

These positions are required to develop and maintain the additional family care homes to provide for the anticipated increase in patient placements. The social worker positions are requested on the previously established ratio of 1 worker per 40 year-end placements. The supervising and clerical positions are requested in the established ratios while operating expenses and equipment are based on standard ratios.

ADMINISTRATION

GENERAL ANALYSIS

The Department of Mental Hygiene is organized in three primary functions: Administration, Bureau of Patients Accounts, and Bureau of Social Services.

Departmental Administration of the Department of Mental Hygiene performs the primary functions of policy formulation, co-ordination, and direction of the overall activities of the department including its hospitals, clinics, and other facilities. Services are provided in the following areas: research, community mental health activities, public information, business and fiscal management, co-ordination of the nursing and rehabilitation service programs, personnel management and training, food administration, statistics, engineering, guardianships, deportation and institution transfers, and inspection and licensing of private institutions. Also, the department is responsible for the administration of National Mental Health Act funds for California, and the outpatient clinic program.

Further expansion of community services authorized by the Short-Doyle Act is programed in 1962-63. It is estimated that 31 local jurisdictions will qualify for aid as compared to 21 in 1961-62 and 18 in 1960-61. The department reimburses the participating jurisdictions for 50 percent of the cost of their approved program. Research projects at the various hospitals have been approved and this program is explained in detail under the budget request for research funds. The entire departmental cost of the specialized training program is provided for in this budget.

BUREAU OF PATIENTS ACCOUNTS

GENERAL ANALYSIS

The Bureau of Patients Accounts assesses and collects charges for the care and treatment of the mentally ill patients within the ability of the patients or their responsible relatives to pay. In addition, reviews are made for the purpose of determining possible benefits to which patients are entitled. The effectiveness of the bureau's program is indicated in the foll ing table of annual collections for patients' care and treatme

BUREAU OF SOCIAL SERVICE

GENERAL ANALYSIS

The Bureau of Social Service conducts preleave investigations, arranges placements to permit hospital leaves for mentally ill and mentally retarded patients, and assists in re-establishing patients as responsible members of the community. Determining and arranging for employment opportunities and living accommodations, developing the most healthful family relationship and frequent patient contacts to effect a firm and lasting adjus ment are all important elements of the overall leave progra of the department. In this regard, the department arranges hom leaves, industrial leaves, and family care home leaves.

GENERAL ANALYSIS

Objectives

The day treatment centers provide a program of day psychiatric treatment to patients who return to their homes each night and who otherwise would require 24 hour hospitalization.

Program and Performance

The day treatment program was initiated with the establishment of a center in San Diego in December 1960. Two additional centers were provided in the 1961-62 Budget and are planned for establishment at Los Angeles and San Francisco early in 1962. These centers are designed to provide rapid and intensive treatment similar to that given by 24 hour institutions but with the added therapeutic benefit of not removing patients from the community environment.

On November 30, 1961, at the end of 12 months of operation, the San Diego Center had admitted 180 patients. Of these, 94 had been discharged leaving a total caseload of 86 on that date. The average daily attendance in November 1961 was 51.5 compared with 8.7 for December 1960 and 36 for the entire year. Following is the average daily attendance for each mon during this first year of operation:

December 1960	8.7	June 1961	3
January 1961	16.8	July 1961	3
February 1961	25.5	August 1961	4
March 1961	36.5	September 1961	4
April 1961	41.9	October 1961	4
May 1961	45.9	November 1961	5

It is estimated that by June 30, 1962 admissions and d charges will have equalized at 20 to 25 per month. This appea to be a maximum based on an average daily attendance capaci of 60 patients. The total caseload, however, should be fro 100 to 125 patients.

No performance estimates have been made for the 2 ad tional centers, which are to be established in 1962. This is due the limited experience with this new program. It is expecte however, that the performance of these centers will parall that of the San Diego Center.

GENERAL ANALYSIS

Objectives

The outpatient mental hygiene clinics provide for the prevention, early diagnosis and treatment of mental illness, retardation or disorder, and are established to assist persons not requiring hospitalization.

Program and Performance

The programs provided by the 6 state-supported clinics and the 1 federally supported clinic at Berkeley operate in metropolitan and rural areas. The Department of Mental Hygiene acts as administrator of National Mental Health Act funds for California and is responsible for allocation of such funds to other agencies as well as setting and maintaining required levels of service. In addition to the general services, the Berkeley Clinic conducts a training program for social workers, psychologists, and psychiatrists.

The total performance of the clinics is indicated by the following schedule which shows the number of hours spent by professional employees in interviews with patients (on either an individual or a group basis) and in preventive services to communities. The hours spent by patients in individual and group therapy are also shown. Of the professional time allocated to all services, 87.8 percent was directed toward treatment of clinic outpatients and 12.2 percent toward preventive work in the community in the 1960-61 fiscal year. It is estimated that the percentages will be 86 percent and 14 percent respectively for both the 1961-62 and the 1962-63 fiscal years.

The chief factors responsible for the variation in cost per service hour from clinic to clinic are: (1) the duration of normally occurring vacancies (e.g., in areas remote from metropolitan centers, recruiting is more difficult); (2) the proportion between children and adults in the caseload of patients (e.g., a child's case takes 2 to 3 times more staff time than does an adult case); (3) the ratio between group psychotherapy and individual psychotherapy offered in a given clinic (e.g., 10 hours of professional staff time may produce 100 patient-hours in group therapy but only 10 patient-hours in individual treatment interviews); and (4) other extraneous factors.

---

[a] Unscheduled appropriation.

[b] Federal grants and expenditures therefrom are not included in the overall budget totals.

GENERAL ANALYSIS

Objectives

The Langley Porter Neuropsychiatric Institute is a teaching and research center for the University of California and the Department of Mental Hygiene and provides care and treatment for patients appropriate to the overall teaching and research program.

Program and Performance

The statistics presented in the following summary are indicative of the performance of this institute as reflected by inpatient and outpatient caseloads.

Caseload:	1960-61	1961-62	1962-63	Change
Hospital inpatient days	30,836	34,400	34,400	–
Outpatient annual interviews [b]	22,496	22,500	22,500	–
Allocation of Costs: [c]				
Inpatient department	$1,512,638	$1,590,826	$1,633,786	$42,960
Outpatient department	504,213	530,276	544,596	14,320

Average Cost Per Patient:	1960-61	1961-62	1962-63	Change
Inpatient (daily)	$49.05	$46.24	$47.49	$1.25 (2.7%)
Outpatient (per interview)	22.41	23.57	24.20	$0.63 (2.7%)

The current program of the institute includes training programs for psychiatric residents, medical students, psychology fellows, social work students, occupational therapy students, graduate and undergraduate student nurses, state hospital physicians, and fellows in psychiatry. Clinical and basic research projects of various kinds are under way. The facilities include an outpatient department, a 104-bed inpatient service, plus 13 day/night program beds which accommodate 26 patients.

An expanded training program in community mental health services has been undertaken as an ongoing activity. In addition an increased number of medical school students will receive training in psychiatry.

GENERAL ANALYSIS

Objectives

The Neuropsychiatric Institute at the University of California, Los Angeles, is a teaching and research center, and provides care and treatment for patients with early curable types of mental disorders as a part of the overall teaching and research programs of the University and the Department of Mental Hygiene.

Program and Performance

The Neuropsychiatric Institute was built as a part of the Medical School of UCLA and was opened on December 1, 1960.

In 1957-58 the institute was authorized to assume full support of an expanded outpatient clinic program to meet the teaching needs of the University of California medical school. With the opening of the new institute in December 1960, the program was expanded to include training for psychiatric residents, medical students, psychology fellows, social work students, occupational therapy students, graduate and undergraduate student nurses, state hospital physicians, and fellows in psychiatry. Also included in the program are clinical and basic research projects, a day hospital program, a somatotherapy room, and a 188-bed inpatient service.

The statistics presented in the following summary are indicative of the performance of this institute as reflected by inpatient and outpatient caseloads.

	1960-61	1961-62	1962-63	Change
Caseload:				
Hospital inpatient days	6,732	43,800	64,200	20,400
Outpatient annual interviews [c]	16,492	28,500	28,500	–
Allocation of Costs: [b]				
Inpatient department	$700,827	$2,521,674	$3,076,769	$555,095
Outpatient department	$467,218	$840,558	$1,025,590	$185,032
Average Cost Per Patient:				
Inpatient (daily)	$104.10	$57.57	$47.92	—$9.65 (—16.7%)
Outpatient (per interview)	$28.33	$29.49	$35.99	$6.50 (22%)

---

[a] Composed of savings in salaries and wages, $22,136; operating expenses, $26,290; equipment, $1,984; and decrease in reimbursements, $16,657.

[b] Costs have been allocated between inpatient and outpatient departments on an estimated basis subject to further analysis after a full year of operation.

[c] Represents total numbers of interviews by professional staff.

GENERAL ANALYSIS

Objectives

Agnews State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics without mental retardation, and primarily serves the Counties of Santa Clara, San Mateo, Santa Cruz, San Francisco, Alameda, San Benito, and Monterey.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. An after-care facility is operated by this hospital which provides psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1958-59	1959-60	1960-61
Total admissions	3,873	3,980	4,354
Total net releases	3,777	3,912	4,559
Net transfers from other hospitals	—14	7	117

GENERAL ANALYSIS

Objectives

Atascadero State Hospital provides care and treatment for sex psychopaths, and for mentally ill male patients requiring maximum security. This hospital serves all counties of the State.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department. While the facilities are designed for maximum security, the program emphasis is on treatment.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1958-59	1959-60	1960-61
Total admissions	1,612	1,577	1,722
Total net releases	1,384	1,568	1,597
Net transfers from other hospitals	—67	159	10

---

[a] Composed of savings in salaries and wages, $7,826; operating expenses, $119,330; equipment, $789; and decrease in reimbursements, $729.

[b] Composed of savings in operating expenses.

GENERAL ANALYSIS

Objectives

Camarillo State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, epileptics without mental retardation, and minors and juvenile court observation cases committed under Section 740.5 of the Penal Code. It serves primarily the Counties of Los Angeles, Ventura, Santa Barbara, and San Luis Obispo.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. A juvenile unit is located on the hospital grounds where a specialized treatment program is conducted for minors. An after-care facility is operated by the hospital, which extends psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1958-59	1959-60	1960-61
Total admissions	3,719	3,974	4,103
Total net releases	3,860	4,031	4,178
Net transfers from other hospitals	—61	—153	6

---

[a] Composed of savings in salaries and wages, $15,677; operating expenses, $40,244; equipment, $333; and increase in reimbursements, $3,457.

Personnel man-years	848.7	878.9	877.2	—1.7

GENERAL ANALYSIS

Objectives

DeWitt State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and a limited number of mentally retarded patients. It serves primarily the Counties of El Dorado, Yolo, Sutter, Yuba, Placer, Nevada, Sierra, Butte, and Plumas.

Program and Performance

It is planned that the average population at this institution will consist of 1,900 mentally ill and 600 mentally retarded patients during the 1962-63 fiscal year. The level of care and treatment techniques utilized at this hospital are comparable to those employed at other state hospitals caring for the mentally ill and/or mentally retarded, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1958-59	1959-60	1960-61
Mentally Ill:			
Total admissions	950	946	1,287
Total net releases	938	1,047	1,307
Net transfers from other hospitals	28	—7	—424
Mentally Retarded:			
Total admissions	–	–	–
Total net releases	8	10	10
Net transfers from other hospitals	—41	1	79

GENERAL ANALYSIS

Objectives

Mendocino State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics without mental retardation and serves primarily the Counties of Marin, Sonoma, Mendocino, Humboldt, Del Norte, Siskiyou, Modoc, Trinity, Shasta, Lassen, Tehama, Glenn, Colusa, and Lake.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. An after-care facility is operated by this hospital which provides psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1958-59	1959-60	1960-61
Total admissions	1,104	1,236	1,848
Total net releases	1,162	1,247	1,953
Net transfers from other hospitals	15	—81	28

GENERAL ANALYSIS

Objectives

Modesto State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, epileptics, and for a limited number of mentally retarded patients. It serves primarily the Counties of Stanislaus, Tuolumne, Mono, Mariposa, Merced, Madera, Fresno, Kings, Tulare, and Kern.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at other state hospitals caring for the mentally ill and/or mentally retarded, and emphasizes treatment rather than custody. An after-care facility is operated by this hospital, which extends psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in the tabular form below:

	1958-59	1959-60	1960-61
Mentally Ill:			
Total admissions	624	683	758
Total net releases	792	824	871

GENERAL ANALYSIS

Objectives

Napa State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, epileptics without mental retardation, minors and juvenile court observation cases committed under Section 740.5 of the Penal Code and serves primarily the Counties of Marin, Solano, Contra Costa, San Francisco, Alameda, Sonoma, and Napa.

Program and Performance

The level of care and treatment techniques utilized at the hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department and emphasize treatment rather than custody. A large tuberculosis treatment unit is maintained and cares for all mentally ill patients in the northern part of the State suffering with this disease; a juvenile unit is located on the grounds where a specialized program is conducted; and a special program for the treatment of alcoholics is available.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1958-59	1959-60	1960-61
Total admissions	3,813	3,999	4,257
Total net releases	3,838	4,214	4,635

GENERAL ANALYSIS

Objectives

Patton State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics without mental retardation, and primarily services the Counties of Inyo, San Bernardino, Los Angeles, Riverside, San Diego, and Imperial.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. A large tuberculosis treatment unit is maintained and cares for all mentally ill patients in the southern part of the State afflicted with this disease. An after-care facility is operated by this hospital, which extends psychiatric, medical, and therapy treatment as necessary, allowing patients to return to their homes at night.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1958-59	1959-60	1960-61
Total admissions	2,905	2,896	2,845
Total net releases	2,811	2,975	3,066
Net transfers from other hospitals	—26	531	119

GENERAL ANALYSIS

Objectives

Fairview State Hospital serves the southern counties of the State by providing care and treatment for mentally retarded patients in that area.

Program and Performance

The level of care and treatment techniques utilized at this relatively new hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department, and emphasize treatment rather than custody.

This hospital was activated in the 1958-59 fiscal year, with the first patients being admitted during January 1959. Additional facilities, providing a total of 1,190 beds, were added during the 1959-60 fiscal year which increased the hospita rated capacity to 1,946 as of June 30, 1960. A total of 6 additional beds already funded will be activated during t 1963-64 fiscal year.

The total performance of the hospital is best measured by t number of admissions and net releases, which is set forth tabular form as follows. As this is a new institution, actu statistics are available for the 1958-59 and 1959-60 fiscal yea only.

	1958-59	1959-60	1960-
Total admissions	150	375	371
Total net releases	13	148	181
Net transfers from other hospitals	446	693	95

GENERAL ANALYSIS

Objectives

Pacific State Hospital provides care and treatment for mentally retarded patients principally from the southern counties of the State.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department and emphasize treatment rather than custody. An after-care facility is operated by this hospital which provides psychiatr medical, and therapy treatment as necessary, allowing patien to return to their homes at night.

The total performance of the hospital is best measured by t number of admissions and net releases which is set forth tabular form as follows:

	1958-59	1959-60	1960-
Total admissions	337	536	33
Total net releases	149	126	275
Net transfers from other hospitals	—214	—392	—72
